MUSTAFA GÜLTEPE

TİM Chairman

Republic's 100th Anniversary, The Power of Export

The Prestige List of the Republic's 100th Anniversary, The Top 1000 Exporters Survey, was marked by intense competition this year.

2023 will be remembered as a year when the global economy faced challenges. The world economy, which grew by 3.5% in 2022, concluded 2023 with a slower growth rate of 3.2%. Developed economies grew by 1.6% in 2023, while emerging economies recorded a growth of 4.3%. With the decline in global demand, the volume of merchandise trade also contracted. Global exports, which were \$24.9 trillion in 2022, fell to \$23.8 trillion in 2023, a decrease of 4.6%. Despite the shrinking global trade, Türkiye managed to increase its exports by 0.5% to \$255.4 billion in 2023. With this performance in 2023, Türkiye increased its share in global trade from 1.02% to 1.07%. We also achieved a historic milestone in service exports, surpassing \$100 billion for the first time. We raised our share from global service exports to 1.3%.

Let me share a few more details about our exports in 2023:

- We surpassed 150,000 members in our export family with the addition of 18,000 new firms.
- We set export records in 66 countries.
- We achieved exports exceeding \$1 billion to 50

countries.

- We set export records in 10 sectors.
- We exceeded \$1 billion in 23 sectors and \$10 billion in 8 sectors.
- We set export records in 19 provinces.
- We surpassed \$1 billion in exports in 24 provinces.
- We increased our unit export value to \$1.48.
- We organized the highest number of delegation events in our history. We conducted 72 procurement delegations and nearly 150 trade delegations.
- We traveled a total of 1.5 million kilometers for delegation visits, circling the globe 40 times in one year with our exporters.

The domestic and international factors that negatively affected our exports in 2023 continue in the first half of 2024. Starting from the second half, with the revival in global demand, I foresee that we can achieve our target of \$267 billion in merchandise exports. I also believe we can comfortably reach our target of \$110 billion in service exports.

We know that our country has much greater production and export potential. With this awareness, we started the second 100 years of our Republic with the vision and goal of

placing Türkiye among the top 10 countries in exports. We see the projected \$375 billion in merchandise exports and \$200 billion in service exports for 2028 as the first significant test of this ambitious goal.

In our journey to place Türkiye among the top 10 countries in exports, our companies listed in the prestige list have a great responsibility. This year, out of the top 1000, 948 are exporters of goods and 52 are exporters of services. In the top 1000, the chemicals and products sector has 112 companies, ranking first. Ready-to-wear and apparel follow in second place with 100 companies, and automotive ranks third with 95 companies. The top 1000 exporters, on average, achieved exports of \$161.6 million per firm.

The average domestic sales amount of our companies in the top 100 was realized as TRY 4.9 billion. Of the top 100 firms, 435 are located in Istanbul, 87 in Izmir, and 61 in Kocaeli. This year, 167 of our companies experienced the pride of being included in the prestige list for the first time. Companies sharing employment data had an average of 1,147 employees, with an average of 311 female employees.

The responses to the surveys directed to our companies by TİM Economic Research Department shed light on predicting future trends. I would like to extend my thanks to all the companies that participated in and completed the survey.

To achieve the goal pointed out by our leader, Mustafa Kemal Atatürk, of raising Türkiye above the level of contemporary civilizations, we need to work much harder. Our top 1000 companies will lead the way in turning the digital and green transformation process into an opportunity for our country.

I believe that Türkiye will continue to rise through exports. I congratulate the top 1000 companies, which have left no country or region untouched on Earth, and wish them continued success.

This year, out of the top 1000 companies, 948 are engaged in commodity export, while 52 are in the service export sector. In the top 1000 list, the Chemicals and Chemical Products sector has 112 companies. The Ready-to-Wear and Apparel sector follows with 100 companies, ranking second, and the Automotive sector comes third with 95 companies.

PROF. DR. ÖMER BOLAT

Minister of Trade

We are implementing strategies that will serve as a guide for our valuable exporters to extend our export reach further

The Turkish economy and its export potential are widely recognized, and periods where this potential is utilized and developed inevitably lead to success. Over the past 22 years, thanks to the structural reforms we have implemented economically, Türkiye now boasts a robust economy with solid foundations and strong infrastructure.

Despite adverse global economic and trade conditions, our country has continued its successful growth trajectory, maintaining growth for the past 14 quarters and exceeding the forecasts of the Medium-Term Program (MTP) with a growth rate of 4.5% in 2023. With this momentum, Türkiye's economy ranks 1st in Europe, 2nd among OECD countries, and 4th among G20 countries. In 2023, Türkiye achieved a milestone by reaching a GDP of 1.1 trillion dollars, with per capita GDP surpassing \$13,000.

Similarly, our exports, which were \$36.1 billion in 2002, reached \$255.4 billion in 2023, increasing our share in global merchandise exports to 1.08%. The number of exporting firms

has grown from 33,000 to 140,000. With our export routes reaching 240 destinations and nearly 13,000 export product varieties, we continue to reap the rewards of our export mobilization that began in the 1980s. With our exports reaching \$82.9 billion in the January-April period of 2024, marking a 2.7% increase from the same period last year, we are already receiving signals that we will achieve our target of \$267 billion this year.

Furthermore, strong economic policies, the momentum in exports, and recent measures to reduce imports have led to a 30.5% decrease in our trade deficit in the January-April period of this year, while our annualized current account deficit has fallen to \$31.2 billion as of March 2024.

In addition, we closed the year 2023 with a service export figure of \$101.7 billion, and by the end of January-March 2024, this figure had reached \$20 billion. We continue our efforts to achieve our year-end target of \$110 billion.

As the Ministry of Trade, ensuring sustainable export growth

remains among our top priorities. In line with our goals for goods and services exports, we provided a total of 11.7 billion TL in support to exporters last year, and we have doubled this support amount for 2024, considering the positive returns of these supports. In addition to programs where our exporters are actively present in the field, such as trade fairs, trade missions, purchasing delegations, and overseas marketing activities, we also provide significant support for enhancing competitiveness, fostering R&D and innovation awareness, and promoting branding and design culture, while devising new supports.

Moreover, we are intensely engaged with Türk Eximbank and İGE A.Ş. to facilitate access to finance for our goods and services exporters. With this aim, we have developed a pre-financing and guarantee model in coordination with Türk Eximbank and İGE A.Ş. under the Ministry's auspices to further ease access to finance for our exporters, particularly for working capital. Additionally, through İGE A.Ş., which has provided guarantees to over 15,000 exporters amounting to approximately 76.1 billion TL (as of May 14, 2024), and Türk Eximbank, which aims for a support volume of \$50 billion in 2024, we will continue to contribute to facilitating our exporters' access to finance, thereby supporting both their investments and competitiveness at the global level.

To extend our export reach and expand our horizons further, we are implementing strategies that will serve as a guide for our valuable exporters. In this context, we are implementing the "Distant Countries Strategy" to ensure market diversification in our trade and continuing our efforts for the "Islamic Countries Export Development Strategy."

Additionally, under our "2028 Export Promotion and Marketing Vision," aimed at effectively promoting Turkish export products worldwide, we will continue to work together to bring distant markets closer in every step we take in exportation.

Our vision for the Century of Türkiye prioritizes comprehensive development based on green and digital transformation, focused on investment-employment-production-export chain. In line with this, we will continue to work with all our might to strengthen high-value-added product exports and increase Turkish product unit export prices by enhancing our approach centered on R&D, high technology, design, and branding. From commercial intelligence activities to export supports, promotion and marketing activities such as delegations, fairs, congresses, and financial access for exporters, we will strive to offer effective solutions to our exporters.

Guided by the leadership of our esteemed President and the effective efforts of our government on our journey towards the Century of Türkiye, the goals we have set, the projects and

initiatives we will implement in the coming period will guide us, reinforce our motivation and determination.

In this regard, I congratulate our Türkiye Exporters Assembly, which plays a significant role in the remarkable increase in exports day by day, and everyone involved in preparing the Top 1000 Exporters of Türkiye' Study Prestige Book. I wish for the continuation of these valuable efforts.

**We increased our exports from
\$36.1 billion in 2002 to
\$255.4 billion in 2023, raising
our share in global merchandise
exports to 1.08%.**

YILMAZ TUNÇ

Minister Of Justice

We are determined to elevate our trustworthy sense of justice to higher levels in the field of foreign trade

Our country, under the leadership of President over the past 22 years, has made significant strides in every field, creating a stability and trust environment that has strengthened our democracy and economy like never before.

Thanks to the achievements during this period, Türkiye has risen to become a country that produces and exports its products to the global market, continuously expanding its foreign trade volume.

In this success, both the political and economic stability environment and the significant contribution of our esteemed exporters and the Türkiye Exporters Assembly, which unites them under one roof, play a crucial role.

To advance our country's production, employment, and exports to higher levels, our exporters are working diligently, making bold initiatives to strengthen our economy.

You are contributing not only to the rise of our national income through domestic investments but also spreading

the name of our country and local brands to all corners of the world. We take pride in and fully support the efforts you carry out with a vision of a strong Türkiye, a robust economy, and powerful export.

Dear exporters,

Throughout human history, a significant portion of legal regulations has comprised rules related to the economy, making it possible for economic activities to occur ideally only through legal frameworks.

From this standpoint, implementing legal regulations that open the way for our investors and provide them with security in their commercial activities has always been a top priority for us.

Türkiye was among the first countries to sign the Singapore Convention. Through this convention, we have not only attracted international investments to our country but also facilitated the international investment processes for

our investors.

Now, one of the most important solutions we successfully implement in our country is to make mediation effective on an international scale.

Additionally, in collaboration with the Presidency and the Ministry of Trade, we continue our efforts to take swift, effective, and results-oriented steps in resolving disputes and implementing arbitration mechanisms for our exporters.

In this regard, please know that your opinions and suggestions on issues requiring legal regulation are highly valuable to us, and we will make every effort to resolve any issues you face.

Under the leadership of the President, we will further strengthen the stability and trust environment secured by justice and law to elevate Türkiye to greater heights in global exports during the Century of Türkiye. We aim to make the Century of Türkiye not only the century of justice and law but also the century of production, employment, and exports.

With this belief and determination, I wish success and ease to the esteemed members of the Türkiye Exporters Assembly, who prioritize the benefit of our country and our people while producing and presenting their products to the global market, always standing for justice, law, democracy, and human rights.

**We are determined to
elevate our country's
achievements to higher
levels in foreign trade,
just as we have done in all
areas, with our Century
of Türkiye vision and our
reassuring sense of justice.**

MAHİNUR ÖZDEMİR GÖKTAŞ

Ministry of Family and Social Services

Goal: qualified individuals, strong families, healthy society

Türkiye's economic development relies unquestionably on the importance of exports. As our foreign trade volume increases each year, Turkish exporters have become significant players in global markets. The successes achieved by our exporters internationally are crucial not only for their own companies but also for the welfare of society. The rising momentum of exports contributes vitally to increasing employment, which is of vital importance to each of the 85 million citizens, and contributes to economic growth.

In this regard, as the Ministry of Family and Social Services, we highly value every step taken and every success achieved in this field. Each new record set every year fulfills an important duty in strengthening human capital and spreading prosperity across all segments of society, aligned with the goal of "Qualified Individuals, Strong Families, Healthy Communities," one of the five main axes of our 12th Development Plan.

As the Ministry, within the framework of the "Strong Individual, Strong Family, Strong Society, Strong Türkiye"

approach, we develop and implement social policies and services to ensure that our citizens live in a more peaceful, prosperous, and secure society.

Our priority goal as the Ministry is to strengthen the institution of the family. Women have a significant impact and contribution to increasing family and societal welfare and enhancing business dynamism. We believe that the active participation of women in economic, social, and political life is always a crucial factor in Türkiye's growth, development, and progress. With this belief, we have increased the women's labor force participation rate from 27.9% in 2002 to 36.4% and the women's employment rate from 25.3% to 32.2%.

Today, we are implementing important projects in collaboration with relevant ministries, public institutions, non-governmental organizations, and the private sector to increase women's participation in the workforce. Additionally, we plan to develop and expand neighborhood-focused childcare models and promote flexible and remote working models to support women's economic and social

participation.

Furthermore, fulfilling the obligation of being a social state, we support young people in establishing families through the “Family and Youth Fund” created with revenues from our natural resources. This contributes to the healthy and strong foundation of family institutions.

Through the “Social and Economic Support” program, we help preserve family unity and support the healthy development of our children.

Moreover, we strive to improve the living standards of those in need through our social assistance programs for citizens who are unable to work. Under the leadership of our President, Recep Tayyip Erdoğan, policies are produced and implemented across almost every field, from economy to health, from trade to industry, from education to social policies, with the fundamental aim of improving the quality of life for our citizens. Our ultimate goal is to ensure a peaceful future for 85 million citizens and a strong Türkiye.

This book prepared by the Türkiye Exporters Assembly highlights the achievements of our country’s leading 1000 exporters, serving our purpose and distinguishing themselves not only with their commercial successes but also with their visions and contributions to our country’s economic future.

Recognizing successful representatives of the export sector critical to Türkiye’s future and drawing inspiration from their experiences will not only benefit us today but also help lay the foundations for a strong Türkiye of tomorrow.

In conclusion, I thank everyone contributing to increasing Türkiye’s export potential. I believe this book will serve as a valuable resource in showcasing Türkiye’s strength and potential in the field of exports. I hope the successful implementation of the “Top 1000 Exporters Research” will open the door to fruitful collaborations, and I extend my congratulations to all those involved in this valuable endeavor.

I wish success to the members and employees of the Türkiye Exporters Assembly, who contribute to a strong and great Türkiye.

A significant contribution to the increase in family and societal welfare and the dynamism of the business world comes from women. We have raised the women’s labor force participation rate from 27.9% in 2002 to 36.4%, and the women’s employment rate from 25.3% to 32.2%.

MEHMET ÖZHASEKİ

Minister of Environment, Urbanisation and Climate Change

Türkiye has undergone a silent revolution in every field over the past 21 years

We are faced with many extraordinary situations threatening our shared home, such as climate change, earthquakes, and wars.

In this regard, last year's February 6th Kahramanmaraş earthquakes in our country caused significant and challenging damages in many aspects. Within a span of hours, these major earthquakes resulted in the loss of 53,000 lives. It's not easy to comprehend; 18 of our provinces and 14 million people were adversely affected by this earthquake. Besides its humanitarian and social impacts, there is also an economic dimension to the damage. In the twin earthquakes, 680,000 residential units and 170,000 commercial units, totaling 850,000 independent sections, became unusable. Just this sudden loss in residential and commercial properties posed a serious additional burden on our economy. Such a burden could only be borne by a country like Türkiye, which has been constructing numerous major projects in 135 countries over half a century and has the capability to export construction materials worldwide.

As the Ministry, we are continuing the reconstruction

and construction efforts in the disaster area. As of April, we have delivered 76,000 residences. Currently, the construction process of 451,000 independent sections is ongoing. Furthermore, our Ministry has undertaken the infrastructure of our cities affected by the disaster. Our support to local administrations in earthquake regions for infrastructure works exceeds 64 billion TL. The restoration and construction works of historical city squares and city centers of Adıyaman, Hatay, Kahramanmaraş, and Malatya, the cities most affected by the earthquake, are also being carried out by our Ministry. By the end of 2024, we aim to deliver 200,000 residences. Our goal is to provide all eligible beneficiaries with warm homes by the end of 2025.

Our country has proven that it is capable of overcoming even major upheavals like the February 6th earthquake, which was termed as "The Century's Disaster" and which I described as "the heaviest disaster we have experienced in our millennium-long Anatolian saga," through unity and solidarity. Now is the time to use this capability to lay the stones on the path that will turn the second century

of our Republic into the “Century of Türkiye.” With Allah’s permission, the efforts of our people, and under the leadership of our President, Recep Tayyip Erdoğan, I wholeheartedly believe that we will succeed in this endeavor. Undoubtedly, we will achieve this success together with our valuable producers, sector representatives, and business people.

In the past 21 years, Türkiye has silently undergone a revolution in every field, from agriculture to health, education to industry, transportation to urbanization. The stable growth in the economy, the balance in production and employment, enable us to look at the future of our country with greater confidence.

Our fundamental goal, under the leadership of our President, is to advance our country further in every sector and in every field. I thank the valuable employees of the Türkiye Exporters Assembly, who unify our strength by bringing together 115,000 exporters under the same roof, towards achieving this goal.

I wish success to all Turkish exporters participating in the First 1000 Exporters Survey and continuing their efforts to be included in the future. I hope this survey brings benefits to our country and our nation.

Under the vision of our President, in the “Century of Türkiye,” while the whole world consumes Turkish products, we will transform the resulting gains into the welfare of our nation. We will construct identity-based and smart cities that embody the sparks of our civilization, respectful to the environment, resilient to climate change, and aligned with Zero Waste principles.

**Our main goal is to advance
our country in every sector and
field under the leadership of
President Erdoğan. I thank
the valuable employees
of the Türkiye Exporters
Assembly who unite
115,000 exporters under
one roof, adding strength
to our capabilities.**

HAKAN FİDAN

Ministry of Foreign Affairs

We are among the top three countries with the world's widest diplomatic network

Türkiye's global influence projection is significantly shaped by the initiatives of our economy, diplomacy, and business community.

We are currently navigating through a sensitive period marked by geopolitical tensions that amplify pressures on the global economy and pose serious challenges. As the Ukraine conflict enters its third year, tensions among our major export markets persist. Additionally, Israel's disregard for humanitarian norms in Gaza risks escalating the Middle East into deeper regional conflict at any moment.

Monitoring the power struggles among leading global actors, including trade wars, is equally crucial due to their adverse effects on the global economy. The noticeable impacts of climate change, increasing protectionist tendencies in international trade, financial regulations to combat inflation, and ensuring food and energy supply security are among the trials facing the global economy.

Despite significant economic risks on the horizon, the current outlook also presents opportunities, particularly for developing countries, to enhance their trade capacities,

improve competitiveness, and diversify export markets. Indeed, while many advanced economies have experienced low growth rates in 2023, developing countries have shown significant growth.

In such an international context, under the leadership of President Erdoğan and guided by the vision of "Century of Türkiye," Türkiye aims to act as a "stability island," promoting a fairer, more inclusive, transparent, and open international trade system and multilateral cooperation worldwide.

In this regard, the Ministry of Foreign Affairs, with its 261 diplomatic missions worldwide, among the top three countries with the widest diplomatic network, continues to stand firmly beside our exporters, who make significant contributions to our country's economic development, job creation, and foreign exchange earnings.

Enhancing multilateral cooperation, maintaining a rule-based multilateral trading system under the WTO framework, and supporting dialogues with member countries and groups for WTO agreement and rules reform are priorities. Initiatives to reinvigorate the WTO Dispute Settlement Body are also

among our priorities.

In enhancing regional cooperation, Türkiye plays a leading role in organizations such as the Turkic Council, Economic Cooperation Organization (ECO), Black Sea Economic Cooperation (BSEC), and Developing Eight (D-8), aiming to strengthen commercial and economic cooperation.

Amidst these conditions, advancing our external trade and economic interests and enhancing our competitiveness remain priorities within the framework of our foreign policy, national security strategy, and export-driven economic growth model.

With the understanding that foreign policy, economy, and foreign trade are mutually reinforcing elements, we have identified economic diplomacy as one of the key areas of activity for our Ministry.

Our Ambassadors, Consuls General, and Trade Attachés continue to engage in close cooperation and coordination to sustain innovative, impactful, and proactive initiatives in economic matters crucial for our national strength and prosperity.

We maintain close collaboration with relevant institutions, particularly the Ministry of Trade, and umbrella organizations such as the Türkiye Exporters Assembly (TİM).

Despite serious global challenges, Türkiye experienced a severe earthquake disaster last year. Following the earthquake, according to the Türkiye Earthquake Recovery and Reconstruction Assessment Report prepared in collaboration with institutions such as the World Bank, UNDP, and the European Union, the cost of the earthquake was estimated at \$103.6 billion.

In such an environment, while global merchandise exports declined by 5%, Türkiye's exports reached \$255.4 billion in 2023, registering a 0.6% increase, and service exports reached a record high of \$100 billion in the history of the Republic. This success reaffirms our strong economic infrastructure, the dynamism of our companies, their adaptability, and entrepreneurship.

To sustain and further enhance this success, the Ministry of Foreign Affairs will continue to support our exporters, TİM representing them, and our Central and External Organizations.

We view our companies not only as commercial actors but also as diplomatic actors representing our country with Turkish-origin goods and services worldwide.

I commend TİM, which institutionally continues these efforts with its effective and dynamic structure, and I believe that the new edition of the "Top 1000 Exporters of Türkiye" study will provide us and our private sector with new perspectives and guide us towards additional steps that need to be taken.

**With the understanding that
foreign policy, economy
and foreign trade are
elements of power that
support each other,
we have determined
economic diplomacy as one
of the main areas of activity of
our Ministry.**

DR. ALPARSLAN BAYRAKTAR

Minister of Energy and Natural Resources

Our course is full independence

Our country has been developing for 22 years with its growing population and evolving economy. This growth trend naturally increases our demand for energy resources and minerals each year. The rise in our energy consumption and mineral demand also triggers our country's current account deficit.

To solve the current account deficit problem, we have two main tasks ahead of us.

One of them is to make companies such as those listed in the "Top 1000 Exporters of Türkiye" by the Türkiye Exporters Assembly more efficient and produce more value-added products. At the same time, we need to increase the number of these companies. In other words, we need to create a more competitive export structure with more and higher quality firms and products.

While creating this structure, we must simultaneously reduce our country's energy imports and dependence on foreign energy, aiming for full independence in energy without compromising on continuous, sustainable, and cost-effective supply security.

Following our roadmap aiming for full independence, which includes a 22-year history and a 30-year future, we strive to reach our net zero emission target. In this process,

we implemented free market dynamics. We met the demand for electricity and natural gas, which tripled in 22 years. We ensured that \$100 billion worth of investment in electricity alone was made by the private sector.

While meeting our increasing energy needs seamlessly and securely, we carried out revolutionary efforts to reduce energy costs. During this process, we significantly supported competitiveness by offering electricity and natural gas prices to our industrial facilities below European prices.

In line with our National Energy and Mining Policy, which is geared towards "full independence," we made a significant leap to integrate our local and renewable energy resources into the economy.

We started natural gas and oil exploration with our own ships, engineers, and capabilities. We made the largest discoveries in the history of the Republic in both natural gas and oil. We found natural gas in the Sakarya Gas Field in the Black Sea, transported it onshore, and delivered it to our homes and industrial facilities. We began Türkiye's largest oil production in Şırnak's Gabar Mountain, turning the region into an oil hub.

While producing our own natural gas, we can also

comfortably procure gas from many different countries thanks to our strong infrastructure, whether via pipelines or LNG. Consequently, Türkiye has now become a natural gas supplier for Europe. We made natural gas trade agreements with Bulgaria, Hungary, Romania, and Moldova and can export natural gas to these countries.

On the other hand, we reached an installed capacity of 110,000 MW, 57% of which is from renewable sources. With our renewable installed capacity, we rank 5th in Europe and 11th in the world. We aim to add 60,000 MW of renewable installed capacity by 2035, conducting comprehensive studies on permit processes and financing models to achieve this target.

In the field of mining, we broke the record for the highest mining exports in the history of the Republic with \$6.5 billion in 2022. Our mining exports, which were \$5.748 billion in 2023 after a slight decrease, entered an upward trend in the first four months of 2024, reaching \$1.865 billion. We increased the share of mining in GDP from 0.6 per thousand in 2002 to 1.4% in 2022. We aim to increase this share to 2% by 2028 and eventually to 5%. Our ultimate goal is to position Türkiye as a net exporter in mining.

The goals set forth by our President Recep Tayyip Erdoğan for the Century of Türkiye, starting with the 100th anniversary of our Republic, align perfectly with our National Energy and Mining Policy. We view the Century of Türkiye as our country's struggle for full independence. We will make our country fully independent in energy and mining within 30 years, ending external dependence.

We are resolutely continuing our National Energy and Mining Policy. We will continuously increase investment, production, employment, and exports in every field, from oil to natural gas, renewable energy to nuclear energy, local coal to gold, rare earth elements to boron minerals. This will make our country stronger, more prosperous, and larger.

In line with our President's 2053 net zero emission target, we will expand the use of clean and local resources. We will bring more renewable resources online, reduce costs and emissions, and support the decarbonization of the system by starting electricity generation with nuclear energy. We will increase energy savings with energy efficiency policies.

We see the Türkiye Exporters Assembly as our companion on our journey towards full energy independence. I wish success to our Assembly, which acts with the mission of making Türkiye a country with a foreign trade surplus.

I thank the valuable employees of our Assembly who contributed to the research on "Top 1000 Exporters of Türkiye." Believing that the research will be an important resource in forming policies to increase our country's exports, I congratulate all export champions who support our country's growth, development, and progress.

We have made a significant leap to integrate our local and renewable energy resources into the economy in line with our National Energy and Mining Policy, which is geared towards "full independence."

MEHMET ŞİMŞEK

Minister of Treasury and Finance

We provide strong support for exports to achieve the goal of balanced, sustainable, and high growth

We are in a period where cyclical conditions in the global economy are relatively improving, but structural challenges persist. Low productivity, inflation running above the long-term average, high global indebtedness, and increasing geopolitical tensions are negatively affecting the world economy. Projections by the International Monetary Fund for five years ahead indicate the lowest global growth in the last 30 years.

The impacts of the pandemic and ongoing wars are reshaping global supply chains. Increasing geostrategic competition and fragmentations in global trade are strengthening the trend of sourcing from friendly and nearby countries. Given Türkiye's strategic location, market size, advanced production structure, and product diversity, it is highly likely that Türkiye will be positively affected by these trends. This is because we are friendly with the European Union through candidate country status and the Customs Union. We are friendly and close with the countries of the

Middle East, North Africa, and Central Asia.

In the development drive that our country has carried out under the leadership of our President over the past 21 years, our exporters have made significant contributions. Exports, which were \$36 billion in 2002, surpassed \$255 billion in 2023, breaking the record in the history of the Republic.

Today, our country is one of the world's leading production and export centers in many sectors. We are number one in Europe in the production of white goods, commercial vehicles, cement, ready-mixed concrete, glass, and solar energy panels; we rank in the top five globally in white goods, tourism, and the steel industry.

Thanks to policies aimed at increasing market and product diversity, the number of products with exports exceeding \$1 billion increased from 9 in 2002 to 54 in 2023, and the number of countries from 8 to 50. The number of exporting companies approached 140,000 from 31,000, while Türkiye's share in global exports rose from 0.5% to 1.07%.

We stand by our exporters in increasing productivity, innovation, and branding to protect our gains in exports and further increase our share of global trade.

Under the Medium-Term Program, we aim to achieve sustainable high growth by implementing policies that will ensure price stability, re-establish fiscal discipline, permanently improve the current account balance, and achieve structural transformation.

Thanks to our program, economic activity began to rebalance, the current account deficit decreased, and our international reserves increased with the inflow of external resources. All these developments will strengthen macro-financial stability and support the disinflation process. Thus, we are creating a more predictable investment and production environment.

In the Medium-Term Program, we have identified strengthening human capital, improving the investment climate, public finance reform, disaster management, green and digital transformation, and deepening capital markets as the main structural transformation themes. With this agenda, we aim to make our economy more resilient, increase the value-added of exports, enhance productivity and competitiveness, and improve our position in the global value chain. We provide significant support to our exporters within this scope.

In 2023, we prioritized exports. To this end, we facilitated our exporters' access to finance. We increased the daily rediscount credit limit tenfold to 3 billion TL. We strengthened the capital of Türk Eximbank in line with its goal of providing \$50 billion in support to exporters in 2024, including \$24 billion in loans and \$26 billion in insurance and guarantees. Additionally, to support green transformation and green exports, we secured support from multilateral development banks for Eximbank's "Türkiye Green Export Project." Moreover, we expanded the scope of Investment Commitment Advance Credits to include investments that will increase high value-added export potential and provide sustainable improvement in the current account deficit. We increased the income exemption from certain earnings derived from service exports to 80%.

While strengthening our macro-financial foundations with the program we implement, we will continue to stand by our exporters with the support we provide.

I congratulate our "Top 1000 Exporters," who are the valuable engines of sustainable growth, and wish them continued success.

I also extend my thanks to the Türkiye Exporters Assembly for its significant contributions to the development of our exports.

**To protect our gains in exports
and further increase our
share of global trade, we
stand by our exporters in
the areas of productivity
improvement, innovation,
and branding.**

ALİ YERLİKAYA

Ministry of the Interior

With the goal of the Century of Türkiye, peace and security are our top priorities

The early years of our economy passed as a struggle for existence. Now, we have entered the second century of our Republic, having successfully completed the first century with honor.

Thanks to God, today we are a strong country, standing tall against all economic and political attacks from within and abroad, offering hope to oppressed nations.

To rise above the level of contemporary civilizations, Mustafa Kemal Atatürk left us with a legacy. The reflection of this legacy today is the “Century of Türkiye” goal.

Undoubtedly, political stability is essential for the economy. The first requirement for political stability is security and peace.

From the first day we took office, we have acted with the goal of ensuring peace throughout our country, making the security of our people our top priority. We call the service we provide “Türkiye’s Peace.”

As the Ministry of Interior, with 600 thousand colleagues, we work to ensure peace for everyone when they lay their heads on their pillows at home, when they go to work, and

when they produce in factories.

With this goal, we strive to provide the best internal security services in all 81 provinces and 922 districts of our country, in the service of our dear nation and our state.

We also focus on ensuring the peace of our real sector, companies, and exporters.

Under the leadership of President Recep Tayyip Erdoğan, we are taking stronger steps in all areas to crown our second century as the “Century of Türkiye.”

To further strengthen our economy, we do not turn a blind eye to organized crime and conduct intensive operations against the financing of terrorism.

While working day and night in our security and peace services, we are in complete harmony with all ministries and institutions.

We know that the ideal of a “Great and Powerful Türkiye” depends on competing in every field worldwide.

If you do not create value, no matter how strong you are, you cannot be resilient. From this perspective, we are well aware of how our members of the Türkiye Exporters

Assembly work with high motivation to strengthen our country's power and to take our competitiveness to the farthest corners of the world.

Your excitement, determination, and efforts on how we can envisage today and the future add value to Türkiye's struggle.

As the Ministry of Interior, we are working to add value to this work ethic of our business world, to strengthen economic development by cementing trust and stability.

Together, we will continue our fight against informal economy with determination to achieve our "Century of Türkiye" goals and contribute to the stable and strong growth of our economy.

Through our steps, security and peace are strengthened in our country.

Continuing to work towards making Türkiye an island of trust and peace and a center of stability in its region perspective.

Undoubtedly, the contributions of the Türkiye Exporters Assembly are significant in strengthening our economic development.

As you break export records in the history of our Republic and make the highest contribution to economic growth, you are one of the most valuable institutions.

I sincerely congratulate all our exporting companies and entrepreneurs who contribute to this success.

As the Ministry of Interior, we are always by the side and in the service of our business people who work, produce, and export for our nation.

We will continue to contribute to the efforts of the diligent, productive, and dynamic members of TİM to create value by providing a peaceful and secure environment.

With these sentiments and thoughts, I greet all the esteemed members of the Türkiye Exporters Assembly with love and respect, and I wish them continued success on this long marathon journey.

**Together, we will vigorously
combat informality to achieve
our 'Century of Türkiye'
goals, contributing to the
stable and robust growth
of our economy.**

YUSUF TEKİN

Minister of National Education

The Power of Vocational Education in the Century of Türkiye

With the vision of Century of Türkiye, we are making great efforts to achieve our goals in the second century of our Republic. As a country, we prioritize education and make the largest investments in this area. Throughout this process, we follow current developments and take into account the expectations of society and the demands of the business world. I express my gratitude to our President, who has been a pioneer in the progress made in education over the past twenty-two years and in the significant steps taken towards the future, and to all valuable members of the education community who contribute with their valuable efforts.

Vocational education, when evaluated in terms of its potential to adapt to the changing and developing world order and to influence economic and social dynamics, plays an important role in the economic development of countries and in increasing societal welfare. Especially rapid changes in technology, industry, and the business world necessitate the training of qualified human resources equipped with skills that meet the requirements of the age. We attach great importance to conducting this process not behind closed doors,

but in coordination with all segments of society, especially with professional organizations and the sector, in vocational and technical education. We have updated our curriculum to train generations equipped with 21st-century skills, capable of competing globally in science and technology, and enriched with national and moral values and the culture of craftsmanship.

Vocational education, whose importance is increasing globally, is in a period of significant change and transformation. With the paradigm shift implemented by our Ministry of National Education to enhance the relationship between production, education, and employment, we have established an effective and efficient institutional structure. We have taken significant steps to improve the human, financial, physical, and technological infrastructure and management organization of our vocational education system.

In this context, with the updates we have made in vocational education, we aim to train our students as individuals equipped with skills that meet the requirements of the age and capable of competing globally in science and technology. At the same time, by establishing stronger ties with the business world, we

continuously update our vocational education programs to ensure that our human resources adapt to the rapidly changing labor market and meet the demand for qualified personnel. These efforts are of great importance for Türkiye's economic development and social welfare.

To enhance the quality of education our students receive and increase their employability, we started opening thematic vocational high schools under the "project schools" initiative we launched with a legislative change in 2014. Subsequently, with amendments to Law No. 3308 in 2016, we included the payment of wages to students receiving vocational education in businesses within the scope of state support. Additionally, all vocational high school graduates have been given the title of technician, and students are insured against work accidents and occupational diseases. In the same year, with the amendment to Law No. 1739, vocational training centers were included in compulsory education, ensuring the issuance of secondary education diplomas. With the amendment to Law No. 5580, support was initiated for vocational and technical Anatolian high schools established within and outside of industrial zones (OIZs) in 2012 and 2016, respectively.

In terms of enhancing the employability of individuals receiving vocational and technical education, which is one of the fundamental focal points of the vocational and technical education system, we have implemented a new educational approach based on collaboration through Sector Consultation Meetings. This approach includes models such as "Regional School, Specialized School, Sector-Specific, and Integrated Schools" aimed at facilitating the participation of industry experts and businesses in the education process.

To ensure that our students are equipped with current and practical knowledge to increase production efficiency, product quality, and consequently our exports in sectors such as manufacturing, energy, transportation, tourism, agriculture, automotive, and defense industries, we are currently executing 226 cooperation protocols with 223 institutions/organizations. Within the scope of these protocols, support for workshop and laboratory equipment in our schools is being increased, training sessions are being provided for our teachers to keep up with developments in the sector, scholarships are being offered to increase our students' access to vocational education, and efforts are being made to facilitate their employment in their respective fields.

Considering global developments, efforts focused on digitalization and green transformation aimed at creating more competitive production processes and generating higher added value are coming to the forefront. In this regard, we will ensure the training of qualified human resources in line with

the needs of our sector by integrating green and digital skills into our curriculum. Through our Craft Workshops, which will be implemented for the first time this summer, we aim to develop the basic skills of middle school students at an early age. Furthermore, we aim to increase students' academic and vocational achievements, provide them with extensive career options, facilitate their adaptation to the business world, and instill a lifelong learning philosophy.

Continuing on our path with the approach that everyone should have a profession and the goal of cultivating a qualified workforce, which is at the heart of the construction of our employment-focused education system that plays a leading role in contributing to the development level and economic prosperity of our country in all fields with the motto "I Am Everywhere," we emphasize our belief that we will improve our education system with strides befitting the Century of Türkiye Vision and our production-oriented approach. I extend my respects to everyone who undertakes great responsibility in production processes and the development of our country.

Currently, we are executing 226 cooperation protocols with 223 institutions/organizations to ensure our students are equipped with current and practical knowledge to increase production, efficiency, product quality, and consequently our exports in sectors such as manufacturing, energy, transportation, tourism, agriculture, automotive, and defense industries.

YAŞAR GÜLER

Ministry of National Defense

For a bigger and stronger Türkiye, we will continue to strive

Our region and the world are experiencing multifaceted developments, and the security environment has become highly sensitive due to increasing risks and threats every day.

Regional conflicts, terrorism, hybrid operations, and proxy wars are becoming more widespread; irregular migration and the refugee issue, xenophobia, as well as climate change, energy and food crises, and epidemic diseases are making the situation more complex.

The proliferation of disruptive autonomous systems supported by artificial intelligence, nanotechnology, and quantum technologies, the risk of increasing conflicts over energy security, the intense impact of trade wars, and the potential for a new competitive environment in the space race are among the prominent security issues of today and the near future.

In such a sensitive environment, our country has achieved a prominent position regionally and globally, thanks to the strategic foresight of our President, through advancements in defense and security, as well as multidimensional relationships established with other countries.

Struggling with major problems that deeply affect our region and competing in global power struggles, ensuring our country continues as a pillar of stability is our primary goal.

As the Ministry of National Defense, within the framework of this goal and our “Century of Türkiye” objectives:

We are committed to eliminating any threats and dangers directed towards our nation.

We work day and night for the security and peace of our country and noble nation.

We will continue to strive for a bigger and stronger Türkiye.

While our business people and SMEs make significant contributions to our economy and industry through their work, they also contribute greatly by producing many products of strategic importance needed by our heroic army with local and national capabilities.

Empowered by the capabilities provided by our developing indigenous, national, and modern defense industry every day, our glorious army continues its activities

much more effectively and powerfully for the security of our country and 85 million citizens.

Our Ministry, with its defense industry organizations, and through joint projects with you esteemed business people, will continue its efforts unabated to increase our country's defense industry trade as it has done so far.

We are aware that we are obligated to constantly progress and produce more advanced products.

With this understanding, we will exert our utmost effort to make the second century of our Republic the century of defense, development, and production, and to write new successes in the golden pages of our history.

The significant achievements Türkiye has attained in national and international arenas through the commercial, social, and cultural relationships established by the Türkiye Exporters Assembly are crucial for strengthening our country's esteemed and powerful position in our region and the world.

We draw our strength from loyalty and dedication to our homeland, the love and trust of our noble nation, and we serve our country with passion and duty in every corner of the world.

We stand by all entrepreneurs, companies, who work sincerely and diligently, produce, and export for the prosperity of our country and nation.

With the belief "Together we are much stronger!" I congratulate the esteemed members of our business community, industrialists, and the valuable members of the Türkiye Exporters Assembly on their achievements, and I wish for their continued success with increasing pride.

While our business people and SMEs make significant contributions to our economy and industry through their work, they also contribute greatly by producing many products of strategic importance needed by our heroic army with local and national capabilities, thereby achieving significant successes and strengthening our power even further.

MEHMET FATİH KACIR

Minister of Industry and Technology

We broke our export record in the 100th year of our Republic

As the Ministry of Industry and Technology, we continue our efforts with the goals of achieving independence in critical technologies, increasing value-added production and high-tech exports, ensuring qualified employment, and promoting comprehensive development. We are transforming Türkiye into a global production hub through a research and innovation ecosystem, planned industrial zones, an entrepreneurship culture, and a qualified workforce.

For 22 years, we have passionately continued our work to lead Türkiye towards prosperous tomorrows, and together, we are reaping the fruits of this effort. In the past 22 years, we have increased our workforce in organized industrial zones (OIZs) from 415,000 to 2.6 million, our R&D expenditures from \$1.2 billion to \$12 billion, and our R&D personnel from 29,000 to 272,000. We have made Türkiye a leader in military UAV production worldwide and in commercial vehicles, solar panels, white goods, iron-steel, and cement production in Europe. Under the leadership of our President, we are continuing our development journey confidently in investment,

employment, production, innovation, and exports.

In a period deeply affected by regional and global crises such as wars, protectionism in trade and technology, global pandemics, climate change, disasters, food, water, energy, and raw material crises, we broke our export record in the 100th year of our Republic, together with our exporters. Our exports, which were only around \$36 billion in 2002, have reached \$255.4 billion. Witnessing the continuous increase in our exports and the growth in the number of exporting companies fills us with pride. While 32,000 of our companies were exporting 22 years ago, this number reached 140,000 in 2023.

As the Ministry of Industry and Technology, we will strengthen Türkiye's role in global value chains by accelerating twin transformations in the Century of Türkiye, focusing on increasing value-added production and ensuring qualified employment through our programs and projects. Increasing our high value-added exports is one of our primary goals alongside the development of our investment climate. With this understanding, we update our existing supports closely following the needs

of our companies and global trends, and we introduce new support mechanisms. We develop new strategies to support product and market diversification, keeping the “Türkiye” brand at the forefront.

With every step we take on the export path, we will continue to increase our country’s international trade potential by working together with our exporters.

As the Ministry of Industry and Technology, we will continue our sincere efforts and work day and night in the upcoming period to maintain Türkiye’s high competitiveness and successful growth momentum. In the “Century of Türkiye,” we will continue to walk the path with our exporters towards surpassing the level of contemporary civilizations.

On this occasion, I extend my thanks to all our companies, especially our top 1000 exporters, who strive to export to all corners of the world and contribute to our economy.

I also thank the valuable employees of the Türkiye Exporters Assembly, who are the voice and breath of our exporters and pioneers of our trade ecosystem, for their contributions.

**As the Ministry of Industry
and Technology, we
will accelerate dual
transformation in the
Century of Türkiye,
strengthening our role
in global value chains
through programs and
projects focused on
increasing value-added
production and ensuring
qualified employment.**

İBRAHİM YUMAKLI

Minister of Agriculture and Forestry

Türkiye has always been prominent in its region with its strong infrastructure in the agriculture and forestry sectors

Our country, located at the center of the fertile crescent, provides us with significant wealth in terms of agriculture and forestry. One-third of our land is covered by forests, one-third by agricultural lands, and one-fifth by meadows and pastures. Surrounded by seas on three sides and dotted with dams and lakes all around, our land experiences 4 seasons and 7 climates simultaneously. The Anatolian geography harbors many times more plant and animal species than Europe, providing us with a major advantage in agricultural production.

In addition to this richness, our country is strategically positioned at the intersection of air, land, and sea transportation routes between Europe, Asia, and Africa. This location allows us to reach 67 countries worldwide within a 4-hour flight, providing significant advantages and opportunities for us in terms of international trade.

Global climate change, population growth, outbreaks of diseases, conflicts, and wars are increasing the demand for

food day by day.

These factors affect the vital basic needs of people—agriculture, forestry, and water—and closely concern their development. Therefore, like the rest of the world, we are guiding our sector with strong strategies to make it more resilient against these risks affecting our agriculture and forestry sectors.

In this context, we attach special importance to the protection and sustainable management of our land, water resources, and forest areas to ensure food supply security and preserve our natural ecosystem. While creating an innovative, flexible, and resilient agricultural sector, we strive to increase the quality of life, welfare, and attractiveness of rural areas and reduce dependence on external agricultural inputs. Furthermore, ensuring sufficient, accessible, and sustainable agricultural product supply forms the basis of our agriculture and forestry strategy.

In the past 22 years, we have provided 1 trillion 364

billion Turkish liras in agricultural support to encourage our producers. We have invested 2.4 trillion Turkish liras in water and irrigation areas, resulting in the construction of hundreds of dams and reservoirs. We have also secured 1 trillion 22 billion Turkish liras in subsidized loans to meet the financing needs of our farmers. With our rural development supports, we have opened the way for investment in rural areas, facilitating the convergence of our farmers with modern agriculture and increasing employment rates in rural areas.

With these efforts, Türkiye has always been at the forefront in its region with a strong infrastructure in the agriculture and forestry sectors. This robust infrastructure is the guarantee of our food supply security. While making this infrastructure more resilient against risks, we will maintain our leadership in agricultural production in Europe. Globally, we continue our path with strong strategies to further elevate our position within the top 10 in agricultural production.

Türkiye has a strong agricultural and food sector, which provides employment to approximately 15% of the working population and constitutes 6.2% of the country's GDP. The sector's contribution to GDP was 69.2 billion dollars in 2023. Additionally, among the characteristics that strengthen the agricultural and forestry sector are Türkiye's young population, market size, dynamic economy, strong tourism income, and favorable climate conditions.

In 2023, Türkiye exported 2,200 varieties of agricultural products to 212 countries and regions, generating 31 billion dollars in revenue. According to the first quarter of 2024 foreign trade data, we broke a record with 9.3 billion dollars in agricultural exports. Türkiye's agricultural trade volume has increased nearly tenfold from 2002 to 2023, with its share in overall trade volume rising from around 6% to about 9%.

One of our most important tools to fully reward our farmers' hard work and effort is branding. In this regard, Türkiye has obtained geographical indication registrations for 1,371 agricultural and food products in the last 22 years. All 21 of our products registered in the EU belong to the last 11 years. These products all have export potential, and enhancing their production lies ahead with foreign trade as an essential tool.

Türkiye aims to position itself as a preferred regional hub and supply center for leading global players in the agricultural sector. We must use this experience more effectively.

In addition to all these developments, as the Ministry,

we have appointed Agricultural Counsellors to 9 different countries to elevate our agricultural trade to higher levels. It is of great importance to us that our sector, especially our exporters, benefit to the fullest extent from these counsellors. In this regard, I sincerely believe that benefiting from the opportunities provided by the state is of vital importance both for your own trade and for our country's interests. I want you to know that the agriculture and forestry sector is open to all kinds of efforts to achieve Türkiye's export goals.

Our Türkiye Exporters Assembly holds an important place in increasing our country's exports. On this occasion, I congratulate your esteemed members who proudly fly our flag in every corner of the world. Together with great faith, we are advancing towards Türkiye's Century goals. I thank everyone who contributed to Türkiye's First 1000 Exporters Company Survey and wish your successes to be continuous.

We are committed to creating an innovative, flexible, and resilient agricultural sector that is open to development. Additionally, we strive to enhance the quality of life, welfare, and attractiveness of rural areas while reducing external dependence on agricultural inputs. Ensuring sufficient, accessible, and sustainable agricultural product supply forms the cornerstone of our agriculture and forestry strategy.

ABDULKADİR URALOĞLU

Minister of Transport and Infrastructure

We will give a new direction to global trade with the Development Road and the Zangezur Corridor!

Since its establishment in 1993, the Türkiye Exporters Assembly, which has been operating successfully, has made significant contributions to our country's economy. I congratulate all exporters who have contributed to our country's economy through their achievements in 2023, where we reached the highest export level in our history, totaling \$255.4 billion on the centennial of our Republic.

Under the leadership of President Erdogan, the political stability achieved over the past 22 years has had a positive impact not only in all other areas but also in the economic sphere. The Turkish economy achieved a growth rate of 4.5% last year, ranking second among OECD countries and third among G20 countries in terms of economic growth.

I believe that our achievements will further increase in the coming period. We began the Century of Türkiye with the vision of placing our country among the top 10 countries in exports. We aim to achieve \$375 billion in exports by 2028. In this regard, the importance of the logistics sector for our exports will continue to increase. Therefore, it is crucial to expand our logistics capacity in line with our export goals. Türkiye's current advanced transportation infrastructure and geostrategic

position further strengthen its capabilities.

Türkiye is strategically located at the intersection of three continents: Asia, Europe, and Africa. It is not only on the East-West corridor of the Silk Road but also at the center of the North-South corridors extending from the Caucasus countries and Russia to Africa. With just a 4-hour flight time, we can reach 67 countries, including 43 in Europe, 5 in Africa, and 19 in Asia, where 1.4 billion people live, with a trade volume of \$8.6 trillion. We serve as a major hub in aviation as well as a central location in maritime transport, encompassing the Mediterranean Basin and the strategically important Turkish Straits and the Black Sea Basin, which have historically retained their significance. In short, Türkiye has the potential to become a significant player on the world stage in terms of logistics.

In this context, as the Ministry, we continue our efforts to effectively utilize this significant potential our country possesses. Over the past 22 years, we have invested approximately \$275 billion in our country's transportation and communication infrastructure. We have realized mega transportation projects such as Marmaray, Eurasia Tunnel, Istanbul Airport, Yavuz Sultan Selim Bridge, Osmangazi Bridge,

1915 Çanakkale Bridge, Filyos Port, İzmir-Istanbul, Ankara-Niğde North Marmara, and Çanakkale-Malkara Highways in succession. We have increased our divided road network from 6,101 km to 29,405 km and our motorway network from 1,714 km to 3,726 km. We have expanded our railway network from 10,948 km to 13,919 km and built a 2,251 km high-speed train network. We have introduced High-Speed Train operations in Türkiye and made Türkiye the 6th in Europe and 8th in the world. Since 2002, we have increased our active airports from 26 to 57, and while flights were made to 60 points in 50 countries in international lines, today we have raised them to 346 points in 131 countries. In maritime, we have increased our 152 international port numbers to 190. With a maritime trade fleet reaching 45.7 million deadweight tons, we are ranked 12th in the world.

Furthermore, to increase exports and create alternative markets, we are prioritizing significant international projects. As you know, the global economy has undergone a series of transformations in recent years, creating new opportunities and challenges for international trade and the logistics sector. Among the reasons for these transformations are the trade wars between China and the United States, Brexit, the COVID-19 pandemic, the Russia-Ukraine War, and the security crisis in the Red Sea Region following Israel's occupation of Gaza. These complex situations have led countries to reassess their logistics strategies. In this reassessment, Türkiye stands out with its strategic position and high-capacity logistics infrastructure, progressing towards a central role that will guide international trade with projects such as the Development Road and the Zengezur Corridor, which will be the new Silk Roads of the world.

With the "Development Road Project" signed on April 22nd with the Ministers of Transport of Iraq, Qatar, and the UAE, uninterrupted transportation will be provided from the FAV Port in Iraq to every country in Europe by road and rail. With this project, which we describe as the New Silk Road, we will strengthen our country's geopolitical status. We will significantly reduce travel time between Asia and Europe via Türkiye. The time between a ship departing from the FAV Port and reaching Europe via the Suez Canal will be reduced by 15 days compared to the time it takes for the same cargo to reach Europe via the Development Road. The project will connect the FAV Port to Türkiye's border with approximately 1200 kilometers of railway and highway and from there to Europe. This project will open a new door for regional trade.

We believe that the opening of the Zengezur Corridor is also crucial to strengthening our country's position in the Middle Corridor. Along with the Baku-Tbilisi-Kars railway line, the Zengezur Corridor will further support the development of

the Middle Corridor. Although it is a long-term projection, it is possible for goods arriving from the Caspian Sea to Baku Port to directly reach Türkiye via the BTK line on this line, which is expected to be shorter than the Baku-Tbilisi-Kars line. Thus, we will have developed an alternative to Georgia, on which we depend for a large portion of the loads on the Baku-Tbilisi-Kars line. With the completion of the Kars-Iğdır-Dilucu railway project in our country, it will be possible to transport the entire load on the Baku-Türkiye-Europe line by rail.

In summary, Türkiye is advancing towards becoming a significant player on the global stage in logistics and transportation sectors with its strategic position and continuously developing infrastructure. We will ensure comprehensiveness in transportation and logistics activities to be a global leader in transportation and logistics. By elevating the quality of transportation infrastructure to the highest level, we will increase efficiency and productivity in transportation and logistics, and reduce costs.

With these thoughts, I sincerely congratulate the successful companies listed in Top 1000 Exporters of Türkiye Survey conducted by the Türkiye Exporters Assembly. I particularly want to emphasize our confidence in Turkish industrialists, businessmen, and exporters for their self-confidence, vision, and hard work. I believe that by acting with mutual sacrifice and team spirit, we will achieve many more records and successes. I extend my thanks to the top 1000 exporters who have made immense efforts and contributions to this successful tableau, and wish them continued success.

Türkiye's economy achieved a growth rate of 4.5% last year, placing second among OECD member countries and third among G20 nations in terms of economic growth data released.

SAMPA's Commitment to the Future

As we celebrate our 30th anniversary this year, we look back at what we have achieved together: a leading company in innovation, manufacturing, global expansion in 5 continents and wide-range product portfolio... A global brand, recognised all around the world for its solution-oriented approach and customer-centric business practices.

We are proud of what we have achieved as a Turkish company, yet we continue to work harder than ever before to reach our ultimate goal: to be the No.1 in the automotive heavy duty parts industry globally.

You can always expect more from SAMPA.

2023 EXPORT PERFORMANCE REVIEW

2023 EXPORT ASSESSMENT

After the pandemic in 2020, the global economy recorded a rapid growth rate of 6.2% in 2021, driven by deferred demand. In 2022, however, due to both excessive demand and the impact of the Russia-Ukraine war that started in February, the world experienced both demand and cost inflation. In 2022, consumer prices increased by an average of 7.3% in developed economies, while in developing economies, the average increase was 9.8%. In response to this inflationary process, most countries' central banks implemented tightening monetary policy measures. The US Federal Reserve (FED) began raising interest rates in the first quarter of 2022, and the European Central Bank (ECB) followed suit in the third quarter of the same year. The US interest rate, which started at 0.25%, rose to 5.5%, and the EU interest rate, which started at 0, increased to 4.5%. Although interest rate hikes halted by mid-2024, the monetary tightening process has not yet concluded. Under these conditions, the global economy, which grew by 3.5% in 2022, finished 2023 with an even lower growth performance of 3.2%. In 2023, growth in developed economies was 1.6%, while developing economies recorded a growth rate of 4.3%.

TÜRKİYE'S EXPORTS AND GLOBAL EXPORTS

Despite the contraction in global trade, earthquakes, and elections, Türkiye's exports in 2023 recorded a growth of 0.5% compared to 2022, reaching 255.4 billion dollars. Imports, on the other hand, decreased by 2.9% compared to 2022, totaling 361.8 billion dollars. Consequently, the export-to-import coverage ratio, which was 69.9% in 2022, increased to 70.6% in 2023. With this foreign trade performance in 2023, Türkiye increased its share in global trade from 1.02% to 1.07%.

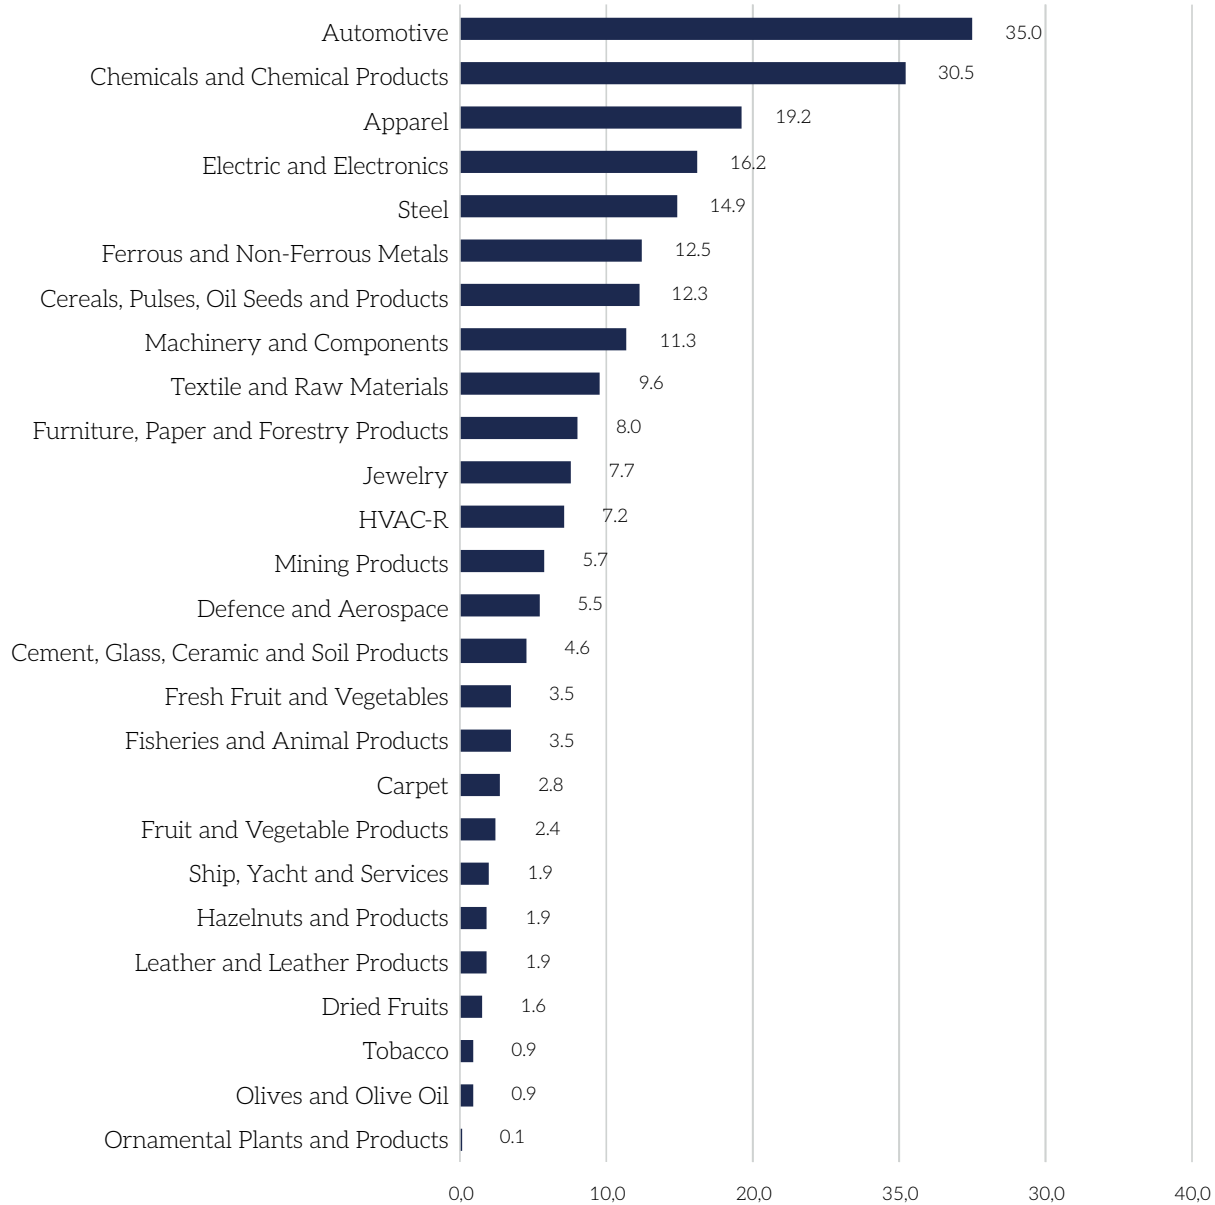

Table 1: Türkiye's Imports and Exports in the Last Decade

Year	Import (billion \$)	Export (billion \$)	Coverage Ratio (%)
2014	251.1	166.5	66.3
2015	207.2	143.8	69.4
2016	198.6	142.6	71.8
2017	233.8	157.0	67.1
2018	223.0	167.9	75.3
2019	210.3	180.9	86.0
2020	219.5	169.7	77.3
2021	271.4	225.3	83.0
2022	363.7	254.2	69.9
2023	361.8	255.4	70.6

Table 2: Türkiye's Exports and Global Exports in the Last Decade

Year	Türkiye Exports (billion \$)	Global Exports (million \$)	Türkiye's Share (%)
2014	166.5	18,787.6	0.89
2015	151.0	16,324.0	0.92
2016	149.2	15,841.3	0.94
2017	164.5	17,553.8	0.94
2018	177.2	19,308.3	0.92
2019	180.8	18,777.7	0.96
2020	169.6	17,428.9	0.97
2021	225.2	22,343.8	1.01
2022	254.2	24,904.5	1.02
2023	255.4	23,758.0	1.07

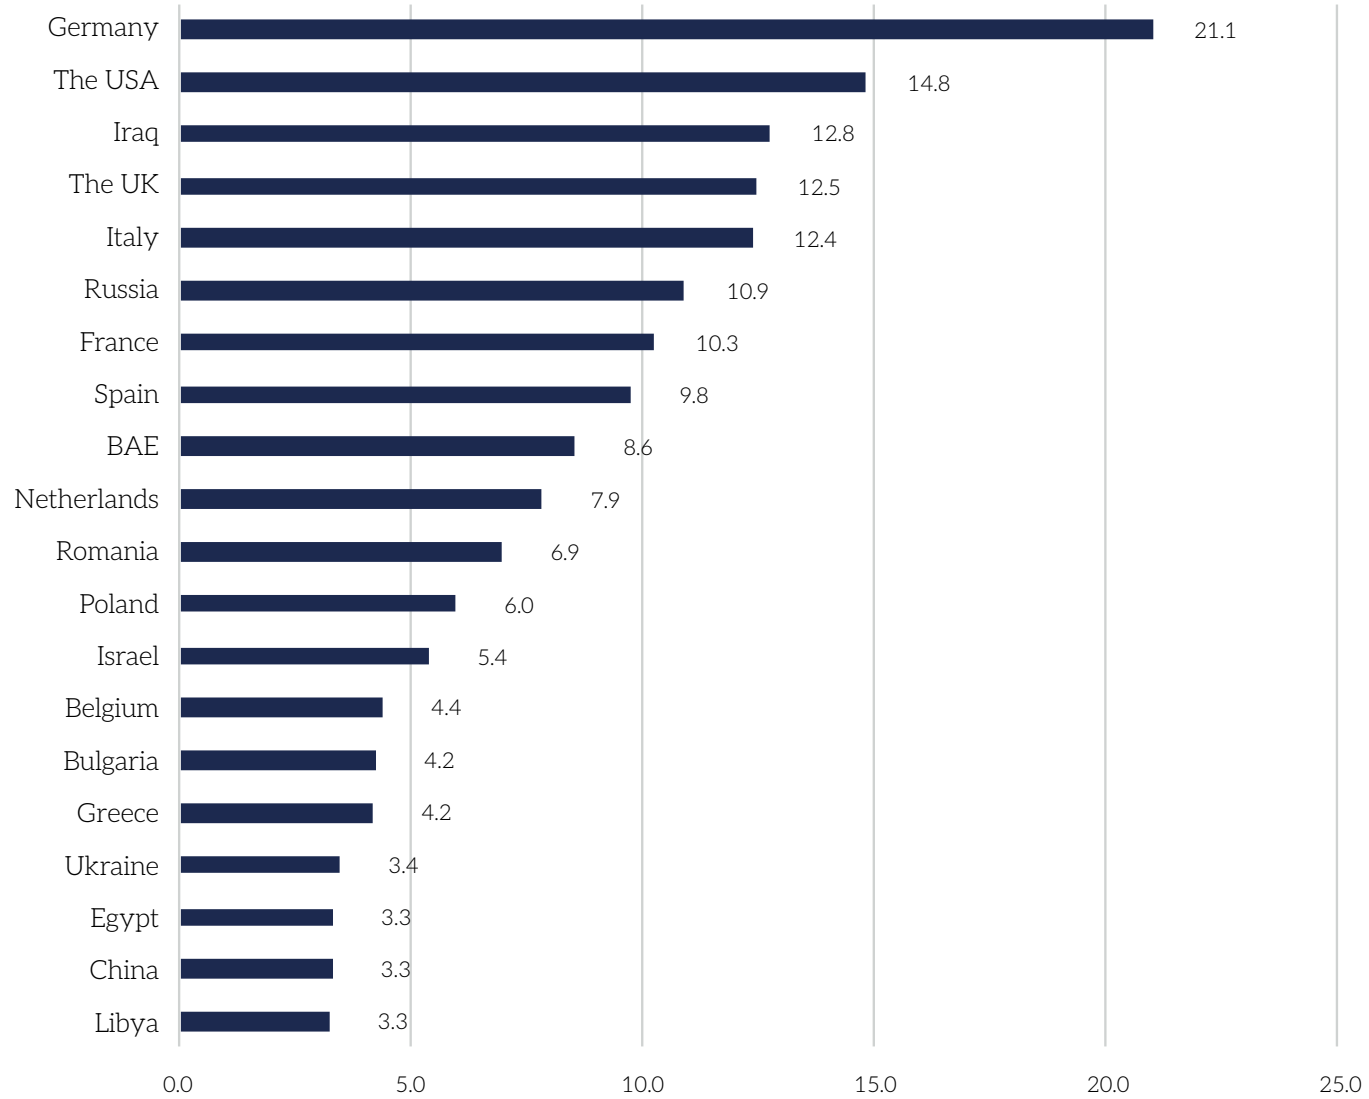

Table 1: Exports by Sector (2023, ÖTS, billion dollars)

Last year, the chemicals and chemical products sector, which had overtaken the automotive sector as Türkiye's main export sector for many years, returned to second place, with the automotive sector regaining the top spot. In 2023, the top three export sectors were automotive with 35 billion

dollars, chemicals and chemical products with 30.5 billion dollars, and ready-made clothing and apparel with 19.2 billion dollars. According to the Türkiye Exporters Assembly (TİM) sectoral classification, 13 sectors increased their export values in 2023.

Table 2: Exports by Country (2023, billion dollars)

In 2023, Türkiye's largest export market, as in previous years, was Germany with 21.1 billion dollars. Germany was followed by the United States with 14.8 billion dollars, Iraq with 12.8 billion dollars, the United Kingdom with 12.5 billion dollars, and Italy with 12.4 billion dollars. Türkiye's exports to the EU reached 104.3 billion dollars in 2023, making up 40.8% of total exports. Additionally, exports to 10 out of the top 20 export

destinations decreased compared to the previous year. Among the top 20 countries, exports to Egypt fell by 26.8%, to the United States by 12.2%, to Bulgaria by 10.5%, and to Belgium by 8.6%. The country with the highest increase in exports among the top 20 countries was the United Arab Emirates with a 63.1% increase. The UAE was followed by Greece with 26.3%, Russia with 16.7%, and Libya with 14.6%.

STATISTICS RELATED TO THE TOP 1000 EXPORTERS IN 2023

- Of the 1000 companies, 948 are goods exporters, while 52 are service exporters. Among the goods exporters, the sectors with the most companies in the top 1000 list are chemicals and chemical products with 112 companies, ready-made clothing and apparel with 100 companies, and the automotive industry with 95 companies.
- Of the 820 companies providing data on their structure, 568 are producer-exporters, 147 are exporters, 73 are group foreign trade companies, and 32 are foreign trade capital companies.
- Of the top 1000 exporters, 435 are based in Istanbul, 87 in Izmir, and 61 in Kocaeli.
- The average export per company among the top 1000 exporters decreased by 0.2% compared to the previous year, reaching 161.6 million dollars. Despite the increase in exports, the slight decrease in the share of the top 1000 exporters in total exports indicates a healthier distribution in exports.
- The average domestic sales of the exporters providing data for our research were 4.9 billion TL, and the average investment amount was 539.1 million TL.
- Of the exporters sharing their capital structures, 75.9% are entirely domestically funded, and 82.1% have at least half of their capital domestically funded.
- The average number of employees of the companies providing statistics for the research is 1,147, with an average of 311 female employees.
- For the companies sharing information about the number of patents held and new patent applications, the average number of patents held decreased by 2.4 compared to the previous year, reaching 13.6, while new patent applications per company decreased by 0.5, reaching 2.5.

BRANDING AND R&D STATISTICS

- For exporters exporting with their own brands, the share of exports made with their own brands in total exports was 78.7%, 32.6 points higher than the previous year. Among the companies exporting with their own brands, the share of producer-exporter companies increased by 14.2 points compared to the previous year, reaching 82%.
- The average number of employees of the companies exporting with their own brands was 1,196, with an average of 37 employees working in the R&D field. Thus, the ratio of R&D employees to total employment for these companies increased from 2.5% last year to 3.1% this year.

- The average domestic sales of the companies exporting with their own brands were 5.8 billion TL.
- The average number of patents of the companies exporting with their own brands, among those sharing data, was 16, approximately 18% higher than the overall average. For companies with R&D or design centers, this average increased to 33.1.
- The average investment amount of the companies exporting with their own brands, among those sharing data, was 610.5 million TL. This figure is 13.2% higher than the overall average.
- For the companies exporting with their own brands and sharing both R&D expenditure and total investment data, the share of R&D expenditure in total investments was 36%.

The average export per company among the top 1000 exporters decreased by 0.2% compared to the previous year, reaching \$161.6 million. Among exporters conducting exports under their own brands, those who share both R&D expenditures and total investment data allocated an average of 36% of their total investments to R&D expenditures.

APPAREL SECTOR

BURAK SERTBAŞ
Member of TİM Sectors Council

Despite the challenges in global trade, the ready-to-wear clothing sector expects a recovery in the fourth quarter of 2024

Despite the challenges in the global economy, particularly influenced by the recession and inflationary pressures in Europe, increased labor and energy costs, and ongoing conflicts in neighboring regions, the ready-to-wear clothing sector experienced a decline in export performance in 2023. Our ready-to-wear clothing exports decreased by 9% to \$19.2 billion compared to the previous year.

As a labor-intensive sector, the high inflation led to rising labor and energy costs in 2023, while the expected demand growth in foreign markets did not materialize. Due to the export contraction, our capacity utilization rate dropped from around 84% to 76.4%. Businesses in the sector suffered profitability losses, and 2023 witnessed job losses in the ready-to-wear and textile

industries.

Moving into 2024, the sector continued to face internal and external challenges carried over from the previous year, including issues such as remaining expensive compared to competitor countries and loss of market share. The export performance in the first four months of 2024, which decreased by 14% to \$5.8 billion compared to the same period last year, underscores these ongoing difficulties.

Despite these setbacks, we remain hopeful. We anticipate a slow recovery throughout the year with expectations for improvement in business conditions by the end of 2024. A full recovery, however, is anticipated to materialize more significantly in 2025.

ALI CAN YAMANYILMAZ
Member of TİM Sectors Council

In 2023, there was a 14% decline in our sector's exports

In 2023, the earthquake that deeply affected our entire country, especially the region where the effects of the disaster were most felt, negatively impacted the seafood and animal products sector. By the end of 2023, there was a 14% decrease in sector exports compared to the previous year. Specifically, total exports of seafood and animal products in the region most affected by the earthquake experienced a 39% decline compared to the previous year.

However, as of April 2024, the situation has started to change. During the first four months of 2024, Türkiye's overall sector exports increased by 16.4% compared to the same period in 2023, with the Association of Seafood and Animal Products (ASHİB) seeing a 16.2% increase. Initially, there was an

expectation of continued growth in sector exports throughout the year due to this early-year increase. However, the imposition of quotas on poultry meat exports in May could lead to a decline in sector exports for the remainder of 2024, given the significant role of this product in our exports.

To minimize the export losses due to these quotas, Exporter Associations are continuing their activities unabated, aiming to empower exporters and create leverage for them in the market.

Member of TİM Sectors Council

In 2023, we broke the all-time export record with \$35 billion in export revenue

As the Turkish automotive industry, with our export performance in 2023, we regained the title of the country's leading export sector after one year. Thus, we achieved our 17th export championship in the last 18 years.

With the chip crisis starting to resolve last year compared to 2022, we managed to meet incoming demands. Our production capacities increased, and as a result, we achieved the targeted export revenue. In the last month of last year, we reached the highest December export ever with \$3.2 billion. Throughout last year, surpassing our targets, we broke the all-time export record with a 13% increase, totaling \$35 billion in export revenue. Thus, in 2023, marking the 100th anniversary of our Republic's founding, we excee-

ded our target of \$34 billion in exports. The share of our sector in the country's exports was 15.8%. Similarly, last year, our largest share of exports, 68.3%, came from our leading market, the EU countries.

With the automotive sector reclaiming the export championship after a year, we started 2024 with morale and motivation. Anticipating a 10% increase in exports compared to 2023, driven by continued demand in our markets, we aim for an export target of around \$39 billion this year. Under normal conditions, we believe that the Turkish automotive industry will reach its goals with its production capacity and quality. Despite the slowdown in the EU market, as automotive exporters, we continue to work tirelessly towards our 2024 goals.

SECTORAL EXPORT ASSESSMENT

CARPETS SECTOR

SALAHATTİN KAPLAN
Member of TIM Sectors Council

The earthquake disaster on February 6, 2023, affecting Gaziantep, the hub of global carpet production, and 11 other provinces, initially had a negative impact on production and exports. Damage caused by the earthquake and subsequent fire at Iskenderun Port hindered the steady growth of our exports. Like many sectors globally, the economic crisis in our country also adversely affected the carpet manufacturing sector, making access to finance difficult. Additionally, rising labor costs and raw material prices further strained producers and exporters. Ongoing conflicts and instability in neighboring countries, especially in the Middle East, also had a negative impact on our exports.

In response to these challenges, our sector has continued to enhance its

We achieved exports totaling \$2.752 billion in 2023

presence in international markets, particularly through Sectoral Trade Delegations organized under the Ministry of Trade's Distant Countries Strategy. The greatest achievement for the carpet sector in 2023 was undoubtedly the CFE Carpet and Flooring Expo held in Istanbul. As Türkiye stands at the center of global carpet production, Istanbul inevitably becomes a hub for carpet trade. The expo's impact and contribution facilitated overcoming these adversities. Despite the challenges, our country's carpet exports remained stable in 2023, reaching \$2.752 billion, similar to 2022.

Our efforts to ensure our carpets find their deserved value in global markets will continue in 2024, and I extend my thanks to all sector stakeholders involved in these endeavors.

SECTORAL EXPORT ASSESSMENT

CEMENT, GLASS, CERAMIC AND SOIL PRODUCTS SECTOR

ERDEM ÇENESİZ
Member of TİM Sectors Council

Sectors that generate high local added value and net foreign exchange earnings through exports are strategic for our country

The year 2023 has been marked by increasing competitive conditions in both domestic and foreign markets for the cement, glass, and ceramics sectors. The total exports of our union contracted by 13.3%, amounting to approximately 5 billion dollars.

When analyzed by sub-sectors, the total cement sector exports, including cement and clinker, decreased by 28% to 19.7 million tons, and by 18.5% in value to 1.26 billion dollars. Excluding clinker, cement exports were 15.6 million tons, while clinker exports amounted to 4.04 million tons. Export unit prices increased. In 2023, glass exports also increased by 1.6% to reach 1.6 billion dollars, with an increase in export unit prices as well. Total ceramics exports in 2023 decreased by 25% in value to 1.42 billion dollars. Export unit prices for Ceramic Tile

Materials and Ceramic Sanitary Ware also increased.

Despite the adverse domestic and external conditions in 2023, our three sectors have begun to focus on investments in green transformation and digital transformation. It is anticipated that more favorable conditions will be experienced in export markets and domestically in 2024.

All three of our sectors are fully utilizing domestic resources in production and, in this sense, contribute positively to Türkiye's trade balance with net foreign exchange inflows. These sectors create very high levels of 'local added value in exports' alongside increasing exports. The local added value ratio in exports is calculated as an average of 68% in the cement sector, 79% in the glass sector, and 82% in the ceramics sector.

AHMET TİRYAKIOĞLU
Member of TİM Sectors Council

We managed to increase our exports in more than 100 countries and free zones last year

We have left behind a year where we faced economic hardships, financial issues, obstacles in our key markets, and the century's disaster. Especially, the earthquake disaster deeply affected our exports in the first half of last year, impacting the backbone of our sector in the Southeastern Anatolia region. As a sector, we quickly healed our wounds and managed to elevate our exports to a higher level before the end of 2023.

The total exports of the cereals, pulses, oilseeds, and their products sector, including biscuits-pasta, wheat flour, vegetable oils, sugary and cocoa products, and pasta, reached \$12.4 billion in 2023. As one of the sectors that have utilized the last 20 years most effectively in our country, we increased our share in Türkiye's total exports from

4.3% in 2001 to 5.6% by the end of 2023. We succeeded in increasing our exports in more than 100 countries and free zones last year.

As the leading sector among all agricultural sectors in our country, the cereal sector accounts for approximately one-third of Türkiye's total agricultural exports according to 2023 data. Excluding furniture and aquatic products, our sector accounts for 52% of Türkiye's vegetable product exports. Excluding sectors with single-digit exports, the cereals, pulses, oilseeds, and their products sector ranks as the third sector with the highest export growth after automotive and machinery, surpassing \$10 billion in exports in 2023.

CHEMICALS AND CHEMICAL PRODUCTS SECTOR

ADİL PELİSTER

Member of TİM Sectors Council

Towards a Green and Digital Chemical Industry

The year 2023 was extremely challenging due to the global inflationary environment, high interest rates, wars between countries, rising energy costs, and the recession in the EU, in addition to the earthquake disaster we experienced in February. Unfortunately, our export performance was also negatively affected by this entire process.

Nevertheless, in the 100th year of our Republic, our sector's exports once again exceeded 30 billion dollars, reaching 30.6 billion dollars and accounting for 11.9% of the country's total exports. The countries to which we exported the most were the Netherlands, Russia, Italy, Romania, Spain, Germany, the USA, Iraq, the UK, and Belgium. Exports of plastics, mineral fuels, inorganic chemicals, cosmetics, rubber, pharmaceuticals, paints, and various chemicals shouldered the majority of our

exports, and 9 of our sub-sectors managed to increase their exports.

In 2024, in addition to establishing sustainability in our exports and increasing our competitive strength, we will strive to implement our Chemical Technology Center to facilitate the transformation of the green and digital chemical industry. We believe that our report "Sustainability Action Plan in the Chemical Sector" will guide our companies in this regard. Our Chemical Technology Center will serve as a technology hub that will elevate our chemical industry and exports to a new level.

We believe that countries that move quickly towards green and digital transformation will have a significant advantage in the global market, and it is of great importance that our government supports our companies in this matter.

SECTORAL EXPORT ASSESSMENT

DEFENCE AND AEROSPACE SECTOR

LATİF ARAL ALIŞ
Member of TİM Sectors Council

Our Defense and Aerospace Industry took off in 2023

Our defense and aerospace industry soared in 2023, shining even brighter on the international stage. Several factors contributed to this success. Increased defense spending provided new investment opportunities in the sector, fostering innovation. Defense and aerospace products, particularly UAVs and armored vehicles, garnered significant interest in foreign markets, breaking export records and contributing significantly to the national economy.

We anticipate continued growth momentum in the defense and aerospace industry throughout 2024. We achieved a 27% increase in exports in 2023, reaching \$5.546 billion. We are committed to sustaining this momentum and continue our efforts towards that goal. However, global fluctuations

and logistical challenges pose ongoing uncertainties and risks in 2024. Nevertheless, with our agile approach, readiness for adverse conditions, and problem-solving capabilities, we are advancing firmly towards our goal of being among the top 10 global leaders in the defense and aerospace sector. Our target for 2024 is to exceed \$6.4 billion in exports.

Türkiye's defense industry is progressing steadily towards becoming a global power, with each company within our defense ecosystem working together in harmony, like a large family. Our utmost goal is to foster this unity and collaboration to produce even better products and access more markets worldwide.

DRIED FRUITS SECTOR

BIROL CELEP
Member of TİM Sectors Council

We are pleased with the increase in our sector's export revenue compared to the previous year

Throughout 2023, all the global challenges underscored the crucial importance of production and export. In all the meetings we attended both domestically and internationally, “sustainability” was always the key agenda item. We recognized that developing sustainable solutions in the operations of all actors in the value chain is inevitable. Both our institutions and exporting companies have worked intensively on the sustainability of agricultural product production and export in 2023.

In 2023, Türkiye's total dried fruit exports amounted to 483 thousand tons, a 3% decrease in volume compared to the previous year, but with a 2.5% increase in value, reaching 1.61 billion dollars. Out of the total exports, 1.141 billion dollars were generated

from the export of seedless raisins, dried figs, and dried apricots. The products that brought the highest export revenue in 2023 were raisins with a 53% share, dried apricots with a 15% share, and dried figs with a 15% share. Raisin exports amounted to 255 thousand tons, a 1% increase compared to 2022, generating 465 million dollars in revenue, an 8% increase from the previous year. Türkiye's dried apricot exports in 2023 reached 405 million dollars, a 1% increase from the previous year. However, the export volume of dried apricots decreased by 7%, amounting to 71 thousand tons in 2023 compared to 2022.

SECTORAL EXPORT ASSESSMENT

ELECTRIC AND ELECTRONICS SECTOR

MEHMET KAVAKLIOĞLU
Member of TİM Sectors Council

We completed the year 2023 with \$16.5 billion in exports

Our electrical and electronic sector holds strategic importance for Türkiye's exports and technological advancement, particularly with its medium and high-tech products. Despite a global decline in demand and stagnant production trends in 2023, our sector maintained a stable competitive export performance, concluding the year with a total of \$16.2 billion in exports and a 7% increase compared to the previous year. With a 6.8% share of Türkiye's exports, we ranked among the top 4 exporting sectors within the industrial sectors.

The rise in raw material prices post-pandemic, shifts in supply chains, geopolitical risks in our region, and increased demand for energy all contributed to our sector's highest exports in specific sub-sectors, reaching \$5.38

billion in the 'Electric, Power Generation and Distribution Equipment' product group. We also achieved export figures of \$4.19 billion, \$3.85 billion, and \$3.07 billion respectively in our White Goods, Electronics, and Cable product groups. In 2023, while the industrial sector in Türkiye had an average unit price of \$1.9 per kilogram, our Electrical and Electronic Sector averaged \$6.81 per kilogram.

During this period, our primary export markets included European Union countries, particularly EU member states, and the Near and Middle East Asia regions. Approximately 44% of our exports, totaling \$7.29 billion, were directed to EU member countries.

SECTORAL EXPORT ASSESSMENT

FERROUS AND NON-FERROUS METALS SECTOR

ÇETİN TECDELİOĞLU
Member of TİM Sectors Council

Our sector is the 6th largest exporter among the industrial sectors

As the Iron and Non-Ferrous Metals sector, we aimed to close 2023 at a level befitting the 100th anniversary of our Republic. However, due to numerous adverse developments, including global factors, the February 6 earthquake that went down in history as the disaster of the century, increases in construction costs, exchange rate developments, the impact of the elections, and rising energy costs, our sector closed the January-December 2023 period with a 13.3% decrease compared to the previous year, with exports amounting to \$12.5 billion. With these exports, our Iron and Non-Ferrous Metals sector accounted for 5.6% of total exports and became the 6th largest exporting sector among the industrial sectors.

As the Istanbul Ferrous and Non-Ferrous Metals Exporters' Association (İDD-MİB), we continued our efforts without

slowing down in 2023 to ensure that our sector did not lose its competitive edge. Aware that high exports to a single region can sometimes put us in a bottleneck, we pursued the diversification of our export markets. We focused on conducting more B2B meetings by organizing Buyer Delegations and Ur-Ge projects in addition to Sectoral Trade Delegations for our target markets.

In 2023, we organized 10 national participations, 7 trade delegations, and 4 buyer delegation events, holding at least 2 major events every month. Additionally, we represented and promoted our sector through participation in 4 conferences and 8 information stands. We have 7 active ongoing Ur-Ge projects. Moreover, with more than 40 sectoral meetings and 14 domestic fair visits, we closely monitor the pulse of our exporters.

12.5

ALİ KAVAK
Member of TİM Sectors Council

In 2023, our exports contributed a net foreign exchange inflow of \$3.5 billion to the country's economy with an 18% increase in value

The fresh fruit and vegetable sector, a cornerstone of Türkiye's exports, not only contributes significantly to the country's foreign exchange earnings but also provides employment to millions of people from harvest to packaging, transport, and export stages. Besides meeting the essential food needs of the population, it supplies raw materials to the industrial sector, generates demand for industrial products, and contributes to national income and exports, clearly demonstrating the sector's value.

In 2023, our exports increased by 18%, providing the country's economy with a net foreign exchange inflow of \$3.5 billion. The most exported products were mandarins, tomatoes, and lemons, with the top export destinations being the Russian Federation, Ger-

many, and Romania.

Our goal for 2024 is not only to maintain our presence in key markets but also to diversify into new markets, particularly in Far East countries. To achieve these goals, we plan to adopt environmentally friendly agricultural practices, provide training for producers and harvest workers in harvesting and post-harvest processes, and engage in packaging and marketing efforts. We also intend to participate in domestic and international delegations and fairs that will benefit the sector.

I believe that with the quality of our products and the meticulous efforts of our exporters, we have achieved world standards. Upholding this quality throughout every stage from production to final consumption will, I am confident, pave the way for even greater success.

SECTORAL EXPORT ASSESSMENT

FRUIT AND VEGETABLE PRODUCTS SECTOR

MELİSA TOKGÖZ MUTLU
Member of TİM Sectors Council

Türkiye's economic locomotive, the fruit and vegetable products sector

Türkiye's economic locomotive, the fruit and vegetable products sector, utilizes the country's agricultural potential to make significant contributions to the economy. Türkiye's climate and soil conditions are highly favorable for fruit and vegetable production, and products from this sector are in demand both domestically and internationally for their high quality and competitive prices. Moreover, by bridging agriculture and industry, the sector supports agricultural production while stimulating industrialization.

Given its agricultural foundation, the sector should evolve alongside both agriculture and industry. It's crucial for Türkiye to establish highly competitive industries using local resources to enhance its global market competitive-

ness. In 2023, the sector contributed approximately 2.5 billion dollars to total exports, representing a 1.1% share.

To sustain the sector and increase exports of high-value-added products, Türkiye must further leverage its agricultural potential. Promoting its gastronomic richness and culinary culture on international platforms will enhance the country's image.

In 2024, efforts will focus on maximizing the sector's potential and boosting international competitiveness through sustainable agricultural and trade policies. This approach will contribute to economic growth and elevate Türkiye's reputation globally by showcasing its gastronomic diversity.

AHMET GÜLEÇ
Member of TİM Sectors Council

200 countries encompass a strong export network that we possess

In 2023, the total export of Furniture, Paper, and Forest Products reached 7.983 billion dollars, with Türkiye capturing a share of 3.6% from its exports. Iraq, the United Kingdom, Israel, Germany, and the USA emerged as our top export markets, underscoring our robust export network spanning 200 countries.

The global economic slowdown, particularly in the US and Europe, along with tensions in the Middle East, posed significant challenges for our exporters in 2023. Concurrently, rising production costs domestically undermined the global competitiveness of our labor-intensive sector.

Despite these challenges, our actual performance diverged from the projections made at the beginning of 2023. The decline in demand affected

not only us but was a common trend globally. For instance, global furniture imports fell by around 10% last year, with major markets such as the USA, Germany, the UK, France, Canada, and Japan experiencing reductions ranging from 8% to 20%. Nevertheless, Türkiye strengthened its position globally, achieving its highest share yet in world furniture trade at 1.8%. According to CSIL data, we currently rank as the 7th largest furniture exporter globally. Throughout Furniture, Paper, and Forest Products, despite global challenges, we maintained a robust position.

SECTORAL EXPORT ASSESSMENT

HAZELNUT AND PRODUCTS SECTOR

HASAN OSMAN SABİR
Member of TİM Sectors Council

We are the world leader in hazelnut production and exports

As known, our country holds the position of world leader in hazelnut production and exports, directly contributing to financing our current account deficit with hazelnut exports that contain minimal imported inputs. Over the past 10 seasons, hazelnut exports have brought in a net income of \$20.5 billion in foreign exchange to our country.

In 2023, a total of 283,519 tons of in-shell hazelnuts were exported to 121 countries, generating \$1,864,551,043 in foreign exchange revenue. Compared to the previous year, there was a 9.29% decrease in quantity but a 6.62% increase in value.

The future of our sector holds promise, but we must swiftly adapt to developments in competitor countries and meet emerging requirements. Due

to high base prices set in dollars for export prices, hazelnut production in competitor countries has increased by approximately 100,000 tons of in-shell hazelnuts over the past decade. This has also led to the establishment of new planting areas. While Türkiye has maintained an 80% production share, it has now declined to 60%, affecting our leadership position. Sustaining this policy in the long term is impossible. Our expectation is to restore direct income support to previous levels and ensure the development of the export market under free market conditions. In years of excessive production, intervention purchases can be made if necessary, but under current conditions, this is not required.

SECTORAL EXPORT ASSESSMENT

HVAC-R SECTOR

SALİH ZEKİ POYRAZ
Member of TİM Sectors Council

2024 export target of the air conditioning industry \$7.8 billion

The Turkish HVAC sector concluded 2023 as a successful year, achieving a 7.3% increase compared to the previous year, reaching a record-high export level of \$7.2 billion. The sector's export-to-import ratio stood at 90%, with exports increasing across all subcategories including heating, cooling, air conditioning, plumbing, ventilation, and insulation. Thus, the sector surpassed the Turkish average in terms of export value per kilogram.

Several factors contributed to this success. Primarily, the Turkish HVAC sector has been advancing efficiently and cohesively from marketing to sales, communication to implementation, with all stakeholders coordinating effectively. The sector's capability for high-quality production stands out as

a major advantage, coupled with a notable increase in production capacity.

Our aim is to build on this success and keep the sector at the forefront of our agenda. In 2024, the HVAC sector is targeting an export figure of \$7.8 billion, focusing on green transformation, eco-design-oriented production, sustainability, environmental awareness, energy efficiency, digitalization efforts, and university-industry collaboration. From this standpoint, we anticipate an 8% growth by the end of the year, surpassing our current potential.

BURAK YAKIN
Member of TİM Sectors Council

The Turkish jewelry sector achieved exports worth 7.6 billion dollars in 2023

The global jewelry sector shrank from \$110 billion to \$72 billion after the pandemic in 2018, but rebounded to over \$100 billion by 2021. In 2023, amidst continued global market growth, the jewelry sector increased its exports by over 30% according to TİM data. Türkiye, which achieved \$5.6 billion in exports in 2022, marked a significant milestone by reaching \$7.6 billion in exports in 2023.

According to Trademap statistics, Türkiye held a 3.97% share with \$4.4 billion from the \$110.6 billion global market in 2018, which rose to a substantial 6.50% share with \$8.1 billion from the \$124.5 billion market in 2022.

Unfortunately, the first five months of 2024 saw a severe decline in our exports due to the implementation of gold quotas. Although the decline may

seem moderate in figures, considering that gold prices rose from \$1800-1900 to \$2300 per ounce, the decline in revenue was much higher. Now, our focus is on resolving our access to raw materials to bring back investors who left, and to heal the wounds from the first five months. For the remainder of 2024, as the Jewelry Exporters' Association, we officially declare a state of emergency to collaborate with the economic administration and support to boost exports and make Türkiye an attractive destination for investors.

SECTORAL EXPORT ASSESSMENT

LEATHER AND LEATHER PRODUCTS SECTOR

MUSTAFA ŞENOCAK
Member of TİM Sectors Council

With \$1.85 billion, we achieved the second-best performance of the past 10 years

In 2022, the Leather and Leather Goods sector, which was breaking records, entered 2023 amid rumors of recession in Europe and the US, and the Russia-Ukraine war. Although we achieved record monthly exports in January and March, starting the year with a positive momentum, our sector gradually lost this momentum due to the global economic downturn.

Despite the negative expectations and a relatively unfavorable global outlook, we managed to achieve the second-best performance of the past 10 years with \$1.85 billion in exports. The average unit price increased from \$10.2 to \$11.3, making a significant contribution to our country's value-added exports. In March, we set a monthly export record in the footwear sector. Once again, our footwear and

leather goods sectors showed their second-best performance of the past decade. Unlike the general decline in the leather apparel sector last year, there was a 5.6% increase. In the finished leather sector, there was a 2% increase in quantity. While we value these positive figures, we continue to raise the problems of our exporters and industry on every platform and work to produce projects. We are waiting for more successful years for our sector when these problems are resolved.

To move the sector forward and increase our share in global trade, we continue our efforts to resolve the scale problem of our sectors and to make new investments in carbon-neutral OSB, shoe factory, and related industry."

KUTLU KARAVELİOĞLU
Member of TİM Sectors Council

Türkiye's share in global machinery and equipment investments has risen to 3%

According to consolidated data classified everywhere in the machinery manufacturing industry, our sector increased its exports, including free zones, by 11% compared to the previous year, reaching \$28.2 billion by the end of 2023. Exports to Germany, where machinery imports remained flat, increased by 8% to \$3.5 billion. Our revenue from Russia, our second-largest export destination, rose by 50% to nearly \$3 billion. In a year when global goods exports are estimated to have shrunk by 5% and machinery exports by 1%, our sector closed the year by increasing its share of global exports to nearly 1.2%.

While machinery and equipment investments worldwide grew by 9% between 2019 and 2023, they

rose by 86% in our country during the same period, reaching an annual total of \$170 billion. With this extraordinary performance, Türkiye's share in global machinery and equipment investments rose to 3% last year. Since a significant portion of these investments was made by our machinery manufacturers, machinery production increased by 11% globally in terms of quantity, while it rose by 73% in our country over the crisis-dominated four-year period.

We believe that these highlights of the machinery sector's success demonstrate our adeptness in technology development, refuting the propaganda that we are dependent on imports, and allowing us to look to the future with greater optimism.

SECTORAL EXPORT ASSESSMENT

OLIVE AND OLIVE OIL SECTOR

M. EMRE UYGUN

Ege Olive and Olive Oil Exporters'
Association Chairman of the Board

Our sector reached its highest export figures in history during the 2022/23 season

In the 2022/23 season, our sector achieved record-breaking export figures, reaching its highest levels in history, as monitored seasonally for table olives (October 1 - September 30) and olive oil (November 1 - October 31) production and foreign trade data. As you all know, our table olive exports increased by 7% in value compared to the previous season, rising from \$172 million to \$184 million.

Our olive oil exports saw a remarkable increase of 158% in quantity, from 58,000 tons to 150,000 tons, and a 259% increase in value, from \$201 million to \$723 million. We exported olive oil to a total of 118 countries during the 2022/23 season.

With our leadership in table olive production globally and our position as the second-largest producer of olive oil

after Spain, coupled with record production in the 2022/23 export season, our total sector exports reached \$947 million. Our sector has gained a significant position in global markets, and we aim to increase this figure to \$1.5 billion within the next few years.

Our country's record-high olive oil yields and sufficient production capacity to meet these yields, along with our modern facilities equipped with high technology and sustainable production methods, have enabled us to rapidly respond to increased demand with products that meet global standards.

İSMAİL YILMAZ
Member of TİM Sectors Council

Türkiye's total ornamental plant exports amounted to 137 million dollars in 2023

The ornamental plants sector holds great significance in the economic landscape due to its employment opportunities and high added value. Ornamental plant production and trade are increasing both globally and within Türkiye. As of 2023, Türkiye cultivates ornamental plants on a total area of 5,815 square kilometers. Outdoor plants account for 70% of these areas, while cut flowers make up 26%, with high-quality, export-oriented production concentrated particularly in provinces such as Antalya, Izmir, Isparta, Sakarya, Mersin, Adana, Bursa, and Yalova.

The export of ornamental plants has shown rapid development, with Türkiye's total ornamental plant exports reaching 137 million dollars in 2023. Türkiye exports ornamental plants to 75 countries worldwide. In 2023, the top

countries for ornamental plant exports from Türkiye were the Netherlands, the United Kingdom, Azerbaijan, Georgia, Germany, Iraq, Turkmenistan, Russia, Uzbekistan, and Denmark.

Live plants, comprising indoor and outdoor varieties, constitute the most important product group in ornamental plant exports, accounting for 54% of total exports. In the live plants category, Türkiye achieved exports totaling 74.2 million dollars in value. Cut flowers also contributed significantly, with exports amounting to 49.3 million dollars in 2023.

Looking ahead to 2024, we anticipate our sector's exports to reach 160 million dollars. To achieve this goal, we will continue our effective promotional campaigns and projects aimed at identifying new target markets.

SECTORAL EXPORT ASSESSMENT

SERVICES SECTOR

SALİH ZEKİ ÇAKIR
Member of TİM Sectors Council

The services sector increased its share in total exports to 28%

As service exporters, we successfully concluded the year 2023. Our country achieved a new record with \$255.4 billion in goods exports and \$101.7 billion in service exports. The services sector increased its share in total exports to 28%, highlighting the sector's crucial role with a \$52 billion trade surplus.

Türkiye stands out positively from other countries with its culture, values, unique business models, and unmatched workforce. We believe that the high potential of service exports, coupled with the positive flexibility and adaptability demonstrated by our sectors in response to economic changes, are key factors leading us to success. As service exporters, we not only contribute to our own sector but also provide positive contributions to all other

sectors through the services we offer.

However, we recognize that each sector has its own requirements and expectations to increase exports further. We believe that meeting these demands and expectations will accelerate our progress towards our goals and elevate our success even further.

Therefore, as service exporters, we are targeting a 20% growth for this year. We have set our export target at \$120 billion by the end of the year. We are aware that achieving this target for our 10 sectors is challenging but feasible. As we strive towards our goals, we emphasize the dynamism of our sectors and the importance of collaboration in our progress.

SECTORAL EXPORT ASSESSMENT

SHIP, YACHT AND SERVICES SECTOR

BAŞARAN BAYRAK
Member of TİM Sectors Council

Our sector reached a volume of \$1.94 billion, marking a 33.6% increase compared to the previous year

In 2023, the ship and yacht sector achieved a value of \$1.941 billion, marking a 33.6% increase compared to the previous year. Ship and yacht exports, accounting for approximately 1% of our total exports, contribute positively to our country's average with their value-added and kilogram-based export values.

During the pandemic, global consumption habits contracted due to limited spending opportunities, leading people to save more compulsorily. As the pandemic's impact diminished in 2022 and 2023, it resulted in an excessive demand for consumption.

Post-pandemic demand surge created new ship demand in transportation, making our country a ship producer facing a 30% increase in new ship orders. The pandemic spurred a significant

increase in demand for yachts, driven by affluent individuals' preference for isolated holiday experiences, leading to a boom in demand for yachts manufactured in our country.

In 2024, economic slowdowns in the United States and European countries began to affect the ship and yacht sector, resulting in slight decreases in orders.

Despite financial challenges and labor supply issues, the ship and yacht sector will continue its growth efforts. With new investors entering the market, it will compete more strongly with other competitive countries worldwide. We are confident that the sector will elevate its position further among leading countries in its field.

SECTORAL EXPORT ASSESSMENT

STEEL SECTOR

İBRAHİM PEKTAŞ
Member of TİM Sectors Council

We will continue to defend our Turkish steel sector

The Turkish steel sector closed 2023 with losses. Protectionist measures imposed by the US and the European Union reduced the exports of the Turkish steel sector, while countries like Egypt and Algeria became exporters. In 2023, many countries, primarily Egypt and Algeria, exported steel to Türkiye. For the first time since 2015, the Turkish steel sector became a net importer based on the total of final steel products, including non-alloy billets.

China, which took advantage of the sanctions imposed on Russia, increased its exports in 2023. Additionally, the Israel-Palestine war and the earthquake disaster in our country led to a decline in the production and export of the Turkish steel sector. Türkiye's steel exports fell by 25.9% last year,

reaching 14.5 million tons in quantity and 14.9 billion dollars in value. Production also decreased by 4% to 33.7 million tons.

Aware that these negative trends will impact our sector throughout most of 2024, we have set new target markets that will contribute to our exports and planned a schedule to increase trade with these regions. After conducting trade missions to Chile, Peru, and Albania in the last quarter of 2023, we organized sectoral trade delegations to Lithuania and Germany since January. We will also organize a delegation to Tunisia in May. In addition to these delegations, we continue to participate in domestic and international conferences and fairs, which are important for the steel sector.

AHMET FİKRET KİLECI
Member of TİM Sectors Council

**We completed the year 2023
with the hope that it will serve
as a beacon for the years to
come**

2023 was a year marked by numerous challenges both for our country and our sector, both in humanitarian terms and in terms of foreign trade. Following the earthquake that affected 11 provinces, our priority was to heal our wounds. The century's disaster in cities where our sector is heavily active, coupled with ongoing inflation and shrinking demand in global markets, resulted in some weakening for our sector in 2023. However, thanks to the tremendous efforts of our government and people, our recovery process continues, and despite all these adversities, we completed 2023 with the hope that it will serve as a beacon for the years to come.

The textile and raw materials sector completed 2023 with a total export of \$9.6 billion. Representing our sector,

which exports to 199 countries and regions, remained aware of potential crises and opportunities, continuing their production and exports during this period.

The world is turning towards a different direction, and the future of our sector lies in sustainability. We must now steer our sector towards a more environmentally friendly production approach, accelerating our efforts towards green transformation and discovering ways to use our resources in an environmentally friendly and efficient manner. We are in an age of transforming production. In order to be the global leader of our sector and to exist in the future, we must strengthen our human capital and base our production approach on sustainability. Circular economy principles should not be an afterthought but should be integrated into every aspect of our lives.

SECTORAL EXPORT ASSESSMENT

TOBACCO SECTOR

ÖMER CELAL UMUR
Member of TİM Sectors Council

2024 will also be one of our key goals for sustainability

In 2023, our sector showed a significant positive momentum compared to 2022. With an 11% increase from the previous year, leaf tobacco exports amounted to \$255 million, while tobacco products exports reached \$667 million, totaling \$922 million in exports. Ranking fifth in global exports, the Turkish tobacco sector primarily exported to Iraq in 2023, followed by the USA, Georgia, and Kuwait. The largest export of leaf tobacco in 2023 was \$51 million to the USA, followed by Belgium, Indonesia, and Iran.

Throughout 2023, we actively engaged with relevant institutions and organizations to address sector-specific and export-related challenges. We closely monitored the initiatives aimed at resolving these issues.

Our sector plays a crucial role in the

Turkish economy in terms of employment creation, export revenue, and added value. Leaf tobacco holds high commercial value among our agricultural products. Türkiye ranks seventh globally in overall tobacco production and is a leader in oriental tobacco production. Key factors contributing to our sector's success include our production technologies meeting international standards, the quality of our products, contract farming with producers, and our commitment to sustainable agriculture practices.

LARGEST COMMODITY EXPORTER OF TÜRKİYE IN 2023

AUTOMOTIVE SECTOR'S LEADER
FORD OTOMOTİV SANAYİ A.Ş.

GÜVEN ÖZYURT
CEO of Ford Otosan

We Are Proud to Lead the Transformation of the Industry

The automotive sector globally experienced a year of growth momentum, thanks to the end of the chip crisis, low base effects, and the increase in vehicle availability. In Türkiye, this growth was driven by pent-up demand and the view of automobiles as an investment vehicle.

As Ford Otosan, the leading company in the Turkish automotive industry, we also had a successful 2023 in both domestic and global markets.

With a production capacity reaching 746,500 units, we achieved a total production of 589,758 units across our four factories in two countries, reaching an all-time high. We maintained our position as the leader in the commercial vehicle market by producing 77% and exporting 88% of Türkiye's commercial vehicles. Since our establishment, we have increased our foreign sales by 738 times, reaching 492,082 units, making us the export champion of Türkiye

for eight consecutive years and the automotive sector for twelve years.

Beyond our financial successes, 2023 held great significance for us at Ford Otosan. A prime example of this was the commissioning of our newly redesigned Yeniköy Factory, which we reimagined with innovative and efficient solutions in line with our vision to lead the sustainable and technological transformation of the automotive industry, befitting the 100th anniversary of our Republic.

While commissioning works at Yeniköy were ongoing, we commenced the production of the next-generation version of the Transit Custom, Europe's best-selling van. The new Transit Custom made us proud by winning the "2024 International Van of the Year" (IVOTY) award. We transferred the production of the next-generation Courier, a vehicle designed and engineered by us, from Yeniköy to our Craiova Plant. Thus, we simultaneously launched two products in two different countries. The year 2023 was a year when all our models started to be renewed, our production capacity increased, and our vehicles and facilities were upgraded with the latest technologies.

Our global brand, Ford Trucks, successfully continued its growth in the heavy commercial vehicle segment. Ford Trucks had another record-breaking year, increasing its production capacity to 22,500 units. Our production grew by 16% to 19,132 units, and our sales increased by 15% to 19.123 units. We introduced our new F-LINE series, which stands out with its connected vehicle technologies, advanced safety features, and modern design. In addition to electrification, Ford Trucks focused on hydrogen technology, successfully igniting a single-cylinder internal combustion engine running on hydrogen. We also introduced Ford Trucks Care, an innovative and holistic business model that offers digital-first solutions under one roof.

Our deep-rooted experience in the automotive industry, strong engineering and production infrastructure, pioneering technologies, and our goal of bringing the future to life today play a significant role in these achievements.

At Ford Otosan, we are transforming our products, production processes, and experiences within the framework of our visionary €2 billion investment plan announced in 2021. We have entered a period where we are shifting into a higher gear on our electrification roadmap. In 2024, we will introduce a series of exci-

ting new vehicles.

The new all-electric E-Tourneo Courier, developed by our engineers, will be produced in Craiova. We will also roll out the electric version of the next-generation Transit Courier, which we designed and engineered, from the same plant. Production of Ford's best-selling van, the E-Transit Custom, and its plug-in hybrid model will begin in Yeniköy. The fully electric version of the Puma, currently produced in Craiova, will hit the roads in 2024, extending our electrification experience to the passenger vehicle segment. Another SUV leading Ford's electric vehicle initiative, the all-electric new Explorer, will also be introduced to our customers.

In summary, 2024 will be a year where we highlight our advancements in production, design, engineering, and electrification. We are proud to lead the transformation of the industry and are designing our infrastructure to create future trends. To maintain our success in the future, we will continue to invest in R&D and innovation.

FORD OTOSAN

SECOND LARGEST COMMODITY EXPORTER OF TÜRKİYE IN 2023

TOYOTA OTOMOTİV SANAYİ TÜRKİYE A.Ş.

ERDOĞAN ŞAHİN

President and CEO

Toyota Motor Manufacturing Türkiye INC.

We are Guiding Change, Focusing on the Future

At Toyota Motor Manufacturing Türkiye Inc., we take pride in reinforcing our leadership in the automotive industry with an innovative and continuously evolving approach throughout our exciting 34-year journey in Türkiye. While upholding Toyota's distinctive values, we are steadfastly working towards a robust position in the future of mobility. Through our exports totaling 4.1 billion dollars, we are pleased to

contribute to Türkiye's successful future and competitiveness by exporting high quality and value added vehicles to destinations worldwide.

**WE CROWNED THE 100TH
ANNIVERSARY OF OUR
REPUBLIC WITH THE
NEW TOYOTA C-HR, AN
INVESTMENT TOTALING 308
MILLION EUROS**

Last year marked a significant

milestone for us in the automotive industry and towards a sustainable future. Starting production of Türkiye's first Plug-in Hybrid Electric Vehicle (PHEV), the new generation Toyota C-HR, at our factory in Sakarya, we proudly celebrated the centennial of our Republic with great success. Additionally, we launched a new PHEV battery production line, making us the first factory in Toyota Europe to produce

batteries. Our new model, launched with additional 308 million euro investment, plays a critical role in Europe's electrification transformation, contributing to a total investment of 2.5 billion euros in our country. As the first Toyota factory worldwide to produce Türkiye's first Plug-in Hybrid (PHEV) vehicle, the new generation Toyota C-HR, we have also opened up new export markets such as Australia and New Zealand, securing a significant position in Türkiye's automotive exports. We have implemented advanced technology with our new PHEV battery line and eco-friendly water-based paint line. Moving forward, we will continue to produce our current C-HR and Corolla models with high efficiency and quality to serve our customers.

WE CONTINUE OUR EFFORTS FOR A MORE SUSTAINABLE FUTURE

At Toyota Motor Manufacturing Türkiye, we prioritize Sustainable Development Goals (SDGs) with a focus on Gender Equality, Quality Education, Reduced Inequalities, Good Health and Well-being and Climate Action. We have undertaken and continue to engage in numerous initiatives in these areas. Through our "Women's Touch to the Future" project, we empower women and support sustainable agriculture. In response to the February 6 earthquakes, we provided support in search and rescue efforts, emergency needs, and housing (72 houses), while aiming to integrate women into social and economic life through the Agricultural Development Cooperative Project, offering long-term solutions.

We execute various projects to enhance societal impact, ensuring we meet our primary responsibilities while prioritizing social obligations. Committed to contributing to societal development and leaving a sustainable world for future generations, we will continue our contributions as a model plant with high social responsibility aligned with Sustainable Development Goals.

At Toyota Motor Manufacturing Türkiye, we have prioritized Sustainable Development Goals (SDGs) focusing on Gender Equality, Quality Education, Reduced Inequalities, Good Health and Well-being and Climate Action. We have conducted and continue to conduct numerous initiatives in these areas.

Business Unit SOCAR Türkiye

SOCAR Türkiye Achieves Its Goals by Diversifying Export Products and Markets in 2023

With an investment of \$18.3 billion, SOCAR Türkiye stands as Türkiye's largest direct foreign investor, integrating operations across all group companies to become the country's largest integrated industrial group. Additionally, located in Izmir Aliğa, our facilities hold the distinction of being Türkiye's first "Special Industrial Zone."

Our group, employing approxi-

mately 5,600 individuals, primarily operates in the fields of Refinery and Petrochemicals. Our flagship, Petkim, showed positive performance in 2023, exporting to nearly 80 countries with an export figure of \$803 million. At STAR Refinery, which meets nearly all of Petkim's naphtha production needs annually, capacity utilization reached 117.1% in 2023. By the end of 2023, STAR Refinery covered approximately

19.5% of Türkiye's processed petroleum product demand. SOCAR Petroleum Trading, engaged in wholesale and retail sales of fuel for land, air, and sea transport, also excelled in exports last year.

The primary driver behind this success is our investment in R&D and digitalization. Implementing innovative projects has positioned us competitively both in our existing product lines and in newly developed products on the

international stage. As a result of these investments, our facilities have been recognized by the World Economic Forum's "Global Lighthouse Network" as leaders in using Industry 4.0 technologies in production. Petkim was the only Turkish company selected in 2020, and STAR Refinery followed suit in 2021, making it the sole refinery worldwide in this league.

Looking ahead, we aim to enhance our production capacity, commercial and operational capabilities to the highest standards in our core activities of refinery and petrochemicals through strategic investments. We also intend to increase our international trade in petrochemicals, electricity, and natural gas exports. Türkiye has emerged as a strong contender in the global energy sector, supported by its geographical location, skilled workforce, and growing economy. In addition to these advantages, various state incentives and grants are available to minimize Türkiye's external dependency and create added value through investments. Investments in new oil and natural gas facilities, along with renewable energy power plants, are strongly supported. At SOCAR Türkiye, we will continue to leverage these opportunities efficiently to create value for our country.

In 2023, SOCAR Türkiye capitalized on opportunities in the global energy markets through innovation and strategic planning, achieving growth both in export volume and diversification of exported products.

FOURTH LARGEST COMMODITY EXPORTER OF TÜRKİYE IN 2023

TÜRKİYE PETROL RAFİNERİLERİ A.Ş.

İBRAHİM YELMENOĞLU
Tüpraş General Manager

**In the new century of our
Republic, we are guided
by our motto
“Energy to the Future”**

2023 was a year when we experienced a myriad of emotions. Alongside the global economic and geopolitical uncertainties, the earthquakes on February 6th deeply affected all sectors throughout the year. While developing strategies to manage global economic uncertainties, we also worked together to heal the wounds caused by the earthquake. Amidst all this, we celebrated the pride of our

Republic's 100th anniversary. Despite the geopolitical tensions at global and regional levels, including G7 and EU sanctions in 2023, the strong and flexible structure of the petroleum sector prevented a crisis similar to the natural gas supply shortage.

As Türkiye's leading industrial company, we optimized our supply chain and diversified resources in crude oil procurement operations to evaluate market risks

and opportunities during fragile times. In 2023, fulfilling our duty to meet our country's energy needs without interruption under our 'My safety, my future' principle, we produced a total of 24.9 million tons of products, including crude oil and semi-finished products, with 26.2 million tons charged and 87% capacity utilization.

Meeting a significant portion of market demand with 23.8 mil-

lion tons of domestic sales dependent on domestic demand, we achieved a total sales volume of 30.1 million tons, including exports and transit sales. Additionally, our total electricity sales reached 2,101 GW/hour in 2023. Holding 53% of Türkiye's storage capacity and a total of 51% share in the Turkish fuel products market, our company rightfully earned the title of export champion in the chemicals category by conducting fuel and crude oil derivative product exports worth approximately USD 3.9 billion, totaling 6.1 million tons in 2023.

At Tüpraş, we stand among the foremost refinery companies in the Mediterranean basin and neighboring regions with our high production and conversion capacity. Thanks to our high operational flexibility, extensive product portfolio, and accredited laboratories, we maintain a reliable and preferred supplier position. Thus, by opening up to new markets and reaching new customers, we sustain our position as one of the most significant exporters of fuel and non-fuel products in our region. Starting our bitumen exports five years ago, we achieved stable tonnage, exporting 850,000 tons in 2023.

Furthermore, we expanded our export product portfolio by producing demanded and high-value-added products within operational flexibility. Anticipating the continuation of risks and uncertainties in 2024, we will continue to support our country's economy through value-added product exports with the same responsibility and awareness.

On the other hand, under our slogan 'Energy to the Future,' our efforts continue in new business areas focused under our Strategic Transformation Plan launched in 2021. Advancing towards our goal of becoming Türkiye's leading Sustainable Aviation Fuel (SAF) producer, we aim to elevate our sustainability vision to new heights. With the operational competencies we will integrate, we will sustain our coun-

try's export gains.

Guided by our goal to lead Türkiye's energy sector transformation and our commitment to '2050 Carbon Neutrality,' we conduct our operations with full force in the new century of our Republic to secure Türkiye's energy and produce the energy of the future."

As Türkiye's leading industrial company, we optimized our supply chain and diversified resources in crude oil procurement operations to evaluate market risks and opportunities during fragile times.

FIFTH LARGEST COMMODITY EXPORTER OF TÜRKİYE IN 2023

**FERROUS AND NON-FERROUS METALS SECTOR'S LEADER
KİBAR DIŞ TİCARET A.Ş.**

HALUK KAYABAŞI
CEO of Kibar Holding

2023, we continued our stable growth of 5%

Despite the ongoing global economic, political, and geopolitical crises in 2023, our world, having surpassed the effects of the Covid-19 pandemic, faced a challenging period with various dimensions and impacts, both globally and in Türkiye. Nonetheless, Kibar Holding, a community focused on exports, successfully concluded 2023. We achieved our budgeted targets for the year, maintaining our steady growth of 5% as we do every year. Currently, approximately

60% of our total turnover is generated through our export-oriented activities. Our subsidiary, Kibar Foreign Trade, ranks among the top five exporters in Türkiye.

With over 20 companies operating in strategic sectors such as aluminum, automotive supply, flexible packaging, construction materials, and iron-steel, we export our products and technologies to hundreds of countries across five continents. Our strong financial structure, long-term strategies, know-

ledge and experience gained over half a century, and extensive range of products and services contribute to our leadership role in the sectors where we operate.

We continue to combine our sectoral expertise with ongoing R&D investments, effectively managing our export operations with a broad production network established in Türkiye and various geographies. This production network not only reduces our costs but also enhances our competitive advanta-

ge through logistical efficiencies.

Despite continued exchange rate fluctuations, inflation, supply-demand issues, and uncertainties worldwide in 2024, we remain committed to our investments and operations without slowing down. In addition to the advantages of being a well-established group, we have a prepared structure to respond to operational and financial risks in advance.

In 2024, as in every year, our goal is to increase our exports and close the year strongly. While taking steps to maintain our strength in international strategic markets, we will also continue our search for new markets. We will remain focused on high-value-added exports and strive to increase our contribution to the Turkish economy.

At Assan Alüminyum, despite all seasonal challenges and significant delays in shipments of new process lines, we completed the largest additional capacity increase in a short period of two years. With the aim of increasing the capacity of our Dilovası facilities to 100,000 tons, we successfully integrated a medium-sized complete new plant investment into our existing operations without interruption. Over the past four years, with investments exceeding \$150 million, we have increased our production capacity to over 360,000 tons at Assan Alüminyum. While maintaining our growth strategy focused on Europe and America in exports, we are strengthening our presence in North America with Kibar Americas, a Chicago-based 100% subsidiary of Assan Alüminyum.

We have completed investments aimed at increasing printing and slitting capacities at İspak Flexible Packaging. By the end of this year, we also plan to commission a new lacquering facility investment that will support growth strategies in aluminum and enable us to gain new shares in high-value export markets.

At Assan Hanil, one of the major automotive component suppliers in Türkiye, we are increasing our facilities in response to order increases and aim to commission additional new paint shop investments this year. In the automotive sector, amidst the transformation shaped by electric vehicle technologies, Assan Hanil has planned all necessary infrastructure

investments to respond quickly and as a pioneer.

In 2023, in line with our strategy to make Assan Panel a global brand among the leading companies in the sandwich panel sector, we are adding a new international investment to our overseas investments this year. With a £45 million investment, we plan to establish our facility in the 'Freeport East' free trade zone in Suffolk, UK, and complete it by mid-2025. Through our new production facility, we aim to have a stronger presence in the European market, particularly in the UK.

While taking all these steps as Kibar Group, our top priority remains sustainability. Under our 2025 Sustainability Strategy, we have identified 39 targets by analyzing the contributions of Kibar Group to the United Nations' goals to be achieved by 2030. In 2024, we will continue to work towards achieving these targets.

In 2024, our goal remains to increase our exports as we do every year. While taking steps to maintain our strength in international strategic markets, we will also continue our search for new markets. We will remain focused on high-value-added exports and strive to increase our contribution to the Turkish economy.

From Türkiye to the World..

As Lila Kağıt; We export the roll paper and tissue paper products we produce in Türkiye to more than 80 countries on 5 continents.

THE EXPORT CHAMPION OF ITS SECTOR FOR LAST 26 YEARS!

With 26 years consistent leadership and technologies spanning over 160 countries,
Vestel stands as Türkiye's Export Champion in its sector.

The export championship award in the electrical-electronics sector was granted by the Turkish Exporters Assembly based on the export revenues of Vestel for the year 2023. It has been determined based on "Turkey's Top 1000 Exporters" data of the Turkish Exporters Assembly.

SIXTH LARGEST COMMODITY EXPORTER OF TÜRKİYE IN 2023

**ELECTRIC AND ELECTRONICS SECTOR'S LEADER
VESTEL TİCARET A.Ş.**

ERGÜN GÜLER
Vestel CEO

We reach our technology to more than 160 countries today.

Our revenue in 2023 increased by 1% in real terms compared to the previous year, reaching 112.2 billion TL, and our net profit increased to 2.3 billion TL. During the same period, our overseas sales revenue amounted to 76 billion TL.

Today, we are reaching our technology to more than 160 countries. We are among Europe's top three TV manufacturers and among the top five in white goods. We have

been Türkiye's uninterrupted champion in electrical-electronic exports for a quarter of a century. With an export ratio reaching 63% in our sales, we are ranked sixth in the overall ranking determined by the Türkiye Exporters Assembly.

Our strong production today, our annual allocation of approximately 2% of our revenue to R&D activities, our workforce of nearly 20,000 qualified personnel, and our quality products provide us with a signifi-

cant advantage in exports.

The European white goods market, after an 8% contraction in 2022, continued to shrink by approximately 7% in 2023 due to high inflation, increased cost of living, and geopolitical uncertainties affecting consumer confidence. Following strong growth during the pandemic, the decline in the European TV market that began in 2021 continued in 2023.

In contrast, the Turkish white go-

ods market showed strong growth in 2023 despite the earthquake disaster in February, elections, tightening monetary policies, and high inflation. Consumer demand played a significant role in this growth. According to data covering six main products of the Turkish White Goods Manufacturers Association, wholesale domestic white goods sales grew by 14% in 2023. Retail sales growth, according to GfK, reached 18%. Vestel's domestic white goods sales in 2023 followed a trajectory parallel to market developments. The Turkish TV market grew by approximately 4% in 2023. While Vestel's wholesale TV sales grew in double digits domestically, retail TV sales also showed parallel growth in the market.

In an environment where confidence in the economy and the balance between production and consumption is being rebuilt, Vestel performed above average in the European market in 2023 and continued to expand into non-European markets.

There are many factors behind the recent increase in white goods exports. Manufacturers have relatively easier access to raw materials and components. Many manufacturers have years of experience. As a result, there is a qualified workforce. Government incentives and support for our sector also strengthen manufacturers' hands in exports.

Türkiye's geographical proximity to markets such as Europe, the Middle East, and Africa contributes to lower logistics costs. Turkish white goods are more competitively priced compared to similar products abroad, increasing demand for Turkish products.

Today, the world is undergoing geopolitical change, and technology is changing in parallel. Vestel is investing in new areas alongside these changes. While continuing to grow in conventional businesses such as white goods and TVs in new markets, we are particularly focused on exponential growth in mobility and energy storage solutions. Under our newly established 'Vestel Mobility' organization, we will continue to export electric vehicle charging

stations, electric vehicle components, and battery energy storage solutions.

With our new company, our goal is to exceed a billion dollars in market value in the mobility market, which ranks among the top growth areas of the future over the next three years.

We do not foresee significant contraction in the sector in the first 9 months of 2024 in Türkiye. I believe that the economic program is continuing successfully. Volatility in foreign exchange rates is decreasing, and a general sense of confidence is forming in the market. This situation also reflects positively on investors.

While maintaining our strong presence in Europe in 2024, Vestel will continue to deepen its presence in new markets such as Africa, North America, Latin America, and Asia. We will continue to enhance our competitiveness in global trade through our global collaborations, licensing agreements, and investments in our brand.

VESTEL

Today, our strong production, our annual allocation of approximately 2% of our revenue to R&D activities, our workforce of nearly 20,000 qualified personnel, and our quality products provide us with a significant advantage in exports.”

SEVENTH LARGEST COMMODITY EXPORTER OF TÜRKİYE IN 2023

Türkiye-RENAULT OTOMOBİL FABRİKALARI A.Ş.

JAN PTACEK
Chairman Oyak Renault

We Are Working to make Türkiye the Export Hub for the Renault Brand

Oyak Renault Automobile Factories became Türkiye's largest passenger car manufacturer in 2023, producing 325,366 vehicles. With the export of 230,397 cars in 2023, we also hold a leading position in passenger cars export.

Renault has been present in Türkiye for 55 years, together with our strong and reliable partner OYAK, we produced more than 7.5 million cars and one out

of every 7 cars in Türkiye is a Renault brand car. Türkiye plays a major role as one of our most important hubs for the "Renault International Game Plan 2027". Our ambition is to be the market leader in Türkiye, to strengthen our brand with new products, especially to develop a strong presence in the SUV segment, and to deploy an electrification strategy based on hybrid and electric vehicles.

In this regard, we proudly presented the all-new Renault Duster, featuring innovative technical equipment, enhanced features, and a powerful design. We are proud the New Renault Duster will be produced in Oyak Renault plant in Bursa. It is a first step of our International Game Plan 2027 that will allow us to produce 4 new Renault models in Türkiye. The new Renault Duster will help us to strengt-

hen the brand, expand our footprint in SUV market and implement our electrification strategy. We will transform our Bursa plant into an export center not only for Europe but also for the rest of the world.

Oyak Renault has achieved high level of industrial excellence and reached one of the best quality levels in Europe. New Renault Duster launch will be a new milestone in the development of our industrial presence in Türkiye.

Renault, aiming to make the Oyak Renault factory, which currently exports 75% of its production to Europe, a global export hub for countries worldwide by 2027, will expand its global presence by exporting future C SUVs to more than 50 countries.

To realize this ambitious plan, Renault Group, and its partner OYAK plan to invest more than 400 million euros through the Oyak Renault joint venture to implement the production of new models in Türkiye

Oyak Renault

Otomobil Fabrikaları

Our goal is to become the market leader in Türkiye, strengthen our brand with new products, establish a strong presence especially in the SUV segment, and implement an electrification strategy based on hybrid and electric vehicles.

EIGHT LARGEST COMMODITY EXPORTER OF TÜRKİYE IN 2023

ARÇELİK A.Ş.

HAKAN BULGURLU
Arçelik CEO

**We aim for approximately
2% growth in our
international revenue in
foreign currency terms**

We left behind another challenging year, marked by geopolitical tensions, global inflation, high interest rates, and earthquakes.

In 2023, our utmost priority was to aid in the recovery efforts following the earthquakes that devastated 11 provinces. Under the leadership of Koç Holding, we worked to ensure that the 'Hope City' container cities at

five different locations were ready for occupancy. Additionally, we set up various facilities including Arçelik Café, children's playroom, and library. To provide employment opportunities in the aftermath of the disaster, we also established call centers.

Global uncertainty persisted throughout 2023, negatively impacting both businesses and consumers alike. Despite significant inflation, the domestic white

goods sector in Türkiye remained robust, witnessing a growth of 14%. However, exports saw a decline of 10%, while sales reached 32 million units.

Amid sluggish consumer demand, the global white goods market experienced a 3% year-on-year decline in turnover, settling at USD 225 billion. Consumer demand also shrank across our core European markets. Despite these challenges, our

organization achieved a turnover of EUR 3.1 billion in Europe, mainly driven by the strong presence of Beko in Western Europe and Arctic in Eastern Europe. Since joining forces with Hitachi, we have made substantial investments in enhancing productivity and performance in the Asia-Pacific region. While maintaining our leading position with Dawlance in Pakistan and Defy in South Africa, our new sales strategy in Bangladesh contributed to an impressive 182% EUR-based surge in online sales last year. In 2024, while we expect our sales revenue in Türkiye to remain flat compared to the previous year, we aim to grow our international sales by about 2%. Additionally, we anticipate our investment expenditures to be around 300 million euros.

Sustainability has long been incorporated in our business model, and as a leader in our industry, we consider it our responsibility to 'inspire sustainable lives in every home'. In 2023, Arçelik once again received the highest score (86/100) in the Household Durables category of the Dow Jones Sustainability Index, the gold standard of corporate sustainability indexes, marking the fifth year in a row.

Our solar panel manufacturing plant in Istanbul became operational last year. With an annual average production capacity of 550,000 solar panels and effective utilization of highly automated production technologies, this advanced facility plays a pivotal role in the transition to clean energy. Last year, our primary focus in R&D was on the development of energy-efficient and eco-friendly technologies. We conducted 374 energy-efficiency projects and successfully reduced the average annual energy consumption per unit produced by 11%. Last year, we created over 20 AI applications designed to provide deeper insights into consumer behavior and streamline our sales processes.

The strategic decision to establish a new partner-

ship with Whirlpool in Europe was the highlight of last year. With Beko Europe, we now stand as the number one home appliance manufacturer in Europe and the second largest in the world. Our new factories in Egypt and Bangladesh are also set to start operations this year.

Arçelik

In line with our sustainability goals in our R&D efforts, we implemented 374 energy efficiency projects and reduced total energy consumption per product in production by 11% annually.

NINTH LARGEST COMMODITY EXPORTER OF TÜRKİYE IN 2023

MERCEDES-BENZ TÜRK A.Ş.

SÜER SÜLÜN
CEO of Mercedes-Benz Türk

Our Goal: Continuing to Proudly Represent Türkiye on the Global Stage

As the leading company in Türkiye's heavy commercial vehicle industry, we continue our activities with the mission to lead the industry and contribute to the national economy. 2023 was a year of great achievements for us. Besides being the best-selling truck and truck tractor brand and coach brand in Türkiye, we also maintained our leadership in truck and bus exports.

Looking at the performance of our sector in 2023, automotive exports stood out as the star performer. The automotive sector, which reached a \$35 billion export volume in 2023 from \$31 billion in 2022, took the export championship of 2023.

For Mercedes-Benz Türk, our export performance in 2023 was also impressive. With our Aksaray Truck Plant, one of Daimler Truck's three major truck pro-

duction centers, and our Hoşdere Bus Plant, the largest bus factory of Daimler Buses, we achieved record production and exports. In 2023, our Aksaray Truck Plant, where every 6 out of 10 trucks produced in Türkiye were manufactured, set a record with exports totaling 14,401 units to 15 countries. Additionally, at our Hoşdere Bus Plant, we produced 4,308 buses, putting our stamp on 2 out of every 5 buses produced

in Türkiye. We closed the year as the company exporting the highest number of buses and trucks, exporting our buses to a total of 32 countries and our trucks to 15 countries.

At the heart of all these achievements are our employees who embrace the vision and values of Mercedes-Benz Türk. Our top-level quality standards, continuous improvement, innovation mindset, and corporate culture focusing on customer satisfaction continuously elevate our success standards. At Mercedes-Benz Türk, we manufacture for Türkiye and the world in our factories. Our aim is to maintain our leadership both in the domestic market and in exports, and to continue representing Türkiye with pride on the global stage. In this context, we will continue our investments in R&D activities, Industry 4.0 technologies, and projects focusing on sustainability to serve our country's industry and shape the future of our industry.

In 2024, we continue to work with our mission to produce for the world from Türkiye, contribute to our country's employment and economy.

Mercedes-Benz

The automotive sector, which reached a \$35 billion export volume in 2023 from \$31 billion in 2022, took the export championship of 2023.

TENTH LARGEST COMMODITY EXPORTER OF TÜRKİYE IN 2023

DEFENCE AND AEROSPACE SECTOR'S LEADER
BAYKAR MAKİNA SAN. VE TİC. A.Ş.

HALUK BAYRAKTAR
CEO, Baykar

“We will take our flag higher in exports”

2023 was a year of new horizons for Baykar, as we consolidated our ongoing efforts toward innovation and technological leadership in the industry. Since its establishment, our company has been guided by the “National Technology Initiative” vision, seeking to make Türkiye more independent and more competitive in the field of defense and aerospace. Accordingly, we were proud to lead the industry

with our export performance and to become one of Türkiye’s top ten exporters.

97.5 percent of all orders that Baykar received in 2023 were export contracts. That record share of exports helped us become a global brand in defense and aerospace. Our success was driven by our R&D investments, our innovative products, and our international collaborations. As of April 2024, we signed export agreements with 33

countries for the Bayraktar TB2 and nine nations for the Bayraktar AKINCI.

Our indigenous platforms helped our country strengthen its position in exports with their achievements in operational theaters and their technological superiority. More importantly, we were able to create an export ecosystem in cooperation with our solution partners and suppliers. In this sense, a broad range of indigenous components,

including ASELSAN's indigenous electro-optical systems and Roketsan's indigenous munitions, are exported together with the Bayraktar TB2 and the Bayraktar AKINCI.

Despite global challenges and fierce competition, the Turkish defense and aerospace industry continued to grow in 2023. Our country's investments in high technology and strategic partnerships were significant factors bolstering its defense and aerospace exports. Meanwhile, companies across the industry reached a certain level of global competitiveness with their superior products and engineering skills.

Going forward, we aim to make additional investments in space technologies and to further develop our unmanned platforms in order to further increase our exports. With Fergani, our space venture, we plan to put our first communication satellites in the Low Earth orbit and to develop orbital transfer vehicles. At the same time, with the Bayraktar KIZILELMA and the Bayraktar TB3, we are developing platforms capable of taking off and landing on short-runway vessels that will create a paradigm shift in the battlefield. Such projects will further strengthen our country's technological independence and add to our competitiveness worldwide.

In 2024, we are planning to further increase our defense and aerospace exports, to enter new markets, and to bolster our international partnerships. Closely monitoring global technological developments, we will swiftly develop solutions to emerging threats and needs as we keep developing next-generation technologies.

The Turkish defense industry's defense and aerospace exports soared from \$248 million in 2002 to \$5.5 billion in 2023. Baykar single-handedly accounted for 32 percent of the industry's total exports amounting to \$5.5 billion. Over the last decade, the Turkish defense industry exported 230 different products to

185 countries, making significant progress toward becoming a household name in the global marketplace. Whereas Türkiye's average export was worth \$1.57 per kilogram, the value of the defense industry's exports exceeded \$65 per kilogram. In this sense, the industry made significant contributions to the Turkish economy and the Turkish society's overall wellbeing. Such achievements and numbers demonstrate the strength of the foundation on which our future goals stand. Baykar will continue to work with its innovative vision to serve our nation and to further strengthen the Turkish defense industry's standing in the global marketplace.

BAYKAR

“In the future, to further increase our export success, we aim to invest more in space technologies and further develop our technologies in unmanned platforms.”

We are one of the leading industrial enterprises in Türkiye, and with a history spanning more than a century filled with achievements, we take justified pride of looking to the future with confidence.

We maintain our leadership in various fields across Türkiye and on the global stage, primarily in the textile industry, which is the flagship of the Group, and we are among the largest producers of renewable energy, cement and packaging in Türkiye.

With thousands of employees, we produce and export to more than 100 countries. With every step we take, we move forward dreaming of a much stronger Türkiye.

LARGEST SERVICE EXPORTER OF TÜRKİYE IN 2023

TÜRK HAVA YOLLARI A.O.

PROF. DR. AHMET BOLAT
Chairman of the Board and Executive
Committee

As Turkish Airlines, we have been Türkiye's export champion for the 15th consecutive time

In 2023, despite the challenging operational environment faced by the aviation sector, Turkish Airlines managed to sustain its growth. While the global capacity for international flights in our sector lagged behind 2019 levels by 12%, our brand soared above, achieving a 27% increase over 2019 and solidifying our position among the leading airlines.

With these developments, Turkish Airlines has been crowned Türkiye's export champion for the 15th consecutive year. In 2023, we achieved

\$16.3 billion in service exports, ensuring \$8.1 billion in net foreign exchange earnings remained in our country. Over the past five years, we have doubled our export revenues and increased our net foreign currency inflows by two-fold.

As the airline with the most destinations worldwide, in 2023, we expanded our flight network to include Lusaka, Krakow, Palermo, Detroit, and Osaka. We continued our efforts in 11 target countries (USA, Canada, Mexico, Australia, Singapore, South Korea, Indonesia, Japan, China, Ta-

iwan, and Malaysia) to increase the number of high-quality tourists visiting Türkiye. Through collaborations with players and brands, and by promoting historical and cultural heritage sites like "Taş Tepeler," we aim to strengthen these initiatives. With the upcoming "Ankara Plus" program on AJet, covering 15 cities within a 3-hour road distance from Ankara, we aspire to transform the capital into Türkiye's third-largest tourism city.

We are also advancing in the cargo sector. Through our subsidiary Wi-

dect, established in September 2023, we aim to integrate all logistics services, providing added value to both our country and stakeholders while boosting our e-commerce volume.

Turkish Airlines is planning for double-digit growth in 2024. In the first four months of 2024, our capacity increased by 11.8% compared to the same period last year, with an 8.0% growth in passenger numbers. We expect this strong growth trend to continue throughout the rest of the year. March 2024 marked a significant milestone with the launch of our Melbourne route, expanding our flight network to the Australian continent. On June 11, we are opening our 14th destination in the US with the Denver route. Towards the end of the year, we plan to commence direct flights to Sydney. With additional aircraft to our fleet and new routes opening, we are poised to strengthen and expand throughout 2024.

Digitalization, a key focus in our future goals, aims to streamline all processes for enhanced efficiency and to deliver a superior customer experience. By increasing investments in online platforms and other technological solutions, we aim to become one of the top three airlines in the digital experience arena, thus elevating customer satisfaction to even greater levels.

Turkish Airlines plans to achieve double-digit growth in 2024. In the first four months of 2024, our capacity increased by 11.8% compared to the same period last year, while the increase in the number of passengers reached 8.0%.

SECOND SERVICE EXPORTER OF TÜRKİYE IN 2023

PEGASUS HAVA TAŞIMACILIĞI A.Ş.

MEHMET TEVFİK NANE
Pegasus Airlines Chairman of the Board

We had high operational profitability in 2023

In 2023, our operational profitability was at a high level. Our EBITDA margin reached 838 million Euros, at 31.4%, exceeding the industry average profitability. Our international sales also reached 2.15 billion dollars. Both these figures and the EBITDA margin represent the highest amounts and rates in Pegasus' history. Additionally, I would like to emphasize that our EBITDA margin is among the highest in the industry. These figures indicate a very successful year for our company in 2023.

The geographical advantage of our

country is quite significant. Türkiye is reachable within a maximum of 4-5 hours by plane from many countries. Moreover, we have a high number of airports and a robust infrastructure in our country. On the other hand, our airline companies are growing with correct strategies. We can list these as important advantages related to airline passenger and cargo transportation services, which are forex earning services provided by companies in our sector.

In addition to these advantages, to strengthen our position in the

market, we plan to carry out the following major activities in 2024: efficient operational management to ensure optimal operational costs, expansion of our fleet and flight network with new aircraft investments, continuation of efforts in digitalization, increase in ancillary revenues, ensuring competitive ticket prices through effective cost management, and expanding the scope of our sustainability efforts...

Increasing ASK (Available Seat Kilometers), an important measure of airline capacity, by 10-12% in 2024

compared to 2023, achieving “mid-to-high single-digit growth” in ancillary revenue per passenger compared to 2023, and an increase in cost per ASK (excluding fuel) by “mid-to-high single-digit” in 2024 are among our main goals.

We believe that export incentives provided by our government, especially Turquality, have greatly benefited our country. The fact that our service exports increased from 14 billion dollars in 2002 (indexed to 23.7 billion dollars in 2023) to 101.7 billion dollars in 2023, and the ratio of our service exports to global service exports increased from 0.9% in 2002 to 1.3% in 2023, is evidence of this.

As Pegasus Airlines, we plan to take delivery of 68 aircraft by 2029. The increase in the amounts and rates mentioned can significantly contribute to the rapid growth rates targeted by the civil aviation sector in the coming years. Therefore, we see value in considering a special incentive program for the civil aviation sector. Furthermore, addressing infrastructure deficiencies that hinder capacity growth at our airports will contribute to the growth of our companies and hence our export amounts. Completing the investment in the second runway at our main hub, Sabiha Gökçen Airport, and starting and completing construction of the second terminal are crucial to increasing the efficiency of the airport and fully utilizing its capacity.

PEGASUS

We believe that export incentives provided by our government, especially through programs like Turquality, greatly benefit our country.

THIRD SERVICE EXPORTER OF TÜRKİYE IN 2023

GÜNEŞ EKSPRES HAVACILIK A.Ş.

MAX KOWNATZKI
Güneş Ekspres CEO

We continue to contribute as Türkiye's tourism ambassador

We continue to support Turkish tourism as SunExpress for 35 years. 2023 was a year where we continued our growth journey without slowing down. With investments in our fleet, operations, and human resources post-pandemic, we expanded our company while increasing our contribution to Turkish tourism and economy. In 2023, we increased our foreign exchange earnings for Türkiye by 30% compared to the previous year, reaching \$1.8 billion. In this context, we continue to be

one of Türkiye's leading companies in service exports.

In 2023, with our fleet of 66 aircraft, we further expanded our direct flights to Türkiye. While our load factor continued at a high level of 85%, we achieved a capacity growth well above the sector with a 46% increase in available seat kilometers compared to 2019.

We achieved a record passenger number of 12.6 million in 2023, an 18% increase from the previous year. Türkiye welcomed 6.2 million visitors from our main market, Ger-

many, last year, with SunExpress transporting more than half of these visitors, contributing to Türkiye's tourism goals.

Our successful operational and financial results are undoubtedly a reflection of the professional and friendly service we provide to our customers. By always placing customer satisfaction at the heart of our business, we continue to work diligently to provide our guests with the best possible experience. In 2023, we were honored to be named 'Europe's Best Leisure Airline' by the Skytrax

International Air Transport Rating Organization. This achievement, based on evaluations from 20 million passengers across various criteria from products and services to staff service, is a testament to the recognition of our efforts and services.

Türkiye will continue to stand out in the coming period with its high potential in tourism and high service quality. We are planning accordingly. In 2024, we increased our seat capacity by 19% compared to the previous year to meet demand abroad. Currently, we offer scheduled flights to more than 200 destinations in over 35 countries. By making Türkiye a destination visited throughout the year, not just for sun and sea vacations, we aim to expand tourism to twelve months a year. As Türkiye's tourism ambassador, we will continue to promote Türkiye abroad, enabling more people worldwide to discover Türkiye's rich culture, history, and unique natural beauty. With a goal of transporting 15 million passengers this year, we will continue to contribute to Türkiye reaching its target of 60 million tourists in 2024.

Our goals for the coming period are ambitious to further increase our contribution to Türkiye. Over the next decade, we will more than double our fleet. By 2035, we plan to increase the number of aircraft in our fleet to 166. Strengthening our capacity with new and modern aircraft, we will continue to add new destinations to our international flight network. We will continue to contribute to aviation, Turkish tourism, and the economy through investments in services, technology, and our employees."

FOURTH SERVICE EXPORTER OF TÜRKİYE IN 2023

İGA HAVALİMANI İŞLETMESİ A.Ş.

SELAHATTIN BİLGEN
CEO İGA İstanbul Airport

Our contributions to the national economy will continue to increase

At İGA İstanbul Airport, which is one of the largest projects in the history of the Republic, our priority is to continue our investments, collaborations, and operational excellence by enhancing our strategies aligned with correct priorities. Despite being in operation for only 5 years, we have achieved significant success on a global scale, as well as in Europe.

In 2023, we are proud to have solidified these successes by contributing to the 'Türkiye brand'. We increased the number of airlines we serve to 103 by the 100th anniversary of the Republic.

As the 3rd airport in the world, we have no doubt that in 2024, we will set a new record as the 'airport with the most airline operations'. Similarly, we increased the number of destinations we reached to a record level of 315.

We have been honored with a total of 5 awards, including the 'World's Best Airport' award from Global Traveler magazine, which reaches half a million readers in the USA monthly. At the 'Air Transport Awards', the only international event that rewards all major categories of the aviation sector, we have been selected as 'Airport of the Year'

four times in a row within five years.

As İGA İstanbul Airport, in 2023, we hosted 76,017,332 passengers, including 58,270,384 international passengers, performing 477,550 aircraft movements. We facilitated 477,550 flights, hosting 144 countries and connecting 592 cities. We are pleased to contribute to our national economy and citizens through the aviation sector, as the most preferred airport.

In the first 4 months of 2024, we hosted 152,956 flights, including 116,720 international flights, welcoming 24,272,190 passengers. Based on

this, we foresee that we will exceed the performance of 2023 by the end of 2024. We have declared 2024 as 'İGA's Investment Year', aiming to serve 85 million passengers. In 2023, we invested €160.1 million, increasing our investment target and planning to reach €656.5 million in 2024.

For the General Aviation Terminal, planned to be completed by the end of 2024, we will invest €35 million this year. Additionally, for the construction of the East-West runway and the North-South backup runway, we have planned a total investment of €331.2 million in 2024. For the Hilton Istanbul Airport, to be completed by the first quarter of 2025, our investment target for this year is €25.6 million.

At İGA Istanbul Airport, one of our most valuable priorities is sustainability. We embrace our responsibility to increase our contribution to our country, world, and the future of our children not only by developing our business goals but also by advancing environmentally sensitive practices every day. We aim to reduce emissions by 45% by 2030 and achieve 'net zero' emissions by 2050. In this regard, we have reached Level 4 in the 'Airport Carbon Accreditation' certification program initiated by Airports Council International (ACI Europe). In 2023, at our airport, 30% of water consumed was reclaimed, reducing our water footprint by 5% compared to the previous year. We achieved 35% recycling in waste and reduced energy consumption by 10.7%.

Furthermore, we continue to take steps to increase energy efficiency and adopt climate-friendly products, services, or technologies. By the end of 2024, with an investment of €212 million, we will become the 'world's first airport' to generate all its electricity from solar energy with our Solar Energy Plant (GES) project.

Over the next three years, we anticipate that productive artificial intelligence will enhance competitiveness, transform business models, and create new talent requirements. Therefore, we highly value our investments in technology and workforce. Embracing the 'Smart Airport' concept, we will further elevate İGA Istanbul Airport, which currently enjoys an approval rating of 89%. We will continue to provide a flawless travel experience for everyone with specialized facilities and services for disabled individuals, elderly passengers, and children.

Istanbul Airport

In 2023, as İGA Istanbul Airport, we achieved a performance that was 56% higher than the previous year, hosting a total of 76,017,332 passengers, of which 58,270,384 were international passengers. Additionally, we managed a total of 477,550 aircraft movements.

FIFTH SERVICE EXPORTER OF TÜRKİYE IN 2023

TAV HAVALİMANLARI HOLDİNG A.Ş.

SERKAN KAPTAN

TAV Airports Chief Executive Officer

Our global footprint has reached 33 countries

In the airport management sector, as Türkiye's leading brand globally, TAV Airports currently operates 15 airports across eight countries. In Türkiye, we manage airports such as Antalya, Ankara Esenboğa, İzmir Adnan Menderes, Milas Bodrum, and Gazipaşa Alanya, alongside international locations including Almaty in Kazakhstan, Tbilisi and Batumi in Georgia, Monastir and Enfidha-Hammamet in Tunisia, Üsküp and Ohrid in North Macedonia, Medinah in Saudi Arabia, Zagreb in Croatia, and Riga in Latvia.

Additionally, through our subsidiaries, we are involved in other areas of airport operations such as duty-free, food and beverage services, ground handling, information technology, security, and management services. With our service companies, our global footprint extends to 110 airports in 33 countries, supported by a workforce exceeding 40,000 employees dedicated to providing the best travel experience for our passengers.

In 2023, we served 96 million passengers across our airports, marking a 22% increase from the previous

year. Particularly, our international traffic saw significant growth in markets outside of Russia and Ukraine. We are committed to completing new terminals at Almaty Airport in Kazakhstan in 2024, and investments in Antalya and Ankara by 2025, enhancing capacity and passenger satisfaction. Our investment program totaling approximately 2.5 billion euros underscores our confidence in the aviation sector's growth potential and the regions where we operate.

Travel demand continues to show

robust growth into 2024, with our airports registering a 19% increase and a 22% growth in international traffic in the first four months of the year. Forecasts from tour operators and airlines indicate strong demand continuing through the summer season.

The travel and transportation sectors play a crucial role in Türkiye's service exports. In 2023, travel services generated revenues of \$47.677 billion, up 15%, while transportation exports reached \$34.958 billion. These two sectors account for over 80% of our total service exports. Leveraging our human resources and global operational capabilities, we maintain a competitive edge and actively pursue growth opportunities in our target markets.

Over the past 25 years, Türkiye has established a model for global aviation and particularly airport management. Long-term forecasts from aircraft manufacturers and airlines predict continued aviation growth, with global passenger traffic expected to double to 20 billion by the 2040s, necessitating a \$2.4 trillion investment in airports. At TAV Airports, we are committed to maximizing benefits for all stakeholders while minimizing our operations' environmental impact. We continue to work towards advancing Türkiye's success story in the aviation sector.

**In 2023, we provided services to
96 million passengers at
our airports, achieving a
22% increase compared to the
previous year.**

SIXTH SERVICE EXPORTER OF TÜRKİYE IN 2023

YAPI MERKEZİ İNŞAAT VE SANAYİ A.Ş.

BAŞAR ARIOĞLU

Yapı Merkezi Holding Chairman of the Board

We are waving our flag on three continents

During the Covid era, global challenges also impacted our performance in 2023. We achieved a service export figure of \$740,630,698.74 that year, and aim to increase this in 2024. With over 85% of our revenue exceeding \$1 billion generated from international projects, we proudly represent our flag across three continents.

Operating in every country and region where opportunities arise, particularly in the railway sector, we anticipate new projects amid current economic, political conditions,

and sectoral trends. Our 2024 projections, tailored to these dynamics, highlight expanding our international portfolio and achieving strategic successes in new markets. Our company's accumulated expertise in this field stands as a significant advantage.

In Africa and the Middle East, we anticipate numerous new projects emerging in line with high oil prices. Saudi Arabia, undertaking a major investment drive, holds particular significance for us. We also foresee substantial opportunities for Turkish

contractors in Iraq if security challenges can be resolved. Strategically, we continue to focus on railway construction, maintenance projects, electric vehicle production, and support facilities. Strengthening our position among service export champions, we aim for Yapı Merkezi to rise as a globally recognized entity.

With our world-class expertise in railway systems and 59 years of experience, we guarantee projects are completed on time, within budget, and to specified quality standards. As a competitive player internatio-

nally, we highlight our turnkey contract and construction proposals, along with offering financial solutions. Financing development is crucial, particularly in Africa, to secure projects. Our railway projects in Tanzania spanning approximately 1000 kilometers and Ethiopia's 420-kilometer railway are examples of projects secured through developed financing.

In infrastructure development, we favor projects involving advanced technology and challenging conditions, contributing to global construction sector advancement. Our tunnels in Slovenia showcase Turkish engineering prowess to Europe, progressing as planned without accidents or disruptions. Yapı Merkezi continuously aims to differentiate itself through high technology and engineering strength, enhancing structural integrity and functional capacity through an interdisciplinary approach.

Finally, by prioritizing materials produced in Türkiye for our projects, we aim to boost our country's export revenues. This effort not only supports substantial foreign exchange inflows but also creates added value for Türkiye, benefiting both Turkish employees working abroad and the overall economy.

We aim to increase Türkiye's export revenues by prioritizing domestically produced materials in our projects. **This approach not only boosts foreign earnings through tangible exports but also generates significant foreign currency inflows and adds value to our country. Additionally, the salaries earned by Turkish personnel employed abroad contribute positively to our economy.**

SEVENTH SERVICE EXPORTER OF TÜRKİYE IN 2023

ODEON TURİZM İŞLETMECİLİĞİ A.Ş.

OZAN SOMAKLAR

Odeon Tours DMC Türkiye
General Manager

Coral Travel Group serves annually 3 million tourists

Coral Travel Group continues to grow in the international tourism industry with its reliable brands in tour operation, accommodation, destination services, aviation, travel agency, information technology, and security sectors.

Coral Travel Group, since its establishment in 1992, has been a prominent player in the tourism sector, operating under various brands across multiple countries. The group includes Coral Travel for tour operation and sales agency (Germany, Belarus, Czech Republic, Estonia, Georgia, Switzer-

land, Latvia, Lithuania, Poland, Romania, Russia, Türkiye, Ukraine), FERİEN Touristik (Germany), ODEON Tours for destination services (Türkiye, Egypt, Greece, Spain, UAE, Thailand, Vietnam, Tunisia), Coral Group (OTI) Hotels including Seven Seas Hotels, Marvida Hotels, Xanadu Resort for accommodations, ODEON Software and Technology for information technologies (Türkiye), and Odeon Security and Consulting for security services (Türkiye).

In 2023, Coral Travel Group proudly concluded a successful year, no-

tably achieving recognition as one of Top 1000 Exporters of Türkiye by the Türkiye Exporters Assembly. Amidst record-breaking tourism in Türkiye in 2023, Coral Travel Group successfully brought over 1.6 million tourists from 14 different source markets. Emphasizing diversity in source markets and growth strategies, the group expanded its operations by establishing new companies in the Czech Republic, Romania, and Switzerland.

In a competitive industry, Coral Travel Group prioritizes innovative product and service research and leads

digital transformation initiatives. With substantial investments in technology infrastructure and a workforce of over 350 employees at Odeon Technology Services, the group develops operational programs and continues to work on new products. The launch of their “Odeonbeds” bed bank project at the end of 2023 was a significant milestone in these efforts.

Monitoring global economic conditions closely, Coral Travel Group adapts swiftly to changes in forex rates, macro-economic shifts, and geopolitical risks. In 2023, the group proudly managed a forex position of approximately 650 million Euros through Odeon Tourism Management, aiming to exceed 1 billion Euros in forex exports annually within the next three years.

Aligned with environmentally friendly policies, Coral Travel Group pursues a sustainable business model, annually measuring and reducing its carbon footprint while exploring innovative models for further reductions.

Looking ahead to 2024, Coral Travel Group aims to bring close to 1.9 million tourists from its source markets to Türkiye, confident that continued governmental support and future initiatives will accelerate achieving their targets in the industry.

Odeontours

Congratulations on achieving your goals in 2023, marking record-breaking success in Turkish tourism! As Coral Travel Group, you successfully brought more than 1.6 million tourists from 14 different source markets to our country.

TENTH SERVICE EXPORTER OF TÜRKİYE IN 2023

TURİSTİK HAVA TAŞIMACILIĞI A.Ş.

DR. BATUĞHAN KARAER
Corendon Group Financial Advisor

As of 2023, Corendon Airlines has become an international airline flying to approximately 120 destinations in around 40 countries

Corendon Group operates in multiple sectors within Türkiye's tourism industry, including tour operation, airline operation, hotel contract management, destination management, and hotel management. Since its inception, Corendon Airlines has been a pioneer in the aviation sector under the slogan "Make a Difference." Notably, it became the first Turkish company to land passenger aircraft at Amsterdam to Sabiha Gökçen on April 12, 2005, and at Gazipaşa Airport on April 4, 2012.

Corendon Airlines expanded its operations with subsidiaries such as Corendon Dutch Airlines, registered in the Netherlands in 2011, and Corendon Airlines Europe established in 2017. By 2023, Corendon Airlines had grown into an international airline flying to approximately 120 destinations in about 40 countries.

The group includes Corendon Travel operating in the Netherlands, Belgium, and Denmark, managing a fleet of 34 aircraft under three different flags. Additionally, it operates Corendon Touristic as its destination

management company and owns Corendon Hotels, a chain of eight hotels. With these achievements, Corendon Group has established a strong brand presence in Europe.

Despite challenges such as the pandemic, the Russia-Ukraine conflict, and fuel price increases, Corendon Group achieved a sales volume of around 1 billion euros in 2023, ending the year profitably across all operations. The increase in demand for Türkiye, coupled with stable fuel prices and strategic measures, contributed to this success. Corendon Airli-

nes ranked third among airlines bringing the most passengers to Antalya Airport between 2019-2022, according to Antalya Airport's data.

In 2023, Corendon Group:

- Brought over 400,000 tourists from the Netherlands, Belgium, and Denmark through package tours.
- Transported over 4 million passengers.
- Provided employment to 3,700 people.
- Contributed over 25 million euros in taxes and social security payments, adding value to Türkiye and its economy.

For the 2023-2024 winter season, Corendon Airlines leased 8 aircraft in India, generating a revenue of \$45 million. The summer of 2023 was highly successful for Corendon Airlines in European source markets, particularly German-speaking countries, with expectations of similar demand for the summer of 2024. Direct flights from over 20 destinations in Germany to Türkiye and additional flights from Austria's Vienna, Graz, Salzburg, and Linz to Antalya and İzmir were planned.

In 2024, Corendon Group added the Alanya region to its destinations, positioning an aircraft at Gazipaşa Airport. The group aims to bring 38% of the total external passenger traffic to Gazipaşa by the end of the year. Additionally, 27 flights per week are scheduled from London, Manchester, Birmingham, Newcastle, Bristol, and Glasgow airports in the UK to Antalya and Dalaman airports, continuing the three-year-long operations.

Corendon Airlines is focusing on flight operations to Eastern European markets such as Poland and Romania in 2024 and beyond, considering them crucial for increasing tourism revenue for Türkiye. Increasing mutual flight frequencies between countries and allocating a share of these frequencies to the private sector are deemed important steps.

Maintaining a surplus of income over expenditures is crucial to overcoming economic challenges. Protecting exporters and the tourism sector from currency pressures and cost increases is vital for stabilizing and strengthening Türkiye's economy, particularly in combating inflation.

Since its inception with the slogan **“Make a Difference,”** Corendon Airlines has pioneered numerous exemplary practices and firsts in the aviation industry. **On April 12, 2005, it became the first Turkish company to land passenger aircraft at Sabiha Gökçen Airport in Istanbul from Amsterdam. Additionally, on April 4, 2012, it achieved another milestone by operating the first flights from Amsterdam to Gazipaşa Airport.**

APPAREL SECTOR **LEADER**

LC WAIKIKI MAĞAZACILIK HİZM. TİC. A.Ş.

VAHAP KÜÇÜK
Chairman of the Board

We Meet Our Customers in 82 Countries Across 5 Continents

When considering the challenges faced in 2023, which we could describe as a century's catastrophe, including a major earthquake that deeply affected 11 provinces with significant loss of lives, injuries, and economic losses, our country's presidential election process, the ongoing Russia-Ukraine war, the persistent effects of the pandemic, and unfortunately, the Israel-Palestine conflict in the Middle East, we can say

that 2023 was a challenging year for both our geography and neighboring countries.

In 2023, LC Waikiki achieved approximately 10% growth in dollar terms, focusing our investments in Africa and Latin America, regions targeted in our growth strategy. Today, through our e-commerce operations, we meet our customers in 82 countries across 5 continents. We maintain our position as the market leader in Türkiye for 20 years

and as the market leader in a total of 23 countries globally.

The founding vision of our company is to become one of Europe's top three successful fashion retail brands. In 2024, we will continue to deepen our presence in our existing markets and expand the square footage of our stores where needed, while entering new countries to sustain steady growth. By the end of the year, we aim to surpass the \$5 billion revenue mark with ap-

LC Waikiki

In 2023, LC Waikiki expanded its presence significantly by **opening over 100 new stores in different locations, increasing our store count to 1300 across 59 countries.** We have been the market leader in Türkiye for 20 years and hold the title of market leader in a total of 23 countries globally.

proximately 10% growth in dollar terms. In terms of profitability, we anticipate a growth in the range of 25-30% compared to the previous year and aim to achieve \$1.25 billion in branded exports in 2024.

AQUATIC AND ANIMAL PRODUCTS SECTOR **LEADER**

GÜMÜŞDOĞA SU ÜRÜNLERİ ÜRETİM İHRACAT VE İTHALAT A.Ş.

MUSTAFA HARUN GÜMÜŞEL
Vice Chairman of the Board

Our company; In 2023, rose to a leading position in the industry

Gümüşdoğa Fisheries Production, Export, and Import Inc. was founded in 1995 in Milas district of Muğla province by businessman Halil Gümüşel and continues its activities as a family business. Starting with the production of fish feed to meet the needs of growing aquaculture facilities in the region, our company has ventured into fish farming over time and quickly become one of Türkiye's leading producers and exporters of fishery products.

With extensive knowledge and ex-

perience gained over the years in the sector, our company has established fish farming facilities across various regions of Türkiye. With our expert team, we have started to cultivate sea bass, sea bream, trout, Turkish salmon, and grouper in these facilities. We process the fish products we produce in our facilities and supply them to Turkish consumers as well as exporting them to more than 50 countries worldwide.

Employing over three thousand specialized and experienced employees, our company makes a signifi-

cant contribution to employment. According to the 2022 data, we rank 94th among Türkiye's largest industrial enterprises. Our company is a leader in trout production in Türkiye and also holds top positions in sea bass and sea bream production both in Türkiye and Europe.

In 2023, by increasing our foreign currency earnings through exports, we have risen to a leading position in the sector. Despite some challenges in the sector due to the unfavorable situation between Ukraine and Russia, our company continues its suc-

successful path with a stable production and marketing strategy. Our sector is crucial for our country, primarily for supplying protein sources to Europe and other countries and for generating significant foreign currency inflows. Therefore, it is essential for both government policies and other stakeholders to proceed with great care while continuing to develop with respect for people and nature.

Our company also conducts significant efforts in sustainability. For instance, we are establishing a solar energy production plant in Ankara aimed at meeting our own energy consumption needs. We are also converting all our vehicles to electric vehicles to reduce carbon emissions. We hope that our environmentally conscious initiatives will serve as an example to all producers and exporters.

In 2024, we will continue to increase our exports and foreign currency revenues steadily. We will also innovate in R&D and technology to develop new products. As a company, our fundamental principle in production is to prioritize quality, environmental responsibility, and sustainability. We will continue to make every effort to leave a more livable world for future generations.

With more than three thousand expert and experienced employees in its field, our company contributes significantly to employment. According to 2022 data, we rank 94th among Türkiye's largest industrial establishments.

CARPET SECTOR **LEADER**

ERDEMOĞLU DIŞ TİC. A.Ş.

DR. MEHMET ŞEKER
Erdemoğlu Holding Board Member

We Aim for Approximately 20% Real Growth in 2024

Erdemoğlu Holding is a leading entity in Türkiye's carpet and chemical sectors. Despite geopolitical, social, and economic challenges in 2023, our group achieved significant success in export performance. This success is underpinned by strong sales and marketing strategies, strategic geographical positioning, flexible production structure, customer-focused solutions, and sustainable production experience.

The year 2023 has been difficult for everyone due to the earthquake disaster we experienced and global

economic fluctuations. The increase in global inflation prompted central banks to raise interest rates, which in turn triggered a global recession. This situation created tight competitive conditions for textile-producing countries, especially Türkiye. Despite the challenging conditions, our holding achieved exports of over 800 million USD in 2023, supplying products to more than 50 countries and undersigning outstanding financial results.

The chemical industry has consistently provided inputs to major

players in the global manufacturing sector. We can say that the industry has high potential for exports. In the chemical industry, we, as the holding, have a leading position in regions other than China and India. Extended shipping times from the Far East to Türkiye and Europe, increasing freight costs, and fluctuations in energy costs have increased the demand for our country from the producers in our nearby region. Gaziantep - Türkiye plays a significant part in the piece carpet sector. The presence of major carpet manufacturers in the

same area, qualified workforce, and the production of environmentally friendly products with high added-value have supported the Gaziantep region in dominating the market. Our group is the world leader in the piece carpet sector. We aim to maintain our competitive position with product diversification and our modernized machinery in the carpet sector. Additionally, we plan to increase our market share in the wall-to-wall carpet (tufting) sector through our investments.

In parallel with the reduction of global economic uncertainties and the increase in demand, especially in nearby markets, our group is focusing on ongoing capacity and modernization investments in the carpet and chemical sectors. These investments, valued at approximately 2,3 billion USD, are expected to be mostly completed in 2024. Projects such as the PTA (Pure Terephthalic Acid) Production Facility, Textile Chips, Beverage Chips, and Pet Chips Production Facility, Fiber Production Facility, and Rooftop Solar Power Plant (GES) will contribute to increasing our exports by providing cost advantages. We aim for approximately 20% real growth in 2024.

One of the holding's largest projects, the Yumurtalık Petrochemical Facility Project, will be one of Türkiye's largest petrochemical plants and is expected to be completed in 12 years with an investment cost of 20 billion USD.

With these investments, Erdemoğlu Holding aims to contribute to Türkiye's economic growth and break export records in 2024.

**ERDEMOĞLU
HOLDİNG**

In parallel with the reduction of global economic uncertainties and the increase in demand, especially in nearby markets, our group is focusing on ongoing capacity and modernization investments in the carpet and chemical sectors.

CEMENT, GLASS, CERAMIC AND SOIL PRODUCTS SECTOR **LEADER**

ŞİŞECAM DIŞ TİC. A.Ş.

DR. SELMA ÖNER

Chairperson of Şişecam Dış Ticaret A.Ş.

We are progressing towards our goal of being one of the top three players in our main fields of activity

As a global player in the glass and chemicals sectors, Şişecam continues its development journey that creates sustainable value. In 2023, our consolidated net sales reached 152 billion TL, while our exports from Türkiye amounted to 31.7 billion TL. The share of international sales, which includes exports from Türkiye and sales from production outside Türkiye, accounted for 60% of our consolidated sales. Throughout 2023, we produced 5.2 million tons of glass, 4.7 million tons of soda ash, and 3.7 million tons of

industrial raw materials.

2023 was a year marked by ongoing macroeconomic fluctuations, geopolitical risks, and persistent high inflation on a global scale. Despite these challenges, we realized most of our investment plans thanks to our solid financial structure, strict financial policies, prudent and rational decisions, and our efficiency-focused production and development journey. We commissioned Şişecam's first float line dedicated to automotive glass in Lüleburgaz and upgraded the technology, efficiency, and capacity of

our furnaces in Georgia, Egypt, and India with cold repair investments.

While progressing towards our goal of being one of the top three players in our main fields of activity, we continue to support the growth of the sectors we serve with investments aligned with our vision of creating sustainable value. We manage the impacts of risks and seasonality while closely monitoring opportunities in existing and potential markets. Our glass packaging production facility investment in Hungary is ongoing. In Mersin, we are expanding

the capacity of the second frosted glass furnace and the energy glass line. Additionally, we are increasing capacity at the Mersin soda ash plant. In the USA, we are investing in natural soda ash and supporting logistical infrastructure with the Stockton Port operation investment. Our new flat glass facility in Tarsus and strategic mineral investments are also progressing. This year, we announced our decision to invest in 20 million square meters of coated glass lines, which will increase the proportion of value-added products in our total production volume and enhance our competitive strength in global markets. With these investments in Türkiye, Italy, and Bulgaria, we will nearly double our coated glass production capacity. Following the new glass packaging line investment in Eskişehir, our Eskişehir facility has become the world's largest integrated glass packaging production site.

The next five years will be an intensive investment period. We will continue to implement these investments while considering the dynamics of the markets in which we operate.

**We successfully completed
a challenging year with
the competencies brought
by the One Şişecam
transformation and our
89 years of experience.
We gained new strengths
and capabilities through our
investment decisions.**

CEREALS, PULSES, OIL SEEDS AND PRODUCTS SECTOR **LEADER**

OBA FOOD GIDA SAN. TİC. A.Ş.

ALPASLAN ÖZGÜÇLÜ
CEO of Oba Makarna

We are Türkiye's Leading Pasta Producer and Exporter

At Oba Makarna, with our successful IPO in 2023, we have solidified the foundations for sustainable growth. We take pride in being a global brand with Türkiye's largest pasta production facility and aim to continually delight all stakeholders and investors who grow with us.

Founded in 1966 in Gaziantep, as a rooted brand, we are Türkiye's leading pasta producer and exporter with approximately 2,000 tons/day pasta production capacity. Operating in Gaziantep and Sakarya, we manu-

facture with state-of-the-art technology and high capacity, meeting global standards. With our 40 varieties of pasta products, we are present on tables in over 100 countries.

Our flagship includes production across four main product groups: pasta, flour, semolina, and noodles. While selling products domestically under the Oba Makarna and Obamie Noodle brands, internationally, we continue sales under Oba Makarna, along with brands such as Oba Gold, Obalino, Nido, Eva, Omelia, Pasta Layla, Pasta Savana, Vera, and Rosa

Linda.

According to the reports of the Türkiye Exporters Assembly as Oba Makarna, we have held the export championship in the pasta sector more than 10 years. In 2022, we ranked 118th in Türkiye's Top 500 Industrial Enterprises (ISO 500) and 117th in the Fortune 500 Türkiye list. As a leading firm in the sector, our strategically positioned Gaziantep and Hendek factories provide us with a significant advantage in both the domestic and export markets. Our Gaziantep factory has a daily

capacity of 1,155 tons of wheat crushing and an annual production capacity of 332,000 tons of pasta. With investments made in our Hendek facility, acquired in 2017, we reached a production capacity of 253,000 tons of pasta annually. Our latest investment aimed at export markets is expected to contribute approximately 25% to our annual pasta sales volume. Starting investments in the noodle sector in 2019, we achieved an annual production capacity of 985 million portions of noodles at the Hendek Factory, making it one of the highest noodle production capacities in Türkiye and Europe.

The global pasta market is approximately \$66 billion in size, with Türkiye ranking third in production and second in exports, playing a critical role. As Oba Makarna, exporting to over 100 countries across six continents, we produce 25% of Türkiye's pasta production and capture about 30% of Türkiye's pasta exports. With the efforts of our 1,200-plus employees and our investments, we successfully completed 2023 with increased production volume, exports, and sales revenues. We achieved a 12% growth in revenue, thanks to increased wheat exports alongside balanced customer distribution in pasta, flour, and noodle sales. With accurate pricing and strategic cost management, we significantly improved our EBITDA margin and transitioned to net profit through increased operational profitability.

At Oba Makarna, sustainability is always at the forefront of our operations. Adhering to responsible energy legislation, standards, and other requirements, we prioritize efficient use of energy and natural resources in all production processes. We evaluate alternative energy sources that minimize adverse impacts by monitoring technological advancements. As a company committed to leadership in the sector, we implement energy recovery systems such as solar energy systems (GES), energy recovery from compressors, trigeneration, economizers for chimneys, LED lighting, valve and pipe insulation in our facilities.

Continuing to analyze market needs and closely monitor consumer expectations with changing consumption habits, we persist in R&D and improvement efforts. We swiftly develop and implement necessary formulas for flavors to offer in different markets. To further strengthen our R&D capabilities, we are establishing an R&D Center

at our Hendek facility.

As a publicly traded company, we will continue to maintain our leadership in Türkiye while increasing our current market share internationally. We will evaluate investment opportunities and sustainably grow with the strength and experience provided by our deep-rooted history.

We capture about 30% of
Türkiye's pasta exports.
**Thanks to the efforts of
our 1,200-plus employees
and our investments, we
successfully completed
2023 with increased production
volume, exports, and sales
revenues.**

DRIED FRUITS SECTOR **LEADER**

ÖZGÜR TARIM ÜRÜNLERİ İNŞAAT SANAYİ VE TİCARET A.Ş.

ŞEMSETTİN ÖZGÜR
Özgür Tarım Ürünleri Board Member

In 2019, we were proud to be the Export Champion of the Dried Fruit Sector

As the Özgür Tarım Family, we concluded 2023 with health, success, and beauty. Our motivation for quality products and qualified services, which has guided our activities since 1994, was crowned once again with the export championship in the dried fruit sector in 2023. In our production journey, where we increase our capacity each year, we closed 2023 with an export volume of 52,000 tons.

WE DIDN'T STOP AT RAISINS AND ADDED NEW PRODUCTS TO OUR PORTFOLIO.

With the investment decision we made in 2022, we included new dried fruit products in our agenda. Our company has focused on sliced dried apricots, sliced dried figs, and sliced dates in addition to raisins, primarily targeting international markets. International competition is extremely important for the

development of our company. Thoroughly understanding and meeting our customers' demands by providing the right product and service promptly and with high quality are the main reasons behind our consecutive export championships.

TÜRKİYE IS THE WORLD'S LARGEST PRODUCER AND EXPORTER OF SEEDLESS DRIED GRAPES.

The products cultivated with

care and effort by farmers in Manisa, Izmir, and Denizli are exported to five continents, generating an annual income of over 500 million dollars for our country. Türkiye's geographical proximity to Europe, the primary market for Turkish dried fruits, along with established historical ties, a century-long market presence in various regions, a variety of transportation alternatives, production capability, and capacity, puts Türkiye a step ahead of other producer origins. Moreover, figs and apricots are exclusively produced in Türkiye.

WE TRACK THE ENTIRE PRODUCTION PROCESS FROM FIELD TO TABLE TO ENSURE HIGH-QUALITY PRODUCTS.

We are currently running a project where we produce and export grapes with a limited amount of pesticides, providing agricultural pesticide support to our 750 agricultural producers. This project, conducted under the name IPM (Integrity Pesticide Management), plays a significant role in obtaining products that meet the expectations of the international market through controlled farming practices.

We anticipate that 2023 will be even better than the year we just finished. Despite the pandemic affecting the world negatively, as the agriculture sector, we have continued to produce without interruption, meeting humanity's food needs.

We believe that with our new facility, this will be a stronger year for us.

International competition is extremely important for the development of our company. **Thoroughly understanding and meeting our customers' demands by providing the right product and service promptly and with high quality** are the main reasons behind our consecutive export championships.

FRESH FRUIT AND VEGETABLES SECTOR **LEADER**

UÇAK KARDEŞLER GIDA A.Ş.

HAYRETTİN UÇAK

**Chairman of the Board Uçak Kardeşler
Food Inc.**

With a commitment to being a qualified, original, robust, and reliable brand, we have added our seventh consecutive industry leadership accolade to our six-year streak. For us, achieving the same success uninterrupted for seven years beyond just securing the top position was extremely important and gratifying.

In this significant achievement, I first and foremost thank my family, all colleagues who have worked with dedication in our gardens, facilities, offices, and logistics fleet, as well as our suppliers and valued producers. I extend my

Sustainability and Investments Have Led to Success

gratitude to them.

Since the inception of our commercial activities to date, I would like to emphasize that our adherence to the principles of “Being a Reliable Brand,” “Unconditional Customer Satisfaction,” and “Sustainability” has been integral to our achievements. It was crucial that we maintained our excitement, did not give up, and did not compromise on our principles. Without these, achieving these successes would have been impossible.

The path to meeting customers’ needs and expectations involves keeping pace with and capturing rapidly

evolving technology, changing economies, and customer habits, and subsequently making them sustainable. Through our investments, we have consistently prioritized and valued this development and change, which has enabled us to keep our company at the pinnacle for seven years.

As the Uçak Kardeşler group of companies, our foremost principle is:

**WE SHOULD BE PRESENT
WHEREVER FRESH FRUITS
AND VEGETABLES ARE
PRODUCED IN OUR COUNTRY**

Our group companies have been and continue to be present wherever world-class or aspiring fruits and vegetables, grown in Türkiye's fertile lands, are cultivated. When it comes to exports, reaching not only good products but also residue-free and high-appeal products through packaging and logistics to provide healthy service is indispensable for us.

Our second principle: "To produce healthy, reliable, and economical products that meet the needs and expectations of our customers, either by producing or collecting and processing from our producers, and swiftly delivering them to customers."

Our third principle: "Increasing exports, providing foreign exchange to our country's economy, as the leader in the industry, is our primary duty and responsibility." With this responsibility, we need to constantly develop ourselves, innovate, and be in harmony with advancing technology.

It is an undeniable reality that if we do not adhere to these principles and ensure sustainability through our investments, we will inevitably lose ground in the global market.

Writing annually on the podium of the top 1000 in exports is extremely honorable. However, we view this podium not as a place for company promotion, but as a place where we explain the reasons for our success and outline the keys to our achievements. If we have been able to convey the keys to success to the readers of this booklet, we believe we have fulfilled our mission and we thank all our readers.

We will continue to work tirelessly to further increase our exports in the new century of our country. As a leading firm in our sector, our greatest expectation and hope is for companies in our sector to compete not only domestically but also with other countries in the global market.

Furthermore, we wish for all components of our sector to be sensitive to reducing climate change and carbon footprints, especially through investments in renewable energy and the establishment of a permanent presence in the global market with high-quality and residue-free products. We believe in our sector and hope that the first year of our country's new century will be auspicious for every company, business partners, and all employees in our sector.

In the new century of our country, we will continue to work tirelessly to further increase our exports. As a leading firm in our sector, our greatest expectation and hope is for companies in our industry to compete not only among themselves within the country but also with firms from other countries in the global market.

FRUIT AND VEGETABLE PRODUCTS SECTOR **LEADER**

GÖKNUR GIDA MADDELERİ ENERJİ İMALAT İTH .İHR. TİC. VE SAN. A.Ş.

OSMAN ASLANALI
CEO

Fruits of Fertile Anatolian Continues to be the Choice of Global Markets

Our country is the world's 4th largest producer of both fruits and vegetables. Supported by this high production power of our country, Göknur operates in all stages of the value chain of the fruit processing industry. It is one of the largest fruit growers in our country with 10,000 decares of mostly organic gardens. In our facilities in 4 different regions of our country, we produce more than 90 value-added products such as fruit and vegetable concentrate, fruit juice, puree, frozen fruit, fruit seeds, fruit flavors by processing the

fruits and vegetables we produce in our own gardens or purchased from other farmers.

Göknur is one of the largest producers of fruit and vegetable processing in Türkiye with 850 employees, excluding seasonal and temporary workers, and a daily processing capacity of 7,200 tons of fruit and filling capacity of more than 1 million liters of fruit juice. In its factory located in Mersin Free Zone, the company adds value to products from many countries around the world and re-exports them.

We export more than 80% of our

production to 85 countries. We serve more than 470 customers, many of them leading international food and beverage manufacturers and chain stores. Our largest market is the USA, where competition is fierce. Our in-house R&D center develops products that will increase our competitiveness in these important markets and respond to rapidly changing global consumer preferences. Our high quality standards help us to increase our share in these markets. Our company continues to grow by facing challenges such as frequently changing inter-

national regulations, protectionist tendencies, cost increases in logistics systems, and trade routes closed due to wars.

We commissioned our facilities that generate electricity by producing biogas from fruit waste. We continue to install solar energy systems on our roofs to reduce our carbon footprint.

Our company was listed on the stock exchange in 2023. More than 1 million investors showed a record demand for our public offering. With this strength we received from our people, we increased our efforts to become a global company.

Turkish fruit juice exports are developing very rapidly. While world trade remains almost flat, Türkiye's fruit juice exports have more than tripled, from \$183 million in 2016 to \$575 million in 2023. Türkiye's fruit juice exports will increase by 3.4% in 2023 compared to the previous year and by 21% compared to two years ago.

Consumption of fruit juice, a healthy beverage, is increasing more than the population growth rate in world markets. Due to its impact on health and the environment, 2021 has been declared the year of fruits and vegetables by the United Nations. Many research reports estimate the medium-term growth of our sector at 6-7%. In the medium term, we expect fruit juice consumption to increase further as the incomes of developing countries increase. In line with this expectation, we have accelerated the opening of distribution centers in all major markets around the world to provide on-site service to our customers. We expect these centers to support us in increasing our share in global markets.

World fruit and vegetable agricultural production has increased at twice the rate of population growth in the last 20 years. Although the growth rate has decreased in our country in recent years, fruit production continues to increase. In 2023, production has reached 25 million tons. We believe that fruit and vegetable agriculture has a strategic importance for our country and has a much higher potential. The fruit and vegetable sector allows us to produce an exportable product by using almost all domestic resources. In addition, a much higher added value can be produced per unit area compared to other crops. We know that the geography and soils of our country are suitable for fruit agriculture. We think that if we increase our production capacity as a country in this field, we can significantly increase our country's foreign exchange income.

göknur

Our high quality standards help us to increase our share in these markets. Our company continues to grow by facing challenges such as frequently changing international regulations, protectionist tendencies, cost increases in logistics systems, and trade routes closed due to wars.

HAYAT KİMYA SANAYİ A.Ş.

ENES ÇİZMEÇİ

Vice President, Eurasia & America
Operations

Our journey to become a global player continues at full speed

At Hayat, believing in everyone's right to access quality and reliable products, we introduce our 16 strong brands such as Molfix, Molped, Bingo, Papia, Familia, and Evony to billions of consumers across 5 continents. As a global player in the fast-moving consumer goods sector, we operate in over 100 countries. While entering at least 1 Hayat brand into 9 out of every 10 households in Türkiye, we maintain a market penetration of 60-90% in other geographies where we operate. With the courage derived from

this success, we continue our investments abroad without slowing down.

We have 26 production facilities in 8 countries including Türkiye, Russia, Algeria, Iran, Egypt, Nigeria, Pakistan, and Vietnam; and sales distribution companies in Morocco, Bulgaria, Kenya, Malaysia, and Thailand. Our company is the largest tissue manufacturer in the Middle East, Eastern Europe and Africa, and ranks 4th in the "World's Largest Baby Diaper Manufacturers" league.

With our export volume growing

day by day in the Middle East, Africa, Central Asia, and Eastern Europe, we proudly stand among Türkiye's largest exporters; we are proud of bringing together our 16 brands born on these lands with consumers in different geographies.

As a Turkish company that originated in Türkiye and globalized, we lead the industry with our production capacity, advanced technology, and innovative products. Beyond performing our job excellently, we are also aware of our responsibility to add value to the world and huma-

nity. Aligned with our sustainability vision based on the theme “We Treat Life Well” we operate with long-term, permanent, and sustainable goals. With this approach, we have implemented many exemplary practices in our production processes to date, and we continue to work on new ones. We are able to meet all our energy needs in our facilities ourselves. In the production of hygiene papers, we consume 4 times less water than industry norms. We use underground water sources 50% less and reduce wastewater volume day by day. At Hayat, we are aware of the importance of “Treating Life Well.” We consider sustainability not only as a business model but also as a conscientious and ethical responsibility.

As a global player in fast-moving consumer goods, we will continue to work to make Turkish brands beloved worldwide with our brands that touch every segment from 7 to 77 years old, and to spread the perception of quality and reliable Turkish products globally. In line with our vision to provide benefit for generations to come, we will continue to contribute to the Turkish economy with our investments, employment opportunities, and export performance without slowing down.

With our export volume growing day by day in the Middle East, Africa, Central Asia, and Eastern Europe, we proudly stand among Türkiye’s largest exporters; we are proud of bringing together our 16 brands born on these lands with consumers in different geographies.

HAZELNUT AND PRODUCTS SECTOR **LEADER**

FERRERO FINDIK İTHALAT İHRACAT VE TİCARET A.Ş.

BAMSI AKIN

General Manager of Ferrero Hazelnut

Ferrero Hazelnut: Creating Value for the Turkish Hazelnut Sector

At Ferrero, we are committed to fostering a more sustainable hazelnut sector. As one of Ferrero's key supplier countries, we contribute to the continuous improvement and enhancement of the hazelnut value chain in Türkiye. We collaborate with NGOs, hazelnut producers, and other relevant stakeholders to jointly advance the sector's development. Since 2012, we have been implementing our Ferrero Farming Values (FFV) sustainability program with the goal of creating "a hazelnut sector that creates value

for everyone."

In 2020, we announced our concrete and strong commitments to the hazelnut sector through the Ferrero Hazelnut Charter. Under three main pillars—'Human Rights and Social Practices', 'Environmental Protection and Sustainability', and 'Supplier Transparency'—we outlined our commitments and roadmap. These commitments continue to be implemented under our Ferrero Farming Values program. Our FFV field experts provide training, on-field consultancy, and ongoing knowledge

support in good agricultural and social practices to hazelnut producers in the Black Sea Region. Through the program, we have contributed to producing on 100,000 hectares with good agricultural and social practices and reached 50,000 hazelnut producers.

We also continue to make significant investments in the modernization of the hazelnut value chain in Türkiye. In addition to our ongoing modernization investments since 2014, we have enhanced our sector by rebuilding our Düzce factory with

FERRERO FINDIK

Ferrero's valuable agriculture field experts provide training, **on-field consultancy, and continuous information support to hazelnut producers in the Black Sea region within the framework of good agricultural and social practices.** As part of the program, we have contributed to production under good agricultural and social practices on 100,000 hectares to date and reached 50,000 hazelnut producers.

innovative seismic isolation and damping technologies, located in a primary earthquake zone.

Since 2016, we are proud to have been named 'Sector Leader in Hazelnut and Products' in the annual 'Top 1000 Exporters of Türkiye' list announced by the Türkiye Exporters Assembly (TİM). With over a thousand employees and our suppliers, we aim to continue creating long-term value as a strategic partner and significant employer in the Turkish hazelnut sector.

HVAC-R SECTOR **LEADER**

BOSCH TERMOTEKNİK ISITMA VE KLİMA SAN. VE TİC. A.Ş.

KIVANÇ ARMAN

**Bosch Home Comfort Group Sales General Manager
for Türkiye, Middle East, Caucasus, and Central Asia**

By 2023, we have become Europe's largest VRF market

As Bosch Home Comfort Group, we are one of the leading producers in the climate control industry both in Türkiye and worldwide. In 2023, we continued to produce high-tech, efficient, and long-lasting boilers for the Turkish and global markets. Moreover, we have been pioneers in developing green technologies for the community, environment, and life in the climate control sector for a long time. In 2023, we announced our transformation from Termoteknoloji to Bosch Home Comfort Group. This

emphasized our commitment to positively contributing to the future of our planet by continuing to develop our product range in line with consumer needs and current conditions.

On the other hand, exports continued to be one of our significant revenue streams. We introduced our products to consumers in 41 countries across Europe, the Caucasus, the Middle East, the Gulf Region, Latin America, and the Far East. The most crucial factor in our export success is our R&D strength. Our main goal is to offer products that support con-

sumer comfort, make life easier, and make a difference with our motto "Technology for life." Bosch Group's total research and development expenditures in 2023 reached a high level of 7.3 billion Euros.

The Turkish climate control industry continues to grow steadily. We are one of Europe's largest split air conditioning markets. According to ISKID data, the production volume in this product group reached 2 million units last year, with a 4.5% increase. The VRF market is also growing rapidly in Türkiye. By 2023, we

have become Europe's largest VRF market. Export figures in this category have also doubled.

In the heat pump group, which is becoming increasingly important in Europe, awareness has started to grow in Türkiye as well. There has been a significant increase in this group over the past five years. According to ISKID data, domestic sales increased by 265%. In addition to rising energy costs, consumer demand for comfort is also increasing interest in heat pump systems. This category saw a growth of over 45% last year. The preference for heat pumps in 15,000 new homes last year indicates that the market is growing.

In addition to developments in the domestic market, our climate control industry is also strengthening its position abroad. As a sector, we closed 2023 with a 7.3% increase compared to the previous year, achieving an export volume of 7.2 billion dollars. The sector's exports reached an all-time high, with the ratio of exports covering imports standing at 89%. The unit price per kilogram in the sector increased from 5.3 dollars in 2022 to 6 dollars in 2023.

The ultimate goal of our climate control sector is to raise the export-to-import coverage ratio from 93% to over 100%, becoming a sector that generates a current account surplus. As companies operating in this sector, we are striving to achieve this goal. We have significant advantages in this regard. First and foremost, the long-standing production by major international manufacturers like Bosch in Türkiye has brought quality and market growth to the sector. With substantial technology and knowledge transfer, Türkiye has increasingly become Europe's production center. In addition to long-standing experience and technology, our sector has started producing technology with the knowledge and effort of Turkish engineers. Significant allocation of resources to R&D and the adoption of modern production technologies are among the main reasons for the increase in exports. While initially only nearby countries were targeted for exports, today we can send products to every region of the world.

The changing living standards in our country and the increasing importance of energy efficiency are significant factors in the growth of the climate control sector. The market is expanding for products that can provide climate control using the least amount of energy possible. As Bosch Home Comfort Group, we will continue to expand

our product range with innovative products in 2024 to meet this demand, primarily focusing on boilers, air conditioners, heat pumps, and floor-standing boilers. Our focus here is on heat pumps. This market is growing rapidly in Europe, and although not as quickly in our country, we foresee growth in the coming years. As Bosch Home Comfort Group, we serve our consumers in the individual heat pump category with our Buderus and Bosch brands. We will continue our investments in this area.

With our individual and commercial portfolios, we offer a product range that meets the needs of every customer in line with market expectations. With our global investments, technology, product and system solutions, and a strong dealer and service network, we will continue to play an active role in the market and enhance people's living comfort.

BOSCH

Our success in exports is primarily driven by our R&D strength. Our main goal is to offer products that support consumer comfort, make life easier, and make a difference with our motto "Technology for life."

JEWELRY SECTOR **LEADER**

İSTANBUL ALTIN RAFİNERİSİ A.Ş.

AYŞEN EŞEN
Chairman of the Board

As industry leaders, we are doing our best for our country

Since 2020, starting with the pandemic and continuing through years affected by inflation problems that have impacted the whole world, there have always been measures to restrict gold imports as one of the factors alleviating our country's current account deficit. As players in the production and export sectors, we have always prioritized our country, strived to comply with decisions to the maximum, carefully explained any shortcomings, and continued our path with constructive corrections. The year 2023,

with numerous restrictive decisions particularly including quota applications, posed significant challenges for exporters and producers. Therefore, in 2023, despite great difficulties, we worked tirelessly to maintain the markets we achieved. We worked with more effort and less profit margin.

Our country ranks among the top three globally in terms of gold and precious metal production. The jewelry sector, together with the refining industry, plays a significant role in the global market. It is cru-

cial for our country not to lose the hard-earned success and reputation. Therefore, when making decisions, it is important to look at the sector not only through numbers but also from the perspectives of production, industry, employment, exports, and global market shares.

One of the practices that will contribute the most to our country in this regard is undoubtedly bringing gold held under mattresses into the economy. Istanbul Gold Refinery has always been a pioneer in this regard, and through its Gold Banking and

KADSIS Jewelry Gold Valuation System, it has contributed the majority of the gold brought out from under mattresses into the economy. Unfortunately, the inflationary period shifted the priorities of the financial system, and 2023 was a year when this issue unfortunately took a back seat. We hope that 2024 will be a year where necessary steps are taken in this important matter.

As Istanbul Gold Refinery, as a leading manufacturer representing our country successfully around the world with products accepted globally, we will continue to do our best for our country and our industry as architects of every decision and step taken regarding gold and precious metals in our country. Despite all the challenges, we continue our investments both domestically and internationally. We sincerely hope that the success achieved with great difficulties in 2023 will continue. However, under current conditions, it is necessary to review hastily made decisions and take measures to protect producers and exporters; otherwise, achieving these figures for 2024 will be challenging. We hope that 2024 will be a year where correct steps are taken, producers and exporters are supported and encouraged, restrictive factors increasing sector costs are removed, and we do not drift away from our competitive position in the world, ensuring that hard-earned markets are not lost, so that together we can look forward to a brighter future.

**As Istanbul Gold Refinery,
as a leading manufacturer
representing our country
successfully around the world

FLO MAĞAZACILIK VE PAZARLAMA A.Ş.

YENAL GÖKYILDIRIM
FLO Group CEO

Adding Value to Our Country's Exports

For 65 years, we take pride in accompanying generations from all walks of life, making FLO the heart of Türkiye and a global stride today. We are tirelessly working to advance these strides, not only for our company but also to create value for all sectoral stakeholders and our country. Leveraging the high potential of our country, we contribute to enhancing the global competitiveness of our sector, directly employing 15,000 and indirectly impacting over 70,000 individuals. Today, FLO Group stands as one of

the rare brands emerging from Türkiye and successfully waving our flag in the global arena. Our success stems from our integrated retail model, transcending traditional boundaries of retail with our multi-channel, multi-brand 360-degree approach.

Within our structure, we encompass five distinct retail formats: FLO, IN STREET, Sneakerbox, Reebok, Nine West, and Lumberjack. We are experiencing robust growth across 29 countries on three continents with over 800 stores, steadily expanding our global operations. Besi-

des physical stores, we continue to broaden our online sales channels, enhancing both our own e-commerce platforms and partnerships with international marketplaces. Strengthening our e-export activities integrated into global and local marketplaces across regions like Europe, CIS, and MENA, we accelerate our e-export efforts.

Our wholesale channel is another vital platform dedicated to boosting Türkiye's branded exports. Through our network of dealers, we efficiently distribute our products to various

corners of the world, reaching millions of customers in more than 60 countries. By forging strategic partnerships with leading global retail groups, we continuously strive to strengthen our country's exports within our sector.

Apart from our multi-channel structure, what distinguishes us in the global footwear sector is our multi-brand approach. Our own brands such as Lumberjack, Kinetix, and Polaris are among the preferred choices of global customers. For instance, Lumberjack is available in 2,000 points of sale across 40 countries. Holding long-term regional licensing rights for renowned brands is a testament to our credibility on the global stage. We manage the distribution of U.S. Polo in approximately 40 countries, serve as the primary supplier for Nine West in over 40 countries, and hold licensing rights for Lotto in 41 countries. Serving as the licensee and strategic partner for esteemed global brands like Reebok across 12 countries underscores our expertise in the global footwear industry. Recently honored as "Partner of the Year" by Reebok Global, we take great pride in bringing this meaningful award to our country, surpassing strong global competitors.

Product and manufacturing excellence is our cornerstone. With design centers in Türkiye, Italy, and China, we stay abreast of global fashion trends and technological advancements in product development. We design and curate collections for our diverse portfolio of brands, manufacturing them in our state-of-the-art production facility in Şanlıurfa and collaborating with 200 suppliers. As we pursue global ambitions, we continuously invest in local development. Following the establishment of our first footwear factory in Şanlıurfa, we spearhead sectoral clustering models by inviting industry partners, contributing positively to both sectoral growth and enhancing our country's production capacity.

As we expand our sales channels and integrate new global brands into our portfolio, we continue to increase our export volume. Being the top exporter in our sector in 2023 brought immense joy to us all. Moving forward, alongside our online and offline sales channels, we will sustain our border-crossing growth as a respected and reliable strategic partner for global brands. As FLO, Türkiye's global stride, we will accelerate our efforts to represent our country in the best possible light, seize global opportunities for our sector, and expand our country's exports.

This excerpt from Yenal Gökyıldırım, CEO of FLO Group, highlights the company's commitment to enhancing Türkiye's global footprint in the footwear industry through innovation, strategic partnerships, and sustainable growth initiatives.

MACHINERY AND COMPONENTS SECTOR **LEADER**

TÜRK TRAKTÖR VE ZİRAAT MAK. A.Ş.

MATTHIEU SÉJOURNÉ
Company Leader

Maintaining Our Leadership in Export in Our Field

2023 was a year full of challenges and wonderful achievements, where we broke new records in production and exports. Sadly, we were all devastated at the start of the year with the February 6 Kahramanmaraş earthquake, the greatest disaster of our age. From the first moment, we worked with all our strength to heal the wounds of our people and to continue our production activities and the operations of our dealers in the earthquake zone.

In terms of production, exports

and sales, 2023 was a very productive year. We were once again the leader in tractor production, sales and exports. TürkTraktör realized 56% of tractor production and 79% of tractor export volume in Türkiye, and broke a new record with a production volume of 51,423 tractors in 2023. We maintained our leadership for the 17th year in a row in the Turkish tractor market, the fourth largest tractor market of the world. We completed the sale of 35,849 tractors to the domestic market and exported 16,016 units.

In 2023, we continued to expand our penetration and activities in the construction equipment sector, completing the production of the 1000th backhoe loader.

In line with our “Future Impact” strategy, launched with the awareness that the future of agriculture lies in technological and sustainable practices, we continued our commitment to eco-friendly production solutions in all areas of activity. To this end, we introduced our Stage V tractors and equipment, and expanded our construction equipment pro-

duct range. In order to pioneer digital transformation in agriculture and to enable our farmers to enjoy maximum efficiency from agricultural production with the help of technology, we launched our own fleet and tractor tracking system, TürkTraktör Connect, and our smart guidance system, TürkTraktör Guide. With the aim of increasing efficiency and sustainability in agricultural production, we took an important step with our investment in Agrovisio and started to support our farmers in their digital journey. Moreover, we stepped up our efforts to introduce T3 Electric Power, our revolutionary electric tractor prototype in agriculture, and reached the final stage.

In 2023, we also took important steps in sustainability, and continued to invest in the modernization of our production facilities and in the supply of our energy from renewable sources. In line with our goal of meeting all of our electricity needs with our own renewable energy power plants by 2026, we work on solar power plant (SPP) projects to meet the energy needs of our Ankara and Erenler Factories. In 2023, we completed the SPP project for the Erenler Factory. We will reach an important milestone with the solar power plants to be established at the Ankara Factory and in Hayranlı, Sivas.

We will continue to prepare our sector and our country for the future, to build an eco-friendly and sustainable agricultural future, and we will fulfill our responsibility for the environment not only in our products but also in our production processes.

EKOM ECZACIBAŞI DIŞ TİC. A.Ş.

EMRE KAYIŞOĞLU

Esan CEO

Leading the way in Innovation and Sustainability

At Esan, despite the competitive environment in the sector, we successfully concluded the year 2023. Remaining firmly committed to sustainable production and operational efficiency principles, we not only maintained our market share but also expanded our export potential by venturing into new markets. In achieving our success during this period, Esan's deep-rooted history in the sector and expertise in both metallic ores and industrial minerals played a crucial role.

The year 2023 was a period where

cost control and profit optimization gained increasing importance in our sector. However, at Esan, we took strategic steps to address these challenges. By developing projects aimed at cost optimization in our facilities, we enhanced our efficiency and preserved our competitiveness.

The advantages of companies in our sector in terms of exports are based on factors such as the recognition of Turkish feldspar and the country's geopolitical position. At Esan, we continue to maintain our leadership in the global market by leveraging

these advantages to the fullest. Our strong expertise in natural resources and technological infrastructure enhances our export potential and international visibility.

In the past year, at Esan, we not only focused on our own achievements but also endeavored to contribute to the overall development of our sector. By assuming a pioneering role in sustainable mining practices, we aimed to raise industry standards and steer our sector towards a greener future. Under the framework of responsible mining, we initiated

esan

Esan, established in 1978 by Eczacıbaşı Group in the natural resources sector, **pioneered Türkiye's first clay enrichment facility and has since been renowned in the industry. Over the past year, Esan successfully navigated a competitive environment by adhering strictly to principles of sustainable production** and operational efficiency, maintaining market share, and expanding into new export markets.

the transition process to meet the European Bank for Reconstruction and Development requirements at our Balya lead-zinc operations and the International Finance Corporation standards at our Milas Regional facilities. We were awarded the Bronze Medal in our initial assessment by Ecovadis, one of the world's most trusted sustainability rating agencies.

Looking ahead, at Esan, we aim to further expand our R&D activities to achieve a leading position in innovation. We plan to optimize our production processes by closely monitoring technological advancements and diversifying our product portfolio. Furthermore, we remain committed to taking further steps in sustainability, fulfilling our responsibilities towards society and the environment. With these strategies, we believe Esan will not only enhance its own success but also contribute to the overall development of our sector.

OLIVE AND OLIVE OIL SECTOR **LEADER**

VERDE YAĞ BESİN MADDELERİ SANAYİ VE TİCARET A.Ş.

MURAT TÜRKAL

Verde Oil Chairman of the Board

Our Goal is to be at the Peak of the World Olive Oil Exports and Ensure Sustainable Export

Our country has made significant progress in the olive and olive oil sector over the past 20 years, and especially in the last 5 years, thanks to both increases in production and the accumulation of sectoral knowledge, it has reached a strategic position in world exports. The year 2023 has been a record year for our sector. On the path we embarked on with the mission of being at the peak of the world olive and olive oil exports and ensuring sustainability in exports, we are proud to be the company that has

made the greatest contribution to our country's exports, demonstrating how great transformations can be achieved when you set out with the right values.

Today, with an olive oil production level of 400,000 tons being achievable, we foresee that it can easily reach 600,000 tons in the medium term. Our company's more than 10 production facilities, built, developed, and expanded using the most modern technologies in the last 5 years, have become some of the world's leading facilities in their fields. Behind every

success we achieve and every reform we implement, there is a great deal of effort, patience, diligence, and experience from our ever-expanding team, alongside the investments we have made in our facilities.

We are increasing the recognition of our brand in the international sector every day with our product quality, and with the right investments, we have become one of the few key players in the world olive and olive oil sector. Since the acquisition of Verde, the previously limited packaged olive oil market has expan-

ded manifold each year. At this point, we are proud and excited to see that the recognition and brand value of our country's olive oil have increased in major global market chains with the label 'Product of Türkiye.'

Our investments in olive groves and land continue, and we are simultaneously carrying out a project that will be a symbol of Turkish olive oil. As of 2000, the number of olive trees in our country has reached 200 million thanks to investments made in olives. With the pursuit of the right strategies, our country will be able to reach its production and export potential, and the figures we mention as records will become the norm. Our goal is to ensure sustainability in olives and olive oil with increasing investments and our growing number of olive trees.

We extend our endless thanks to our farmers and workers, producers, valuable team, solution partners, sector stakeholders, and everyone who has contributed to these achievements.

At this point, we are increasing the **recognition and brand value of our country's olive oil in major global market chains with the label 'Product of Türkiye.**

ORNAMENTAL PLANTS AND PRODUCTS SECTOR **LEADER**

QUEEN TARIM SANAYİ VE TİCARET A.Ş.

CEVDET ANIL BİÇER

**Deputy General Manager Responsible for
Commercial Relations Queen Türkiye**

Queen Türkiye had an impressive success story in 2023. The company gained momentum in exports, and one of the most important factors behind this success is continuous investment in research and development (R&D), aiming to offer the highest quality, long-lasting, decorative flowers to flower enthusiasts and customers. Queen Türkiye attaches great importance to R&D activities to consistently enhance product quality and gain a competitive advantage in the international market. Additionally, signifi-

Being the Export Champion in 2023 and Beyond

cant investments have been made in strategic partnerships and marketing activities to establish a more effective presence in global markets.

The floriculture sector is dynamic and offers growth potential. Particularly in recent years, the recognition of our country in the field of flowers and plants has presented new opportunities to companies in the sector. Leading companies like Queen Türkiye combine this growth potential in the sector with export advantages to achieve a stronger position in the international market. Among

the export advantages of companies in the sector, factors such as product variety, compliance with quality standards, logistics infrastructure, and brand awareness play a significant role.

Looking ahead, Queen Türkiye plans various investments in collaboration with its European partner to further enhance its success trajectory and increase exports. Strategic goals include expanding production capacity, enlarging the logistics network, and exploring new markets. Moreover, the company aims

to strengthen environmentally friendly production and supply chain practices through sustainability-focused projects.

Queen Türkiye anticipates 2024 to be a period focused on growth and success. Despite uncertainties stemming from high inflation in international markets and rising costs, our company is determined to expand into new markets and strengthen its presence in existing ones. Furthermore, continuing investments in R&D and innovation efforts aim to expand the product portfolio and offer more competitive products. Queen Türkiye will continue to progress decisively to maintain industry leadership and become a more recognized brand internationally in 2024.

Queen® Türkiye

Queen Türkiye is a leading company in the floriculture sector, drawing attention with its successes in exports. **Despite economic uncertainties, 2023 has been a significant turning point for the company, marked by achievements in export.**

SHIP, YACHT AND SERVICES SECTOR **LEADER**

TERSAN TERSANECİLİK SAN. VE TİC. A.Ş.

OSMAN NURETTİN PAKSU

**Tersan Shipyard
Chairman of the Board of Directors**

Tersan continues to lead the shipbuilding and yacht construction sector in exports this year.

2023 was a year of new investments and successes for Tersan. As the top exporter in the ship and yacht construction sector once again this year, we are delighted to have won this award 10 times in the last 11 years. I extend my sincere congratulations and gratitude to our approximately 5,000 employees and their families, who are the true architects behind this great success.

In 2023, six ships from different segments that we exported began successful operations on the world's seas. The third and fourth passenger

ships we built for Norwegian Havila Kystruten, Havila Polaris and Havila Pollux, as the world's largest battery-powered operating on the historic Bergen-Kirkenes route, provide passengers with a unique experience. Our fishing vessels, Gadus and Enniberg, delivered to the Faroe Islands, continue their operations as floating factories with superior fishing, processing, packaging, and freezing capabilities. Apart from the deliveries to Faroe Islands, our factory fishing vessel Atlantic Enterprise has been delivered to Canada and our com-

bined crab-catching and processing vessel Froyanes has been delivered to Norway. All of these deliveries continue to elevate the reputation of Turkish-made quality ships with their superior quality and features.

In 2023, the Turkish shipbuilding industry continued to maintain its strong global position, especially in tailor-made niche ship types. The Turkish shipbuilding sector is an important industry that contributes to development in connection with many related industries, supports te-

chnological advancement, and provides high employment. Turkish shipyards, thanks to their specialized workforce and technological infrastructure, continued to contribute to the sector's achievements in 2023 by adding new ones, and we are proud of this success with all our stakeholders and colleagues. We can say that the economic uncertainties worldwide and the negative atmosphere associated with these economic uncertainties are starting to dissipate slowly, and with buyers becoming accustomed to new inflationary figures, project requests are able to progress and conclude more quickly.

Underlying all these successes of Turkish Shipyards are actually many different factors. Firstly, the geographical location of our country, which is surrounded by seas on three sides and its proximity to Europe, provides a very good ground for our shipbuilding activities. In addition, our sector, which is blended with talented engineers and experienced workers, is currently ahead of many countries in terms of labor. Another very important characteristic of the Turkish shipbuilding sector is its flexibility. Our most basic feature that distinguishes us from other countries engaged in mass production is our management and production flexibility to implement tailor-made niche projects entirely tailored to the needs of our customers. Of course, we can say that the maritime culture we have had throughout history has played a major role in building high-quality and advanced technology ships.

As Tersan, by the end of 2023, we acquired Havyard Leirvik Shipyard, which is located in Norway and covers an area of approximately 100,000 square meters, and added it to our structure under the name Tersan Havyard. This strategic investment, which will provide financing and production advantages, especially in Norway and throughout the Scandinavian market, has created a positive atmosphere in the market and has increased demand also in the new building project inquiries for our shipyard. In addition to shipbuilding, in September 2023, we put into operation our Tersan Marine facility, which is the largest yacht repair, maintenance, and haulage facility in the Mediterranean basin, covering an area of 250,000 square meters in Muğla Ören. Despite starting late in its first season, Tersan Marine had a very successful season by wintering more than 150 yachts. At present, we are planning to undertake refit and yacht construction projects at Tersan

Marine, where we carry out yacht haulage, maintenance, and repair activities. Besides our new facility investments, our 100% renewable clean energy investments are also continuing steadily.

In 2024, while we secure more projects in the fishing and ferry segments, where we have proven our worth in shipbuilding, we aim to seize new opportunities and projects in the offshore vessels and floating structures segments, where the market share is increasing. With our experience of more than 25 years, we believe that our company values, such as good management, quality shipbuilding, innovation, effective marketing, and sound financial management will play effective roles in achieving our goals for 2024 and beyond.

**With over 25 years of experience,
we believe that our
company values such as
effective management,
high-quality
shipbuilding, innovation,
efficient marketing, and sound
financial management play
effective roles in achieving our
goals for 2024 and beyond.**

STEEL SECTOR **LEADER**

HABAŞ SİNİ VE TIBBİ GAZLAR İSTİHSAL ENDÜSTRİSİ A.Ş.

MEHMET BAŞARAN
Chairman of the Board of HABAŞ

In 2023, we enhanced our competitive strength with new markets and products

HABAŞ, established in 1956, continues its industrial activities today as one of Türkiye's leading groups in sectors including Iron & Steel, LPG, Natural Gas, Heavy Machinery Manufacturing, Energy & Banking, Automotive, and Shipbuilding, starting with the production of industrial and medical gases.

• **INDUSTRIAL AND MEDICAL GASES**

As the leading company in the sector, HABAŞ continuously develops its capacity, sales points, and product range in line with Türkiye's increasing demand for industrial and medical gases. Besides liquid oxygen,

HABAŞ produces and supplies liquid nitrogen, liquid argon, liquid carbon dioxide, liquid helium, acetylene, hydrogen, anesthetic gases, welding gases, food gases, gas mixtures, high-purity and specialty gases across its widespread facilities nationwide.

HABAŞ also diversifies its export by directly and indirectly providing medical oxygen to neighboring countries such as Balkan countries, Greece, Bulgaria, Serbia, and Macedonia.

• **IRON & STEEL**

Iron & Steel is one of the foremost sectors in Türkiye, and HABAŞ is a leader in this

sector. The iron and steel facilities in Aliğa, which started production in 1987, currently have a liquid steel production capacity of 4.7 million tons. With new investments, this capacity will increase to 7.5 million tons by 2024.

Global events in 2022, including the impact of the Ukraine-Russia war on production and supply chains, and the commercial bans on Russia, have directly and indirectly affected the iron and steel sector. Continued unfair protective measures by the EU and the US against Türkiye have further hindered our exports in 2023.

Despite significant cost increases in pro-

duction, we have been compelled to compete with constant and high-tonnage sales from the Far East to Türkiye and our major export markets. Nevertheless, HABAŞ, exporting flat and long steel products to 40 countries across five continents, achieved an export of USD 805 million in 2023. The key to our success lies in HABAŞ's ability to rapidly adapt to market conditions and grasp market realities due to our sector's strong experience.

Additionally,

- HABAŞ diversifies its export markets by developing user sectors it can meet demands for, thereby increasing the number and quality of customers on a continuity basis.

- HABAŞ continues to produce ribbed construction steel, film sheet, hot rolled flat steel, tempered, pickled, oiled flat steel, patterned steel, slit flat steel coils, and steel strap. In 2023, HABAŞ further strengthened its competitive power with new markets and new products.

Upcoming facilities to be put into operation in the coming years;

- Plate rolling mill,
- Cold and Galvanized Production Facilities,
- Tinplate line;

These investments will cover the heavy sheet demand needed in the domestic and international markets, and large-sized coated plates required in the shipbuilding industry, machinery industry, and construction sector.

Considering the first four months of 2024 and possible developments; market over-protection, labor costs, and low exchange rates, and increased import pressures do not expect the year to go well. Under these conditions, achieving 2023 export figures in exports will be a success.

• ENERGY & LPG / LNG-CNG

Among the leading companies in the sector, HABAŞ offers LPG in tubed, bulk, and autogas forms to consumers with filling and storage facilities, sea terminals, a wide transportation fleet, and dealer network.

After the liberalization of the natural gas sector, HABAŞ has obtained the necessary licenses and has developed the supply system for liquefied natural gas (LNG) for the first time for customers in areas where natural gas has not yet reached. HABAŞ is also the first company to develop and introduce a compressed natural gas (CNG) supply chain to meet the needs of customers with lower consumption levels.

HABAŞ aims to exist in every aspect of energy, making significant investments in electricity production and ranking among the leading

companies in our country with 860 MWh.

• INDUSTRIAL

One of HABAŞ's business areas is the manufacturing of industrial facilities. HABAŞ Industrial Plants, which provide turnkey installation of process plants, air separation plants, steel production plants, rolling mills, electricity production plants, gas filling and storage plants, and have a large processing, welding, and shaping machine park, also offer R&D engineering services in this field. HABAŞ, Türkiye's first high-pressure seamless steel tube manufacturer, is also a manufacturer of all types of welded and seamless pressure gas cylinders, single and double-wall storage tanks, gasifiers, waste heat boilers, and similar machinery and equipment.

• BANKING

HABAŞ Group, 100% locally owned, also operates in the banking sector. Anadolubank, a subsidiary of HABAŞ, is one of Türkiye's young, dynamic, and highly potential banks. Acquired from the Privatization Administration in 1997 with only three branches, Anadolubank now serves customers with a total of 116 branches and 1660 employees, maintaining uninterrupted growth. Additionally, Anadolu Leasing, Anadolu Factoring, Anadolu Investment, and Anadolubank N.V., based in the Netherlands, are financial institutions operating within the HABAŞ Group.

HABAŞ Group will continue to contribute to the growth of the national economy by increasing its contribution in the coming years, with its quality workforce and strong capital.

Continuing to lead in many areas
in which it operates, **HABAŞ**
has maintained the
**leadership flag in flat and
long steel exports for the
past 15 years.**

TEXTILE AND RAW MATERIALS SECTOR **LEADER**

AK-PA TEKSTİL İHRACAT PAZARLAMA A.Ş.

PELİN IRGAÇ

AK-PA Textile General Manager

We Provide Strategic Contributions to Exports for Our Country and Yalova

Akkök Holding's international marketing and export activities necessitated the establishment of a specialized company within the holding, leading to the foundation of Ak-Pa in 1976. Today, Ak-Pa exports to 100 countries across 6 continents. Initially focusing on textile products, Ak-Pa's commercial activities have since expanded to include the foreign trade of all group companies, including chemical products.

In 2023, Ak-Pa facilitated the group's export operations, achieving FOB exports worth \$551 million and maintaining its position among Türkiye's leading exporting companies. Our company's greatest advantage in the export sector is its integrated service with group manufacturing companies, successfully reflecting the strength of the holding. Our group manufacturing companies

include Aksa Akrilik Kimya, Akkim Kimya, DowAksa, and Akcoat A.Ş.

Aksa Akrilik Kimya Sanayii A.Ş., a subsidiary of Akkök Holding, was established in 1971 in Yalova to meet Türkiye's acrylic fiber needs, starting production with a capacity of 5,000 tons per year. Since then, it has continuously grown and developed its own technology, becoming the world's largest acrylic fiber producer.

Aksa, which has nearly 1,400 employees, is established on an area of 600,000 square meters. With a capacity of 355,000 tons per year, it is the largest single-site acrylic fiber producer in the world and the only one in Türkiye. Throughout the year, our company focused on active marketing activities in the domestic market, achieving a capacity utilization rate of 90% in 2023 and maintaining a global market share of 25%.

Aksa Acrylic produces approximately 950,000 kilos daily, enough to clothe over 2 million people in knitwear. The company, which has a 145 MW energy production license, meets the electricity and steam needs of itself and other group companies in Yalova.

Aksa exports to nearly 400 customers in more than 50 countries across five continents. In 2023, 57% of its sales were made to the domestic market and 43% to the international market.

Akkim Kimya, operating under Akkök Holding, one of Türkiye's established industrial enterprises, began its journey 47 years ago in Yalova with an annual production of 1,000 tons of sulfur dioxide. Today, with an annual production capacity of 800,000 tons across five different locations, primarily in Yalova, it is a leading chemical producer. Due

to its wide product range, Akkim holds a competitive position among the few producers in both Türkiye and Europe. It is a market leader in many products, including carboxymethyl cellulose (CMC), sodium percarbonate, sodium metabisulfite, chlor-alkali, methylamines, and persulfates.

Akkim has a workforce of 1,350 employees, including its subsidiaries. By exporting to more than 70 countries, we strategically contribute to exports for our country and Yalova. We provide chemicals to various sectors such as cleaning, hygiene, water treatment, chemicals, textiles, paper, construction, plastics, food, metals, energy, detergents, drilling, and mining.

In its 45th year, Akkim laid the foundation for a strategic epoxy production facility in Yalova, aiming to produce 50,000 tons of liquid and solid epoxy resins and formulated derivatives annually on a 30,000 square meter area. This facility is expected to be operational by the last quarter of 2024.

DowAksa, Türkiye's first and only and one of the world's few carbon fiber producers, is a 50/50 joint venture between Dow, a global leader in materials science, and Aksa Acrylic, the world's leader in the acrylic fiber industry. Since its establishment, DowAksa has made rapid growth, providing efficient and competitive solutions that make a difference in the composite industry supply chain. It supplies carbon fiber and carbon fiber-based composite solutions to industrial sectors, particularly the wind energy and defense sectors, enhancing Türkiye's economy with high value-added exports. In 2023, DowAksa exhibited strong financial performance, marked by sustainable growth and innovative strides. In this successful year, the company strengthened its market position by completing the investment of a new production facility on 117,000 square meters in Yalova and commissioning a third carbon fiber production line. This new line increased production capacity by 50%, raising the number of employees to 850.

Operating since 1979 with a focus on R&D and customer satisfaction, Akcoat is an international brand producing in two continents in five main product groups: enamel, ceramic coating and digital printing inks, glass, non-stick-decorative coatings, and pigments. It is a global solution partner for leading manufacturers in various industries, ranging from white goods, small household appliances, construction materials, architectural solutions, and kitchenware to telecommunications, providing advanced chemical coating materials solutions. With production facilities in Türkiye and Spain, offices in the USA and China, and sales representatives and technical services in regions like Europe, South America, Asia, and Africa, it actively serves customers in 65 countries across six continents. Akcoat is the market leader in Türkiye and the world's second-largest enamel coating producer

globally, consistently being among the export leaders in its sector for 16 consecutive years, thus contributing strategically to Türkiye's economy. Akcoat focuses on R&D, digitalization, and innovation, transforming every detail of science into real-world solutions and realizing new investments with this vision.

In 2023, Ak-Pa has proactively shared global and national changes in export processes with group companies, ensuring compliance with regulations and safeguarding against potential risks. Interactive approaches were maintained across all processes to uphold customer satisfaction and prevent operational disruptions amid changes in international trade.

Applying an Integrated Management System, Ak-Pa updated its ISO 9001:2015 and ISO 27001:2017 certifications after interim audits. Adapting to changing regulations, Ak-Pa obtained the Authorized Economic Operator Certificate from the Turkish Ministry of Customs and Trade in 2018, which grants convenience and privileges to reliable companies in customs procedures. Reaching the renewal period in 2023, Ak-Pa completed the necessary applications for certification renewal. Additionally, Ak-Pa underwent an external audit in 2023, preparing its annual activity report, and continued to expedite group companies' export operations by completing customs procedures through the green line, thanks to the rights provided by this certification.

Ak-Pa will continue to contribute to foreign trade with its increasing performance in 2024.

Aksa exports to nearly 400 customers in over 50 countries across five continents. In 2023, 57% of its sales were in the domestic market, while 43% were in the international market.

TOBACCO SECTOR **LEADER**

JTI TÜTÜN ÜRÜNLERİ SANAYİ A.Ş.

WOJCIECH ODZIMEK
Regional Operations Lead

Our goal is to stabilize and sustain export production directed towards our country

In 2023, we exported around 197M USD worth of products to 56 countries on five continents. We increased the number of countries we supply products to by one country and increased our total tobacco exports by 24 percent on a year-on-year basis. Our total exports reached 3.3B USD from our foundation until last year's end.

In 2023, Türkiye's year-on-year total tobacco and tobacco products exports increased by 10.8 percent reaching 932M USD, 256M USD of which was of tobacco leaf and 676M

USD of tobacco products.

Although the price hikes in export code prices in 2019 significantly reduced exports for a while, our industry recovered before long as production shifted to Türkiye due to the ongoing war between Russia and Ukraine. Our increased cigarette production and filter capacity as well as the investments we made in our factory contributed to our breakthrough in recent years.

We aim to render the recent production for export shift to our country continuous and sustainable.

Türkiye continues to be the global leader with its high-quality oriental tobacco products, and we support our farmers by purchasing their products and helping them produce more efficiently through our programs.

Furthermore, the tobacco products industry creates significant value for the country with its well-educated human resources, investments made, taxes paid, and export revenues generated.

JTI Türkiye is 2900 strong including our sales force; thus, we gene-

rate significant employment in the country. We are an important academy for our employees, today, we export talent from our JTI Torbalı factory to all around the world.

We implement programs to enhance the welfare of the communities in which we operate, support women's participation in social and economic life, and continue our efforts to improve the lives of disadvantaged groups. We contribute to our future by meticulously implementing environmental programs in our factory and producing our own energy with investments.

In 2024, we will continue making investments to fulfill our commitments in all fields, from technology to human resources, society to the environment.

We firmly believe that Türkiye will become a center of attraction with its advantages over other markets.

We are confident that Türkiye's advantages will make it a center of attraction among other markets.

**In 2024, we will continue
our investments
by fulfilling our
commitments in every
area, from technology to
our human resources, from
society to the environment.**
