COMPARATIVE DATA OF THE TOP **1000 EXPORTERS** IN 2022

Mustafa GÜLTEPE

Chairman of Türkiye Exporters Assembly

EXPORT FAMILY IS TÜRKİYE'S SOURCE OF HONOR

The year 2022 was a Challenging year for both the global economy and developing countries. The global economic growth rate, which declined due to price increases, recession expectations, the Russian-Ukrainian war and interest rate hikes, caused a slowdown in global trade growth, as expected. The global trade volume, which grew by 26.4 percent in 2021, grew by 11.2 percent in 2022. Despite this, the performance of the Turkish economy in general and the achievements of our exporters left their mark on the previous year.

As the export family,

we increased our exports by 12.9 percent in 2022 compared to the previous year and reached 254.2 billion dollars.

I would like to underline that this rate is higher than the development rate of global trade. We recorded an increase in exports more than the growth rate of global trade in 8 of the last 10 years. Thus, our share in global exports, which was 0.86 percent in 2013, increased to 1.02 percent in 2022.

Last year, we did not leave a single spot in the world that did not meet with Turkish products. We added 21.501 companies to our export family. While we increased our exports to 162 countries, we reached the highest level in exports to 108 countries. We increased the number of countries to which we export over 1 billion dollars to 52. While 16 of our sectors broke export records, the exports of 23 of our sectors exceeded 1 billion dollars.

In order to further develop these achievements, we continued to run our international trade diplomacy activities uninterruptedly

In 2022, as TİM and exporters' associations, we organized 72 trade delegations in 43 countries and hosted participants from more than 100 countries with 38 buying missions in our country. We participated in 184 fairs in Türkiye and abroad. We achieved all these together, we made significant contributions to the Turkish economy.

Now, we have new medium and long-term goals ahead of us. We aim to set a road map for establishing more effective communication with our trade attachés in our target countries, accelerating the promotion of Turkish products through lobbying activities, launching "Made in Türkiye", monitoring compliance with UN Sustainable Development goals, increasing Türkiye's average export distance and product diversity, green transformation, establishing an overseas logistics support system, and developing the high value-added products and sectors in the medium term.

In the long term, there is the implementation of the "Turkish Marketplace Platform", the evaluation of new opportunities that may arise in the global supply chain, the establishment of the necessary infrastructure to make Türkiye one of the top 10 exporting countries in the world, and the determination of Türkive's 2053 export strategy.

The architect of Türkiye's success in exports and of course, the source of honor of our country is Türkiye's top 1000 exporters. Türkiye's top 1000 exporters of goods managed to export a total of 133.8 billion dollars in 2022. Thus, the share of our first 1000 exporters in total exports exceeded 52 percent. This ratio clearly shows the importance of our

When we look at the top 1000 companies in our list of exporters of goods and services, we reach a total export volume of approximately 162 billion dollars. There is an increase of 31.2 percent in the average export turnover of our top 1000 companies this year. Statistics show that our companies' branded exports, R&D and investment expenditures have increased. With the inclusion of the service sector in the research this year, a total of 185 companies, 53 of which were from the service sector, experienced the pride of taking place on the list for the first time. Of these 1000 companies, 448 are located in Istanbul, 76 in Izmir and 63 in Gaziantep. The average domestic sales amount of our companies is around 5.3 billion TL. On the other hand, our top 1000 exporting companies also make a significant contribution to employment. The average number of employees of 585 companies that shared their employment data was 857 while the average number of female employees was 197.

Strong export performance is extremely significant for the development of national welfare. As the Turkish Exporters Assembly, our vision is to make our country one of the top 10 exporting countries in the world. For this reason, we meticulously follow every issue that concerns exports and exporters, and evaluate every project that our exporters may benefit from.

Our research on the top 1000 exporters is of great importance in terms of keeping up with the current trends in our exports and strengthening our communication with our companies.

I believe that thanks to the export-oriented approaches of our companies, we will achieve all of our export targets. I sincerely congratulate the success of our exporters, who are Türkiye's source of honor and who will pave the way for our country to achieve these goals, and I wish their success to increase exponentially on the way to Türkiye, which is rising with exports.

top 1000 companies for our export family.

We use the replies to the questionnaires we send to our companies in our research and development projects. In this sense, I would like to thank all of our companies that participated in the research and filled out the questionnaires.

Last year, we did not leave a single location in the world that did not meet with Turkish products. We added 21.501 companies to our export family. While we increased our exports to 162 countries, we reached the highest level in exports to 108 countries. We increased the number of countries to which we export over 1 billion dollars to 52. While 16 of our sectors broke export records, the exports of 23 of our sectors exceeded 1 billion dollars.

Prof. Dr. Ömer BOLAT

Minister of Trade

WE WILL ACCELERATE OUR POLICIES THAT FOCUS ON HIGH ADDED VALUE AND **BRANDED EXPORTS**

Thankfully, we completed an election that we held with maturitv befitting our democracy. I would like to express my gratitude to our President, who has led us to the vision of the "The Century of Türkiye" by paving the way for our country in every field with his strong and determined leadership in this process and I pray to Allah that the election results and our new Cabinet will bring blessings to our country, our nation, and our business world.

I have been appointed as the Minister of Trade in the Second Cabinet of the Presidential Government System with the approval of our President. Now, by Allah's leave, "The Century of Türkiye" has begun, and the doors of a period in which our country will write new epics, as it did in the past, have been opened. Together with you, our esteemed exporters, we will work harder than ever before, and we will embrace each other and brocade the vision of The Century of Türkiye.

At a time when the world and our region are going through a painful period due to many social, economic, political, military, technological and environmental factors, our Ministry of Trade closely follows all these developments in the new period, as in the past, with its strong industry, strong infrastructure and export-based growth strategy, it prepares itself for the conditions of this new era. In this period, both our exports and production have made a successful progress compared to other countries, with the contribution of the steps taken from financing to digitalization, from new market strategies to trade diplomacy, and from consultation mechanisms with civil society to activities to expand exports to the base.

While our economy grew by 5.6% in 2022, our exports in-

creased by 12.9% and reached 254.2 billion dollars, exceeding the 250 billion dollars threshold for the first time. With the continuous increase in our exports, there is an increase in the number of export companies. While 33 thousand of our companies exported in 2002 in our country, this number exceeded 114 thousand in 2022. Our exporters make very important contributions to our economy both by increasing the quality of their products and by exporting to countries that have not been exported before.

On the other hand, our main goal and joint effort for our country is to establish an export structure that is more competitive, produces higher added-value and is based on R&D. The main role in the establishment of this structure undoubtedly belongs to our export companies. Therefore, understanding the changing structures and needs of our export companies is our most important requirement in the process of guiding our foreign trade policy.

At this point, the "Top 1000 Exporters of Türkiye" research prepared by Turkish Exporters Assembly, analyzes data in many fields such as export performances, capital structures, profitability ratios, investment and employment status, R&D and branding profiles of our 1000 companies that export the most and meets an important need to shed light on the work of all relevant stakeholders.

As Ministry of Trade, we adopt an understanding that sees export as the locomotive of our economy, prioritizes it, and acts with export in mind at every step. Because every export-oriented investment means an investment in the production, trade and employment of our country as a whole. In this respect, we

VOU.

We will accelerate our policies that focus on highly competitive, high value-added and branded exports. We will provide a competitive advantage in international markets within the framework of our vision of sustainable export growth, with our support that has a lean, understandable, innovative, flexible, and holistic structure.

In addition, as the Ministry, we will develop different support models for the needs of e-export actors in the digitalized world and make e-export easy, fast and reliable. Hopefully, we will implement the E-Easy Export Platform by reconfiguring the Easy Export Platform, which was previously implemented as a product of self-sacrificing work, for e-export.

We will continue to increase our country's international trade potential by working together to bring the distance closer in every step to be taken in exports as we used to do previously and we will continue to develop our strategies. Within the scope of market diversification and the development of our exports, we are effectively implementing our "Far Countries Strategy" and increasing commercial and economic cooperation with these countries.

In addition, we will implement a new strategy for the Gulf countries, which are members of the Organization of Islamic Cooperation, in the light of recent political developments, especially in countries such as Kuwait, Qatar, Saudi Arabia and the United States, which are net energy exporters and have a GDP of over \$40 billion in 2023.

In addition, we will start an effective working period by implementing a new strategy under the title of "Export Vision 2028" with TİM and Exporters' Associations, and creating target market-based foreign promotion and marketing plans for our 27 different sectors.

In summary, in Türkiye, which produces and grows export-oriented, despite all the negativities expected to be experienced in the global conjuncture in the upcoming period, we will increase the share of value-added, brand-conscious, hightech and environmentally friendly products in exports, reduce regional dependence on exports, and introduce new strategies to support product and market diversification, and strengthen our country's position in the global value chain by prioritizing exports.

Today, thanks to the outstanding success and efforts of our exporters, who work, produce and seize opportunities with perseverance and determination despite all obstacles, the "Türkiye" brand has become a symbol of trust with its brand value

stand by you in many stages, starting from the foundation and becoming a world brand, and we will continue to be there for

that has been increasing day by day all over the world. We not only establish commercial relations with each country to which our exporters deliver the Turkish brand but also strengthen our cultural ties and friendship; we develop our relations on the basis of mutual interests and gains. In this context, we are pleased to observe that our contribution to global peace, stability and prosperity increases as we expand our exports to wide geographies by providing market diversity.

We see all the positive developments that honor us as the fruit of the investments we have made since 2002 under the leadership of our President. We all carry this flag first to fulfill the promise we made to our nation and then to sustain our President's trust in us. In this relay race, we will always go further and carry Türkiye to a strong future together. We do our best, the rest is in the will of Allah.

Dear Export Family, our Ministry of Trade has played a key role in strengthening our country's economy and trade and increasing the welfare of our people in the past. Witnessing this fact, I fully believe that we will reach our target of 400 billion dollars for The Century of Türkiye 2028 by keeping our records, which we have added a new one every day, with the devoted efforts of our esteemed export family during this sacred duty I took over during the 67th Government of our Republic.

I am pleased to see that our Turkish Exporters Assembly is one of the important factors behind the strong performance of our exports, and I would like to take this opportunity to congratulate everyone who contributed to the Top 1000 Exporters of Türkiye research, which will help us achieve the targets of The Century of Türkiye.

As the Ministry of Trade, we will continue to increase our country's international trade potential by working together to bring the distance closer in every step to be taken in exports and we will continue to develop our strategies.

Yaşar GÜLER

Minister of National Defence

FOR A COUNTRY, PRODUCTION IS OF STRATEGIC AND VITAL IMPORTANCE AS SAFETY

While our country is struggling with geopolitical tensions affecting the whole world, pandemics, irregular migration and the uncertainties caused by these, it also faced major and destructive natural disasters that deeply affected us all, unfortunately.

Just as we, as the state and nation, have always managed to overcome all kinds of disasters and difficulties that we have been exposed to throughout history, we will overcome these troubled days by standing shoulder to shoulder.

While each institution of our state was trying to fulfill all its duties with great effort in order to heal the wounds rapidly and to get over this period in a short time, our industrialists and exporters likewise stood by our people, using all their means to return life to normal in our 12 provinces, which have a 10% share in our total exports and were affected by the earthquake.

In those harsh times, our business world and industrialists once again demonstrated their talents and the potential of our country by continuing to produce and export. It should not be forgotten that production is as vital and strategic as defense and security for a country. In line with our "National Technology Move", our business people and SMEs make significant contributions to our economy and industry by making investments, while at the same time producing many strategically important products needed by our heroic army, with domestic and national resources, it achieves very important successes.

Our heroic army continues to operate much more effectively and strongly for the safety of our country and our 85 million citizens, with the opportunities and capabilities provided by our domestic and national defense industry, which is developing day by day as a result of the unique efforts of our industrialists, on this path we set out with the goal of "Great and Strong Türkiye".

Ministry of National Defence will continue its breakthroughs in our domestic and national defense industry in order to maintain our deterrent power, strengthen the environment of peace and tranquility, and ensure sustainable welfare increase.

In addition to this, our Ministry will continue its efforts to increase the trade of our country in the field of de-

fense industry, as it has done so far, with the defense industry organizations it contains.

Under the leadership of President Erdoğan, our country will reinforce its respected and powerful position in the region and in the world with its young dynamic population, growing economy, effective-deterrent-respectable army in "The Century of Türkiye".

With its strong infrastructure, human resources, established commercial, social and cultural relations and great achievements in the national and international arena, Turkish Exporters Assembly also plays an important role in the sustainability of this position in our country.

We stand by all our entrepreneurs and companies who work, produce and export sincerely and with determination for our country and nation.

With the "Together we are much stronger!" belief, I congratulate our business people, industrialists and valuable members of the Turkish Exporters Assembly family, who working diligently so that our country and our noble nation can live a more prosperous life and wish them continued success, which we are proud of. Our Ministry will continue its efforts to increase the trade of our country in the field of defense industry, as it has done so far, with its defense industry organizations.

Mehmet Fatih KACIR

Minister of Industry and Technology

WE WILL ACCELERATE BRANDED EXPORTS WITH HIGH COMPETITIVE POWER AND ADDED-VALUE

With the vision of the National Technology Move for a Türkiye that aims to be among the leading economies of the world with its competitive power, we implement policies and support mechanisms that support exports. Under the leadership of President Erdoğan, we focused on high technology, innovation, digital and green transformation, entrepreneurship, human capital and infrastructure.

In "The Century of Türkiye", we aim to improve the investment environment and increase our exports in terms of quality and quantity, while realizing high value-added exports and reducing dependency on imports. In this direction, we have quickly implemented the necessary measures thanks to the right strategies and the dynamic structure of our economy and exporters, despite the external factors and shocks stemming from the crisis, pandemic and geopolitical developments. We have continued our investments without interruption, increased our employment and thanks to our bold exporters, we have broken the export record of our Republic's history.

We increased our exports, which we see as the locomotive of economic growth, from 36.1 billion dollars in 2002 to over 254 billion dollars in 2022. A portion of 162 billion dollars, which corresponds to approximately 64 percent of our exports, was realized by 1000 companies in 51 provinces.

In Türkiye, which produces and grows export-oriented, we have set it as a priority to increase our share in global exports by providing sustainable export growth. By closely monitoring the needs of our companies and global trends, we updated our existing supports and activated our new support mechanisms. We supported our companies in high technology and high-value-added sectors.

While around 33 thousand of our companies were exporting in 2002, we increased this number to 115 thousand in 2022. We gradually increased our 0.5 percent share in global goods exports in 2002 and increased it to 1.02 percent in 2022.

Within our vision of "The Century of Türkiye", which we launched to make our country a global power center, we aim to grow through a current account surplus on the basis of a green and digital transformation-oriented investment-employment-production-export chain with a total development approach. In this direction, we will preserve and go beyond the gains we have achieved in the last 20 years, and activate our development potential at the highest level, in a way that will mark the next period as the century of sustainable development in our history.

We will accelerate our policies that focus on highly competitive, high value-added and branded exports. We will increase the share of value-added and high-tech and environmentally friendly products in exports, strengthen our country's position in the global value chain, and support product and market diversification by reducing regional dependence on exports.

We will continue to encourage the creation of new exporters and the development of existing exporters' markets. We will continue to develop policies that will bring competitiveness to our companies and entrepreneurs on a global scale with new export incentives. In the upcoming period, we will direct our resources to productive areas with the programs we will develop in order to achieve our goal of high growth and improving the balance of payments. In this context, with a perspective focused on the target market and target sectors, we

In our vision of the Century of Türkiye, which we put forward for our country to become a global power center, we aim to grow through a current account surplus on the basis of a green and digital transformation-oriented investment employment-production-export chain with a total development approach.

will increase the added value in exports and the share we get from the global value chain.

As the Ministry of Industry and Technology, we will continue to work day and night for a highly competitive Türkiye by finding quick solutions to the structural problems faced by our exporters, and we will continue our goal of becoming one of the 10 largest economies in the world by working harder and producing.

I would like to take this opportunity to express my gratitude to all of our companies, especially our top 1000 exporters that contribute to our country's economy through exporting, doing their best to deliver a single order all over the world.

I would like to thank the valuable employees of Turkish Exporters Assembly, which is the flagship of our trade diplomacy, gathering our 115 thousand exporters in our country under the same roof, for their contributions, and I wish the "Top 1000 Exporters Research" will be beneficial for our country.

Within the vision of "The Century of Türkiye", we will continue to draw new routes in our exports, break new records, and make history.

The World is Not Enough

Our growth journey continues all around the world as a global brand in heavy-duty vehicle parts. SAMPA now has 24 offices and warehouses worldwide and exports high-quality products to 160+ countries, We attend the most prestigious tradeshows of our industry worldwide, and deliver creative solutions to all our business partners. We proudly continue to carry the 'Made in Turkiye' label as one of the Top 100 exporters in Turkey!

2022 EXPORT PERFORMANCE REVIEW

ೲೲಁಁಁಁೲೲಁಁಁಁಁಁೲೲೲಁೲೲೲಁೲೲೲಁೲೲ಄ಁೲಁೲಁಁೲೲೲಁೲ

THE EVALUATION OF **EXPORTS FOR 2022**

The economy and trade accelerated in the world, which reopened after the closures that entered our lives with the Covid-19 pandemic, which severely slowed down economic and commercial activities, and after the contraction of 2.8% in 2020, there was a 6.3% growth in the global product level in 2021. In accordance with this global growth, the global trade volume grew by 10.6% in 2021 after shrinking by 7.8% in 2020. (World Economic Outlook, IMF). In the light of these developments, Türkiye's exports grew by 32.8% in 2021, reaching the level of 225.2 billion dollars and in 2022, it reached 254.2 with an increase of 12.9%.

Demands, which fell sharply during the pandemic process, have entered a rapid global increase trend since the end of 2020, with the return of economic life to normal. This increase led to an increase in both consumer and producer prices. So much so that the median inflation in developed countries, which was 0.3% in 2020, rose to 2.5% in 2021 (World Economic Outlook, IMF). In addition to these developments, Russia and Ukraine went to war in February 2022 and this situation accelerated the increase in producer prices. With the effect of both the delayed demand in the transition from 2020 to 2021 and the Russia-Ukraine war, global price increases accelerated and almost all countries had to increase the interest rates. The effective Fed interest rate, which was 0.83% in early 2022, increased to 4.1% at the end of 2022, and the European Central Bank interest rate, which was 0.25% in early 2022, rose to 2.75% at the end of the year. As a result of this struggle against inflation by increasing interest rates, the rapid growth achieved after the pandemic inevitably gave way to a global slowdown, and while global product growth fell to 3.2% in 2022, the median inflation in developed countries rose to 8.3%.

The global economic growth rate, which decreased in 2022 with price increases, the Russia-Ukraine War and interest rate hikes, naturally caused global trade growth to slow down. The global trade volume, which grew by 10.6% in 2021, grew by 5.1% in 2022. Parallel to this, with the decrease in the rate of increase in demand for our export goods, our exports grew by 12.9% in 2022, below the level of 32.8% that it caught in 2021.

Although it lost momentum in 2022, global trade volume continued to increase with a growth rate of 5.1%, and the export unit value also grew both globally and domestically in Türkiye during this period. In this period, global trade unit value increased by 10%, while Türkiye's export unit value increased by 14.8%. The main reason for the rapid unit value increase that started in 2021 and continued in 2022 was the increase in commodity prices. While total commodity prices increased by 52.5% globally in 2021, they continued to rise by increasing 33.7% in 2022 (Primary Commodity Prices, IMF).

Türkiye's foreign trade volume increased by 24.4% in 2022 compared to the previous year and reached 617.9 billion dollars. Imports led to this rapid increase as a result of the increase in commodity and energy prices, and Türkiye's foreign trade coverage ratio decreased from 83.0% to 69.9%. In 2022, imports were 363.7 billion dollars and exports were 254.2 billion dollars.

Table 1 Exports and Imports of Türkiye (2013-2022)

Year	Exports (million \$)	Imports (million \$)	Coverage Rate (%)
2013	161.481	260.823	61,9
2014	166.505	251.142	66,3
2015	150.982	213.619	70,7
2016	149.247	202.189	73,8
2017	164.495	238.715	68,9
2018	177.169	231.152	76,6
2019	180.833	210.345	86,0
2020	169.638	219.517	77,3
2021	225.214	271.426	83,0
2022	254.192	363.711	69,9

Türkiye, which has shown a faster growth performance than global exports in 8 of the last 10 years, thus took a share of 0.86% from global exports in 2013, and increased this rate to 1.01% as of 2021. This momentum, which grew faster than global exports, continued in 2022 as well, and Türkiye's share in global exports was 1.02%.

Year	Türkiye's exports (million \$)	Global exports (million \$)	Türkiye's share(%)
2013	161.481	18.698.474	0,86
2014	166.505	18.787.624	0,89
2015	150.982	16.323.969	0,92
2016	149.247	15.841.269	0,94
2017	164.495	17.553.774	0,94
2018	177.169	19.308.341	0,92
2019	180.833	18.777.720	0,96
2020	169.638	17.428.866	0,97
2021	225.214	22.343.840	1,01
2022	254.192	24.904.489	1,02

improved.

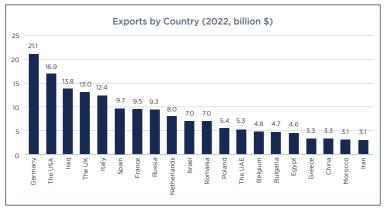

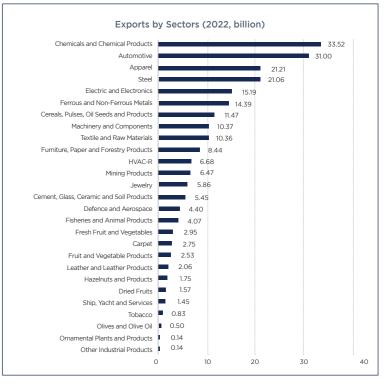

Table 2 Share of Türkiye in Global Exports (2013-2022)

Türkiye's main export sector has been the Automotive Industry for many years, but as a result of the reflection of increasing energy prices on the prices of final products in 2022, a significant export volume has been achieved in the Chemicals and Products sector. As a result, the Chemicals and Products sector ranked first with 33.52 billion dollars. Despite the chip and supply crises, the Automotive Industry sector, which exceeded 30 billion dollars and reached 31.00 billion dollars in exports, fell to second place this time. Electric and Electronics sector, which exports 19 billion dollars, ranked fifth. The exports of Turkish Defense and Aerospace Industry sector, which is one of the rising sectors in recent years, were realized as 4.40 billion dollars in 2022.

Considering the exports by country, it is seen that the country to which Türkiye exports the most in 2022 is Germany with 21.1 billion dollars. Following Germany, the USA ranks second with \$16.9 billion, Irag ranks third with \$13.8 billion, the United Kingdom ranks fourth with \$13.0 billion, and Italy ranks fifth with \$12.4 billion. While 5 of the top 10 countries are EU members, the fact that the USA from North America and Iraq and Israel from the Middle East are on the list indicates that Türkiye's market diversification capabilities have

Table 3 Exports by Country

Table 4 Exports by Sectors

Statistics on Our Top 1000 Exporters in 2022

- 116 of the 1000 companies operate in the Chemicals and Products sector, 111 in the Apparel sector, and 90 in the Steel sector. In 2021, 132 companies from the Clothing and Apparel industry, 108 companies from the Chemicals and Products industry and 93 companies from the Steel industry were among the top 1000 exporters.
- 947 of the 1000 companies operate as goods exporters and 53 as service exporters. Of the 806 goods exporting firms that replied to the survey question on the type of firm, 71.4% are Manufacturer Exporters, 13.6% are Exporters, 11% are Group Foreign Trade Firms and 4% are Foreign Trade Firms.
- 448 of 1000 companies are established in Istanbul. 76 in Izmir and 63 in Gaziantep.
- The average export amount of 1000 companies increased by 31.2% and reached 161.9 million dollars.
- The average domestic sales amount of the companies that shared the domestic sales amount of 2022 was 4.2 billion Turkish Liras.
- The average investments of companies that share data on investment amounts were 164.2 million Turkish Liras.
- Among the companies participating in the survey, which shared their capital structure data, the rate of companies with all domestic capital is 90%, while the rate of companies whose capital is at least half of the domestic capital is 96%.
- The average number of employees of 585 companies that shared employment data among the companies participating in the research was 857, and the average number of female emplovees was 197.
- While the average number of patents held for companies participating in the survey that shared their data on the number of patents held and the number of new patent applications remained unchanged compared to the previous vear, the number of new patent applications per company increased by 1 compared to the previous year and rose to 3.

Statistics on Branding and R&D

- When the companies that share their export data with their own brands are analyzed within the scope of the survey, it is seen that 46.1% of the exports are made with the companies' own brands. This rate is around 67.8% for producer exporters.
- The average number of employees of companies sharing branded export data is 863 and the average number of employees in the R&D field is 22.
- When the 10 companies with the highest number of brand-

ed exports are analyzed, it is seen that the average number of employees increased to 2,648 and the average number of R&D employees to 116. Therefore, the average number of employees for these companies is about 3.1 times the average for all companies, while the number of R&D employees is about 5.3 times the average for all companies. This situation shows that although the branded exports of our companies naturally increase with the effect of scale, the expansion of the scale by concentrating on the R&D field is of greater importance in the increase of branded exports.

- When the statistics above are analyzed for producer exporters sharing branded export data, a similar picture emerges. The average number of employees for these companies is 1,227 and the average number of R&D employees is 36. When the 10 companies that export the most branded exports from these companies are examined, it is seen that these figures increase to 3.022 and 133, respectively, so the average number of employees of these 10 companies is approximately 2.5 times the average of all companies, and the R&D employees are 3.7 times the average of all companies.
- Similarly, the average investment level of companies sharing branded export data for 2022 is 189 million TL and their average R&D expenditure is 14.8 million TL. When the 10 companies with the highest number of branded exports are analyzed, it is seen that the average investment amount increased to 726.6 million TL and the average R&D expenditure increased to 136.9 million TL. Therefore, the average investment amount for these companies is about 3.8 times the average for all companies, while the average R&D expenditure is about 9.2 times the average for all companies. When the same statistics are examined for producer exporters, the average investment for the top 10 companies is 965.5 million TL and 3 times the general average, which is 321.5 million TL, and the average R&D expenditure is 127.1 million TL and 4.9 times the general average, which is 26.1 million TL.
- The number of patents held for 2022 and the average number of patents of our companies sharing branded export data is 14.4. When the 10 companies that export the most with their own brands are analyzed, this rate is 163.5. Again, while the average number of patents for those of our companies that export at least half of their exports with their own brands is 15.1, the average number of patents for companies that do less than half of their exports with their own brands is 4.3.

Last year, we did not leave a single location in the world that did not meet with Turkish products. We added 21.501 companies to our export family. While we increased our exports to 162 countries, we reached the highest level in exports to 108 countries. We increased the number of countries to which we export over 1 billion dollars to 52. While 16 of our sectors broke export records, the exports of 23 of our sectors exceeded the 1 billion dollar mark.

SECTORAL EXPORT ASSESSMENT

Apparel Sector

Burak SERTBAŞ

Member of TIM Sectors Council

DESPITE THE CHALLENGES IN GLOBAL **TRADE, THE APPAREL INDUSTRY** MAINTAINS ITS POTENTIAL

When we evaluate the apparel industry in 2022, we can say that we have shown a successful export performance in general, despite the recession and inflationary pressure in Europe, the increasing labor costs, the energy crisis caused by the ongoing Russia-Ukraine war, and the loss of parity. In 2022, we broke the export record of all times by achieving an export volume of 21.2 billion dollars with an increase of 4.8 percent compared to the previous year. In fact, the first half of 2022 passed in line with our expectations. In the second half of the year, while our exporters had difficulty in competing due to increasing costs, we started to lose the advantage we gained due to the disrupted supply chain during the pandemic. Unfortunately, a significant part of the orders coming to our country returned to the Far East countries. With its value-added production and contribution to

employment, the apparel industry is a strategic sector earning a significant amount of net foreign currency to our country every year. The apparel industry has a dynamic structure that can react to changes rapidly. Our design

power, sustainable and green production capacity are the factors that make our sector stand out in competitiveness. Our investment in design plays a major role in our country's leading position among the value-added export sectors today. Likewise, the future of the industry is linked to sustainability and green production. Together with our export companies, we continue to work in this direction with determination.

Global economies entered the year 2023 with an energy crisis and recession concerns. We foresaw that the first guarter of the year would be difficult for our exports. This situation had reflections on our figures, as well. Türkiye's overall apparel exports decreased by 10.4 percent in the first four months of the year compared to the same period of the previous year. However, we are hopeful for the second half of the year due to the expected recovery in the global economy and our main export markets. As a sector, we aim to increase our apparel exports by at least 10 percent. The economic and political conjuncture that will occur in the second half will be a major determinant in this regard.

If it is necessary to evaluate the year 2022 in terms of Türkiye's Aquatic and Animal Products exports, we can say that the year 2022 has been a good year for our industry; although the previously set target of 3.8 billion dollars was achieved, it was exceeded with 4.06 billion dollars.

There was an increase of approximately 17 percent in fish and aquaculture exports compared to the previous year, and a total of 1.63 billion dollars and 250.5 million kg of exports were realized. There was an increase of 25.18 percent in poultry meat exports compared to the previous year, and an export of 990 million dollars and 613.9 million kg was realized. There was an increase of 55.48 percent in canned meat exports compared to the previous year, and 115 million dollars and 63.2 million kg of exports were realized. There was an increase of 16.26 percent in milk and dairy products exports compared to the previous year and 170 million kg of exports were realized. There was an increase of 5.98 percent in egg exports compared to the previous year and an export of 398 million dollars and 225 million kg was realized. Offal exports decreased by 56.59 percent compared to the previous year, and exports

Aquatic and Animal Products Sector

Ali Can YAMANYILMAZ

Member of TIM Sectors Council

2022 WAS A GOOD YEAR FOR OUR SECTOR

amounted to 5.09 million dollars and 2.44 million kg.

Intestine exports decreased by 2.32 percent compared to the previous year, and approximately 85 million dollars and 12.3 million kg of exports were realized.

We think that the damage caused by the earthquake disaster that took place in February 2023, when a decrease in volume and a slowdown in international trade is expected, will have serious negative effects on our country and region. For these reasons, although it is unlikely that our exports will increase, maintaining the achieved export levels should be the priority target for this year. In order to achieve this goal, we must work with all our strength to produce end products with high added value by using Turkish products and to place the perception of quality Turkish goods in international markets.

Another important goal is to expand to distant markets in order to reduce our dependence on traditional markets. We plan to support this goal with activities such as fairs, promotional activities, and sectoral trade delegations.

Automotive Sector

Baran ÇELİK Member of TIM Sectors Council

DESPITE ALL CHALLENGES, WE ACHIEVED 31 BILLION DOLLARS IN EXPORT WITH A 6-PERCENT INCREASE

As OİB, we set our sectoral export target for 2022 as 33 billion dollars. However, the continuation of supply problems throughout the year, especially the semi-conductor chip crisis, prevented us from our target. On the other hand, the automotive industry, which works with 85 percent euro, suffered a loss of 3 billion dollars in 2022 due to the euro-dollar parity. Nevertheless, in 2022, we achieved an export of 31 billion dollars with an increase of approximately 6 percent. This figure was recorded as the secondhighest export figure in the history of the automotive industry, after the record export of 31.6 billion dollars reached in 2018.

Supply industry exports increased by 10 percent in 2022 compared to the previous year and amounted to 12 billion 983 million dollars. The share of the supply industry in all automotive exports was 42 percent. It was followed by passenger cars with 9 billion 265 million dollars of exports, motor vehicles for transporting goods with 5 billion 54 million dollars, and tow trucks with 1 billion 761 million dollars.

If we look at the year 2023, we are in a period when we are faced with chain problems such as global supply chain problems, increases in energy costs, the danger of recession in Europe, which is our main market, and negative developments in the banking sector in the USA and Europe. Access to finance is more difficult than ever due to interest rate hikes by Central Banks around the world. Global growth projections for 2023 are also below 2022.

However, despite all these negativities, the year 2023 has a different meaning for our sector. In honor of the 100th anniversary of our Republic, we aim to take over our sectoral championship in the country's exports, with our target of 34 billion dollars of exports this year.

In March 2023, our automotive exports increased by 23 percent to reach 3.3 billion dollars and we reached the highest figure ever on a monthly basis. Our exports in the January-March 2023 period increased by 16 percent to 8.6 billion dollars. We can say that we made a good start to the year. Our target this year will be to reach the export record of all time in the automotive industry with 34 billion dollars. In the second half of the year, we believe that we will reach this target with the effect of the chip crisis diminishing further.

Our carpet industry, which achieved an extraordinary increase during the pandemic and the historical export summit we realized in 2021, experienced a decline in 2022 due to geopolitical threats.

Türkiye's carpet exports amounted to 2 billion 754 million USD in 2022. We exported carpets to 184 different countries. The top five countries we export to were the USA, Iraq, the United Kingdom, Germany and Saudi Arabia, respectively. The total value of exports to the first five countries was 1 billion 387 million 400 thousand US dollars, which is 50.3 percent of total exports. After the global problems experienced in 2022, our industry had to temporarily stop its production for a few weeks due to the earthquakes in our region on February 6, 2023.

We wish to maintain and carry further our international competitiveness and global dominance. We will continue to follow the developing technology and adapt to changing consumer preferences. I fully believe that we will overcome the difficulties encountered with the least damage in unity

Carpets Sector

Salahattin KAPLAN

Member of TIM Sectors Council

WE ASPIRE TO INCREASE OUR MARKET **DIVERSITY BY EXPANDING OUR PRODUCT RANGE**

and solidarity with our industrialists and exporters. We want to increase our market diversity by expanding our product range. We continue our Carpet Design Competition and Design Days activities. Our search for new markets will continue to work on opening up to new markets determined in different continents.

In 2023, we are implementing an important project that we think will contribute to our country and our industry. We aim to make the "Carpet and Floor Coverings Fair", which will be held for the first time in Istanbul on 5-8 December 2023, the most important international fair of the sector.

Our export family is gradually expanding and exports are spreading to the base. I would like to thank our producers and exporters who have worked in this direction and made extraordinary efforts to increase our exports.

Cement, Glass, Ceramic and Soil Products Sector

Member of TİM Sectors Council

WE WENT BEYOND EXPORT TARGETS WITH A 17-PERCENT INCREASE IN 2022

In 2022, Türkiye's total exports reached a new record with an increase of 13 percent and reached 254 billion dollars. Cement, Glass, Ceramics and Soil Products Exporters Association, which includes the cement, glass and ceramics industries, exceeded the average increase in exports and reached 5.6 billion dollars with an increase of 17 percent on value basis. In 2022, when the export targets were exceeded, the ceramics industry reached 1.9 billion dollars with an increase of 15 percent, the cement industry reached 1.5 billion dollars with an increase of 24 percent, and the glass industry achieved an export of 1.3 billion dollars with an increase of 24 percent.

When the export of ceramic tile materials is analyzed on the basis of value, it is seen that it increased by 8 percent and reached 1 billion dollars. However, on quantity basis, it decreased by 22 percent and became 128 million m2. Ceramic sanitary ware exports decreased by 9 percent on the basis of quantity and decreased to 183 thousand tons. However, exports in terms of value continued to maintain the level of the previous year with 339 million dollars.

The export of glass products, which are in the scope of Association's activity increased by 24 percent in value and reached the level of 1.3 billion dollars. While large projects caused an increase in glass demand in 2022, the replacement market slowed down in 2022.

The highest increase in exports on the basis of value was 129 million dollars in flat glass with 58 percent, followed by glass packaging with an increase of 25 percent and 240 million dollars. Glassware exports increased by 15 percent and reached the level of 382 million dollars. It is observed that there was an increase in export unit prices as well.

Cement exports increased by 36 percent on value basis in 2022 and reached 1 billion dollars. There was also an increase in average export ton prices.

Clinker exports decreased by 31 percent on amount and -2 percent on value basis in 2022, and decreased to 8.6 million tons and 403 million dollars. In 2022, an increase was observed in average unit prices.

Exports of ceramics and glass products will decline to a limited extent in 2023. While residential and non-residential building constructions will be affected more negatively, infrastructure investments will continue. Within this context, it is foreseen there will be a limited decrease in cement exports in 2023 or, in the worst conditions, it will stick around the levels in 2022. After the pandemic days, when everyone understood that the issues of supply security and self-sufficiency in agriculture and food are at least as important as industrial development in terms of development and welfare, we had a year in which we faced new problems such as the Russia-Ukraine war, the global food and climate crisis. In 2022, when food prices increased due to global inflation, we managed to increase our exports while meeting domestic demand.

In 2022, when our exports of cereals, pulses, oilseeds and products reached 11.5 billion dollars with an increase of 25.4 compared to the previous year, the share of our sector in Türkiye's total exports was 4.5 percent. In this period, the countries we exported the most to were Iraq, the United States of America, Syria, Libya and Yemen.

According to the data of the Turkish Statistical Institute, in 2022, when our grain products production increased by 21.3 percent compared to the previous year and reached 38.7 million tons, Türkiye's grain and other food products

Cereals, Pulses, Oil Seeds and Products Sector

Chemicals and Chemical Products Sector

Adil PELİSTER

Member of TİM Sectors Council

EXPORT CHAMPION OF CHEMICAL SECTOR IN 2022

Our chemical industry, which has achieved a 92-percent growth in exports in the last five years and reached the top with a record export of 33.6 billion dollars in 2022, continues to be Türkiye's rising star in exports.

Despite many negativities from commodity prices to energy costs, from food and raw material prices to global inflation in 2022, our sector grew by 4.2 percent on an amount basis and 32 percent on a value basis in terms of exports of chemicals and products. The export price per kilogram, on the other hand, exceeded the 1 dollar limit and increased by 30 percent to 1.16 dollars.

Our chemical industry, which won first place in exports on a monthly basis 7 times in a row between March and September, became the export champion for the first time in 2022 and managed to get a share of 13,2 percent from Türkiye's exports.

In 2022, the countries to which the most chemicals were exported were the Netherlands, USA, Italy, Romania, Lebanon, Russia, Germany, Spain, Iraq and South Africa, respectively. Plastics and its products, mineral fuels, mineral oils and products, inorganic chemicals, essential oils, cosmetics and soap, rubber, rubber goods, pharmaceutical products, paint, varnish, ink and their preparations, various chemicals, organic chemicals and fertilizers were the top ten sub-sectors to which exports were made.

The chemical industry is of strategic importance for the economic development of our country and the future of our exports. We continue our work with this awareness and want to be among the playmakers of the new era in the future of chemistry.

In the upcoming period, we have important topics that we need to adapt to, such as sustainable production in chemistry, digital transformation, high value-added innovative products, EU Green Deal, carbon regulation at the border, the "Supply Process Management Principles" law adopted in Germany and KKDIK Chemicals Registration. In line with our sustainability and digitalization strategy, we, as IKMIB, continue to work to scale up with our projects that will carry our exports to the next level.

Within the framework of our "Vision 2030" strategy, we aim to increase our chemical exports to 36 billion dollars in 2023 and 50 billion dollars in 2030 by focusing on scale-up on the basis of sustainability. The Turkish defense and aerospace industry is in a serious breakthrough process that benefits the country's economy, public security, technological production, military superiority and stability. When we look at the last 15-20 years of this breakthrough, we can easily say that Türkiye has reached a level that can compete with global actors and is among the global players.

The success achieved in the defense industry with the National Technology Move, which was put forward to ensure the economic and technological independence of Türkiye, was also reflected in exports. Perhaps the most important reason for this acceleration in exports is the active use of our products on the battlefields and their success. Therefore, our platforms, which have proven themselves in operational environments, create a sense of trust in foreign customers. In addition, we can proudly say that countries with similar operational needs as Türkiye show great interest in our products. In this sense, the fact that many of the states fighting terrorism have turned to unmanned aerial vehicle (UAV) systems and armored land vehicles produced by our country is largely due to the effective use of these vehicles in the field.

Defence and Aerospace Sector

Latif Aral ALİŞ

TMember of TIM Sectors Council

OUR AGENDA IS TO PRODUCE BETTER AND REACH MORE MARKETS

In 2022, we increased our exports by 37 percent to 4.4 billion USD. We continue to work with the aim of maintaining the momentum we have achieved. Unfortunately, many risk factors that remain uncertain due to fluctuations in global balances, chip crisis and logistics problems continue in 2023 as well. With our agile structure, our approach to being prepared for all kinds of adverse conditions and our ability to produce solutions, we are taking firm steps towards our goal of being among the top 10 countries in the world in the field of Defense and Aviation. Accordingly, we set our target for 2023 to exceed 6 billion dollars.

Our sector is working hard to export more as a single body, to increase our share in the world market in the field of defense and aerospace, and to rank higher among the leading countries of the world. Our only agenda is to produce better and to reach more markets.

Dried Fruits Sector

Birol CELEP Member of TIM Sectors Council

WE ARE HAPPY WITH THE INCREASE IN **OUR SECTOR'S EXPORT REVENUES**

When dried fruit exports in 2022 are compared to 2021, they remained at the same level in terms of value and amounted to 1 billion 571 million dollars. When compared on the basis of quantity, approximately 500 thousand tons of dried fruit export was realized with an increase of 2 percent compared to the previous vear.

1 billion 77 million dollars of our total exports in 2022 was gained from the export of seedless raisins, dried figs and dried apricots. The shares of our products with the highest export revenue in 2022 in the export value were respectively as follows; raisins were 27 percent, dried apricots 26 percent and dried figs 16 percent.

On the basis of quantity, raisin exports amounted to 254 thousand tons in 2022 with an increase of 12 percent compared to 2021, and in return, a revenue of 431 million dollars was gained with an increase of 1 percent compared to the previous year.

As of 2022, Türkiye's dried apricot exports amounted to 401 million dollars with an increase of 15 percent on a value basis compared to the previous year, and 76 thousand tons on an amount basis, with a decrease of 16 percent compared to the previous vear.

As of 2022, an income of 245 million dollars was obtained from

dried fig exports, with a decrease of 6 percent compared to the previous year. The amount of dried fig exports decreased by 1 percent in 2022 compared to the previous year and amounted to 70 thousand tons.

We are happy that the export income of our industry has increased compared to the previous year. To maintain this, we aim to protect our existing markets, especially the European Union countries, and to increase our exports by entering new markets. In this context, although the increase in value-added exports is a very important issue, we carry out many joint projects with our stakeholders at home and abroad in order to increase our product diversity and the export revenues of our sector.

We think that people's demand for healthy food will continue to increase in 2023, and we come together with stakeholders in the sectors to increase our exports and product diversity with added value while preserving our worldwide prestige and existing markets. It is of great importance to implement marketing strategies in line with the expectations of Generation Z, which has a very important consumption potential. At the same time, it has decided to restart our UR-GE project, which ended in 2022, in 2023 in order to increase the production and competitiveness of our products in international markets.

The electric and electronics sector, which ranks fifth in with international standards, and the high employment it has are the basic building blocks that have helped us Türkiye's exports, creates a high added value for our country's economy with its four sub-sectors. Our sector, achieve success. The disruption of the international supply chain during the pandemic days made us realize how which has an export performance increasing every year, important domestic production is. For this reason, there was achieved an export of 15.5 billion dollars in 2022, an increase a greater need for domestic production and high valueof 7 percent compared to the previous year, and received a added production. 6 percent share from Türkiye's exports.

In this season, on the basis of sub-product groups, the export volume was 4.55 billion dollars in electricity generation and distribution equipment products, 4.31 billion dollars in white goods, 3.47 billion dollars in electronics, and 3.15 billion dollars in our cable group, respectively.

In 2022, 44 percent of our exports were carried out to EU member countries with an export volume of 6.7 billion dollars. In the same year, the United Kingdom was the

In line with our country's policy of production, exports, country with the highest export volume with 1.64 billion employment and growth, the role of exports in growth dollars, followed by Germany with 1.37 billion dollars and has an important place. In this context, our electrical and France with 850 million dollars. electronics sector, which aims to reach an export volume Our industry's R&D infrastructure, its ability to produce of approximately 16 billion dollars in 2023, will continue to export-oriented and high value-added products, its capacity make significant contributions to our country's economy to offer high quality and flexible products in accordance and growth as an important actor in exports.

Electric and Electronics Sector

Mehmet KAVAKLIOĞLU

Member of TIM Sectors Council

OUR SECTOR HAS AN EXPORT PERFORMANCE INCREASING EVERY YEAR

The European Green Deal, circular economy, and green energy issues are among the issues that are closely related to our sector. Considering that the European Union is our biggest market, the Border Carbon Regulation Mechanism, which will come into force in line with the goal of being a carbon-neutral continent by 2050, will be an important driving force for our companies to comply with the Green Deal.

Ferrous and Non-Ferrous Metals Sector

Çetin TECDELİOĞLU

Member of TİM Sectors Council

OUR INDUSTRY HAS A 5.3 PERCENT SHARE OF TURKISH EXPORTS WITH AN EXPORT FIGURE OF US\$ 4.26 BILLION

The exports of the Ferrous and Non-Ferrous Metals Sector in the January-April 2023 season decreased by 19.5 percent compared to the same period of 2022 and fell to 4.26 billion dollars and received a 5.3 percent share from Türkiye's general exports.

The fact that it increased despite the global recession caused by factors such as the post-pandemic and Russia-Ukraine war in 2022 prevents us from thinking negatively about this recession in the first quarter of 2023 because our export figures are expected to increase rapidly if the indecision environment after the election dissipates.

The decrease in production in Europe due to the significant increase in energy prices, which is an integral part of production, due to the Russian-Ukrainian war, and the European Union's imposition of more restrictions on Russia in each new sanction package played an active role in this success in 2022. While the European market constitutes approximately 60 percent of our export market, there are serious increases in our export figures to Russia. Our non-stop national participations, sectoral trade delegations and projects also played an important role in this success. As the Ferrous and Non-Ferrous Metals Sector, we continue to organize national and info participation in prestigious fairs such as Cwieme-CoilWinding (Copper), ISH (Armature), Eisenwarren (Hardware), Ambiante (Kitchen), and Batimat Paris (Building Materials) Alimunyum Dusseldorf. Apart from these, we organized a very productive sectoral trade delegation to Israel, which is the gateway to America and Africa, and now we will organize it to Egypt and Kazakhstan. We continue to work to announce the Ferrous and Non-Ferrous Metal index every month. We have started to organize sector meetings with our new management. With the project, we bring together our foreign students studying in our country with our exporters and ensure that they are employed in their companies. Again, through our Trade 365 website, we promote the products of our export companies at every fair and event we attend. We also make a separate effort to ensure that our exporting companies benefit from government incentives. In addition, we have been trying to listen to the problems and demands of our exporters by visiting approximately seven or eight companies every day for the last nine months. In summary, we are having an active year as the Ferrous and Non-Ferrous Metals sector.

The fresh fruit and vegetables sector is a valuable sector that creates employment for millions of people in the process from harvesting to packaging and from transportation to export, as well as the net foreign currency input it provides to the national economy.

In 2022, while a decrease of 4 percent was recorded in our exports with 2,95 million dollars in value, there was a decrease of 4 percent in quantity with 4,96 million tons. The products we export the most are tangerines, tomatoes and lemons, respectively, while the most exported countries are the Russian Federation, Germany and Ukraine. It is considered that the tension between the Russian Federation and Ukraine, which are among the top three countries with the largest share in our sector in 2022, has had a negative impact on our exports.

On the other hand, our country once again faced the reality of an earthquake with the disaster centered in Kahramanmaraş and affecting 11 provinces. Along with experiencing the deep sadness of losing our brothers in disasters, our industry has also received deep wounds. It

Fresh Fruit and Vegetable Sector

Ali KAVAK

Member of TIM Sectors Council

WE AIM TO INCREASE MARKET DIVERSITY IN 2023

is our duty to quickly restore the conditions of the people of the region. Our expectations for 2023 include bringing the old momentum to our cities, especially Hatay, which has an important position by being among the top three in the sector's exports. For this reason, a total of 420 containers were supported, with the donations of our exporting companies and the containers provided with the support of furnishing materials by the Türkiye Exporters Assembly, by pioneering the formation of a container city. In addition, employment is being provided in the region, and the wounds of the people who do not want to leave their land are being bound up.

In 2023, we aim to increase our market diversity, especially in the Far East countries, while maintaining our presence in our main markets. For these purposes, we plan to participate in delegations and fairs that will provide benefits while studies are carried out on the selection of environmentally friendly agricultural control methods, training of producers and harvest workers regarding harvest and post-harvest processes, packaging and marketing.

Fruit and Vegetable Products Sector

Melisa TOKGÖZ MUTLU

Member of TİM Sectors Council

OUR EXPORT INCREASE CONTINUED IN 2022

In 2022, our export increase, which we caught in the pandemic, continued consistently. Let us emphasize that Türkiye's fruit and vegetable products sector has reached 2 billion 525 million dollars in 2022 with an increase of 24.6 percent compared to the previous year. We achieved our goal of reaching the export figure of 2 billion dollars, which we set at the beginning of the year.

The sector that will always win in the world is agriculture. The pandemic revealed how important food, and therefore agriculture, is. With the Russia-Ukrain War that came upon it, the importance of the supply chain was further consolidated. Due to the container crisis experienced during the pandemic and crisis periods, suppliers that were not cheap but sustainable, reliable and accessible gained importance. In addition, the demand for packaged products with extended shelf life and consumption time, which can be easily stocked and come into contact with fewer people, is increasing. Our sector, which includes many products from fruit juices to jams to frozen vegetables and fruits, has started to have a say in the world with its strong producers. We see that we maintained our reliable supplier position during the pandemic in 2022.

I would like to say that the target of our industry for 2023 is \$2.7 billion in exports. We aim to strengthen the position of our sector in the global economy and to get a larger share of exports to geographies with high potential. In addition to our goal of strengthening our position in the EU and the USA, we also want to get a larger share of exports to distant countries such as Japan, India and China. The Furniture, Paper and Forestry Products Sector has gained significant export momentum recently and has managed to make a name for itself in the global market. Especially in the last decade, it has broken a record by increasing its exports by 220 percent. Despite the developments that negatively affected exports such as the energy crisis and recession concerns that dominated the business world throughout the year, the furniture, paper and forestry products sector surpassed the record export figure of the previous year, with an export of 8.4 billion dollars in 2022 with an increase of 21 percent. Its share in Türkiye's exports was 3.3 percent. In addition, by exporting to 219 customs regions, it became the second most common sector among all sectors.

Our industry has succeeded in turning the global supply chain crisis into an opportunity. Despite the factors that directly affected world trade such as recession, energy crisis, diplomatic tensions between countries, and the cold war during and after the pandemic, Türkiye has become the supply base center for important chain brands in the world due to its strategic location. These negative factors, which caused many disruptions in global trade, presented opportunities as well as difficulties. In

50

Furniture, Paper and Forestry Products Sector

Ahmet GÜLEÇ

Member of TIM Sectors Council

OUR INDUSTRY INCREASED A RECORD IN THE LAST DECADE, INCREASING ITS EXPORTS BY 220 PERCENT

this period, developed countries, which attach importance to environmentally friendly production, trust and being instantly accessible, reconsidered their supply chains. Türkiye, which stands out with its dynamic and rapidly adapting structure, also differentiated positively at this point. Our industry provides the digital transformation that consumers expect from purchase to sale, and this creates a very important background for future exports. The furniture, paper and forestry products sector's high production power along with its structure that does not compromise on design and quality has been an important key to its success. While defining our sector, we say that we a component and customer of the manufacturing and production sectors with our sub-sectors. With this success we have achieved in exports, we are actually nourishing our manufacturing industry in a sense.

We believe that the momentum gained in 2022 will continue in 2023. Our goal is to reach a double-digit export figure of 10 billion dollars, to increase the share of Türkiye's total exports from 3.3 percent to 5 percent, and to achieve a greater share in world trade.

HazeInut and Products Sector

Hasan Osman SABIR

Member of TİM Sectors Council

WE MAINTAIN OUR WORLD LEADERSHIP IN THE EXPORT OF HAZELNUT THAT INVOLVES NEARLY NO IMPORT INPUT

As it is known, hazelnut, which is the world leader in production and exports of our country, is a strategic national export product that directly contributes to the financing of our current account deficit due to the fact that it has nearly no imported inputs, and a net \$ 20 billion foreign currency income has been earned in the last 10 seasons from hazelnut exports.

In 2022, 312,564 tons of hazelnut kernels were exported to a total of 127 countries, and a foreign exchange income of 1,748,835,811 dollars was obtained in return for these exports. Compared to 2021, when the all-time export record on a quantity basis was broken, there was a decrease of 9.24 percent in quantity and 22.62 percent in value. Although it is observed that there is a significant decrease in our exports compared to the previous year, the year 2022 was recorded as a year in which our hazelnut exports reached the third-highest figure of all time in terms of quantity.

Although the Hazelnut and Products Sector, which has the most advanced hazelnut processing facilities in the world, has the capacity, talent and customer portfolio to export all the hazelnuts produced by our country, the significant decrease in our share in world hazelnut production in recent years emerges as a problem that requires urgent measures. While the share of our country in the world hazelnut production was 80-82 percent in the 90s, it has unfortunately decreased to 60-65 percent in recent years.

Apart from our traditional competitors such as the USA, Italy, Georgia, Azerbaijan, and Spain, many countries around the world have started planting hazelnut and while the production in the USA is about 70 thousand tons, the hazelnut production in Chile has reached 55 thousand tons in a short period of 15 years.

On the other hand, price instability caused by artificial reasons, and foreign buyers that should be considered as our strategic partners in terms of their contribution to the increase in consumption and world-renowned.

On the other hand, price instability caused by artificial causes adversely affected the future projections, predictability and will of using hazelnuts in their products of foreign buyers, who should be considered as our strategic partners in terms of their contribution to the increase in consumption, and worldrenowned chocolate industrialists and it has become a major obstacle to the increase in consumption. The first target of our country's hazelnut policy should be to ensure that exports can compete and reach a price increase within natural market dynamics, together with increasing sales figures. The heating, ventilation, air conditioning and refrigeration (HVAC-R) industry, which is the 11th largest sector in exports according to TIM data, completed 2022 in a coordinated and efficient manner with all its stakeholders, from marketing to sales and from communication to implementation.

We closed the year 2022 with an export volume of 6 billion 680 million dollars, an increase of 7.9 percent compared to the previous year. With this figure, the sector's exports reached the highest level of all time. The ratio of sector exports to imports was 93.5%. These results show that we are organized as a sector and that we are moving forward with a certain strategy. In 2022, the countries that we exported to the most were Germany, the United Kingdom, Italy, Russia and France, respectively. The kilogram unit price of the industry increased from \$4.63 in 2021 to \$5.35 in 2022. This proves that our industry is effective in producing value-added products.

While we participated in 23 different international fairs for our exporters in 2022 with our national participation and info stand models, we organized sectoral trade delegations to Uzbekistan, Brazil, Argentina, and Hungary. In addition, we organized a separate procurement committee organization for delegations

HVAC-R Sector

Salih Zeki POYRAZ

Member of TIM Sectors Council

WE BROKE A NEW RECORD IN SECTOR EXPORTS IN 2022

from North African countries and Balkan countries.

The Turkish HVAC-R industry is the European market leader with its production capacity in split air conditioners, and the world leader in the export of radiators and towel warmers. We continue to take firm steps towards becoming the world's production base in the production of combi boilers, ventilation equipment and flexible air ducts. We aim to achieve similar success in other product groups such as refrigeration, installation and insulation and to enter the top 10 in the world ranking in the medium term

In 2023, we have determined to be the sector with foreign trade surplus as our biggest goal. We entered 2023 stronger by updating and improving our strategy document with 16 different working groups created to increase and develop the activities of our sector. We have planned and implemented more than 40 activities from foreign trade delegations to fair participations and from procurement committees to overseas education and B2B meetings.

In 2023, we will also continue to work on new product development with our R&D and innovation vision without slowing down.

Jewelry Industry

Burak YAKIN Member of TIM Sectors Council

NEW GENERATION EXPORT IN THE JEWELRY SECTOR

As the Jewelry Exporters' Association, we are constantly working to carry our industry into the future by taking new steps on what the previous executives have done.

As the Jewelry Exporters' Association, we have started to implement our projects since 2022, when we took office, and we have achieved very fast results so far. Our industry needed new exporters. For this reason, we encouraged our ateliers, which make many contract manufacturing, to work for export. We implemented the procurement committee programs very effectively, especially the Antalya procurement committee was very effective and efficient. In addition to the Istanbul Fair, we increased the number and quality of national participation in the world's largest fairs. With the valuable support of our government, we were able to overcome some financial factors that affect the global competitiveness of our sector. We have switched to a more flexible model regarding the DİR application, and we have done our best to ensure that the gold that comes to our country within the scope of DİR is not considered as an import. As long as there is no cash or goods outflow in return, the raw material entering our country within the scope of DİR should not be considered as import, even if it is temporary. In light of all these developments, the exports of our members amounted to 5.8 billion dollars. We can say that a figure

of over 10 billion dollars was realized with micro-exports, exports made outside the exporters' union, and trade made by means of sales to tourists and luggage trade.

The world is changing rapidly and we will either adapt to this change or stay out of it. For this reason, we need to work on New Generation Exports. Therefore, we will walk towards this goal in 2023 and beyond. We have taken and will continue to take many steps towards higher value-added exports and increasing our influence globally. We have become a member of CIBJO, and we will increase our effectiveness in influential international organizations of the sector.

Türkiye is very competitive in jewelry globally and is very strong in some areas as it has no rivals. We want to develop this and attract new investors to Türkiye. In the export of new generation jewellery, we will export not only gold, silver and diamonds but also design, technology and know-how. The best example of this is developed by our JTR laboratory, of which the Jewelry Exporters' Association is also a partner. To gain technological and design advantage in the global sense in new generation exports, we aim to bring higher added value to Türkiye by increasing the reputation and value of our brands and products.

As the leather and leather products sector, we achieved a very good output in 2022. Our sector broke a record and reached an export value of 2 billion 57 million dollars. In the shoe product group, which is also one of our sub-sectors, we signed a record with an export value of 1.2 billion dollars and 320 million dollars in the product group. In this season, our tannery sector achieved an export value of approximately 280 million dollars, and this figure was approximately 220 million dollars for our leather and fur garments sector. In addition to the increase in exports, we also recorded positive developments in value-added exports, which we attach great importance to as a sector. By closing the end of the year with a unit price of 10.2 dollars per kg, we also made a significant contribution to our country's value-added exports.

With the awareness of the negativities created by the Single Market-oriented trade, we have been working for a long time to reach the goal of achieving a more balanced export volume. In recent years, a positive outlook has already been displayed in this sense, and the data for 2022 has been an important indicator of the success of this policy. While exporting to 188 countries, we recorded an increase in exports in almost every region on the basis of country

60

Leather and Leather Products Sector

Mustafa ŞENOCAK

Member of TIM Sectors Council

OUR SECTOR SIGNED A RECORD WITH AN EXPORT **VALUE OF 2 BILLION 57 MILLION DOLLARS**

groups. It is also an important development that this success was achieved at a time when a relatively negative picture was experienced in global trade.

Again, I think it is also effective to make a differentiation in marketing activities, to increase participation in fairs, to bring together direct manufacturers and buyers with trade delegations and VIP purchasing committees, and to strengthen the efforts of individual companies in this field by prioritizing exports.

Despite the negative expectations in the global economy, 2023 started with positive momentum for our sector. We achieved a 4-percent increase in the first four months of the year. We aim to increase our export markets and close the year with an increase in both value and unit price. For this purpose, national participation increases the number of our fairs; We organize sectoral trade delegations and purchasing committees. In order to increase the awareness and international perception of our sector, we are planning promotional activities with sectoral stakeholders. Digitalization and sustainability are the two most important items on our agenda. We are creating our roadmap, including trainings for the integration of the sector in this field, as well.

Machinery and Components Sector

Kutlu KARAVELİOĞLU

Member of TİM Sectors Council

WE WILL FURTHER INCREASE OUR GLOBAL MARKET SHARE AT THE 100TH ANNIVERSARY OF OUR REPUBLIC

In 2022, when there was an increase of 5.2 percent in global machinery and equipment investments, the growth in this field was recorded as high as 13 percent in Türkiye, and the buoyancy in machinery production continued until the end of the year with the effect of additional supply demand for our country. Many factors such as the Ukraine-Russia war and the pressure on demand due to inflationary monetary tightening trends in the EU and the USA had an impact on our data in this period when the competitive advantages of the machinery sector did not reflect on the export amount at the target rate at the beginning of the year due to the negative effects of global developments, recession pricing and cross-rates.

In 2022, when global machinery exports grew by only 0.9 percent, our country's export growth rate was 10 times the world's average increase rate, and our industry increased its exports, including free zones, by 11.3 percent compared to the previous year, to \$25.5 billion at the end of last year. Excluding exports from free zones, annual machinery exports reached 2.9 billion dollars for Germany, 1.5 billion

dollars for the USA and 1.3 billion dollars for Russia. Machinery exports from free zones to these three countries exceeded 600 million dollars.

While we set our targets for 2023, it was the expectation of shrinkage in the first quarter and stagnation in the second quarter that guided our projections. Despite the disruptions in production due to the problems in the supply chain and shortage of materials, there was a recovery in the second half of the year, and this recovery accelerated with the start of the fiscal relaxation in developed countries next year. However, whatever the conditions in the world are, we believe that we will get better results than our competitors and increase our market share on a global scale by the end of 2023, when we will celebrate the 100th anniversary of our Republic. In the early months of 2022, we set a target of 7.5 billion dollars for our sector. However, we could not reach our target due to the negative developments in the world. Despite all the difficulties, we still managed to increase our exports. Exports of the mining industry increased by 9.13 percent in 2022 to reach 6 billion 469 million dollars. Thus, with our exports of 5 billion 927 million dollars in 2021, we contributed 6.5 billion dollars to Türkiye's exports.

As MİB, we continue to work to create new markets and increase the share of the mining industry in existing markets, despite the negative developments. In this context, we continue to support our members with the trade delegations we organize. By the end of this year, we will reach 18 in the number of trade delegations. Next year, we aim to increase this number to 24. We hope to see the positive effects of these delegations on exports in a short time.

The developments in the world for 2023 are of great interest to us. In the first three months of the year, we

Mining Products Sector

Rüstem ÇETİNKAYA

Member of TIM Sectors Council

WE SUCCEEDED IN INCREASING OUR EXPORTS DESPITE ALL THE CHALLENGES

witnessed a decrease in our mineral exports. In the first three months, our exports decreased from 1 billion 524 million dollars to 1 billion 323 million dollars with a decrease of 13.13 percent compared to the same period of the previous year. We can say that this decline is primarily due to the negative developments in our main markets, China, the USA and European countries. The fact that the construction industry has not yet recovered in China and the expectations of recession in the US and European economies have affected our exports. In addition, due to the banking crisis in the USA, companies are trying to continue their business with their stocks. If the developments in the world differ after the second 6 months of 2023, we may reach the same levels in exports as 2022 or increase slightly.

Olive and Olive Oil Sector

Davut ER

Member of TIM Sectors Council

WE HOPE TO REACH EVEN HIGHER **PRODUCTION IN THE COMING YEARS**

The 2021-2022 table olive export season ended on September 30, 2022. Exports rose to 110 thousand tons, breaking a record, with an increase of 24 percent. The amount of foreign currency obtained from table olives, on the other hand, increased by 15% and reached 173 million dollars.

In the 2021-2022 season, black olive exports increased by 19 percent compared to the previous season and reached 80 thousand tons. The amount of foreign currency obtained increased by 10% and reached the level of 125 million dollars. Our increase rates in green olive exports were much more pleasing. While our green olive export was 21 thousand tons last season, it increased to 30 thousand tons this season. The export income of green olives increased by 35 percent to 48 million dollars.

In this period, our olive oil exports increased by 28 percent on a guantity basis, from 40 thousand tons to 52 thousand tons. The export amount increased by 44 percent to 180 million dollars. Our average export price per kilogram of olive oil rose from \$3.03 to \$3.44. In this season, we have realized approximately 60 percent of our 52 thousand tons of olive oil exports in packaging. We consider this a very pleasing development for our industry. Our pomace oil exports, on the other hand, increased

by 168 percent to \$22 million. The total exports of our industry increased by 32 percent from 282 million dollars to 373 million dollars.

Especially in the last 2 decades, our tree wealth has increased from 90 million to 190 million with the plantings made within the framework of the support given by our state to olive tree planting. With the new plantings yielding, we have started to see significant increases in our yield. Every year, an average of 2-3 million trees participate in the yield. According to the data of the Ministry of Agriculture, reaching a yield of 1 million 200 thousand tons of table olives and 650 thousand tons of olive oil was like a dream before. We see that we are taking firm steps towards this goal.

We aim to export 1 billion dollars of total olive and olive oil this season. We have a target of 250 million dollars in table olive exports and 750 million dollars in olive oil.

The olive-olive oil sector is our national and domestic sector that provides net foreign exchange income and exports directly without importing. It is essential to make positive discrimination in our sector and to reorganize and continue DFIFs for the continuation of exports with packaging.

Türkiye is among the most important exporting countries of the world in the export of ornamental plants sector. The number of exporting companies in the ornamental plants sector is increasing and modern technologies and sustainable production are becoming widespread. Our exporting companies have started to produce new product types in recent years, and the number of export markets in the sector has increased to 70.

The export of ornamental plants and products from Türkive this product group are the Netherlands, England and Russia, was realized with an amount of 137 million dollars in 2022. The respectively. Exports increased by 35 percent to Russia and 16 percent to Denmark, one of our important export markets. most important products in export are live plants consisting of indoor and outdoor plants and cut flowers. The top three We continue to carry out promotional activities in target countries to which ornamental plants are exported the markets in order to increase our exports. With the UR-GE most from Türkiye in 2022 are the Netherlands, Germany, project that we will start this year, we will participate in and Uzbekistan. Our other important export markets are delegations and fairs in new markets. Azerbaijan, England, Georgia, Turkmenistan, Iraq, Russia and In the first four months of 2023, we exported ornamental Italy. Countries with the highest increase in exports on the basis of value are Azerbaijan with an increase of 17 percent, plants worth 63 million dollars. By the end of 2023, we predict Turkmenistan with an increase of 58 percent, Georgia with an that our sector's exports will increase by 25 percent and reach increase of 24 percent, and Irag with an increase of 22 percent. 180 million dollars.

THE NUMBER OF EXPORTED MARKETS IN THE **SECTOR INCREASED TO 70**

The export volume of live plants product group was 73 million dollars in 2022. Uzbekistan, Azerbaijan, Germany, and Georgia are our most important markets in the export of live plants. In this product group, exports increased by 24 percent to Georgia, 58 percent to Turkmenistan, 28 percent to Italy and 22 percent to Iraq.

The export volume of the cut flowers product group was 49.4 million dollars in 2022. Our most important markets in

Turkish Aerospace Subsidiary of TAFF and an affiliate of St tusas.com

Services Sector

Ahmet BOLAT Member of TİM Sectors Council

IN 2022, WE SIGNED A HISTORIC RECORD WITH AN INCREASE OF 47 PERCENT

When we completed the year 2021, we were not satisfied enough with the position we were in and because we knew very well that we could do even more, we increased our efforts, achieved success in team play, and supported the development of our country brand with market diversity. As a result of these, we broke a historical record by increasing our Service Exports to 90.3 billion dollars with an increase of 47 percent in 2022. The foreign trade surplus we provided in this period reached 50 billion dollars. Since more than half of the exports we achieve in this way is a current account surplus, we have made a significant contribution to the fight against the current account deficit, the growth of our country, the increase in investments in our service sectors and the development of employment. In our sub-sectors; Tourism and Travel Services exports reached 41.2 billion dollars in 2022 with an increase of 55 percent compared to the previous year, and our exports of the Passenger and Freight transportation sectors reached 36.6 billion dollars with an increase of 50 percent compared to the previous year. In terms of Education Services, the number of international students in Türkiye has increased regularly every year, it showed an important performance and gained momentum by ranking among the top 10 countries hosting the largest number of international students in the world,

with 310 thousand students in 2022.

Türkiye is positively differentiated from rival countries with its culture, values, unique business model and workforce. With these features, the Turkish service sector is well-recognised abroad. We are among the most important countries in the world in passenger transportation and tourism. We succeeded in making Türkiye a "hub" with our airports serving in passenger transportation and our air transportation under the leadership of Turkish Airlines. In this context, we continue our efforts to make our country the center of the world in all transportation modes by maintaining our success. Turkish-made TV series and movies are watched by nearly 800 million people in more than 160 countries around the world. We believe that these achievements will continue exponentially in all our sectors in 2023.

We have taken our targets of 125 billion dollars that we set for 2025 two years forward and we aim to contribute to our country with 125 billion dollars of service exports in the 100th year of our Republic. There is a service export market exceeding 6 trillion dollars in the world. In this context, we, as Türkiye, can achieve greater successes in service exports and make a greater contribution to the development of our country. The export volume of our sector in 2022 was recorded as 1 billion 453 million dollars. Although this figure seems to have decreased in export figures compared to the previous year, it was actually a manifestation of growth and gearing up in targets for a sector that aims to reach 1 billion dollars on an annual basis until a few years ago. Due to the fact that the order, production and delivery process of the products subject to the export of the ship vacht and services sector covers years, monthly and annual evaluations can sometimes change even if the export of a boat is a few days earlier or later. Therefore, it would be correct to evaluate the figures for a wider period. Looking at it from this perspective, it would be more accurate to say that the sector's export volume increased from 1 billion dollars to 1.5 billion dollars per year.

Our industry is highly specialized in special purpose shipbuilding and is in the leading position. This success of the sector is hidden in its rapid adaptation to global trends, technology and the efforts of the shipyards to

Ship, Yacht and Services Sector

Başaran BAYRAK

Member of TİM Sectors Council

OUR SECTOR IS SPECIALIZED IN CUSTOM-MADE SHIPBUILDING AND MAINTAINS ITS LEADERSHIP

come out of all crisis environments with success stories. The works and contributions of the Ship Yacht and Services Exporters' Association and other maritime non-governmental organizations for the international promotion of the sector also bring this success. Today, our country is the first in the world in the export of fishing vessels, and it is among the top three countries in the export of tugboats, including the world's most important brands. It is one of the leading countries in product groups with a very high export value per kilogram, such as ferries and pleasure boats and mega yachts.

It is difficult to predict how 2023 will result in terms of sector exports. The number of the order lists of our shipyards are in quite pleasing and deliveries are continuing intensively. However, the issue of how the export figure will be realized will be clear the number of deliveries to be completed by the end of the year is clear.

Each SOUL needs a powerful body.

Guiding You To New Horizons In Export Market

Steel Sector

İbrahim PEKTAŞ Member of TİM Sectors Council

THE STEEL INDUSTRY RANKED EIGHTH IN THE WORLD AND SECOND IN EUROPE IN 2022

As the Turkish steel industry, we started 2022 with good momentum. However, the factors affecting the global steel industry caused us to experience a great decline in exports in the second half of the year. Our industry closed the year 2022 with 19.6 million tons of exports with a 17.7 percent decrease in quantity and 21.1 billion dollars with a 5.3 percent decrease in value.

The war between Russia and Ukraine, which broke out last year, was initially considered as a development in favor of the Turkish steel industry. Although the embargo of many countries, especially the USA and the EU, to Russia seems to have opened up some space for us, the cost increases on the energy side and the different tariffs applied especially to the steel industry negatively affected our competitiveness. Another factor was that Russia shipped steel products, which could not be exported to the West due to sanctions, to the Far East at much lower prices than global prices. The fact that the Far Eastern countries exported low-priced steel to the West due to cheap imports by Russia, reduced Türkiye's export performance. Apart from this, countries such as China, India and Iran continued to sell to our country at dumped prices. In 2022, when the global steel industry also left behind a tough year, Türkiye became the world's eighth-largest steel producer, Europe's second-largest steel producer and the world's fifth-largest steel exporter.

In order to compensate for the losses experienced by the Turkish steel industry, we, as the Steel Exporters' Association, determined different target markets for our exporters. In 2022, we managed to increase our exports by organizing trade delegation visits to countries such as Germany, Israel, Monaco, Estonia, Latvia, Hungary, and Serbia. In 2023, we held trade delegation visits to Hungary, Bulgaria, Romania, and Spain. For the remainder of the year, we plan to keep in close contact with the Belgium-Netherlands, Peru-Chile and African markets and carry out studies in these markets.

However, as the Union, we will continue to work on important fairs and conferences while carrying out our UR-GE projects. We will continue our work without slowing down in areas such as harmonization with the EU Green Deal, and the Border Carbon Regulation Mechanism. Despite the economic and political crises such as the container crisis that started during the pandemic and continued for a long time, the global inflation problem, the Russia-Ukraine war and the global energy crisis that followed, we managed to increase our export figures in 2022. The "Textile and Raw Materials" sector closed the year 2022 with an export volume of 12 billion 946 million 454 thousand dollars. Our sector realized 5.7 percent of Türkiye's total exports in 2022. In 2022, an increase of 0.6 percent was recorded compared to the previous year.

We started January 2023 with 988 million 598 thousand dollars, which is almost the same export figure as in January a year ago. Unfortunately, two major earthquakes in the Southeastern Anatolia Region on February 6, 2023 and the aftershocks that followed adversely affected the social and economic structure of the region. Companies producing throughout the region were closed for weeks and many production facilities were destroyed, severely damaged or their machinery were severely damaged. While the export in the January-March season of 2022 were 3 billion 376 million dollars,

76

Textile and Raw Materials Sector

Ahmet Fikret KİLECİ

Member of TİM Sectors Council

WE WILL CONTINUE TO MAINTAIN THE SUCCESS OF OUR INDUSTRY

it decreased by 11.9 percent to 2 billion 974 million dollars in the same period of 2023 when the earthquake disaster took place. While aiming to crown 2023 with export records on the occasion of the 100th anniversary of the Republic, we currently aim to catch up with last year's export figures. We will continue to maintain the success of our industry with projects such as far countries strategy, sectoral purchase and trade committees, sustainability and adaptation to green transformation, design competitions, and sectoral trainings.

The biggest factor that motivates us in our work is our business people, who continue to produce and export in the face of all kinds of obstacles and difficulties. Our exporters, who continue their activities with determination and determination, knowing that challenges bring new opportunities, will advance to their export targets in 2023 with the same determination and determination as they did in 2022. On the occasion of this meaningful work organized by the Türkiye Exporters Assembly, I would like to congratulate the top 1000 exporters of our country, and extend my heartfelt thanks to all our exporters for their contribution to the country's economy.

Tobacco Sector

Ömer Celal UMUR

Member of TİM Sectors Council

SUSTAINABILITY WILL OCCUPY A LARGE PLACE ON OUR AGENDA AGAIN

Compared to the previous year, 2022 was guite positive for our industry. If we look at the effects on the export of our sector, as you know, our tobacco exports are realized under two main headings. Thanks to the performance of 252 million dollars in leaf tobacco exports and 576 million dollars in tobacco products exports in 2022, our total export increased by 6 percent compared to the previous year and was realized as 828 million dollars. If an evaluation is made on the basis of countries, our exports to the countries with our top three markets in leaf tobacco are as follows: We exported 61 million dollars to the USA, 41 million dollars to Iran and 36 million dollars to Belgium. The most significant increase in the export of leaf tobacco was to Iran with an increase of 700 percent. In terms of our tobacco products export, our export volume was 110 million dollars to Iraq, 35 million dollars to the USA, and 30 million dollars to Georgia. The most important increase in exports in the finished product group was to Georgia with 1460 percent.

While Türkiye ranks seventh in world tobacco production, it is the world leader in oriental tobacco production. The main

factors that make our sector successful are our production technologies that can easily meet world standards, the quality of our products, and contracted production with manufacturers. Thanks to the contracted productions in leaf tobacco production, tobacco is produced in around 5 thousand villages in Türkiye, and approximately 60 thousand families earn their living from tobacco production.

During 2023, we will work to win our potential markets while improving our market shares in our current markets. In 2023, as in the previous year, sustainability will occupy a very large place on our agenda. In order to ensure sustainable production and export in leaf tobacco exports, we established the sustainability working group with the participation of the representatives of leaf tobacco exporting companies that are members of our association.

TOP 10000 EXPORTERS OF TÜRKİYE

Gürok Group Is Among The Top 1000 Exporters!

Incorporating two of Turkey's leading brands, LAV and GCA, in glassware and glass packaging categories, Gürok Group was included in the 2022 "Turkey's Top 1000 Exporters" list announced by the Turkish Exporters Assembly (TIM). Operating under the Gürok Group and the world's 5th largest producer of glassware, LAV exports to 140 different countries, primarily France, Spain and the USA, with its innovative and original designs, with a daily production capacity of 2 million units. GCA, the glass packaging producer of the group, undertakes to add value to its business partners and

the country's economy with its effective and sustainable studies in the field of R&D, always keeping respect to the environment and people, and with its understanding of quality and safe production; by exporting to more than 40 countries, it is rapidly moving towards becoming one of the preferred players in the glass packaging industry in the international arena. Contributing to employment with domestic production, Gürok Group continues to contribute to the Turkish economy and development with value-added products by exporting glassware and glass packaging products to all over the world.

ASSESSMENT OF TÜRKİYE'S TOP 10 COMMODITY EXPORTERS IN 2022

LARGEST COMMODITY EXPORTER FORD OTOSAN OF TÜRKİYE IN 2022

Automotive Sector's Leader FORD OTOMOTIV SAN. A.S.

Güven ÖZYURT

General Manager

WE ARE PROUD TO LEAD THE **TRANSFORMATION OF THE INDUSTRY WITH STRATEGIC MOVES**

As the leading company in the Turkish automotive industry, Ford Otosan has been providing innovative products and services that benefit society for over 60 years. In 2022, we continued our determined and steady growth. Our company, which has been Türkiye's export champion for seven consecutive years and the automotive sector export champion for 11 consecutive years, exports vehicles and parts to 94 countries today.

We had a successful year despite the ongoing global semiconductor supply constraints and logistics disruptions in 2022. In an environment where conditions are rapidly changing, we managed to minimize the impact of sectoral challenges on our operations through our qualified human resources, high-quality, flexible, efficient production and agile work approach. We reached the highest production volumes of all time. Our production, which we have grown 11 times in the last 25 years, reached a record level of approximately 466,000 units. By adding Ford's Craiova Factory in Romania to our portfolio, we have become a global player with four factories in two countries, a production capacity of approximately 722,000 vehicles, and

over 20,000 employees.

The most valuable indicator of our engineering and manufacturing power is the fact that Ford Otosan has become the key production center for Ford's most important business segment, commercial vehicles, in Europe. In 2022, with the vehicles we produced in Kocaeli we led Ford to the top of the European commercial vehicle sales for the eighth consecutive year. We also rolled off Ford's first electric commercial vehicle in Europe, the E-Transit, the production line in our Kocaeli factories. The E-Transit, which is a milestone in our electrification journey, is currently a leader in its segment in Europe. Immediately after, we introduced our second fully electric commercial vehicle, Ford E-Transit Custom.

2022 was also a record-breaking year for our Ford Trucks brand. Our brand, which achieved record sales in both domestic and international heavy commercial vehicle markets, increased its production by 30% and its sales by 33%. It expanded its growth successfully in international markets and reached 46 markets as of 2022. We unveiled

Fair (IAA).

Behind this success lies our deep knowledge in the automotive industry, our engineering and manufacturing power, our innovative technologies and our vision to bring the future to life today. We have been investing in the transformation of our industry towards sustainability and digitalization for a long time.

We anticipate that the Turkish automotive market will experience moderate growth in 2023, both in domestic and global markets, with a much more positive outlook. Our industry will once again be the driving force behind exports, thanks to Türkiye's location, logistics advantages, skilled workforce, and local production. As Türkiye's export leader and Ford's commercial vehicle production hub in Europe, we will continue to support our industry with all our might this year. We aim to reach a total sales volume of 670.000 units, with an expected contribution of 570,000 units from overseas sales.

We take pride in leading the transformation of the automotive industry through strategic moves, as evidenced by our consecutive announcements of the largest investments in the Turkish automotive industry.

As the Yeniköy Factory, a cornerstone of our visionary 'plant of the future' investments, undergoes complete renovation and prepares to resume production in 2023, we We had a successful year despite the ongoing global semiconductor supply constraints and logistics disruptions in 2022. We reached the highest production volumes of all time.

our 100% electric truck, which is entirely designed and manufactured by us at our Eskisehir factory, and the latest technologies we achieved in connected and autonomous vehicles at the Hannover International Commercial Vehicle

will also begin the mass production of the next generation Transit Custom model for Europe. With these investments to be made until 2025, along with our Craiova campus, we anticipate that our total capacity will reach 900,000 units, positioning us among the world's leading manufacturers.

2023 will also be a year of emphasizing the progress we have made in production, design, and engineering. The light commercial model, Transit Courier, which was developed by Ford Otosan designers and engineers and introduced to the world from our Ford Otosan R&D center in Istanbul in April, will start production at the Romania Craiova Factory at the end of the year. It is a fully electric and connected nextgeneration Transit Courier is fully electric and connected.

We are extending our expertise in commercial vehicles to the passenger category as well and manufacturing the Puma, one of the best-selling vehicles in the B-SUV segment in Europe, in Romania. With these developments, we are focusing on completing our electrification transformation by offering electric options for all the vehicles we produce in the next two years.

At the same time, we are investing in data to design valuecreating experiences, assist our customers in transitioning to electric vehicles, and personalize their experiences. We are also designing our infrastructure to create the automotive trends of the future.

There is a very exciting future ahead of us. As always, with our vision to lead the way to the future, we will continue to invest in R&D, innovation, and, most importantly, our ecosystem.

SECOND LARGEST COMMODITY Tüpras EXPORTER OF TÜRKIYE IN 2022

Chemicals and Chemical Products Sector's Leader TÜRKİYE PETROL RAFİNERİLERİ A.Ş.

İbrahim YELMENOĞLU

General Manager

WE HAVE FULFILLED OUR **CONTINUOUS MISSION OF MEETING OUR COUNTRY'S ENERGY NEEDS**

We ended 2022 business year on a successful note despite all the challenges, yet unfortunately we were all shaken by the earthquakes, which plunged our country into a state of deep mourning affecting 11 provinces. I wish peace upon the souls of our citizens who lost their lives in the earthquakes and extend my deepest condolences to relatives of all those injured.

We directed Tüpras search and rescue teams to disaster areas within the first hours following the earthquake. We maintained our production without interruption with a sense of responsibility to supply our country's energy needs and delivered the energy needed to all corners of our country, especially in the disaster areas.

Hopes that the exit from the Covid-19 pandemic around the world and the normalization process would gain pace in 2022 gave way to fears regarding energy supply security as the Russia-Ukraine war broke out. This led to a surge in energy prices, with supply security starting to dominate the headlines.

The sanctions against Europe's main energy supplier Russia, imposed by the United States and European countries, soaring energy prices and tight monetary policies due to

globally deepening inflation accounted for major challenges of the past year.

Declining energy and commodity markets arising from geopolitical risks, temporary cuts in demand triggered imbalances and fluctuations in global economy. Destructive impact of climate change, inflationary trends and economic uncertainties, as well as the decline of social welfare, globally reflected as economic regression.

We recorded an export volume of 6 million tonnes and export turnover of USD 5.5 billion.

In 2022, we fulfilled our duty to meet our country's energy needs with a safe operation approach. We produced 26.0 million tonnes of products with a total charge of 27.6 million tonnes and a 92% capacity utilization rate, including crude oil and semifinished products. In line with the recovery in demand we met the majority of the country's demand with 23.5 million tonnes of domestic sales, reaching a sales volume of 29.5 million tonnes including export and transit sales. We reached our pre-pandemic performance through disciplined and effective financial management.

In 2022 we achieved an exports of 6 million tonnes of products and recorded an exports turnover of USD 5.5 billion, gasoline and fuel oil comprising majority of our exports.

Half of our USD 173 million investments allocated to sustainability projects

Our Strategic Transformation Plan, the first year of which we have completed, sets out our aim to transform Tüpraş into a carbon neutral energy company by 2050. We press ahead with the belief that these objectives will contribute significantly to our country's carbon commitments. We defined four strategic business lines - sustainable refining, zero carbon electricity, biofuels and green hydrogen - that Tüpraş will focus as we progress through our objectives. Despite the rapid rise in exchange rates, we realized an investment of USD 173 million, half of which is allocated to sustainability projects.

Significant milestones in the first year of the Strategic Transition Plan

Tüpraş sets out to remain the biggest supporter and business partner in the Turkish aviation industry, which commands an important share in the global aviation industry. As part of our plan, we have taken another important step towards the production of sustainable aviation fuel (SAF), which will significantly contribute to the targets to cut emissions. We signed a license agreement with Honeywell for the use of UOP Ecofining[™] technology at the İzmir Refinery. The project to be implemented with the agreement envisages the conversion of 400.000 tonnes of plant and animal based waste raw materials into sustainable aviation fuel, renewable diesel and other products per year.

Tüpras Ventures was established with the purpose of investing in domestic and international technology ventures in the fields of smart information technologies, energy efficiency, the circular economy and robotic solution technologies, especially in Tüpraş's strategic transition focus areas.

Our first goal in the field of green hydrogen, an area which we attach great importance to, is to establish a demo facility by 2025. We maintain our work in this area without interruption.

efficiency.

Growing stronger with our subsidiaries

Ditas, a subsidiary of Tüpras, operating with Türkiye's largest fleet of oil product tankers, expanded its fleet to 14 tanker with a gross tonnage of 542,879 DWT.

Türkiye's first private railway operator, Körfez Ulaştırma,

We work tirelessly to carry out our investments for the production of new products with high added value and energy transported 2.5 million tonnes of hydrocarbons in 2022 and played an organizational role in the transport of 250,000 tonnes of iron ore.

Tüpraş Trading Ltd continues its activities in the UK with the company maintaining its positive contribution to Tüpraş's activities with spot crude oil trading in addition to its fuel trading activities. In 2022, Tupras Trading realized a total product trade in excess of 8 million tonnes. For the needs of Tüpraş refineries approximately 10 million tons of spot crude oil purchase was made.

Entek achieved sales of approximately 2.7 billion kWh in 2022. Entek also became a 10% partner in WAT Mobility Cözümleri Teknoloji ve Ticaret A.Ş., a Koç Group company established in May 2022 with the mission of rolling out electric vehicle charging stations throughout Türkiye.

Our business partnership, Opet rounded off a successful year with 1,857 stations and a total market share of 18.8% -18.9% in white products and 31.4% in black products.

Committed to produce energy of the future

In line with Koc Holding's global leadership at the United Nations Women's Generation Equality Forum, we developed the "Women in Technology and Innovation Program" to contribute to the commitments announced by the Holding in the field of technology and innovation. We aim to reach 100,000 female students through this program in five years.

As a signatory to the United Nations Women's Empowerment Principles (UN WEPs), we work for equal representation of women with the aim of being an inclusive workplace in energy industry, ensuring that one in every two people we recruit is a woman.

We will continue to provide the energy that our country needs, which we deem as our national responsibility and work to produce the energy of the future.

Tüpras sets out to remain the biggest supporter and business partner in the Turkish aviation industry, which commands an important share in the global aviation industry.

SOCAR THIRD LARGEST COMMODITY EXPORTER OF TÜRKİYE IN 2022 SOCAR TÜRKİYE PETROL TİC. A.S.

Anar MAMMADOV

Head of Refinery and Petrochemicals Business Unit and Petkim General Manager

SOCAR TRADE CONDUCTED EXPORTS AMOUNTING TO 3.751 MILLION TONS IN 2022

SOCAR Türkiye, the largest industrial holding and direct foreign investor in Türkiye, operates through its group company SOCAR Trade in the wholesale and retail fuel, crude oil, air and marine fuel sales sectors.

Our activities in these areas are conducted under the brands SOCAR and Hazar in the fuel distribution sector, SOCAR MARINE in the marine fuel market, and SOCAR AVIATION in the aviation fuel market. SOCAR Trade provides the supply, trade, and logistics of crude oil required by the STAR Refinery, as well as production planning. In 2022, SOCAR Trade conducted exports amounting to 3.751 million tons.

In SOCAR MARINE, we achieved sales of 700 thousand tons in 2022, covering a quarter of the international marine fuel market with a 28% market share.

In the fuel distribution sector, we serve throughout Türkiye with a total of 103 fuel stations operated by SOCAR, including 7 airports, 2 locations on the North Marmara Highway, 2 in Aliağa, and 1 at the Yalova Ro-Ro Customs Terminal. Yalova Ro-Ro Customs Terminal, one of Türkiye's six border gates opening to the sea, allows vehicles leaving for export to also refuel at the SOCAR station. We have been supplying fuel to both national and international airlines since our entry into the aviation sector with SOCAR AVIATION in 2013.

Located in İzmir Aliağa, our facilities hold the title of "Special Industrial Zone," making us the first group of companies to receive this designation in Türkiye. Furthermore, we continued to invest by increasing both the duration and amount of our strategic investment incentive certificates. As a result of our investments, our Petkim facility was selected as the only Turkish company in the World Economic Forum's "Global Lighthouse Network" in 2020 for its advanced infrastructure and utilization of Industry 4.0 technologies, while in 2021, STAR Refinery became the only refinery from Türkiye to be selected. STAR Refinery also holds the distinction of being the only refinery in the world to be included in this league.

Türkiye needs to implement strategic energy

investments of crucial importance to minimize its dependency on external sources. Currently, various state incentives and grants are available for investments that can create added value in the energy sector. Investments in new oil and natural gas facilities, as well as renewable energy power plants, are strongly supported.

Türkiye, with its geographical location, young workforce, and geographic diversity, is a strong player in the global energy sector. As SOCAR Türkiye, we will continue to convert our capabilities and advantages into added value for Türkiye.

SOCAR MARINE achieved sales of 700 thousand tons in 2022, covering a quarter of the international marine fuel market with a 28% market share.

TOYOTA FOURTH LARGEST COMMODITY EXPORTER OF TÜRKİYE IN 2022

TOYOTA OTOMOTİV SANAYİ TÜRKİYE A.Ş.

Erdoğan ŞAHİN

President & CEO

WE AIM TO LEAVE A SUSTAINABLE WORLD FOR FUTURE GENERATIONS

We successfully concluded the year 2022 with \$3.4 billion in exports while carrying out activities effectively to manage the preparation process for our new project.

As Toyota, while continuing our efforts in fully hybrid, plug-in hybrid, electric, and fuel cell vehicles as part of our global carbon-neutral goal, Toyota Otomotiv Sanayi Türkiye (Toyota Motor Manufacturing Türkiye) will contribute to global objectives by producing Türkiye's first plug-in hybrid vehicle, the new generation C-HR (PHEV), for the first time in our plant in Sakarya. We will also have the pride of establishing a battery production line and becoming the first plant in Toyota Europe operations to produce plug-in vehicles and batteries.

With an investment of 317 million euros, the new C-HR that we will produce will play a critical role in Toyota's electrification transformation in Europe and we will reach a total investment amount of 2.3 billion euros.

Guided by the Sustainable Development Goals (SDGs)

We aim to contribute to the development of society and leave a livable world for future generations with our prioritized four items aligned with the Sustainable Development Goals (SDGs). In line with SDG 5 "Gender Equality," we work towards diversity and inclusivity, striving for equal, diverse and inclusive opportunities for women. In 2022, we increased our female workforce from 3% to 11%. Under SDG 4 "Quality Education," we enhance the quality of vocational technical education by working with universities in Sakarya for contributing to the development of a qualified workforce. On the path of becoming a disability-friendly factory, we take step-by-step measures under SDG 10 "Reduced Inequalities." With regard to SDG 13 "Climate Action," Toyota aims to make all production facilities in Europe carbon-neutral by 2030. We work towards minimizing energy consumption, transitioning to green energy, making improvements and investments that

reduce or eliminate CO2 emissions, while also conducting awareness-raising activities throughout the year. In addition to our internal activities, with our "Geleceğe Kadın Eli" (Women's Touch to the Future) project, we prioritize creating awareness on all SDG elements to empower women, enhance their workforce participation, contribute to their children's education, and promote clean agriculture.

Supporting the people after the earthquake disaster

Following the earthquake disaster centered in Kahramanmaraş, we first established an effective intervention plan. Our disaster rescue team, consisting of 51 employees, managed to rescue 19 people from under the rubble. We also provided emergency supplies, tents, and container homes through aid trucks. We accommodated 33 earthquake victims in our factory in Sakarya. We enrolled their children in schools and facilitated their vocational training internships in our factory. Considering the long-

With the mission of "Mobility for All" and "Happiness for All" we will produce Türkiye's first plug-in hybrid car, the new Toyota C-HR, in Sakarya.

> term housing needs of the earthquake victims, we initiated a prefabricated housing project that will complete 72 prefabricated houses in the region and we will continue our support. We allocate a budget fund worth \$1.9 million for all these efforts with TMC & Toyota Europe.

Global excellence in production

In our journey that started 33 years ago, Toyota, based on its core values of high quality, efficiency, skilled workforce and successful cost management, has adapted to the world's electrification transformation. With increasing digitalization, operational excellence, and our social responsibilities, we are proud to crown our contributions as a role model plant in the 100th year of the Republic of Türkiye.

Kibar FIFTH LARGEST COMMODITY Kibar EXPORTER OF TÜRKİYE IN 2022

Ferrous and Non-Ferrous Metals Sector's Leader KİBAR DIŞ TİCARET A.Ş.

Haluk KAYABAŞI

CEO

STRONG GROWTH WITH GLOBALIZATION AND SUSTAINABILITY ACTIVITIES

Our world has been going through challenging times in recent years. There are many unusual developments that left and still leave their impact on the global economy, countries and individuals. Tensions in international relations and Trade Wars, the COVID-19 pandemic, the climate crisis, and natural disasters that leave great destruction behind. As Kibar Holding, while we continued to maintain our strength in global competition with our effective corporate infrastructure and culture, digital competence, effective risk management in all of these processes. Despite 2022 being a year in which the impacts of the pandemic on the global economy were deeply felt, we have achieved great successes and continued our stable growth in exports.

We are proud of being one of the top 5 exporting companies in our country with our export performance through Kibar Dış Ticaret as a Group operating in strategic sectors such as aluminum, automotive supply, flexible packaging, building materials, and iron-steel, which shape the global economy. We are also proud to be one of the most important stakeholders of the sustainable future with our activities in our group companies, our environmental projects, the progress we have made in energy and water efficiency, and our adoption of digital transformation as a corporate culture, while creating economic value for our country.

During the year 2022, we kept our success sustainable in exports thanks to our strategic planning, agile business model, and strong partnerships with both our customers and suppliers. Disruptions in the global supply chain have led to an increase in demand for our products, especially in the packaging and construction sectors. Of course, the strong infrastructure and logistics network of our country also made significant contributions to our export success. Our export volume exceeded \$4.5 billion, and Kibar Dış Ticaret, which carries out the export activities of our group companies, has become one of the top 5 exporters in the country this year once again. I believe that in 2023, as we maintain our cautious optimism, the global economic recovery will continue and demand for our products will remain strong.

"Our focus is on globalization."

As an industrial enterprise that has left 50 years behind, and as we prepare for our second half-century, our focus will be on growing within our globalization plans. As a group with commercial relationships in over 100 countries across 5 continents, there are strategic regions such as America, Africa, and the Middle East where we are strong and want to further deepen our strengths, and where we aim to increase the visibility. Our dream is to fulfill our globalization goal after 10 years. We have deeprooted relationships in our dominant markets. Our flexible production capabilities allow us to provide customized solutions to our customers in different geographies. Our reputation for reliability is one of the defining factors that characterizes us in foreign markets, just as it does in our country. Thanks to our production and guality approach that goes beyond world standards, we are vying for market leadership in our own sectors even in challenging markets like European Union countries.

We are proud of being one of the top 5 exporting companies in our country with our export performance through Kibar Dış Ticaret as a Group operating in strategic sectors such as aluminum, automotive supply, flexible packaging, building materials, and iron-steel, which shape the global economy.

"Sustainability practices will shape the future"

We are taking our steps towards our goals under the guidance of the Kibar Holding 2025 Sustainability Strategy, which we have identified as a result of the intense work of the Sustainability Committee we have established within our Holding. Closer to 2025, the year we plan to realize our sustainability goals, we keep taking real steps to contribute to 36 of the United Nations' 2030 Goals, which we have strategically identified. Because we know that the sustainability practices we are responsible for today will shape the future for all of us.

VESTEL SIXTH LARGEST COMMODITY EXPORTER OF TÜRKİYE IN 2022

Electric and Electronics Sector's Leader VESTEL TICARET A.Ş.

Turan ERDOĞAN

CEO

WE SUCCESSFULLY CLOSED THE YEAR 2022 WITH OUR DIGITAL TRANSFORMATION AND TECHNOLOGY-FOCUSED BUSINESS MODEL

2022 was a year in which the world focused on the process of recovering from the pandemic and faced significant social and economic challenges due to emerging geopolitical developments. Despite Türkiye's economy facing difficulties caused by high inflation, it continued to grow thanks to the positive contribution of exports. As Vestel, we successfully navigated this multidimensional resilience test in 2022, characterized by ongoing economic challenges stemming from the pandemic in the global economy, supply crises due to tensions in international relations, and an energy crisis following imposed sanctions, leading to a deepening inflation cycle. Our flexible and agile structure, combined with our digital transformation and technology-focused business model, enabled us to overcome these challenges successfully.

As one of Türkiye's largest consumer electronics and household appliance manufacturers and exporters, we continued to contribute strongly to the country's export performance in 2022, accompanying Türkiye's growth journey. With our export-focused business model and the strength of our presence in export markets spanning over 160 countries, we successfully implemented our strategy of market diversification.

In 2022, we achieved outstanding performance, further adding value to the national economy through production, employment, and sustainable export growth. Our success trajectory remained stable, driven by our technology, innovation and export-oriented sustainable business model. As a result, we were once again crowned as the export champion in our sector for the 24th time, and we proudly secured the 5th position in Türkiye's overall export rankings. Moreover, in Brand Finance's "Türkiye's Most Valuable Brands" survey of 2022, we climbed seven places and achieved the fourth position, with a brand value of 720 million US dollars.

While geopolitical developments and rising inflation had a negative impact on TV and household appliance demand in our main export market, Europe, we increased our export volume in household appliances through our strong product portfolio and competitive advantages. In the TV segment, we managed to maintain our overseas sales volumes. Within the framework of our export-oriented growth model, we aim to increase our investments and international collaborations in the upcoming period. We are determined to strengthen our presence not only in the European market but also in various regions around the world, such as North America, South America, the Middle East, and South Africa, particularly in the household appliance industry.

We are going through a time of rapid global change and transformation. Uncertainties are increasing, while predictability is diminishing. Although we can not control these conditions, we believe that by managing them effectively, we can ensure the sustainability of our business. With this understanding, in the coming period, we will continue to enhance our ability to overcome challenges by utilizing our experience, capabilities, and adaptability to changing conditions, while leveraging the agility and flexibility offered by our organization.

The value we create through our sustainability-focused business model empowers us to contribute to both our stable growth and the social and economic development in our country and the world. We will continue to be pioneers in building a better, smarter, and more sustainable future through collaborative efforts with all stakeholders. In 2022, we achieved outstanding performance, further adding value to the national economy through production, employment, and sustainable export growth.

Arcelik SEVENTH LARGEST COMMODITY EXPORTER OF TÜRKİYE IN 2022

ARÇELİK A.Ş.

Hakan BULGURLU

CEO

WE HAVE SUCCEEDED IN MAINTAINING OUR GROWTH MOVEMENT

Amidst numerous geopolitical developments that unsettled the global order, businesses faced significant challenges in the past year. Despite the waning effects of the pandemic, the global economy experienced various headwinds that undermined recovery efforts, including the war in Ukraine, supply chain disruptions, climate breakdown, and rising food and energy prices. Unfortunately, these developments had a negative impact on our industry as well. In particular, the rising raw material and energy prices resulted in higher manufacturing costs, and the global white goods market shrank by 7.5% in turnover on a year-on-year basis in 2022. Meanwhile, domestic sales in unit terms contracted by nearly 2% compared to the previous year, while exports remained relatively stable.

Despite several hurdles, such as rising inflation, weakening consumer confidence, and concerns over economic stagnation, our organizational agility enabled us to successfully maintain our growth momentum through robust investments. In the past year, we acquired Whirlpool's operation in Russia, one of the world's leading home appliance manufacturers. Furthermore, with new investments in Bangladesh and Pakistan, we strengthened our manufacturing network across these regions. We also initiated the construction of our new manufacturing facility in Egypt with a USD 100 million investment. Against this backdrop, our revenues in Europe accounted for 41% of our total sales last year, while our revenues in the Middle East and Africa increased by approximately 27% on a EUR basis compared to the previous year. We achieved strong revenue growth in Türkiye as well. In 2022, our consolidated turnover rose by 96% and reached TL 133.9 billion.

In 2022, we remained committed to transforming all our business processes with an unwavering focus on sustainability. Our Ulmi plant in Romania – the prime example of our dedication to sustainable manufacturing – has been awarded 'Sustainability Lighthouse' status by the Global Lighthouse Network initiative of the World Economic Forum. We also became the highest-scoring household durables company on the Dow Jones Sustainability Indices for the fourth year in a row. We have also set the stage for a significant move that is certain to become a landmark in our global growth journey and signed an agreement with Whirlpool to create a new business in Europe. Going forward, our main goal is to cement our leadership in global markets, particularly in Europe. Sustainability will undoubtedly remain at the core of our operations, and we will work to generate positive social and environmental impact. Leveraging our strong R&D capabilities, we will prioritize investments in digital technologies and artificial intelligence (AI).

Lastly, I would like to express my deepest condolences and extend my heartfelt sympathies to all our citizens impacted by the devastating earthquakes. The scale of the disaster is enormous, and recovery will take time. Rebuilding life in the region will be one of our utmost priorities in 2023, and we will continue to support our citizens to the best of our abilities with the guidance of our parent company, Koç Holding. Despite several hurdles, such as rising inflation, weakening consumer confidence, and concerns over economic stagnation, our organizational agility enabled us to successfully maintain our growth momentum through robust investments.

EIGHT LARGEST COMMODITY **EXPORTER OF TÜRKİYE IN 2022**

TGS DIS TİCARET A.S.

Ali TANRIVERDİ

Chairman of the Board

WE ARE BY THE SIDE OF **COMPANIES WITH OUR SOLUTION-ORIENTED WORK APPROACH**

Our company exhibited a performance parallel to Türkiye's overall exports in 2022. We achieved a significant upward trend in exports during the first half of the year. Due to the energy crisis in Europe and concerns about a global market recession, the pace of our export growth slowed down in the second half of the year.

The shift of orders back to China and Asian countries due to the normalization of freight costs also had a negative impact on our exports. Moreover, the high cost increases, particularly in energy and labor, made it challenging for our companies to maintain competitive pricing, weakening their competitiveness. Despite all these negative developments, we managed to increase our exports by approximately 10% in 2022. As known, exports made the highest contribution to Türkiye's economic growth in 2022, and we are happy and proud to have our share in this growth. We would like to express our gratitude to all manufacturing companies and our companions who contributed to this success.

In the current conditions, high costs and the exchange rate continue to adversely affect the competitiveness of our companies. Nevertheless, we anticipate a new acceleration in exports in the second half of the year as global markets return to normal. Increasing the number and sectoral distribution of the companies we provide intermediary services to is among our priorities this year. Currently, our company provides intermediary services to manufacturing companies in the textile, ready-to-wear, leather and leather goods, automotive, chemicals, iron, and non-ferrous metals sectors. In addition to existing sectors, we are also in talks with companies from different industries. Furthermore. we are collaborating with export associations to help our manufacturing companies find new markets abroad and

overcome logistical challenges they face.

TGS Dış Ticaret AŞ. has been a leader in its field for years. We have built our success on the trust and quality service of the companies we serve. As a publicly traded company, trust, respect for the confidentiality of our stakeholders, and transparency are the fundamental principles that shape our work at every stage. With our solution-oriented work approach, we have always stood by our companies. We are proud to celebrate the 100th anniversary of our Republic in 2023. In such a meaningful year, we are working with great enthusiasm alongside our manufacturing companies to contribute even more to the country's exports. With all these efforts, we aim to complete the 100th anniversary of the founding of our Republic with the highest possible performance.

TGS Dis Ticaret AS. has been a leader in its field for years. We have built our success on the trust and quality service of the companies we serve.

TÜRK OTOMOBİL FABRİKASI A.Ş.

TOFAŞ

Cengiz EROLDU

CEO

2022 WAS A YEAR IN WHICH WE TOOK IMPORTANT STEPS TOWARDS THE FUTURE AND ACHIEVED SUCCESSFUL BUSINESS RESULTS

In 2022, the global automotive industry was affected by production bottlenecks caused by fluctuations in raw material and energy costs, particularly due to chip-related supply shortages. While markets became more active with the recovery from the pandemic, inflation-controlling policies created pressure for slowdown, especially in the EU economy. Environmental regulations and the energy crisis led to a significant acceleration in electric vehicle sales. Initiatives aimed at reducing environmental impact in line with the industry's sustainability goals and new collaborations regarding mobility solutions emerged as important topics.

Despite challenging and volatile conditions, our automotive industry achieved a total production of 1,352,000 units, representing a 6% increase compared to the previous year. Despite the slowdown and variability in demand in the global economy, with Europe as our largest export market, automotive exports reached \$31 billion, marking a 5.5% increase in 2022. Thus, the industry's share in our country's total exports reached 12.2%. In the domestic market, total sales of automobiles and light commercial vehicles reached 783,283 units, showing a 6.2% increase compared to the

previous year.

2022 was a year of achieving successful business results and taking important structural steps towards the future for Tofaş. We ensured a high degree of production continuity through our agile operations and effective supply chain management despite the challenges we faced in chip-related material procurement. We produce the Fiat Egea family, consisting of Sedan, Hatchback, Station Wagon, Cross, and Cross Wagon body types, as well as the Fiat Doblò and Fiorino models at our factory.

In 2022, we achieved a production volume of 264,000 vehicles, representing 18.8% of Türkiye's automotive industry production. Representing the FIAT, Alfa Romeo, Jeep®, Ferrari, and Maserati brands in the Turkish automotive and light commercial vehicle market, we attained a market share of 19.2% with 150,013 units sold. Our domestic sales were primarily driven by our locally manufactured models, accounting for 95% of our total domestic sales. With 146,435 units sold and a market share of 18.7% in total passenger car and light commercial vehicle sales, FIAT maintained its leadership position in the overall market for the fourth consecutive time.

Our Egea model, which carries the Tofas signature, has held a special place in our company's history and the automotive industry as a globally recognized product. It has remained Türkiye's most preferred car for the past seven years.

In addition to its record-breaking sales in our country, it has made significant contributions to Türkiye's automotive exports by being exported to various parts of the world. We conduct a significant share of our exports to European countries. In 2022, due to the semiconductor supply disruptions in the European markets, there was a slowdown in production, resulting in a 4% contraction compared to the previous year. The European market closed 2022 at approximately 13% below the pre-pandemic levels of 2019.

Nevertheless, Tofaş achieved an 8.0% improvement in export volumes compared to the previous year in 2022 and our export revenue increased by 109.6% to reach 29.903 million TL. Our export volume accounted for 12% of Türkiye's automotive sector exports, with 121,000 units. We continued to expand our R&D activities in 2022, which are the facilitators of both our domestic production and exports. Tofaş R&D is one of Stellantis' leading R&D centers with its strong product engineering expertise, over 600 employees, and advanced technology and diversity in its laboratories.

Our R&D Center, which is positioned as a global hub for competitive product and technology development, supports not only the products we manufacture but also the development of new automobiles/products for different markets within the Stellantis group, enabling engineering exports. Additionally, we engage in research activities in both product and manufacturing technologies, including European Union projects. One of our significant initiatives in 2022 was the establishment of a branch in Izmir in collaboration with Izmir Institute of Technology, specializing in automotive software, to further enhance our expertise in this field.

With our new R&D branch, we aim to expand the scope of our activities in automotive software, taking on responsibilities in designing components and systems for not only local needs but also other brands and models within the Stellantis world. This includes activities such as virtual-physical validation, prototyping, and advancing our responsibilities in various domains.

Our initiatives to bring innovation to our processes and services gained momentum in 2022, especially with the use of digital technologies. We continued our work towards achieving a smart factory through digital optimization

2022 was a year of achieving successful business results and taking important structural steps towards the future for Tofaş.

applications as part of our industrial productivity priorities. We also maintained our focus on generating digital solutions and services to enhance the customer experience in our sales and after-sales processes.

In summary, during a period characterized by uncertainties and resilience testing, Tofaş successfully navigated the challenges with our experience, competencies, and adaptability to changing conditions. To ensure the sustainability of our achievements, we will continue to enhance our competencies, invest in R&D and product development, and support the well-being and skill development of our employees.

The climate crisis has become a top priority on the sustainability agenda. We are committed to continuously improving our sustainability outcomes by using advanced technologies throughout the supply chain and production processes. In line with this, we closely monitor the European Green Deal and persistently work towards carbon neutrality. Within the framework of the Sustainable Development Goals, we will continue to generate projects that support social development and increase the value we create for our stakeholders.

In March, Tofaş and Stellantis signed a framework agreement for a new commercial vehicle investment and the acquisition of the entire capital of Stellantis Türkiye distribution company, Stellantis Otomotiv Pazarlama A.Ş., by Tofaş, bringing together all Stellantis brands in Türkiye under the Tofaş umbrella. With the implementation of this agreement, following the necessary approvals from relevant competition authorities and regulatory bodies, we aim to create significant synergies and enhance the value we provide to our customers.

As we approach the celebration of the 100th anniversary of our Republic in 2023, we believe that with the confidence derived from our past and our continuously evolving corporate capabilities, our company will achieve new and prideful successes.

ASSESSMENT OF TÜRKİYE'S TOP 10 SERVICE EXPORTERS IN 2022

TURKISH LARGEST SERVICE EXPORTER OF AIRLINES TÜRKİYE IN 2022

TÜRK HAVA YOLLARI A.O.

Prof. Dr. Ahmet BOLAT

Chairman of the Board and Executive Committee

AS THE CARRIERS OF THE NATIONAL FLAG WE REPRESENT OUR COUNTRY IN THE SKIES

As the National Flag Carrier and Türkiye's largest service exporter, Turkish Airlines, we take great pride in celebrating the 90th anniversary of our journey, carrying on with our mission of building bridges between continents, cultures, and people in the 100th year of our Republic. In a period where the global economy faced challenging tests, we successfully completed the year 2022 with profitability, achieving a net profit for the sixth consecutive quarter through our agility, extensive flight network, and highly skilled workforce. Our successful growth performance continues to make significant contributions to the country's economy.

As Turkish Airlines, the National Flag Carrier, we currently hold the title of the airline with the most destinations, flying to 344 points in 129 countries across five continents. In 2022, our fleet of 394 aircraft, which has an average age of 9.1 years, ranked among the youngest and most modern in the world. We carried approximately 72 million passengers, achieving an 85.8% seat occupancy rate on domestic flights and an 80.1% occupancy rate on international flights. Our goal for 2023 is to transport 85 million passengers to their destinations. Having reached 1 billion passengers in 90 years, we aim to welcome our 2 billionth passenger by 2031, eight years from now. With our fleet reaching 415 aircraft by 2023, we aim to further expand it to 800 aircraft within the next 10 years, connecting over 170 million passengers to more than 400 destinations and becoming the leader in its sector.

Turkish Airlines is well aware of its key role in promoting Türkiye on a global scale and continues to add value each day. With our extensive flight network, connection points worldwide, strategic investments, and partnerships, we significantly contribute to Türkiye's economy as the locomotive of exports, providing meaningful momentum. The total service exports of our country reaching 89 billion dollars by the end of 2022 highlight the magnitude of Türkiye's recent economic achievements. On this occasion, I express my gratitude to our President H.E. Recep Tayyip Erdoğan, for his steadfast stance in the export-oriented growth strategy and his dedication to our aviation mission, bringing us one step closer to our goals. As Turkish Airlines, with the approximately 15 billion dollars have undertaken, we continue to support our exporters and we earned in 2022, we continue to fly our country's flag at contribute to our country's export achievements. Thanks to the third protocol we signed with the Turkish Exporters the highest heights in service exports. By the end of 2023, Assembly, we provided special solutions, enabling our through both direct initiatives and service exports, as well as exporters to use a discounted capacity of approximately the incentives and support we provide, we aim to contribute 18 thousand tons, resulting in a 23% increase in exports. On up to 55 billion dollars to our country's economy. We this occasion, I extend my gratitude to the management directly support tourism activities that will bring inputs to of the Turkish Exporters Assembly for their valuable our country and economy, ranging from education to health, contributions and precious collaborations in increasing culture to art, and we carry out efforts that unveil Türkiye's Türkiye's exports. tourism potential.

In 2023, we are making significant efforts in the United States, with the goal of attracting 2 million American tourists to our country. We organize events in important cities in the U.S. to achieve this objective. Furthermore, we intend to accelerate activities that promote various aspects of tourism and increase the inflow of tourists to our country by conducting events in different regions worldwide.

As the rising brand in air cargo, Turkish Cargo becomes an integral part of exporters' logistics solutions, contributing to our country's export success. Through the initiatives we

Turkish Airlines, fully aware of the key role it plays in promoting Türkiye on a global scale, continues to generate added value with each passing day.

Following the successful results of 2022, in 2023, we aim to further strengthen our role in the country's economy, continue to enhance our effective partnerships with the Turkish Exporters Assembly, and thereby increase our contributions to Türkiye's expected record-breaking export figures in 2023. With our extensive flight network, strategic investments, and commitment to sustainability, as Turkish Airlines family, we will continue to support our exporters, contribute to our economy, and proudly fly our flag high in the skies.

PEGASUS SECOND SERVICE EXPORTER OF TÜRKİYE IN 2022

PEGASUS HAVA TAŞIMACILIĞI A.Ş.

Güliz ÖZTÜRK

CEO

OUR TOTAL NUMBER OF GUESTS INCREASED BY 34%, REACHING 26.9 MILLION IN 2022

In 2023 and beyond, our primary goal is to maintain and further enhance our leading position in the industry with an innovative, rational, principled, and responsible approach.

Despite challenging conditions, 2022 was a year of significant achievements for Pegasus Airlines, particularly due to the rapid surge in travel demand during the summer season. As one of the airlines that quickly recovered its capacity during the pandemic, we had expressed our expectations that travel demand would gain strong momentum once restrictions were eased. In line with this, we kept our operations and all our team members prepared to meet the potential demand and increased our capacity to accommodate the surge in demand. Other stakeholders and service providers in the aviation sector in Türkiye also prepared themselves well for the post-pandemic period in a similar manner.

With an extensive international flight network, we served a total of 16 million international passengers in 2022, representing a 9% growth compared to 2019. We highlighted our operational flexibility and agile decisionmaking processes on various platforms, which we believe played a crucial role in managing the post-pandemic period successfully. As a result, not only did we return beyond the pre-pandemic levels in 2022, but we also improved our performance in many operational and financial parameters, breaking our own records.

Our total number of passengers increased by 34% to 26.9 million in 2022. In terms of international flights, our passenger count grew by 96%, outperforming the overall market. We raised our sales revenue by 139%, reaching 2.45 billion euros. Our revenues increased by 41% compared to 2019, which was the last normal year. In terms of available seat kilometres (ASK), our total capacity increased by 8%, and international capacity increased by 23% compared to 2019. We achieved the highest performance in the world with an EBITDA margin of 34.1% at the end of the year. Our net profit for 2022 was 431 million euros. Additionally, we demonstrated the best performance in terms of unit costs among global airlines.

Our main goal is to maintain and further enhance our

leading position in the industry with an innovative, rational, principled and responsible approach in 2023 and the following years. In line with this strategic objective, we plan to increase our total capacity by approximately 20% in 2023. During the 100th anniversary of our Republic, our fleet size will surpass 100 aircraft, and we will continue to grow.

While adding new destinations to our international flight network, we will also plan frequency increases for our existing destinations. Consequently, we will continue to improve and enhance our key operational and financial performance indicators in 2023. Our pioneering digital transformation efforts, fleet transformation with newgeneration aircraft, expansion of our flight network, investments in technology and people, support for aviation's sustainability goals, and our commitment to inclusivity and diversity will be the driving forces behind our sustainable success. In 2023 and the following years, our primary goal is to maintain and further enhance our leading position in the industry with an innovative, rational, principled, and responsible approach.

Chairman of Executive Committee

Serkan KAPTAN

WE HOSTED 78.5 MILLION PASSENGERS AT OUR AIRPORTS IN 2022

As TAV Airports, Türkiye's leading brand in airport operations, we currently operate 15 airports in a total of eight countries. In Türkiye, we manage Antalya, Ankara Esenboğa, İzmir Adnan Menderes, Milas Bodrum, and Gazipaşa Alanya airports. Additionally, we operate airports in Almaty (Kazakhstan), Tbilisi and Batumi (Georgia), Monastir and Enfidha-Hammamet (Tunisia), Skopje and Ohrid (North Macedonia), Medina (Saudi Arabia), Zagreb (Croatia), and Riga (Latvia). Besides airport management, we are also involved in various other airport-related areas such as duty-free, food and beverage services, ground handling, IT, security, and operations. Our global footprint extends to 29 countries and 108 airports with our service companies. Along with our joint ventures, we work with more than 36,000 employees to provide our passengers with the best travel experience.

Following the most devastating crisis in the history of the aviation sector caused by the pandemic, we experienced a rapid recovery in 2022, welcoming 78.5 million passengers at our airports. Thanks to our unique business model and balanced portfolio, we managed to be ahead of the global recovery curve and financially surpass the pre-pandemic levels. During this period, 63% of our revenues were generated from international sources.

In 2023, international travel demand continues to be robust. With the increasing demand, we served a total of 20.7 million passengers in the first four months of the year. During the same period, our international traffic at airports increased by 63% compared to 2022. Despite the impact of the Russia-Ukraine conflict, we expect a strong summer season in 2023. Türkiye will remain a powerful attraction point globally, with its natural, historical, and cultural riches.

Tourism and transportation play a significant role in Türkiye's service exports. These two sectors, which constitute 86% of the total service exports, have stood out positively from the world average during the pandemic. In 2022, they closed with a 47% increase in service exports, surpassing \$90 billion. During the same period, the trade surplus in services also increased by 57% to \$50 billion. Our experience, infrastructure facilities, educated workforce, and values put us one step ahead in global competition.

Aviation, as one of the two main driving sectors of globalization, will continue to grow in the medium and long term. The Airports Council International (ACI World) expects the global passenger count, which was approximately 7 billion in 2022, to reach 19 billion by 2040. This growth will be more significant in the emerging markets, which is where we focus our attention.

As TAV Airports, we continue to work closely with sector stakeholders under the guidance of public authorities, including the Ministry of Transport and Infrastructure and the Ministry of Culture and Tourism, to further advance Türkiye's success story in the aviation sector. As Türkiye's leading brand in airport operations, we currently operate 15 airports in a total of eight countries.

TURİSTİK HAVA TAŞIMACILIK A.Ş.

Yıldıray KARAER

Chairman of the Board of Corendon Airlines

WE HOLD A SIGNIFICANT **POSITION AS AN AIRLINE, BOTH** IN TÜRKIYE AND ACROSS EUROPE

As Corendon Tourism Group, we take pride in being included in the "Türkiye's Top 1000 Exporters" research conducted by the Türkiye Exporters Assembly in 2022. Being listed alongside Türkiye's most valuable companies is a testament to one of the significant examples of our sustainable success.

The Corendon brand plays a pioneering role in its industry, inspiring other organizations and guests. Our journey, which began as a tour operator in the Netherlands in 2001, has evolved into a tourism group that includes airlines, incoming services, and hotels serving in Europe, Türkiye, and the Caribbean.

As the "Airline of Firsts." Corendon Airlines has been making a difference in the aviation sector with numerous innovative practices under the slogan "Make a Difference" since its establishment. In 2005, the year we started our airline operations, we became the first Turkish company to fly passenger aircraft to Amsterdam-Sabiha Gökçen Airport and in 2012 to Gazipaşa Airport. In 2014, we started direct flights from Germany to Antalya. Through collaborations

with the largest tour operators in the market and our dynamic business approach, we have consistently increased the number of seats offered each year, showing a rising success graph.

To increase our flights from the Netherlands and Belgium to Türkiye and the number of tourists we carry, we established Corendon Dutch Airlines, registered in the Netherlands, in 2011. In 2017, in line with our new strategies, we launched Corendon Airlines Europe to meet the growing demand for holiday destinations from Europe. With these three airlines, we operate flights to popular holiday destinations within Europe and Türkiye.

Today, Corendon Airlines is an international airline operating in 65 countries, including Türkiye, the Netherlands, Belgium, Germany, Switzerland, Austria, Spain, the United Kingdom, France, Romania, Poland, Israel, and Egypt, with direct flights to 165 airports.

As Corendon Tourism Group, we continue to expand both our destinations and operation centers. In addition to our operation centers in Antalya, İzmir, and Kayseri in Türkiye,

potential.

With our fleet of 37 aircraft, we continue our operations. As one of the airlines bringing the highest number of tourists to Türkiye, we are a significant airline both in Türkiye and Europe, with over 6 million passengers and more than 1800 employees annually.

We take pride in being listed among Türkive's best workplaces in the 2023 LinkedIn Top Companies list, an achievement recognized by LinkedIn Türkiye. As we celebrate our 19th season in the sky, we aim to continuously develop our company and add new awards in both commercial and corporate aspects.

Contributing to the development of sports and promoting sports tourism in our country is one of the fundamental elements that shape our brand values. Since the beginning of our brand's activities, we have provided sponsorship support to numerous sports clubs, elite athletes, and sports organizations, both domestically and internationally. The clubs, athletes, and organizations we have supported include Anadolu Efes Sports Club, Fenerbahce Opet

we have added Düsseldorf, Köln, and Hannover in Germany, as well as Basel in Switzerland, to our list of operation centers. With the addition of Dalaman Airport as one of Corendon Airlines' operation centers in the summer of 2022, we aim to transport more passengers to the crystalclear waters and golden sandy beaches of the Aegean and Mediterranean regions in 2023.

Under the motto "Your Holiday Airline," while organizing flights from Europe to popular holiday destinations in Türkiye, we also conduct direct flights from various cities in Türkiye to different European destinations, continuing to connect Europe and Türkiye. We believe that Türkiye has a strong tourism potential, thanks to its favorable climate and high-quality hospitality facilities, making it one of the world's significant tourism destinations capable of offering services in various tourism areas throughout the year. To achieve this, we devise strategies that cater to the country's

Women's Volleyball Team, Fraport TAV Antalyaspor, Alanyaspor, Hull City Football Team, FC Nurnberg Football Team, Bike Aid Cycling Team, Turkish Korfbol National Team, Muratpasa Belediyespor Women's Volleyball Team, Muratpaşa Belediyespor Women's Handball Team, Altınordu Football Club. "Firsts' Airline" Corendon Airlines has been making a difference in the aviation industry since its establishment with the motto "Creating a Difference." Throughout its journey, the airline has introduced numerous exemplary practices to the aviation sector.

NINTH SERVICE EXPORTER OF LOGISTICS 4.0 TÜRKİYE IN 2022

EKOL LOJISTIK ANONIM ŞİRKETİ

Arzu AKYOL EKİZ

Türkiye Country Manager

WE HAVE ALWAYS OPERATED WITH THE PRINCIPLE OF DYNAMIC TRANSFORMATION FOR 33 YEARS

Ekol, a leading logistics company operating with a seamless service approach in 12 countries in the fields of transportation, contract logistics, foreign trade, customs, and supply chain management. Understanding that each industry has unique logistic needs, we provide specialized integrated logistics services to various sectors, including automotive, FMCG (Fast-Moving Consumer Goods), food, healthcare, retail, textile, industry, and technology. With distribution centers covering over one million square meters in Türkiye, Germany, Italy, Greece, France, Ukraine, Romania, Hungary, Spain, Poland, Slovenia, and Sweden, we facilitate exporters' businesses. Additionally, our weekly 52 block trains and a fleet of 7,500 vehicles enable us to be among Europe's leading logistics providers, providing opportunities for intermodal transportation.

We have always operated with the principle of dynamic transformation over the past 33 years since our establishment. By enhancing our capabilities in the technology field, we have elevated research and development (R&D) to a competitive advantage point. We possess one of Europe's largest and most modern vehicle fleets in road transportation. With our extensive service network, we provide fast and efficient transportation services. Through significant investments in technological infrastructure with an innovative perspective, we offer partial and full truckload transportation services between all of Europe, Türkiye, Russia, Ukraine, and CIS countries. Utilizing the most effective transportation models, we cater to various industries, including automotive, FMCG, healthcare, e-commerce, retail, textile, manufacturing, and electronics, by providing tailored solutions.

We are the first logistics company to be included in the Turquality program, which we believe contributes significantly to our country's exports. As Ekol, our E2E (end-to-end) software solutions, which include e-commerce, fulfillment, shipping, integration, and order management infrastructure, form the critical building blocks of our e-commerce growth strategy, positioning them at the core of our growth strategy. Through our Ekol360 brand in e-commerce, we provide the muchneeded end-to-end software-supported e-commerce solutions for Turkish SMEs (Small and Medium-sized Enterprises) in collaboration with existing and potential partners, utilizing both internal resources and strategic partnerships.

In 2022, a significant portion of our exports were carried out through our road transportation services. It was also a year where we continued to invest in e-commerce, both in the export market and the domestic market. We established our Belgium warehouse to serve one of our global customers for B2C distribution.

Furthermore, we are continuing our investments in 2023 in our LEED-certified facilities, which demonstrate our leadership approach to energy and environmental design. We are committed to equipping our fleet and ports with low-carbon technologies and equipment such as electric tractors, road train applications, and biofuels. Additionally, we are investing in automation solutions with high-end technology to optimize our operations.

In 2022, a significant portion of our exports were carried out through our road transportation services. It was also a year where we continued to invest in e-commerce, both in the export market and the domestic market

ASSESSMENT OF TÜRKİYE'S SECTOR LEADERS IN 2022

Apparel Sector Leader

TAHA PAZ. VE MAĞAZACILIK A.Ş.

Yalçın ÇAĞLAR Chairman of the Board

WE FINISHED 2022 AS THE LEADER IN THE APPAREL **SECTOR**

As Taha Pazarlama ve Mağazacılık A.Ş., we are experiencing the well-deserved pride of the success we achieved in 2022. Undoubtedly, this success is built upon the efforts of our employees and management teams, as well as the trust placed in us by our customers in more than 60 countries across six continents.

In a country like Türkiye, which is synonymous with apparel, reaching the summit as a sector leader among foreign trade capital companies by climbing the steps one by one is of great importance for our group. When evaluating the success achieved in 2022 from another perspective, it becomes even more significant.

The stagnation in the global economy leading to a contraction in demand, the continuous fluctuations in commodity markets, and the negative impact of the domestic exchange rates on our competitiveness. as well as the shift in the exchange rate against the Turkish apparel sector, undoubtedly require a different evaluation of this period compared to previous years.

Despite all kinds of challenges, the upward momentum

achieved in exports generally demonstrates the resilience of our apparel sector and specifically showcases the performance of Taha Pazarlama ve Mağazacılık A.S.

As Taha Pazarlama ve Mağazacılık A.Ş., thanks to the synergy created by our group companies, we have achieved a strong performance both domestically and internationally, completing exports worth 606 million dollars and becoming a leader in the apparel sector. We know there is still a long way to go as Türkiye's largest apparel group.

We feel a heavy sense of responsibility, as we take what we receive from these lands and give back to the people of this land. With this sense of responsibility, we are preparing to celebrate the 100th anniversary of our Republic. Inspired by the words of our great leader, Mustafa Kemal Atatürk, 'The one who loves their homeland the most is the one who does their duty best,' we will continue to work to do our job in the best possible way. In this very special anniversary, we will

continue to grow together with our group companies on one hand, and on the other hand, we will strive to push our export goals further.

long journey together.

I express my gratitude to our customers who trust us, our colleagues, and all stakeholders involved in the production and marketing processes. I wish us many more years of shared success and happiness on this

As Taha Pazarlama ve Mağazacılık A.Ş., thanks to the synergy created by our group companies, we achieved exports worth 606 million dollars, leading the way in our sector.

Sinan KIZILTAN

Chairman of the Board

KILIÇ DENIZ IS THE LEADER OF THE SECTOR IN 2022, AS WELL

In 2022, we achieved an export of 282 million dollars via our KLC seafood Foreign Trade Company, an affiliate of Kilic Seafood, and we maintained our sector leadership. The most important key of our success that we are a fully integrated seafood company in Turkiye, operating in the fields from fish production to feed factories, packaging and processing facilities, logistics and export. In the aquaculture sector, we have the world's largest fully integrated facility with a production volume of 75,000 tons. We also ensure the continuity of our success by working in our own facilities and with our own team to control all stages of the production and value chain. At Kılıç Seafood, we are proud of being the leading company in the sector with our 2500 employees and an annual production and export volume of 500 million juveniles of sea bream, sea bass, meagre, trout and Turkish Salmon trout.

Since 2010, we have been maintaining the first place in Turkiye in the field of export in the Aquaculture and Animal Products category. We have exported to approximately 60 countries, including mainly Europe, Asia, the Middle East and America at the end of 2022. As Kilic Seafood, we sustain to work for type of new product and follow an export-oriented and growth-oriented path with new investments and projects. In addition, we continue our Green economy-oriented practices adopted at our facilities. With Aegean University, we continue to work on solutions that aim to reduce environmental risks and carbon footprint.

We sat up the facilities for salmon trout production in the eastern region of the Black Sea in 2022. We expanded marketshare by increasing capacity of Turkish salmon Trout production in 2023. In addition to production of sea bass, sea bream, meagre, Turkish Salmon trout and salmon trout, we breed Bluefin Tuna. Our sales of Bluefin Tuna to Japan exceeded our target Especially in 2022. we will continue to increase the capacity of Turkish salmon and exporting it to a wider range of markets, especially to the Far East markets in 2023.

We produce sustainably at our facilities in Mersin, Aydın and Adana to full capacity. Our production continues in our trout facilities in Albania, in our fish feed production facility in Mauritania, and in our sea bass and sea bream facilities of Dominican Republic.

We hold all the quality standard certificates for our industry and ISO18000, ISO22000, IFS, BRC, Global GAP certificates as well as Aquaculture Stewardship Council (ASC) certificates. We also have certificates in the fields of production and environment, which are especially accepted around the world. ASC is one of the world's leading certification and labeling certifications in the field of responsible aquaculture. The GLOBAL GAP certificate is one of the most important certificates that is performed under hygienically safe conditions and the products are produced through environmentally friendly practices. Therefore, in 2022, our delicious and nutritious fish products received high demand both from the domestic market and from all over the world also. As Kılıç Seafood, we sustain to work for type of new product and follow an exportoriented and growth-oriented path with new investments and projects. "Geleceğe Doğru Yeni Bir Yolculuk"

Carpet Sector Leader

ERDEMOĞLU DIŞ TİC. A.Ş.

Mehmet ERDEMOĞLU

Vice President of the Executive Board

WE ENDEAVOUR TO BE MORE SUCCESSFUL AND PROVIDE MORE BENEFITS TO OUR COUNTRY

In our companies Merinos and Dinarsu, we aim to increase our share in the world carpet production from 6% to 7% in 2023 with new investments and effective endeavors. Our companies currently export more than 90% of their production, selling especially to developed countries and the world's largest retail chains. We export to different countries all around the world, particularly in the US, Germany, and the UK. As Erdemoğlu Holding, with more than 15,000 colleagues, all our efforts are to be more successful and provide more benefits to our country. In this context, our Merinos company has started to invest in a polyester chips production facility with an investment value of 250 million US\$, in addition to its ongoing investments. With this investment, which is expected to be operational in 2024 and contribute 500 million US\$ to the turnover. the entire production process from polymer to carpet will be under the same roof and this will be a first in the world carpet industry. Our most important advantage in this investment is that we will supply PTA, which is the main raw material of polyester chips production, from our SASA company's PTA production facility that is the largest

petrochemical investment in Türkiye.

When we look at the world carpet sector, the world's largest machine-made carpet production capacity is present in our country. Our Merinos company also has the world's largest capacity in the production of machine-made carpets. The year 2022 has been a challenging year for our industry in every sense. In 2022, machine carpet exports dropped by 15% and reached 2,3 billion US\$ compared to the previous year, and tufted carpet exports decreased by approximately 2% and amounted to 431 million US\$ year-on-year.

The responsibilities we have as Erdemoğlu Holding impose serious tasks on us on a national scale. The most important ones are to contribute more to employment and to our country by reducing the current account deficit in a way that is least dependent on imports in terms of raw material requirements. Moreover, we have adopted it as a principle to create value for our society while ensuring sustainable growth, and constantly improving ourselves by protecting our innovative spirit. Within the scope of responsibility and sustainability principles to leave a green and clean world to future generations, it was decided to install Solar Power Plants (GES) with a total investment cost of 50 million US\$ on the roofs of the buildings in Gaziantep and Adana central areas for our Merinos and SASA companies. In addition to the energy efficiency projects we implement within the framework of our sustainable development targets, we continue to carry out our production with the awareness of effective use of natural resources and to conduct studies for renewable energy investments.

On behalf of all humanity, we wish for a healthy 2023 year; we hope that all people in the world will live in peace. When it comes to business life, we will shape our production and investment plans according to the changing consumption habits in the world. We will intensify our efforts for recyclable products that have taken their place in the textile and carpet market for the last few years, and we will try to do our part in sustainability in the best manner possible. In 2023, our target is to provide more benefits to our country by continuing the growth in all our companies, as in every year, and to maintain the leadership of the company that exports the most. We export to different countries all around the world, particularly in the US, Germany, and the UK. As Erdemoğlu Holding, with more than 15,000 colleagues, all our efforts are to be more successful and provide more benefits to our country.

ŞİŞECAM DIŞ TİC. A.Ş.

Dr. Selma ÖNER Sisecam Dış Ticaret A.Ş. Chairwoman

WE HAVE COMPLETED OUR CONTINUOUS JOURNEY TO SUSTAINABLE GROWTH SUCCESSFULLY

Sisecam is a major global player in the fields of glass and chemicals. Sisecam is the only global company operating in all core areas of glass production – including flat glass, glassware, glass packaging, automotive glass and chemicals. Sisecam adds sustainable value with its production activities and sales more than 150 countries in Europe, Asia-Pacific, the Americas, Africa and the Middle East. Over half of our sales are realized to international markets. Sisecam conducts production activities in 14 countries on four continents: Türkiye, Germany, Italy, Bulgaria, Romania, Slovakia, Hungary, Bosnia and Herzegovina, Russian Federation, Georgia, Ukraine, Egypt, USA, and India.

Currently, Şişecam ranks among the top two manufacturers of glassware and the top five producers of glass packaging and flat glass. Şişecam also figures among Türkiye's top exporters according to 2021 data of the Turkish Exporters Assembly. In 2021, Şişecam was the Top Exporter in Türkiye in the flat glass, glassware, and glass packaging categories. In the flat glass category, Şişecam was also named the "Company with the Biggest Increase in Exports." In addition to ranking among the top three soda ash producers globally, Şişecam is the world leader in chromium chemicals.

According to its financial results for 2022, Şişecam recorded consolidated net sales of TRY 95.3 Billion (USD 5.8 Billion) while its exports from Türkiye amounted to USD 1.1 Billion. International sales (the sum of exports from Türkiye and sales from production outside Türkiye) accounted for 63 percent of Şişecam's total consolidated sales during the year. In 2022, Şişecam produced 5.8 Million tons of glass, 4.9 Million tons of soda ash, and 4.4 Million tons of industrial raw materials.

While ongoing macroeconomic volatility and geopolitical risks around the world are affecting many companies on a global scale, Şişecam is moving forward on its sustainable growth journey. Şişecam successfully exited a difficult year that had different impacts compared to previous crises. In an environment where disruption in production, supply and logistics affected every industry worldwide, Şişecam advanced towards its global goals in 2022. Şişecam continued to achieve its goals thanks to its forward-looking investments, a new agile structure resulting from the One Şişecam transformation, advanced capabilities, a workforce of more than 24,000 employees worldwide and 88 years of experience.

Şişecam added value to its stakeholders with its operational and financial results in 2022 due to its advanced capabilities centered around smart technologies, highly competent human resources and data-driven decision-making. Our solid results once again demonstrate Şişecam's strong performance even under extremely challenging circumstances, flexibility and adaptability to quickly changing conditions. At Şişecam, we are keenly aware that sustainable success is no accident. Every single day, we strive to make our achievements sustainable. Şişecam obtained these strong results by making the right decisions to effectively manage change. Our data-driven forecasting and exceptional risk management competencies acquired by operating in multiple locations allow Şişecam to achieve sustainable success.

As a well-established company that has been accompanying the 100-years-old Turkish Republic for 88 years, Şişecam proudly represents Türkiye's production power in 14 countries on four continents. In 2023, Şişecam plans to complete its comprehensive transformation effort. Şişecam remains committed to further supporting the growth of the industries to which it provides input, by realizing its planned investments and seizing new opportunities. As a well-established company that has been accompanying the 100-yearsold Turkish Republic for 88 years, Şişecam proudly represents Türkiye's production power in 14 countries on four continents.

Thank you Condé Nast Traveler readers for choosing us as **the best airport in the world.**

www.istairport.com

Cereals, Pulses, Oil Seeds and Products Sector Leader

OBA FOOD GIDA SAN. TİC. A.Ş.

Alpaslan ÖZGÜÇLÜ

CEO

WE ARE HOLDING ONTO OUR POSITION AS TÜRKİYE'S EXPORT CHAMPION

As Oba Makarna, we are committed to providing Türkiye and the world with safe, responsible, and sustainable nutrition. With our production facilities located in Gaziantep and Sakarya/Hendek, we have a daily wheat crushing capacity of approximately 3000 tons and produce 1900 tons of pasta. We distribute our products to over 100 countries.

Beyond our dedication to raw material excellence, we also invest in technology, utilizing industry-leading systems and embracing innovative strategies for product development. With half a century of experience, we harvest the most precious crops from Anatolia, preserving the freshness of wheat from the fields, and transform it into products of world-class quality and utmost concern for human health in our state-of-the-art facilities.

We continued to uphold our innovative and quality-focused approach, resulting in an increase in our global market share in 2022. With our rapid, healthy, and sustainable growth strategy, we had a successful year. Our total net sales, which were 5.56 billion Turkish Lira on December 31, 2021, rose by an impressive 104.55%, reaching 11.38 billion Turkish Lira as of December 31, 2022.

With the awareness that development is achievable through production and export, we aim to contribute even more to the country's economy with continuous new investments and next-generation products. According to the reports of the Türkiye Exporters' Assembly, our company has maintained its position as the export champion in the pasta sector for 10 years, ranking 108th in the ISO 500, and 103rd in the Fortune 500 Türkiye list in 2021.

Thanks to the efforts of over 1000 employees, our increased production volume, exports, and sales revenues have allowed us to retain the title of Türkiye's export champion in the pasta sector since 2012.

We take pride in reaching the capacity of producing 3,000,000 packets of noodles and 300,000 noodle cups per day by increasing the number of noodle lines to 4 at our Hendek factory, thanks to the 15 million Euro investment made in our facilities during 2021-2022. With this capacity, we have established the largest noodle production facility

in both Türkiye and Europe. Furthermore, our goal is to increase the total number of production lines for pasta and noodles from the existing 23 to 25, with the new lines scheduled to be operational in 2023.

We meet half of the electricity used in our noodle production with a 2.4 MW solar power plant installed on our facility's roof. As a result, we not only generate electricity for our facility from renewable energy sources but also prevent 1700 tons of carbon emissions annually. This value is equivalent to planting approximately 33,500 trees, contributing to sustainability efforts in reducing carbon dioxide levels.

We plan to complete our ongoing solar power plant project at our Gaziantep production facility in 2023 to contribute to sustainable living. By doing so, we aim to meet 3,000 MWh of electricity used in our pasta production with the solar power plant, preventing 1800 tons of carbon emissions annually. This initiative will further enhance our commitment to sustainability and reduce our carbon footprint.

In the framework of our R&D activities, the construction

We had a successful year by maintaining our innovative and quality-focused approach without compromising on it in 2022. We increased our global market share through a fast, healthy, and sustainable growth strategy.

> of a 1,200 square meter R&D center has commenced at our Hendek factory in 2022 and we aim to inaugurate this center in 2023. The center will include Microbiology, Instrumental, and Formulation laboratories, as well as a pilot plant laboratory where a miniature version of the noodle production line and an automated sauce mixing machine will be available for testing. Additionally, there will be an industrial kitchen and offices for the application of various recipes. Our R&D efforts will not only focus on product development but also on packaging and recycling waste materials.

We take great pride in concluding the successful year of 2022 with four separate awards, and in 2023, we will continue to represent our country with pride in the global market through new investments.

A101, Turkey's supermarket chain with the highest number of stores, has been awarded as the most reputable brand in the supermarket industry according to the 'Turkey Reputation Index' research.

Consumers who participated in the survey highlighted five key factors that make A101 the most reputable company: rapid growth and advancements achieved, superior service and product quality, emphasis on innovation, technology, and design, being the industry pioneer and, its leading position within the sector.

We would like to express our gratitude to all of our consumers for preferring A101 and their appreciation.

Defence and Aerospace BAYKAR Sector Leader

BAYKAR MAKİNA SAN. VE TİC. A.Ş.

Haluk BAYRAKTAR

General Manager

WE WILL CONTINUE OUR JOURNEY IN THE DIRECTION OF THE NATIONAL TECHNOLOGY MOVE

Having financed all its projects with its equity capital since its establishment, Baykar will maintain its focus on developing high-tech unmanned aerial vehicles in Türkiye's defense and aerospace industry. Whereas public institutions made significant contributions to the defense industry's development, private enterprises brought dynamism to the field and laid the groundwork for exponential growth.

Contributing to Türkiye's productive and sustainable defense ecosystem, Baykar increased the share of exports in all contracts signed in 2022 to 99.3 percent. As the defense and aerospace industry's top exporter, Baykar generated \$1.4 billion of gross revenue in 2022. Exports accounted for 75 percent of the company's total revenue since it launched its R&D process for UAVs. In 2021, Baykar became the defense and aerospace industry's top exporter according to the Turkish Exporters' Assembly (TIM). Baykar's business model, where R&D projects are financed with export revenue and equity instead of government grants, remains unparalleled in the technology, defense and aerospace industries worldwide.

Baykar foresees that its export success will continue steadily in 2023. At the beginning of this year, Baykar achieved a significant milestone by concluding a \$370 million agreement with Kuwait's Ministry of Defense for the sale of Bayraktar TB2 UAVs upon outperforming American, European, and Chinese competitors in a competitive process. Moreover, following our 2023 exports to Romania, the Bayraktar TB2 entered the inventory of four NATO allies and two European Union members. I must add that Baykar signed export agreements with 30 countries for the Bayraktar TB2 UAV and six countries (seven countries as of July 2023) for the Bayraktar AKINCI UCAV to date.

Baykar's most significant motivation in achieving these successes is undoubtedly the vision of a fully independent and prosperous Türkiye. Since our inception, we have been working with the vision of a "National Technology Movement." As more stakeholders embrace this vision, Türkiye gradually breaks free from external dependence andbecomes a country that sets new paradigms and defines doctrines with the technologies it develops. Today, the progress we have made in unmanned aerial vehicles is the most concrete example of this transformation.

Baykar's main source of motivation in achieving that success remains the dream of a fully independent and prosperous Türkiye. Since the very beginning, our work has been guided by the "National Technology Initiative" vision. As more and more stakeholders begin to share that vision, Türkiye gradually liberates itself from foreign dependency and emerges as a paradigm-changing, doctrine-setting country. The point we have reached in the field of unmanned aerial vehicles attests to that fact.

Our success, while quite gratifying, does not stop us from setting our sights on greater achievements. With the Bayraktar KIZILELMA, Türkiye's first unmanned combat

We have reached the highest point in the atmosphere with Türkiye's first unmanned combat aircraft, Bayraktar KIZILELMA. Furthermore, with the establishment of our new initiative, FERGANİ, we have begun activities in the space domain. Our initial goal is to take a concrete step by placing communication satellites into low orbit.

aircraft, we have reached the highest level within the atmosphere. At the same time, our new venture, Fergani, marks the beginning of our activities in space. In that field, our initial goal is to take concrete steps regarding communication satellites which shall be placed into the low Earth orbit (LEO). Subsequently, we will work on orbital transfer vehicles.

Collaborating with stakeholders of the defense and aerospace industry is key to our current and future success. The increasing number of projects in the defense industry, job creation, the sector's gross revenue surpassing \$12 billion, and the significant achievement of exporting \$4.4 billion worth of goods and services all indicate that we have a bright future ahead. Yet the road ahead remains long. The defense and aerospace industry shall continue to march forward and prepare for the races of tomorrow with its R&D and original production model and in line with the vision of the National Technology Initiative.

Dried Fruits Sector Leader

AYDIN KURUYEMİŞ SANAYİ VE TİC. AŞ.

Mahmut Ramiz BALIK

General Manager

OUR INVESTMENT AND EMPLOYMENT PLANS WILL CONTINUE TO INCREASE

We have exerted great effort with our young and dynamic team to adapt to the changing dynamics of trade due to geopolitical issues and ongoing conflicts worldwide after the pandemic. We take great pride in the fact that our hard work and dedication have brought our company to this achievement.

The increasing awareness of the numerous health benefits of nuts contributes to the growing consumption of nuts and dried fruits among broader populations every year.

We are planning to increase our additional investments and employment in the coming years, focusing on production and marketing. We are also continuing our investments in renewable energy usage and processes that reduce carbon emissions in our facilities.

We are aware of the active support provided by our government to exporters, and we see increasing domestic production and taking our exports to higher levels as the most effective solution for the development of our country and overcoming economic challenges. We welcome the new incentives and vision that guide exporters and believe that they will further motivate us in a positive direction.

n 2023, we are hopeful that we will enter a period where we will feel the positive results of the investments we have previously planned and implemented more prominently. Along this path, with the contribution of our government and in line with our national goals, we regularly update our objectives and renew our belief that production and exports are significant gateways for our company, our industry, and our country, adapting to the changing world without making excuses.

On this occasion, we hope that the year 2023 brings prosperity to our export family and our country.

We plan to increase additional investments and employment based on production and marketing in the upcoming years,. We will continue to invest in processes that promote renewable energy usage and reduce carbon emissions in our facilities.

Fresh Fruit and Vegetables Sector Leader

UÇAK KARDEŞLER GIDA SERACILIK ULUSLARARASI NAKLİYE PLASTİK SAN. VE TİC. LTD. ŞTİ.

Hayrettin UÇAK

IN THE 100TH YEAR OF OUR **REPUBLIC, WE DEDICATE OUR** SECTOR LEADERSHIP AS A GIFT **TO OUR COUNTRY**

Companies, like individuals, have turning points in their lives. Our company, which started its trade in the fresh fruit and vegetable sector in 1970 and transitioned to a corporate structure in 1984 under the name Ucak Kardesler Ltd. Sti.. experienced its most valuable and important turning point in 2017 when we achieved the first place in the Turkish Fresh Fruit and Vegetable Sector.

Starting from local markets, continuing for 35 years in the same sector, and receiving numerous awards and first places throughout its activities, our company became the "2017 Türkiye First Place Winner." When the "First 1000 Exporters" book was published in 2017, we were filled with excitement. We realized that this first place came with a serious responsibility, and the mission in the sector had changed.

The thirty-five years of corporate life of our company would now continue with the title of "Türkiye's First Place Winner." With this awareness and mission, we continued to work diligently. We are delighted to have achieved the "sixth sector first place" in 2022, following five consecutive years

of being the sector leader.

In this significant achievement, I extend my thanks and gratitude first and foremost to all family members and to all colleagues who work with dedication in the fields, facilities, offices, and in our logistics fleet.

"We spent the first half of our Republic's century working in this sector. And now, we step into its 100th year as the sector leader." We dedicate this achievement, which fills every member of our company with immense pride, as a gift to our country.

For the past six years, expressing the pride of being listed in the "First 1000 Exporters" book, I want to reiterate the important mottos that I have included in every writing in the booklet.

"Being a Trusted Brand",

"Sustainability",

"Quality and Residue-Free Production",

"Investment in the Sector and Technology",

"Unconditional Customer Satisfaction",

is Impossible",

"Renewable Energy".

"Creating a Collective Intelligence in the Sector"

With these principles and the goal of "Being present wherever there are fruits and vegetables in our country," our sixth championship has been achieved. We will continue to work and serve our country with these mottos. We know that in the fresh fruit and vegetable sector, providing not only quality production but also flawless logistics services is of utmost importance. With this awareness, as Uçak Kardesler Sirketler Grubu, in 2023, we have developed and started providing services with our "Road Logistics Fleet" and established our Sea Logistics Fleet.

We consider the 100th Anniversary of our Republic as a turning point not only for our country but also for our company. In our new century, as Uçak Kardeşler Şirketler Grubu, with the principle of sustainability, we aim to take steady steps towards becoming a "World Brand" with our commitment to the industry, technology, zero-carbon footprint target, investments in renewable energy, and the strengthening and renewal of our road and sea logistics fleets.

In the second century of our Republic, I wish for our country to become a world leader in agriculture, production, and exports, and for the new century to be remembered as the "Türkiye Century" worldwide.

"Production Without Export, Export Without Production

In our new century, as Ucak Kardesler Sirketler Grubu, we aim to take gradual steps towards becoming a "Global Brand" with the principle of sustainability. We are committed to strengthening and renewing our road and sea logistics fleets, embracing advanced technologies. striving for a zero-carbon footprint, and investing in renewable energy sources.

Fruit and Vegetable Products Sector Leader

ALTUNKAYA İNŞ. NAK. GIDA TİC. A.Ş.

Mahsum ALTUNKAYA Chief Executive Officer

INCREASING FOOD DEMAND HAS AFFECTED OUR EXPORTS

For 43 years, Altunkaya Group of Companies has been bringing its range of brands Altunsa, Mahmood Rice, Mahmood Tea, Mahmood Coffee, and Confy to consumers around the world, serving the food, beverage, personal care, agriculture, animal husbandry, and packaging industries all the while driven by its slogan "In Every Field of Life".

At Altunkaya Group of Companies, we ensure that we are always steadily gaining growth with our continuous investments. We owe our success to the strength of our corporate structure, fidelity to modern management principles, and our highly competent, innovative and honest team of employees.

With this talented workforce, we contribute to the achievement of Turkish export goals and strive to develop high value-added products that enable us to be more competitive in global markets. In this regard, we allocate significant resources to R&D activities, and expand our technology and know-how through both our labor pool and investments.

The demand for consumer goods, which has increased over the past two years due to the pandemic, is beginning to decline with the rise in inflation. Despite supply problems and hikes in the cost of raw materials, energy, and logistics, we are proud and happy this year to once again be leader of the fruit and vegetable sector for the ninth time.

Our country's exports increased 12.9% year-on-year in 2022, to USD 254.21 billion. In the fruit and vegetable sector, our exports reached USD 2.525 billion with a year-on-year increase of 24.6%. The increasing demand for food around the world has had a significant impact on the growth of

exports in the food industry. Our country's geographic location, its proximity to target markets, and the logistical advantages it enjoys are key factors in this success. The three top countries to which we export in ranking order are Iraq, the US, and the UK. As a result of the embargo against the Russian Federation, there was significant demand for goods from Türkiye, which was one of the driving factors for the increase in food exports.

The report published by the IMF in January 2023 predicts that the world economy will grow by 2.9% in 2023. High inflation, which was one of the biggest problems in the world economy last year, is predicted to go down in 2023. At Altunkaya Group of Companies, we plan to continue our investments in the coming period with as much zeal as ever before. Our goal will be to continue pursuing sustainable and profitable growth by expanding our brand-based trade of goods to a wider market.

156

At Altunkaya Group of Companies, we ensure that we are always steadily gaining growth with our continuous investments. We owe our success to the strength of our corporate structure, fidelity to modern management principles, and our highly competent, innovative and honest team of employees.

Furniture, Paper and Forestry Products Sector Leader

HAYAT KİMYA SANAYİ A.Ş.

Enes ÇİZMECİ

Vice President, Eurasia & America Operations

OUR 16 BRANDS ARE CONNECTING WITH MILLIONS OF CONSUMERS IN OVER 100 COUNTRIES

As Hayat, we operate in the fast-moving consumer goods sector with the belief that every individual in the world has the right to access quality and reliable products. In the baby care category, we have Molfix and Bebem Natural; in women's personal care category, we have Molped; in personal health category, we have Joly, Evony, and Goodcare; in home care category, we have Bingo, Gleen, Test, and Has; in paper products category, we have Papia, Familia, Teno, Focus, and Nelex; and in pet care category, we have Sholk. Today, we proudly present our total of 16 brands to millions of consumers in more than 100 countries.

Today, with our 21 production facilities in Türkiye, as well as in Egypt, Iran, Algeria, Russia, Nigeria, Pakistan, and Vietnam, along with sales and distribution companies in Morocco, Bulgaria, Kenya, Malaysia, and Thailand, we export to over 100 countries across different geographies.

With our continuously growing export volume, particularly in the Middle East, Africa, Central Asia, and Eastern Europe, we have been consistently among Türkiye's top 50 exporters for 7 consecutive years. Additionally, our production capacity ranks us 4th among "The World's Largest Baby Diaper Manufacturers." We are also the largest producer of cleaning and hygiene papers in the Middle East, Eastern Europe, and Africa.

In addition to the commercial success we have achieved, since our establishment, we have been conducting our business with a strong focus on high quality and innovation. Every step we take is aligned with the principle of benefiting the planet and humanity.

We define all our sustainability activities aimed at reducing environmental impact in our business processes with the motto "Taking Good Care of Life." With this approach, we have implemented numerous exemplary practices in our production processes and continue to work on new ones. In the production of cleaning papers, we consume 4 times less water than industry norms. We use 50% less groundwater resources and steadily reduce wastewater volume. Moreover, in our global production facilities, we have adopted the "produce on-site, consume on-site" approach, and now we have decided to take energy efficiency one step further and increase our share of renewable energy production. Our ultimate goal is to become a carbon-neutral company by our 100th anniversary in 2037.

As we strive to provide the best to our consumers with our products, we also embrace a purpose-driven brand approach by implementing various social responsibility projects.

With the collaboration of the Turkish Ministry of Health, General Directorate of Public Hospitals, we initiated the Molfix Hayat Güvenli Bağlanma Program in 2019. This program aims to help unhealthy or premature babies securely and lovingly bond with life. Through this program, we provided training to 35 hospitals' midwives and nurses in 31 provinces, as well as vital equipment support to neonatal intensive care units. As a result, we have positively impacted the lives of 160,000 mothers and babies, enabling them to

160

We have been among the top 50 exporters in Türkiye for seven consecutive years, thanks to our continuously growing export volume in the Middle East, Africa, Central Asia, and the Balkan regions.

establish secure connections with each other and with life.

With our Molped brand, in 2022, we launched the "Kız Sözü Akademi" project. The aim of this project is to support young girls in building their self-confidence on their path to realizing their dreams. We provided a 12-week training program to 250 university students aged between 18 and 25 years through the "Kız Sözü Akademi." In 2023, we will continue both projects in 11 provinces affected by the earthquake disaster. Our commitment to these initiatives reflects our dedication to making a positive impact in the lives of young individuals and communities in need.

As Hayat, the success of our brands born in these lands, becoming influential on a global scale in their respective categories, is not only a consequence of our business strategy but also a reflection of our national motivation. In the new century of our Republic, we will continue to expand our geographical coverage through both exports and local production principles. This way, we aim to further strengthen our brands' position globally and contribute to our country's brand power in international markets.

FERRERO Hazelnut and Products FINDIK Sector Leader

FERRERO FINDIK İTHALAT İHRACAT VE TİCARET A.Ş.

Bamsı AKIN General Manager

FERRERO FINDIK IS ACTIVELY WORKING FOR A SUSTAINABLE VALUE CHAIN

The Ferrero Group strives for excellence along the entire value chain, focusing on the social and environmental quality of the raw materials it safely uses for its products. Türkiye, the leading country in hazelnut production in the world, is one of Ferrero's main supplier countries for hazelnuts. As Ferrero Findik, we have been continuing our activities since 2014 to contribute to the continuous development of the hazelnut value chain from the hazelnut orchard to the factory in Türkiye.

In the 10th year of our Ferrero Farming Values sustainability program, which we have been carrying out since 2012 for the development of quality and sustainable hazelnuts with the goal of "a hazelnut sector that creates value for everyone", significant strides have been made towards fulfilling our commitments announced with the Ferrero Hazelnut Charter. Hazelnut producers, to whom more than 100 Ferrero Farming Values agricultural and social experts provided training, onsite consultancy and ongoing information support on Human Rights and Social Practices, Environmental Protection and Sustainability, and Supplier Transparency from planting to harvest, had the opportunity to produce with good agricultural and social practices on a combined area of 100 thousand hectares. We reached a total of 50 thousand hazelnut producers in Sakarya, Düzce, Samsun, Ordu, Giresun and Trabzon. We have further expanded the impact of the Ferrero Farming Values program by developing collaborations with nongovernmental organizations, hazelnut producers and all other relevant stakeholders of the value chain and working together towards the development of the hazelnut sector.

Under the Human Rights and Social Practices pillar of our program, we continue to work with the Association of Chocolate, Biscuit and Confectionery Industries of Europe (CAOBISCO) and the International Labor Organization (ILO) in special cooperation to prevent child labor in hazelnut harvesting in Türkiye, focusing on the joyful growth and protection of children and increasing the resilience of hazelnut producing communities. We are working in collaboration with Giresun University, TEGV, Art Everywhere Association, local administrations, hazelnut agricultural intermediaries (known as "dayıbaşı," who manage workers and lead the workforce) and hazelnut producers. With all the projects carried out in this context, we have reached more than 21 thousand children and nearly 9 thousand families in 10 years. Within the scope of the program's 'Environmental Protection and Sustainability Business Model' pillar , our field experts provide hazelnut producers with good agricultural practices such as fertilizing according to plant nutrient needs through soil and leaf analysis, optimizing water use, combating pests and diseases, and correct pruning methods with the training and consultancy they provide in the field throughout the year. Since 2017, we have implemented agricultural practices and innovative agricultural solutions with proven effectiveness in 52 model orchards spread across the Black Sea Region, all of which belong to hazelnut producers, and we have ensured the widespread use of good agricultural practices. Hazelnut quality in model orchards has reached 60 percent.

We also focus on supplier transparency within the scope of the Ferrero Farming Values program, with the aim of ensuring that the hazelnuts we supply are fully traceable from the orchard to the factory. Aware of the importance of tracing hazelnuts back to their source, we continue our efforts to achieve a completely transparent supply chain.

With the strength we derive from the expertise of Ferrero,

Completing its fiscal year on August 31, 2021 with a turnover of 14 billion euros, Ferrero Group continues its activities with 109 companies, 32 production facilities, sales to more than 170 countries and approximately 41 thousand employees. Ferrero Findik has been operating in Türkiye since 2014 as a part of Ferrero Findik Company, which incorporates all of Ferrero's hazelnut activities.

> which designs state-of-the-art production facilities around the world, we continue to make significant investments for the modernization of the hazelnut value chain in Türkiye. In addition to our ongoing modernization investments since 2014, we are rebuilding our hazelnut processing factory in Düzce, located in a first-degree earthquake zone, with innovative seismic isolation and dampening technologies. At the same time, we are continuously improving all links of the hazelnut value chain, from crushing and selection to integrated processing.

We are proud to be the 'Hazelnut and Products Sector Winner' in the 'Türkiye's Top 1000 Exporters' list announced by the Turkish Exporters Assembly (TIM) every year since 2016. With more than a thousand employees and suppliers, we will continue to create value for the Turkish hazelnut industry as a long-term strategic partner and a significant employer, as we have done to date. DAIKIN ISITMA VE SOĞUTMA SİSTEMLERİ SAN. TİC. A.Ş.

Hasan ÖNDER

Daikin Türkive CEO

2022 WAS A YEAR OF INNOVATIONS IN BOTHPRODUCTION AND **PRODUCT DEVELOPMENT FOR US**

We made significant innovations in both production and product development in 2022. In May 2022, we opened our VRV outdoor unit production facility in Sakarya/Hendek, with a total investment of 13 million Euros. Additionally, at our Hendek facility, we initiated production on a new production line for "Sensei" wall-mounted fully condensing boilers.

We have also started manufacturing the FXMA-A series, our VRV indoor unit equipped with the R-32 refrigerant, which is a first in the Turkish market. This indoor unit not only introduces a new product to the Turkish market but also stands out as a model that can earn bonus points for investors seeking LEED-BREEAM green certification. The R-32 refrigerant in this unit offers low global warming potential and high energy efficiency, making it an essential milestone for us as it is the first product of its kind produced by Daikin in Türkiye.

The year 2022 was a rewarding one for us, as our extensive product range and continuous innovation efforts were recognized with prestigious awards. We received the

second-place award in the "Most Exporting Company" category and the first-place award in the "Most Split Air Conditioner Exporting Company" category at the 2021 Export Awards given by the Association of Heating, Cooling, Air-Conditioning Manufacturers and Exporters (ISIB). This recognition reaffirmed our strength in the industry, especially after winning the first-place award in the same category for 2019 and 2020 as well.

Additionally, at the A.L.F.A. Awards 2022 organized by Marketing Türkiye, we received the first-place award in the Cooling Category, showcasing our commitment to managing customer experiences effectively. This victory followed our previous success in the same category last year, making it a consecutive achievement, demonstrating our dedication to excellence.

According to the data released by ISKID, the largest market for split air conditioners experienced a 20% increase in production, a 2% increase in domestic sales, and a 20% increase in exports compared to the previous year. When considering five years of data, there was a significant

growth in split air conditioner production with a rate of 130%, a 35% increase in domestic sales, and a remarkable 260% increase in exports.

The VRV market size also saw a 15% growth compared to the previous year, achieving an impressive 150% increase in export figures. As Daikin Türkiye, we position ourselves as the center for the CIS (Commonwealth of Independent States) countries and actively establish our presence in these markets by providing quality products and services.

In 2022, as part of our efforts to strengthen our presence in the region, we established a new center in Almaty, Kazakhstan. This center will serve as a regional liaison office and handle training and service functions, supported by a team of 16 professionals. As a company that values not only product guality but also pre-sales and after-sales processes, this new center will allow us to provide our customers with comprehensive solutions.

The training function of the newly opened center is of particular significance as it will not only cater to customers in Kazakhstan but also provide training to distributors in neighboring countries such as Kyrgyzstan and Uzbekistan. Moreover, in 2022, we had the privilege to be part of several signature projects both within and outside the country, where our pioneering solutions were utilized. One such project is the "Silk Road Samarkand," a multi-functional tourism complex built in the historical city of Samarkand, Uzbekistan, where we served as the climate control solution partner.

As a company, we firmly believe that innovation is the key to the future, and we recognize that this can be achieved through research and development (R&D). Daikin holds several proprietary inventions, such as VRV technology, and has numerous patents that have been made available for industry use. We take great pride in our position as the 93rd

166

2022 was a rewarding year for us as our extensive product range and continuous commitment to innovation were recognized and rewarded.

company on the "R&D 250 - Türkiye's Companies with the Most R&D Expenditure" list in 2021. Over the past 10 years. we have increased our budget for R&D fivefold, reaching 2 million Euros.

To further strengthen our commitment to R&D, we have decided to expand our current R&D center located in Sakarya-Hendek. We are investing 3.5 million Euros to construct a new R&D center building, which is planned to be operational in April 2024. With the completion of this new facility, our current 2,700 square meters R&D center will expand to an impressive 6,000 square meters. Our investment in R&D contributes significantly to our production capabilities. Today, we export the products manufactured in Sakarya-Hendek to 44 countries, solidifying our position as a strong manufacturing hub in the region.

One of our biggest expectations for 2023 is the rapid adoption of sustainability-focused regulations in Türkiye, similar to those in Europe. As Daikin, we take pride in being a pioneering company that complies with regulations both globally and in Türkiye. In line with our goals to increase energy efficiency and reduce carbon emissions, we have been proactive in adhering to the Environmental Design Requirements related to LOT21, which came into effect in Türkiye on January 1, 2023. These requirements were initially implemented in Europe in 2018, and we were already a company that met the necessary criteria.

Since 2019, we have been introducing VRV outdoor units in Türkive, aligning with our achievements in Europe. Moving forward, we will continue our R&D efforts to focus on producing even more energy-efficient products and solutions worldwide. Our commitment to sustainability remains steadfast as we strive to contribute to a greener future through our innovations and advancements.

Machinery and Components **TürkTraktör** Sector Leader

TÜRK TRAKTÖR VE ZİRAAT MAK. A.Ş.

Aykut ÖZÜNER

Company Leader

WE LEFT BEHIND THE YEAR 2022, WHICH WAS FULL OF SUCCESSES

As TürkTraktör, the first manufacturer of the Turkish automotive sector and Turkey's leading company in the agriculture mechanization, we take firm steps on the road to our 70th anniversary, leading and creating value for every sector where we operate.

We do and go beyond our best to prepare Turkish agriculture and cities for the future. To this end, we identified TürkTraktör's focus as sustainability while shaping the future with the strength bestowed upon us by our deeprooted history. We approach production, agriculture and cities in a new light in line with our sustainability strategy called 'Future Impact'.

We know that "Every step we take today has an impact on the future", so we focus on four areas: Impactful Leadership for the Future, Impact the Future Competencies with Innovation, Impact Responsibly in Operations and Products, and Impact the Future of Agriculture. Starting from our own operations, we strive to minimize our environmental impact in line with our targets. We meet the energy needs of our factories from 100% renewable resources, and we use technologies that will minimize the carbon footprint of the engines used in our agricultural and construction machinery.

2022 was a year full of achievements thanks to the devotion and commitment of our employees, dealers, authorized services, suppliers, and all our stakeholders. We manufactured our 600,000th engine, and started the domestic production of cabins in our factories. These achievements in production helped us break new records in exports. In 2022 our sales to global markets increased by 6% compared to 2021, reaching 17,095 units. Enjoying the production of 44,619 tractors in 2022, we completed the sales of 27,436 units in the domestic market.

We are proud to be the leader of the Turkish tractor market, the fourth largest in the world, and the only company in the market that domestically manufactures more than 90% of the components. Since 2013, where we entered the construction equipment market by adding a new dimension to our partnership with CNH Industrial, we have taken important steps to expand our penetration. Thanks to our significant investments, we started domestic production of construction equipment in our Ankara factory in 2020. We contribute to the transformation of cities with our construction equipment featuring eco-friendly engines complying with the latest emission level requirements.

As TürkTraktör family, we continue to work with commitment and devotion to meet the needs of our farmers in 2023. While achieving our goals one by one, we aim to maintain our successful performance in production, domestic market and exports in 2023. We are proud to be the leader of the Turkish tractor market, the fourth largest in the world, and the only company in the market that domestically manufactures more than 90% of the components.

Mehmet Efendi's Turkish coffee is today enjoyed in 60 countries across the globe.

Mining Products Sector Leader

EKOM ECZACIBAŞI DIŞ TİC. A.Ş.

ECZACIBAŞI

EKOM

Savaş ŞAHİN Ekom Board Member

Esan CEO

OUR GOAL IS TO REACH NEW CUSTOMERS IN EXISTING MARKETS AND ENTER NEW MARKETS

ESAN, a group company of Eczacıbaşı Group, is responsible for the mining sector exports conducted by EKOM, the export arm of Eczacıbaşı Group. Established in 1978 with the objective of providing high-quality raw materials to the ceramic industry, ESAN was the first company to establish a clay enrichment facility in Türkiye in 1979, followed by the first feldspar flotation facility in 1985. Over the years, ESAN has expanded its industrial raw material production from clay to include a wide range of products, including feldspar, quartz, bentonite, and kaolin, which serve as crucial raw materials for various industries, from glass to technology and numerous products essential for modern life.

Esan, always open to innovation and opportunities, expanded its operations to include metallic minerals with the investment in the lead and zinc mine in Balya in 2009, in addition to its initial activities with industrial raw materials. The underground mine produces lead-zinc and copper concentrates and has reached a depth of 1,100 meters, making it the deepest lead and zinc mine in Türkiye. With a total gallery length of 120 kilometers underground, the Balya mine has positioned Esan, and consequently EKOM, as Türkiye's largest lead exporter. This diversification and growth have contributed significantly to Esan's success in the mining sector and its strong position in international markets.

Esan, specializing in natural resources, has become one of Türkiye's leading producers and exporters of industrial minerals and metallic minerals since its establishment. Currently, Esan is the world's top producer of sodium feldspar and serves as a crucial raw material supplier for various sectors, including ceramics, glass, paint, plastic, and abrasives. Its journey from inception to the present has solidified its position in the global market as a significant player in the natural resource industry.

In addition to its production activities, Esan has expanded its portfolio to include the trading of various industrial minerals, aiming to provide services to a broader range of sectors, including welding electrodes, glass, refractories, enamel, abrasives, paint, plastics, and composite stones. Currently, Esan trades nearly 150 different products, further enhancing its role as a comprehensive supplier in the industrial mineral market.

In terms of industrial raw material sales, the year 2022 can be characterized as a year of positive results in line with the market growth until the last guarter. However, the Russian-Ukrainian war, followed by the energy crisis and inflation in Europe, led to a decrease in production capacities by major producers in the region and a general decline in demand in the last guarter. In 2023, Esan plans to overcome the expected global recession and the slowdown experienced in the first quarter in many sectors through its sustainable quality advantage, reserve and facility investments, and its appetite and experience in reaching new markets. As a result of expanding the pool of demand by entering new markets and reaching new customers in existing markets, the second quarter has already shown promising results. The second half of 2023 is expected to continue the improvement, with a focus on value-added products in sectors such as glass, guartz surfaces, etc., aiming to increase market share in new markets and strengthen relationships with existing customers.

The year 2022 can be described as a year with positive results in terms of industrial raw material sales, parallel to market growth until the last quarter.

> In 2022, the imbalance caused by the Russia-Ukraine war, especially in the energy market, led to record-high metal prices, along with the impact of rising energy costs, resulting in the closure of some smelting facilities, which became crucial issues in the metal markets. Esan had a successful year in 2022, adding copper concentrate production to lead and zinc concentrates in metallic minerals. Despite the challenges posed by the energy crisis, the process was well managed, particularly in the first six months, with the shaping of metal prices and financial operations. All metallic concentrates are exported and shipped to smelting facilities in Europe and Asia.

Esan continues to invest in reserves both domestically and internationally in metallic minerals. In 2023, as the expectation of a global recession softens from the second quarter onwards, the lifting of Covid-19 restrictions in China and China's return to the markets are expected to lead to an increase in demand. This surge in demand is also expected to drive a rise in metal prices.

Toy Professional

PİLSAN DIŞ TİC. LTD. ŞTİ.

Oğuzcan ÇETİNALP

Chairman of the Board

WE ARE PROGRESSING STEP BY STEP TOWARDS OUR GOAL OF BECOMING A GLOBAL BRAND

In 1940, our journey began in 40-square-meter production facilities, and we are continuously progressing step by step towards our goal of becoming a global brand in the production of plastic toys. Currently, we are the largest plastic toy manufacturer in Europe, with state-of-the-art production facilities covering an area of 200,000 square meters and employing over 1.200 staff. Since our first export in 1990, we have expanded our reach, and now we export to over 100 countries worldwide.

directed the toy industry towards domestic production.

We achieved a substantial growth of approximately 20% in terms of volume and approximately 35% in terms of revenue in 2022. This growth can be attributed to our increased export market share and expanded production capacity. Our presence in the market since 1940 has provided us with valuable experience, and our innovative approach in research and development, as well as our ability to respond promptly to our customers' demands with new models, has been instrumental in driving the increase in export figures. The pandemic and crises in the Far East in recent years have The difficulties in importing from the Far East, rising transportation costs, and uncertainties in delivery times have made our country an important resource for Europe and nearby regions. As a result, the demand for locally manufactured toys has increased significantly, providing an opportunity for us to meet this demand and strengthen our position as a leading toy manufacturer in the market.

As Pilsan, we continue to sustain our success not only through product quality and delivery times but also through our investments in the environment and people. With 85,000 square meters of closed production area, we are expanding our manufacturing capabilities with an additional 40,000 square meters of production and 10,000 square meters of storage area. We believe that every child around the world has the right to access toys that are produced from healthy raw materials, are of high quality, and bring joy. By combining technology with imagination, we aim to reach more children worldwide each year and continue to lead the industry. Our commitment to providing safe, fun, and innovative toys remains at the core of our mission, and we strive to make a positive impact on children's lives through our products. The experience gained since 1940, our innovative approach in research and development, and our commitment to meeting our customers' demands with complete and short-term solutions have been effective in increasing our export figures.

Olive and Olive Oil VERDE Sector Leader

VERDE YAĞ BESİN MADDELERİ SAN. VE TİC. A.Ş.

Murat TÜRKAL Chairman of the Board

WE ARE RAISING THE BRAND VALUE OF TURKISH OLIVE OIL IN THE INTERNATIONAL MARKET

We have successfully concluded a highly successful year for our country's olive and olive oil sector, significantly increasing our export revenue. As the leading company in the sector, we take immense pride in once again being a key contributor to this success.

The foundation of our achievements lies in the significant investments we make in our human resources. The dedicated efforts of our employees and the strategic planning of our management propel us forward. We continuously produce innovative and sustainable solutions without compromising on quality. Thanks to this approach, we meet our customers' expectations in the best possible way and have attained a prestigious global brand position. We continue to lead in the export of packaged olive oil, and our efforts to enhance the brand value of Turkish olive oil in the international market persist with unwavering dedication and improvement each year.

As the leading company in the sector, Verde, we are

strengthening our position day by day and gaining more influence in the international market. Since acquiring Verde Yağ in 2018, our accelerated investments have enabled us to become not only one of Türkiye's most significant producers and exporters but also one of the key players in the global market for our sector in just a few years.

We place great importance on innovation and modernization, which allows us to strengthen our existing facilities and lead the sector with our newly established ones. Our investments in the environment have enabled us to make our facilities more efficient while fostering an ecofriendly consciousness. We apply these principles in all 10 different production facilities located in various olive regions of our country. Within the group, our production facilities include the largest and most modern refining plants, olive oil pressing facilities, and bran processing plants in the sector.

With a customer and quality-oriented approach, we have rapidly expanded our export network to 50 countries across 6 continents. Receiving praises from leading supermarket and hotel chains worldwide is another source of pride for us. We remain dedicated to meeting our customers' expectations and maintaining a respected position in the industry by staying true to our principles and working with determination.

The current year has become a historic one for Türkiye's olive oil production and exports. According to the announced data, our country has achieved a recordbreaking harvest in olive oil. Additionally, the significant crop loss experienced by other major producing countries has made this year even more crucial for Türkiye. As a leading company in the sector, we are also having a successful season with our experienced team, taking decisive steps to achieve our vision.

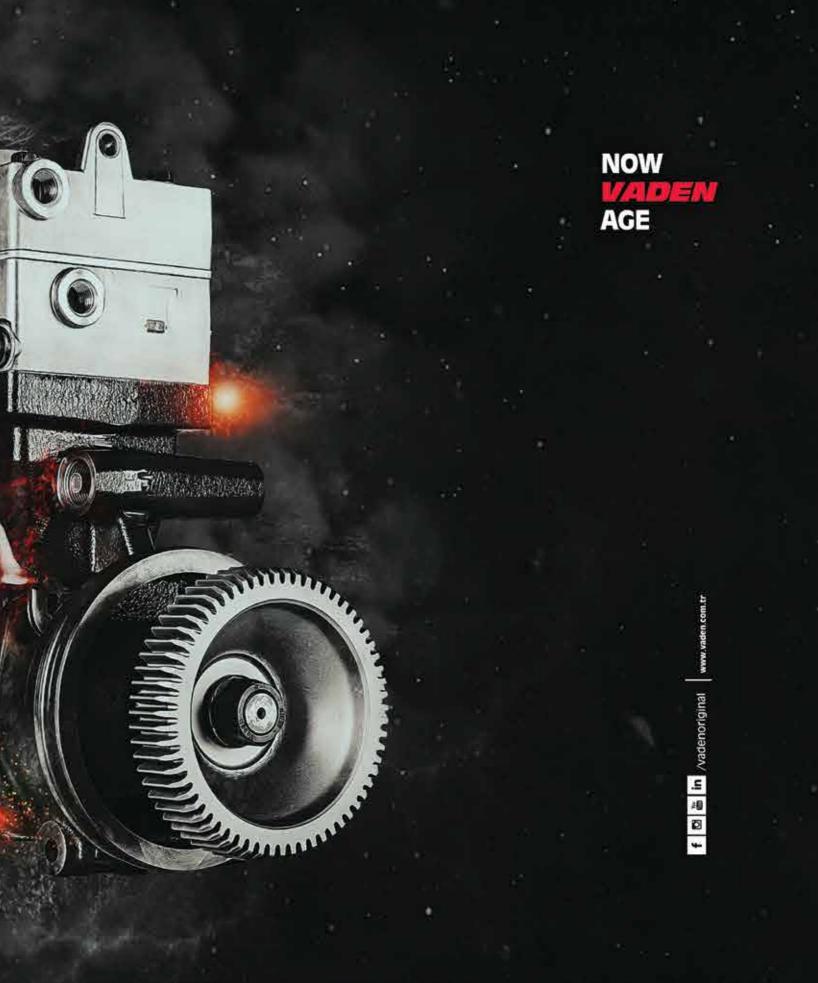

We extend our heartfelt thanks to our dedicated farmers and producers who grow, nurture, harvest, and process these valuable products, which are among the significant exports of our country. Their efforts are highly valued and appreciated in contributing to the success of the olive oil industry in Türkiye.

"With a customer-centric approach and a commitment to uncompromising quality, we have rapidly expanded our export network to 50 countries across six continents."

At the peak of its power

While the world stood still, we did not stop, we constantly worked, we perpetually improved and we rose step by step towards our great goals.

Ornamental Plants and Products Sector Leader

ÇİÇEKÇİLER BİRLİĞİ DIŞ TİCARET A.Ş.

Lütfi GÖBÜŞ

Chairman of the Board

ÇIÇEK AŞ AIMS TO ADD VALUE TO THE COUNTRY'S PRESTIGE

Çiçekçiler Birliği Dış Ticaret A.Ş. (ÇİÇEK AŞ) was established in 1997 as a Sectoral Foreign Trade Company to create joint synergy and consensus among leading companies in the cut flower sector. Over the years, with the power of its unity, it has achieved a success story that serves as an example for the entire agricultural sector.

Under the brand name Turkish Flower Group (TFG), ÇİÇEK AŞ embarked on a mission to introduce Turkish flowers to European markets and establish a significant presence in the industry. By conducting substantial exports to major flower auctions in Europe, ÇİÇEK AŞ has secured an important position in the European flower markets. Moreover, ÇİÇEK AŞ has successfully placed its products on the shelves of European supermarkets, promoting Turkish flowers across the continent.

In the ornamental plants sector, ÇİÇEK AŞ continues

to showcase its TFG brand at the world's largest and prestigious fair, the International Floriculture Trade Fair (IFTF), every year, aiming to further promote its brand to a global audience.

As the pioneering company in the ornamental plants sector, Çiçekçiler Birliği Dış Ticaret A.Ş. continues to experience the joy of being the sector leader, just as in previous years. In 2022, the export of 115 million flower stems required significant organization and effort. One of the most important reasons behind the success in the sector is the power of teamwork, and Çiçekçiler Birliği has successfully applied this principle with the motto "Strength in Unity" to achieve success.

Within its established system, ÇİÇEK AŞ has taken on the logistics operations of its partner companies and developed a comprehensive export system through its logistics center project, providing essential support to manufacturing companies. This success is a result of conventional and systematic work practices that have been implemented diligently.

Currently, Çiçekçiler Birliği Dış Ticaret A.Ş. has proven itself as a reputable company in the carnation market and has entered the European market with various other product varieties. The company continues to expand its product range every day, aiming to establish Turkish flowers as a global brand. Apart from its existing flower varieties, Çiçekçiler Birliği conducts R&D studies for new varieties to further diversify its product range. The company's goal is to export a wider range of flower species in the coming years.

To prevent losses in logistics operations, Çiçekçiler Birliği is working on developing different transportation methods to ensure minimal loss and efficient delivery of products to the end consumers. The company aims to increase its export capacity through national collaboration in the sector and export products that comply with international standards, thereby adding value to both the sector and the country's prestige.

You are absolutely right! Flowers are not just numbers and technical details; they hold a deeper meaning and significance. They symbolize a mother's smile, a person's happiness, and a sense of peace. Beyond the quantitative aspects, our main goal is to touch the lives of more people each year, striving to bring happiness to more individuals. We will continue to work harder and produce more, aiming to spread joy and create memorable moments through the beauty and emotions that flowers bring to people's lives.

Be a flower, spread smiles all around, Promise to be the fragrance on the ground. Be the earth, support and hold with care, Someone will lift you, with love to share. "Be a rose, let your scent embrace, Promise to be the story, love to trace. Find a nightingale with a heart so true, To narrate your beauty, forever anew." By Hz. Mevlana

TERSAN TERSANECİLİK SAN. VE TİC. A.Ş.

Osman Nurettin PAKSU

Chairman of the Board

TWO OF OUR SHIPS THAT WE EXPORTED WERE AWARDED IN 2022

Our shipyard became the export leader in the new shipbuilding and construction sector for the ninth time in the last ten years in 2022. I extend my heartfelt congratulations and thanks to our approximately 5,000 employees who are the architects of this success. Two out of the four ships we exported in 2022, from different segments, were honored with awards. The Havila Capella Passenger Ship, built for Norwegian company Havila Kystruten, received the "2022 New Generation Ship" award, and the "Vladimir Biryukov," built for Russian company Okeanrybflot, was named the Best Super Trawler Ship of 2022. Behind all these achievements, there are numerous interconnected factors that have led us to success. Our management capabilities, commitment to high-quality shipbuilding principles, emphasis on innovation, effective marketing, and strong financial management are among the key factors contributing to our success. Moreover, we believe that our pioneering role in new investments has also played a significant part in achieving this success as Tersan.

Indeed, alongside our own achievements, we are also immensely proud of Türkiye's recent rise in the shipbuilding sector. In 2022, we witnessed a significant increase in demand for new ship construction worldwide, driven by the post-pandemic surge in demand and growth in maritime trade. Türkiye's expertise in shipbuilding, coupled with a skilled workforce and advanced technological infrastructure, has played a pivotal role in shaping the future of the shipbuilding industry. As Tersan, we are delighted to be part of this growing success story and look forward to contributing further to the development and progress of Türkiye's shipbuilding sector.

Of course, we are also affected by global economic uncertainties and political risks. However, we remain hopeful that in the coming years, as these economic uncertainties subside, it will create more opportunities for Türkiye. When we look at the success of Turkish shipyards, there are many factors that provide advantages. Firstly, our geographical location provides an advantage in terms of proximity to the target markets. As a country with a long history in the maritime sector and qualified workers trained in maritime education, we have a skilled workforce. Additionally, we have proven our capabilities in the construction of different types of ships, and we have achieved a wide range of products. At the core of all these factors lies our maritime culture that we have possessed throughout history. This culture plays a significant role in constructing high-quality and technologically advanced ships.

In 2022, we continued our investments in clean energy usage that we started in 2020. With the addition of a 1.3 MW rooftop solar energy panel, our total capacity reached 5.1 MW. With this installed capacity, we currently own one of the world's few, and Türkiye's largest, shipyard rooftop solar power plants. Thanks to our solar power plant and our own wind turbine in Bafa, we use 100% clean energy in all our production processes. We plan to deliver 10 different types of ships that we continue to build using clean energy in 2023, making 2023 an important year for us. Regarding the sector, we aim to achieve a leading position in the construction of fishing vessels, as well as in the offshore and passenger ship segments. All our investment, financial, and marketing activities are channeled in line with these objectives.

186

In 2022, two out of the four different segments of ships we exported were awarded prestigious honors. The "Havila Capella Passenger Ship," which we built for the Norwegian company Havila Kystruten, received the "2022 New Generation Ship" award. Additionally, the "Viladimir Biryukov" ship, which we constructed for the Russian company Okeanrybflot, was named the "2022 Best Super Trawler Ship."

Steel Sector Leader

HABAŞ SINAİ VE TIBBİ GAZLAR İSTİHSAL ENDÜSTRİSİ A.Ş.

Mehmet BAŞARAN

Chairman of the Board

WE CONTINUE TO BE THE CHAMPION OF TURKISH STEEL EXPORTS

HABAŞ, excelling in various fields of activity, continues to carry the flag of leadership in Türkiye, maintaining its first place in long and flat steel exports for the past 15 years.

HABAŞ was established in 1956. Starting with the production of industrial and medical gases, it has grown into one of Türkiye's leading groups today, continuing its industrial activities in various sectors such as iron and steel, LPG, natural gas, heavy machinery manufacturing, energy, banking, automotive and shipbuilding.

HABAŞ holds a leading position in the Industrial and Medical Gases sector. It possesses widespread facilities, high production, storage, and transportation capabilities, an extensive network of dealers, and technical support and maintenance teams across the country. HABAŞ continuously strives to enhance its capacity, sales outlets, and product range to meet the growing demand for industrial and medical gases in Türkiye.

HABAŞ has also been providing support to neighboring countries, especially Balkan countries, Greece, Bulgaria, Serbia, and Macedonia, by directly and indirectly supplying the medical oxygen they need. Besides liquid oxygen, HABAŞ produces, stores, and supplies liquid nitrogen, liquid argon, liquid carbon dioxide, liquid helium, acetylene, hydrogen, anesthesia gases, welding gases, food gases, gas mixtures, high-purity gases, and specialty gases at its facilities throughout the country.

The Steel Industry is one of Türkiye's most important and prioritized sectors, and it is another area where HABAŞ excels as the industry leader. HABAŞ's steel plant, which began production in Aliağa in 1987, currently has a liquid steel production capacity of 4.7 million tons. With new investments, this capacity is expected to increase to 7.5 million tons by the beginning of 2024.

In 2022, global events, particularly the Ukraine-Russia war and the imposition of trade sanctions on Russia have had a negative impact on the production and supply chains in the steel industry. These events, along with the unjust protectionist measures that the EU and the US have continued against Türkiye, further exacerbated the challenges for the steel sector. These obstacles have affected Türkiye's steel exports and created barriers for the industry to expand its international trade activities.

Despite facing significant increases in production costs, as players in the industry, our competitiveness has been weakened. We have been challenged to compete with continuous and high-tonnage sales from the Far East to Türkiye and our important export markets. However, despite these challenges, HABAŞ, exporting long and flat steel products to 40 different countries across five continents, achieved an export value of 1.4 billion USD in 2022.

The main reason for our success lies in HABAŞ's ability to quickly adapt to market conditions and grasp market realities. This strength stems from our experience in the sector. Additionally, HABAŞ diversifies its export markets on a country-by-country basis, develops customer sectors where it can meet demands, and consistently increases the number and quality of customers, adhering to a principle of sustainability.

HABAŞ continues its production of various steel products, including ribbed construction steel, wire rod, hot-rolled flat steel, tempered, pickled, oiled flat steel, patterned steel, slit flat steel coils, and steel billets. We further strengthened our competitive power with the introduction of new products and entry into new markets in 2022.

In line with the decisions made in 2022, we have planned to commission new facilities in the coming years, including the Plate Rolling Mill, Cold and Galvanized Production Plants, and Tinplate line. These investments will cater to the increasing demand for heavy plates in domestic and international markets, serving the shipbuilding, machinery, and construction industries, as well as meeting the needs for wide-coated sheets in the automotive and packaging sectors.

As a leading player in the Energy-LPG sector, HABAŞ offers LPG to consumers in various forms, including cylinder gas, bulk supply, and autogas, through its filling and storage facilities, marine terminals, extensive transportation fleet, and dealer network.

In response to the liberalization of the natural gas sector, HABAŞ obtained the necessary licenses and developed a liquefied natural gas (LNG) supply system to serve customers in areas where natural gas infrastructure is not yet available. Additionally, HABAŞ pioneered the compressed natural gas (CNG) supply chain to cater to customers with lower consumption needs, becoming the

The HABAŞ Group, whose foundations were laid in 1956 with the establishment of Hamdi Başaran's Topkapı Oxygen Factory, is one of Türkiye's leading organizations in various sectors, including Industrial and Medical Gases, Iron and Steel, LPG, Natural Gas, Heavy Machinery Manufacturing, Energy, and Banking

first company to introduce this technology to the market.

HABAŞ's commitment to establishing a presence in all aspects of the energy sector is further demonstrated by its significant investments in electricity generation. With substantial projects in the field, HABAŞ has become a prominent player in the country's energy landscape, contributing to the generation of 860 MWh (megawatt-hours).

HABAŞ's range of activities also includes the manufacturing of industrial facilities. HABAŞ Endüstri Tesisleri is equipped with a wide range of processing, welding, and shaping machinery and specializes in providing turnkey installations for various industrial sectors. They undertake projects such as process plants, air separation facilities, steel production plants, rolling mills, power generation facilities, gas filling and storage facilities, and more. In this field, HABAŞ Endüstri Tesisleri also offers research and development (AR-GE) engineering services.

Furthermore, HABAŞ is recognized as Türkiye's first high-pressure seamless steel tube producer. They manufacture all types of pressure vessels, including both welded and seamless gas cylinders, single and double-wall storage tanks, vaporizers, waste heat boilers, and similar machinery and equipment for the gas industry.

HABAŞ Grubu, with its "100% Domestic" capital, is also active in the banking sector. Anadolubank, a subsidiary of HABAŞ, is one of Türkiye's young, dynamic, and high-potential banks. Acquired from the Privatization Administration in 1997 with only three branches, Anadolubank has shown continuous growth and today operates 116 branches with a total of 1.660 employees, providing services to its customers.

In addition to Anadolubank, HABAŞ Grubu includes other financial institutions such as Anadolu Leasing, Anadolu Faktoring, Anadolu Yatırım, and the Netherlands-based Anadolubank N.V.

With its skilled workforce and strong capital, HABAŞ Grubu will continue to contribute to the growth of the country's economy in the coming years.

Carrying the legacy of a 100-year-old tradition, Verde has once again succeeded in becoming export leader. of Turkey's olive & olive oil. sector with its sales all over the World.

Textile and Raw Materials Sector Leader

AK-PA TEKSTİL İHRACAT PAZARLAMA A.Ş.

Pelin IRGAÇ

General Manager

WE CONTINUE TO BE AMONG TÜRKIYE'S LEADING EXPORT COMPANIES

The overseas marketing and export activities of Akkök Holding created the need for a company within the holding, and thus, the foundations of Ak-Pa were laid in 1976. Today, Ak-Pa exports to 98 countries across 6 continents and its commercial activities started with textile products and later expanded to include the facilitation of foreign trade for all group companies, including chemical products.

In 2022, Ak-Pa facilitated the export operations of the group and achieved an export amount of 629 million USD, continuing to be among Türkiye's leading export companies. Ak-Pa ranked 136th in the Fortune 500 list, which evaluates the highest-performing companies in Türkiye. Additionally, in Capital Magazine's "Capital 500" research, Ak-Pa climbed 44 positions and secured the 181st place compared to the previous year.

Our company's biggest advantage in the export sector is its integrated services with group manufacturing companies and effectively reflecting the strength of the holding. The manufacturing companies within our group include Aksa Acrylic Chemicals, Akkim Chemicals, DowAksa, and Akcoat A.Ş. This integration allows us to offer a wide range of highquality products and services, leveraging the expertise and resources of each company within the group to meet the diverse needs of our international customers. As a result, we are able to maintain a strong position in the global market and continue to excel in the export industry. Aksa Akrilik, for 50 years, has been a leading company both in Türkiye and globally, producing one-fourth of the world's acrylic fiber consumption on its own, with 1450 employees. Its production facility in Yalova covers an area of 600,000 square meters, with a daily production capacity of approximately 950 tons and an annual capacity of 330,000 tons.

In the past year, one of its most significant investments, the Aksafil project, became operational after three years of intense work by Turkish and Japanese engineers. Within this project, Aksa Akrilik successfully produced voluminous acrylic yarn using air jet spinning technology, a process known as high bulk. Aksafil introduced a new business model and excitement in the flat knitting sector, where it is already a leader. The use of air jet spinning technology results in products with less fuzziness and a clearer appearance. Moreover, Aksa Akrilik achieved a yarn output speed of 550 meters per minute with this technology, reducing costs and increasing efficiency.

The technology used by Aksa Akrilik offers functional advantages such as high moisture absorption, resistance to pilling, abrasion, and washing compared to other spinning systems. This advancement has allowed Aksa Akrilik to maintain its leadership in the flat knitting sector while bringing innovation and efficiency to the production process. Akkim Kimya, Türkiye's leading chemical manufacturer, was founded in Yalova in 1977. With over 1000 employees, Akkim operates in five different locations and holds a special position in the chemical industry with its wide range of products. The company's product portfolio includes chlorine-alkali and derivatives, peroxides, methylamines, persulfates, bisulfites, textile auxiliaries, paper and water chemicals, construction chemicals, and plastic additives. Akkim exports to more than 70 countries across 6 continents.

Being a market leader in many products in basic and performance chemicals, Akkim is a partner in various sectors such as cleaning, hygiene, water treatment, textiles, paper, industrial coatings, construction, plastics, food, metal, energy, detergents, drilling, and mining industries. It has transformed into an organization capable of innovating at global standards with its rich product diversity developed at its R&D Center.

Akkim Kimya has made significant advancements in recent years. They acquired Akcoat, the world's leading chemical coating materials manufacturer. In 2016, they entered the advanced technology water treatment sector with an investment in ultrafiltration membrane modules. Additionally, they established Akkim Silikon Kimya to produce high-tech products like silicone polymers. Akkim expanded its investments to international markets by acquiring companies in Germany and Spain.

Furthermore, Akkim Kimya signed the United Nations Global Compact in 2007, showcasing its commitment to sustainability in the chemical industry. As a result of these strategic moves and commitment to sustainability, Akkim Kimya stands as an exemplary company in the field of chemistry.

DowAksa, Türkiye's first and only, and one of the world's leading carbon fiber producers, was established in 2012 as a joint venture between Dow, a global leader in materials science, and Aksa Akrilik, the world's leader in acrylic fibers. Since its establishment, DowAksa has experienced rapid growth in just a decade.

DowAksa focuses on providing carbon fiber and carbon fiber-based composite solutions to various industrial sectors, including wind energy, automotive, and defense industries. Their high-value exports contribute significantly to Türkiye's economy, strengthening the country's position in the global market.

DowAksa generates 90% of its revenues from exports. Particularly, in the global wind energy sector, DowAksa plays a significant role as a supplier. Their high-performance and innovative carbon fiber pultruded profile solution for wind turbine blades improves the performance and efficiency of wind turbines, providing DowAksa with substantial growth opportunities in the sector.

In April 2022, DowAksa laid the foundation for a new facility, and by 2024, it aims to reach an annual carbon fiber production capacity of 13,400 tons. This expansion will also create 500 job opportunities in Türkiye.

Akcoat started its operations in 1979 with frit production and continues to produce in five main categories: enamel, ceramic, non-stick and decorative coatings, pigments, and glass coatings. They are a solution

partner for global brands that lead various industries such as white goods, ceramic tiles, household and kitchenware, glass industry, and digital printing in their respective fields, with their product groups and "advanced chemical coating materials."

Operating in more than 65 countries on 6 continents, Akcoat is a preferred brand with production facilities in Türkiye and Spain. They also have regional offices and subsidiaries in the United States and China. Consistently increasing its international sales and production capacity, Akcoat has been among the industry's export leaders for 14 consecutive years, providing a significant added value to the Turkish economy.

Focused on R&D, digitalization, and innovation, Akcoat is taking solid steps to strengthen its leadership and is implementing new investments in line with this strategy. Their goal is to double their exports and total turnover within five years, aiming to achieve world leadership in the industry.

Ak-Pa demonstrated its commitment to being a pioneer in complying with global and national changes in export processes by sharing instant updates with group companies, ensuring compliance with regulations, and protecting against potential risks in 2022.

As part of its Integrated Management System, Ak-Pa has updated its ISO 9001:2015 and ISO 27001:2017 certifications following interim audits. Adapting to changing regulations, the company obtained the Authorized Economic Operator Certificate in 2018, which grants customs privileges and facilitations to trusted companies recognized by the Ministry of Customs and Trade of the Republic of Türkiye. In 2022, Ak-Pa successfully completed external audits, prepared its annual activity report, and continued to hold the certificate, utilizing the privileges provided by it to expedite customs procedures and accelerate the export operations of group companies.

With its increasing performance, Ak-Pa will continue to contribute to foreign trade in 2023 as well, enhancing its role as a key player in the export industry.

Ak-Pa has been ranked 136th on the Fortune 500 list, which evaluates Türkiye's top-performing companies. In Capital Magazine's "Capital 500" research, which reveals Türkiye's top 500 companies, Ak-Pa has climbed a significant 44 places from the previous year and settled at 181st place.

Cluster Operations Lead

OUR TOBACCO EXPORTS REACHED THE HIGHEST LEVEL IN HISTORY

The Covid-19 pandemic, which shook the entire world three years ago, negatively affected many processes of companies, ranging from supply chain of raw materials through production up to distribution of finished goods. Although the effects gradually abated in 2022, limited effects were still felt in operations such as logistics. In 2022, we exported approximately USD 159 million worth of tobacco products to 55 countries across five continents. We managed to increase the number of countries we supplied by approximately 40 percent and our total export of finished goods by 17 percent yearover-year. In the meantime, also our semi-finished goods export, which stood at USD 10 million, was highest ever. This growth of our export was in large portion driven by production shift to Türkiye due to the Russia-Ukraine war as we have been very quick and agile in our response to this overnight change of world reality.

In 2022, Türkiye's overall exports of tobacco and tobacco products grew by 7,6 percent compared to the previous year and reached USD 841 million. Of these exports,

leaf tobacco accounted for USD 261 million while the remaining USD 580 million were tobacco products.

Tobacco product exports had been in a downward trend on a sector basis since 2019. Last year's increase gave us all hope, but still, despite significant increase of production volume due to war, the pre-2019 export value was not matched, mainly due to cost factors. Reducing costs such as the export code fees used for exported cigarette packs marking would strengthen the competitiveness of our country against others and ensure that the production diverted to our country due to the war will be permanent.

Türkiye is the world leader in oriental tobacco growing, and tobacco is a product with a high commercial value for the country. The tobacco products industry has been creating employment, developing human resources, and generating considerable value with its investments and export revenues for 30 years.

In addition to technology investments, technical and

administrative know-how that is essential for our country is also being created. For example, our employees who were trained at JTI's Torbalı plant are now working in senior management positions all over the world due to their knowledge and experience.

Türkiye's young and talented workforce, experience in this field, and geographical advantages are important assets for attracting investments that will increase the country's production capacity. I firmly believe that we will become a center of attraction among many different markets by regulating the factors I mentioned earlier that create cost disadvantages.

On the other hand, we will continue to take an active role in the sustainable tobacco production and export efforts initiated last year with the contributions of the Aegean Exporters Association.

Unfortunately, 2023 started with the most painful earthquakes for Türkiye. As JTI Türkiye, we have been contributing to both search and rescue and humanitarian aid efforts in the earthquake region since day one, and we will continue to do so. In order to heal the wounds and re-develop the region, not only our Türkiye operations but also JTI will support the medium- and long-term efforts globally. My wish is that the rest of 2023 will be peaceful and healthy for all of us. In 2022, we exported approximately USD 159 million worth of tobacco products to 55 countries across five continents. We managed to increase the number of countries we supplied by approximately 40 percent and our total export of finished goods by 17 percent year-over-year.

ÜRETİM VE PAKETLEME KAPASITESI ILE AVRUPA'DA **ILK 3 ICINDEYIZ**

Yeni yatırımlarla büyüyoruz. 75'ın üzerinde ülkede her gün, milyonlarca kedi sahibinin hayatına dokunan ürünler üreten şirketimiz, küresel ölçekte büyümeye emin adımlarla devam ediyor.

2007 yılında kurulan sirketimiz Bentas Bentonit A.S., ülkemizde bulunan beyaz bentonit rezervlerini, cesitli islemlerden gecirerek dünyada 75'den fazla ülkeye ihrac etmektedir. Türkiye'deki beyaz bentonit rezervlerinin cok büyük bir kismi Ordu-Ünye-Fatsa civarındadır. Bu rezervlerin önemli bölümü sirketimiz himavesindedir.

Türkiye kedi kumu pazarının yüzde 70'inden fazlasını domine eden firmamız, ülke genelinde 45'e yakın büyük toptancı ya da iş ortağıyla halen çalışmaya devam etmektedir.

Ayrıca şirketimiz, hem üretim kapasitesi hem de paketleme kapasitesi olarak Avrupa'da ilk 3 firmadan biridir. Bugün 240 bin ton granül üretim kapasitesine sahip olan firmamız, toplam 350 personele de istihdam sağlamaktadır.

VanCat[®] markamız 3 Temmuz 2019 tarihinde Viyana'da, World Branding Forum tarafından,

"Temizlik ve Hijyen" alanında yılın markası ödülüne layık görüldü. 9 Eylül 2021 de ise ikinci kez bu ödüle layık görülerek ülkemiz pet sektöründe ilk kez ve ikinci kez bu ödüle layık görülen ilk ve tek firma oldu

6 Mart 2020'de TİM önderliğinde düzenlenen "İhracatın Yıldızları" yarışmasında, Özgün Ürün dalında da ödüle layık görüldük.

Bugün VanCat[®] markamız 65 ülkede, Cat's White[®] markamız 25 ülkede pazarlanmaktadır. Bentaş Bentonit olarak kurulduğumuz günden beri en büyük hedeflerimizden biri olan "Türkiye'nin üretimden ihracat yapan ikinci 500 firması" arasına girmiş olmanın mutluluğunu ve gururunu yaşıyoruz.

TOP 3 IN EUROPE WITH PRODUCTION AND PACKAGING CAPACITY

We are growing with new investments. Our company produces products that touch the lives of millions of cat & cat owners every day in more than 75 countries.

Our Company, was established in 2007, exports the white bentonite reserves to more than 75 countries in the world by undergoing various processes. A great portion of the white bentonite reserves in Turkey are around Ordu-Unye. Most of these reserves are under the auspices of our company.

Our company, which dominates more than 70% of the Turkish cat litter market, still continues to work with nearly 45 large wholesalers or business partners throughout the country.

> Our company is one of the top 3 companies in Europe in terms of production and packaging capacity. Our company has 240,000 tons production capacity, provides employment for a total of 350 personnel.

> Our VanCat[®] brand was awarded the brand of the year in the field of "Cleaning and Sanitation" by the

World Branding Forum in 2019 in Vienna. In 2021, it was deemed worthy of this award for the second time, becoming the first and only company in the pet industry to be deemed worthy of this award.

In the "Stars of Export" competition organized under the leadership of TIM in 2020, we were also awarded in the Original Product category.

Today, our VanCat[®] brand is marketed in 65 countries and our Cat's White[®] brand in 25 countries. As Bentas Bentonit, we are experiencing the happiness and pride of being among "Turkey's second 500 companies that export from production", which was one of our biggest goals since our establishment.
